## प्रस्तावना

देश के नई सहस्राब्दि में पदार्पण करने के साथ ही, कृषि मंत्रालय, भारत सरकार ने भारतीय किसानों के लिए एक व्यापक सामाजिक-आर्थिक अध्ययन की योजना बनाई। रूचि के क्षेत्र थे किसानों का शैक्षिक स्तर, रहन-सहन का स्तर, कृषि पद्धतियाँ, उत्पादक परिसम्पत्तियों का स्वामित्व, कृषि के क्षेत्र में जागरूकता के साथ-साथ आधुनिक प्रौद्योगिकी तक पहुँच, संसाधन उपलब्धता, ऋणगस्तता तथा बहुत से अन्य प्रासंगिक मुद्दे। इन अपेक्षाओं को पूरा करने के लिए राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एन.एस.एस.ओ) ने 59वें दौर के एक भाग के रूप में ग्रामीण क्षेत्रों में जनवरी-दिसम्बर, 2003 के दौरान 'कृषक स्थिति का मूल्यांकन सर्वेक्षण' किया जिसमें किसान को एक ऐसे व्यक्ति के रूप में परिभाषित किया गया था जिसके पास कुछ भूमि हो और उस पर कार्य करता हो तथा कृषि संबंधी कार्यकलापों में संलग्न हो। इस सर्वेक्षण में किसानों को ऐसे परिवारों के जरिए शामिल किया गया जिसमें कम से कम एक सदस्य 'किसान' हो।

2. राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय ने जनवरी-दिसम्बर, 2013 के दौरान 70वें दौर में "कृषक परिवारों की स्थिति मूल्यांकन सर्वेक्षण" दोहराया। एनएसएसओ के केंद्रीय प्रतिदर्श के अलावा, अधिकांश राज्य सरकारों ने भी समान माप के राज्य प्रतिदर्श द्वारा इस सर्वेक्षण में भाग लिया। इस सर्वेक्षण में, इस तथ्य को मानते हुए कि कोई भूमि न होने पर भी पर्याप्त कृषि कार्य किए जा सकते हैं, एक किसान की पात्रता के मापदण्ड के रूप में उसके पास भूमि होने की शर्त को समाप्त कर दिया गया, उसके स्थान पर "कृषि उत्पादन इकाई" की अवधारण को रखा गया जो फसलों का उत्पादन, पशुधन पालन अथवा अन्य विशिष्ट कृषिजन्य कार्यकलापों से उत्पादन का कुछ मूल्य प्राप्त करता हो। इस सर्वेक्षण का उद्देश्य भारत सरकार की नीतियों और कार्यक्रमों के संदर्भ में देश के ग्रामीण क्षेत्रों में कृषि परिवारों की स्थिति को भी शामिल करना था।

3. कृषक परिवारों के स्थिति मूल्यांकन सर्वेक्षण के केन्द्रीय प्रतिदर्श आंकड़ों पर आधारित दस्तावेज, 'भारत में कृषि परिवारों की स्थिति के मुख्य संकेतक', जिसमें भारतीय कृषि परिवारों की स्थिति के महत्वपूर्ण संकेतक दिये गए हैं, तथा इकाई स्तर आंकड़े दिसम्बर, 2014 में जारी किये गए। इसके अलावा, कृषि परिवारों के विभिन्न पहलुओं पर तीन विस्तृत रिपोर्टें जारी करने की योजना थी, जिसमें पहली दो रिपोर्टें 'भारत में कृषक परिवारों की कुछ विशेषताएँ' तथा 'भारत में कृषि के कुछ पहलू' जारी की जा चुकी हैं। वर्तमान रिपोर्ट, "भारत में कृषक परिवारों की आय, व्यय, उत्पादक परिसंपत्तियाँ और ऋणगस्तता", इस श्रृंखला की अंतिम रिपोर्ट है। इस रिपोर्ट में तीन अध्याय तथा तीन परिशिष्ट हैं। इस रिपोर्ट में दिए गए अनुमानों से संबंधित प्रमुख निष्कर्ष अध्याय III में दिए गए हैं।

4. यह रिपोर्ट राष्ट्रीय और राज्य / संघ राज्य क्षेत्र स्तर पर कृषि वर्ष जुलाई 2012-जून 2013 के दौरान कृषक परिवारों द्वारा निष्पादित विभिन्न आर्थिक क्रियाकलापों से प्राप्त आय तथा व्यय, कृषि एवं गैर-कृषि व्यवसाय और मजदूरी/वेतन भोगी रोजगार तथा उत्पादक परिसंपत्तियों पर किए गए व्यय से संबंधित विस्तृत विशेषताएँ प्रस्तुत करती है। इस रिपोर्ट में सर्वेक्षण के समय कृषक परिवारों की ऋणगस्तता की स्थिति के बारे में भी चर्चा की गई है।

5. सर्वेक्षण अभिकल्प तथा अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति, सर्वेक्षण-साधन विकसित करने तथा इस रिपोर्ट को तैयार करने का कार्य किया है। क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा क्षेत्र कार्य किया गया तथा आंकड़ा विधायन तथा सारणीयन कार्य समंक विधायन प्रभाग (डीपीडी) द्वारा किया गया है। समन्वय एवं प्रकाशन प्रभाग (सीपीडी) ने सर्वेक्षण संबंधी विभिन्न कार्यकलापों में समन्वयन का कार्य किया है।

6. मैं सर्वेक्षण के विभिन्न चरणों में बहुमूल्य मार्गदर्शन प्रदान करने हेतु राष्ट्रीय प्रतिदर्श सर्वेक्षण के 70वें दौर के कार्य दल एवं राष्ट्रीय सांख्यिकीय आयोग (एनएससी) के अध्यक्ष और सदस्यों का अत्यंत आभारी हूँ। मैं इस रिपोर्ट को तैयार करने में शामिल एनएसएसओ के विभिन्न प्रभागों के अधिकारियों द्वारा किये गये प्रयासों की भी सराहना करता हूँ।

7. मैं आशा करता हूँ कि यह रिपोर्ट योजनाकारों, नीति-निर्माताओं, शिक्षाविदों और शोधकर्ताओं के लिए उपयोगी सिद्ध होगी। इस रिपोर्ट की विषयवस्तु, अभिन्यास अथवा रिपोर्ट के किसी अन्य पहलू में सुधार के लिये सुझावों का स्वागत है।

  
(समीरन मल्लिक)

## Preface

As the country entered the new millennium, the Ministry of Agriculture, Government of India planned for a comprehensive socio-economic study of the Indian farmers. The areas of interest have been their educational level, level of living, farming practices, possession of productive assets, awareness as well as access to modern technology in the field of agriculture, resource availability, indebtedness and a host of other relevant issues. To meet these data requirements, the National Sample Survey Office (NSSO) conducted the 'Situation Assessment Survey of Farmers' during January - December 2003 in the rural areas as part of its 59<sup>th</sup> round, where 'farmer' was defined as a person who possesses and operates some land and is engaged in agricultural activities. In this survey farmers were captured through households having at least one family member as 'farmer'.

2. The NSSO repeated 'Situation Assessment Survey of Agricultural Households' in its 70<sup>th</sup> round during January – December 2013. Apart from the Central sample canvassed by NSSO, most of the State Governments also participated in this survey by canvassing a matching State sample. Recognizing the fact that significant agricultural activity can be carried out without possessing any land, possession of land as an eligibility criterion of a farmer was dispensed with, replacing it with the concept of 'agricultural production unit' which produces crops, rear livestock or receives some value of produce from other specified agricultural activities. This survey also aimed at capturing the condition of agricultural households in the rural areas of the country in the context of policies and programmes of Government of India.

3. Based on the Central sample data of the Situation Assessment Survey of Agricultural Households, a document titled '*The Key Indicators of Situation of Agricultural Households in India*' giving important indicators of situation of Indian Agricultural households, and the unit level data were released in December 2014. Apart from this, three detailed reports were planned to be released on various aspects of agricultural households. Out of these, the first two reports titled '*Some Characteristics of Agricultural Households in India*' and '*Some Aspects of Farming in India*' have already been released. The present report '*Income, Expenditure, Productive Assets and Indebtedness of Agricultural Households in India*' is the last in this series. The report contains three Chapters and three Appendices. The main findings, relating to the estimates are presented in Chapter Three.

4. This report provides National and State/UT level broad features pertaining to income from and expenditure for various economic activities performed by the agricultural households, including farm and non-farm business and wage/salaried employment and the expenditure incurred on productive assets during the agricultural year July 2012 - June 2013. The report also discusses about status of indebtedness of agricultural households at the time of the survey.

5. Survey Design and Research Division (SDRD) undertook the development of survey instruments and the preparation of this document. Field work of the survey was carried out by the Field Operations Division (FOD) and the data processing and tabulation work was done by the Data Processing Division (DPD). The Coordination and Publication Division (CPD) coordinated various activities pertaining to the survey.

6. I am highly thankful to the Chairman and Members of the Working Group for NSS 70<sup>th</sup> round and National Statistical Commission (NSC) for providing their valuable guidance at various stages of the survey. I would also like to appreciate efforts made by the officers of the different Divisions of NSSO involved in preparation of this report.

7. I hope this report will be useful to planners, policy makers, academicians and researchers. Suggestions for improvement in content, layout and other aspects of this report will be highly appreciated.

(Samiran Mallick)

Director General & Chief Executive Officer  
National Sample Survey Office

New Delhi  
April 2016

## मुख्य बातें

यह रिपोर्ट जनवरी 2013 से दिसम्बर 2013 के दौरान राष्ट्रीय प्रतिदर्श सर्वेक्षण के 70वें दौर में कृषि परिवारों की स्थिति मूल्यांकन सर्वेक्षण (एसएसएस) पर आधारित है। इसके दो दौरों के दौरान देश के ग्रामीण क्षेत्रों में सर्वेक्षण किया गया जिसमें 4529 गांव तथा 35200 परिवारों को शामिल किया गया था। इस सर्वेक्षण से प्राप्त जुलाई 2012-जून 2013 से संबंधित कृषि परिवारों के आय, व्यय, उत्पादक परिसम्पत्तियों और ग्रामीण परिवारों की ऋणग्रस्तता से संबंधित प्रमुख अनुमान नीचे दिए गए हैं:-

- कृषि वर्ष जुलाई 2012-जून 2013 के दौरान प्रति कृषि परिवार की औसत मासिक आय का आकलन 6426/- रु. किया गया।

[विवरण 3.3]

- कृषि वर्ष जुलाई 2012-जून 2013 के दौरान प्रति कृषि परिवार की औसत मासिक आय का लगभग 60 प्रतिशत कृषि व्यवसाय (खेती/पशुपालन) की निवल प्राप्तियों से था। जबकि आय का लगभग 32 प्रतिशत मजदूरी/रोजगार वेतन से था।

[पैरा 3.4.4]

- कृषि वर्ष जुलाई 2012-जून 2013 के दौरान औसत मासिक उपभोक्ता व्यय प्रति कृषि परिवार 6223/- रु. था।

[विवरण 3.3]

- कृषि वर्ष जुलाई 2012-जून 2013 के दौरान प्रति कृषि परिवार का कृषि एवं गैर-कृषि व्यवसाय के लिए प्रयोग की गई उत्पादक परिसम्पत्तियों पर औसत मासिक व्यय 1087/- रु. किया गया।

[विवरण 3.7]

- उत्पादक परिसम्पत्तियों पर औसत मासिक व्यय में से, करीब 33 प्रतिशत कृषि मशीन एवं उपकरणों पर खर्च हुआ, पशुधन एवं मुर्गीपालन पर 18 प्रतिशत एवं 42 प्रतिशत कृषि व्यवसाय से संबंधित अन्य परिसम्पत्तियों पर तथा गैर-कृषि व्यवसाय में, प्रयुक्त उत्पादक परिसम्पत्तियों पर व्यय कुल मासिक व्यय का 7 प्रतिशत था।

[विवरण 3.6]

- कृषि वर्ष जुलाई 2012-जून 2013 के दौरान खेती करने वाले कृषक परिवार द्वारा फसल उत्पादन पर औसत मासिक व्यय 2192/- रु. आकलित किया गया।

[विवरण 3.10]

- जुलाई 2012-जून 2013 के दौरान खेती करने वाले प्रति कृषि परिवार के फसल उत्पादन पर किए गए कुल औसत मासिक व्यय में से, 24 प्रतिशत उर्वरक तथा खाद्य पर, 21 प्रतिशत मानव श्रम पर तथा 11 प्रतिशत बीजों पर खर्च किया गया ।

[पैरा 3.7.4]

- कृषि वर्ष जुलाई 2012-जून 2013 के दौरान, खेती करने वाले कृषि परिवारों के लिए फसल उत्पादन से प्राप्त औसत मासिक प्राप्ति 5542/- रु. थी ।

[विवरण 3.10]

- कृषि वर्ष जुलाई 2012-जून 2013 के दौरान पशुपालन में लगे प्रति कृषि परिवार का पशुपालन पर औसत मासिक व्यय 1388/- रु. आकलित किया गया, जिसमें से 77 प्रतिशत पशुचारे पर व्यय किया गया ।

[विवरण 3.12]

- जुलाई 2012-जून 2013 के दौरान पशुपालन में संलग्न प्रति कृषि परिवार की पशुपालन से औसत मासिक प्राप्तियां 2604/- रु. थी, जिसमें से 69 प्रतिशत दूध की बिक्री से थी ।

[विवरण 3.13]

- जुलाई 2012-जून 2013 के दौरान गैर कृषि व्यवसाय से जुड़े कृषक परिवारों की गैर-कृषि व्यवसाय से औसत मासिक निवल प्राप्ति 5290/- रु. था ।

[विवरण 3.16]

- ग्रामीण भारत में अनुमानित 90.2 मिलियन कृषक परिवारों में से लगभग 52% परिवारों पर सर्वेक्षण के समय ऋण बकाया<sup>1</sup> था ।

[विवरण 3.18]

- बकाया ऋण का लगभग 60% ऋण संस्थानिक स्रोतों (बैंक, सहकारी समिति और सरकार) से तथा ऋण का अन्य 26% कृषि/व्यावसायिक साहूकारों से लिया गया था ।

[विवरण 3.20]

<sup>1</sup> ऋणों में वे सब बकाया ऋण शामिल हैं इस उद्देश्य की पूर्ति के बिना कि वह किस कार्य के लिए लिया गया है

## HIGHLIGHTS

---

This report is based on the Situation Assessment Survey (SAS) of Agricultural Households conducted in the 70<sup>th</sup> round of NSS during January 2013 to December 2013. The survey, conducted in the rural areas of the country with its two visits, was spread over 4529 villages covering 35200 households. Some of the key estimates related to the income, expenditure, productive assets and indebtedness of the agricultural households with respect to the agricultural year July 2012 – June 2013 as obtained from this Survey are presented here:

- The average monthly income per agricultural households during the agricultural year July 2012- June 2013 was estimated as ₹6426

[Statement 3. 3]

- Net receipt from farm business (cultivation and farming of animals) accounted for about 60 percent of the average monthly income per agricultural household during the agricultural year July 2012- June 2013. Nearly 32 percent of the income was contributed by wage/ salary employment

[Para.3.4.4]

- The average monthly consumption expenditure per agricultural household during the agricultural year July 2012- June 2013 was ₹6223.

[Statement 3.3]

- Average monthly expenditure on productive assets used for farm and non-farm business per agricultural household during the agricultural year July 2012- June 2013 was ₹1087

[Statement 3.7]

- Out of the average monthly expenditure on productive assets, nearly 33 percent was spent on agricultural machinery and implements, 18 percent was on livestock and poultry and another 42 percent was on ‘other assets in farm businesses’. Expenditure on productive assets used in non-farm business accounted for about 7 percent of the total monthly expenditure.

[Statement 3.6]

- Average monthly expenditure on crop production by cultivating agricultural household during the agricultural year July 2012- June 2013 was estimated as ₹ 2192

[Statement 3.10]

- Of the total average monthly expenditure on crop production per cultivating agricultural household during July 2012- June 2013, an estimated 24 percent was incurred on *fertilizers and manure*. *Human labour* accounted for 21 percent of the monthly expenditure and another nearly 11 percent was spent on *seeds*.

[Para 3.7.4]

- During the agricultural year July 2012- June 2013, the average monthly receipts from crop production for the cultivating agricultural households was estimated as ₹5542

[Statement 3. 10]

- The average monthly expenditure for farming of animals per agricultural household engaged in farming of animals was estimated as ₹1388 for the agricultural year July 2012- June 2013, of which 77 percent was spent on animal feed

[Statement 3. 12]

- The average monthly receipts from farming of animals per agricultural household engaged in farming of animals during July 2012- June 2013 was estimated as ₹2604, out of which nearly 69 percent was from sale of milk.

[Statement 3. 13]

- Among the agricultural households engaged in non-farm business during July 2012- June 2013, the average monthly net receipt per agricultural household from non-farm business was ₹5290

[Statement 3. 16]

- About 52 percent of the estimated 90.2 million agricultural households in rural India reported outstanding loans<sup>1</sup> at the time of the survey.

[Statement 3. 18]

- About 60 percent of the outstanding loans were taken from institutional sources (bank, cooperative society and Government) and another 26 percent of the loans were from agricultural/ professional money lender.

[Statement 3. 20]

<sup>1</sup> loans included all kind of outstanding loans irrespective of the purpose for which it was taken

# Chapter 1

**Introduction**

# CHAPTER ONE

---

## INTRODUCTION

### 1.1 Background

1.1.1 The National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MOSPI), Government of India, since its inception in 1950 has been conducting nationwide integrated large scale sample surveys, employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects. In its 70<sup>th</sup> round of survey, conducted during the period 1<sup>st</sup> January 2013 to 31<sup>st</sup> December 2013, NSSO carried out a Situation Assessment Survey of Agricultural Households. Prior to this, Situation Assessment Survey (SAS) of farmers was conducted in NSS 59<sup>th</sup> round (January, 2003- December, 2003).

### 1.2 Objective of the Survey

1.2.1 At the beginning of this millennium, the Ministry of Agriculture, Government of India had planned for a comprehensive assessment of the situation of farmers in the country. The areas of interest were their level of living as measured by household consumer expenditure, income and productive assets, their indebtedness, farming practices and preferences, resource availability, their awareness of technological developments and access to modern technology in the field of agriculture. To meet these requirements, the Situation Assessment Survey (SAS) of farmers was conducted by the NSSO during January to December, 2003, as a part of its 59<sup>th</sup> round.

1.2.2 The Situation Assessment Survey of Agricultural Households in NSS 70<sup>th</sup> Round (January, 2013- December, 2013) was conducted as a repeat survey of Situation Assessment Survey of farmers conducted in 59<sup>th</sup> round. The survey also aimed at capturing the condition of agricultural households in the country in the context of policies and programmes of Government of India.

1.2.3 The survey schedule was designed for collection of information on various aspects relating to farming and other socio-economic characteristics of agricultural households. Along with information on household consumer expenditure, income and productive assets, their indebtedness, farming practices and preferences, resource availability, their awareness of technological developments and access to modern technology in the field of agriculture, information on crop loss, crop insurance and awareness about Minimum Support Price (MSP) was also collected during 70<sup>th</sup> round. The information was collected in two visits from the same set of sample households with a view to collect relevant information separately for the two major agricultural seasons in a year. The first visit was made during January to July, 2013 and the second during August to December, 2013. The survey, like in 59<sup>th</sup> round, was conducted in rural areas only.

### 1.3 Comparability of results with previous round of SAS

1.3.1 ‘Situation Assessment Survey of Farmers’ conducted in NSS 59<sup>th</sup> Round defined ‘farmer’ as a person who operated some land (owned or taken on lease or otherwise

possessed) and was engaged in agricultural activities in broad sense of the term e.g., cultivation of field crops, horticultural crops, plantation, animal husbandry, poultry, fishery, piggery, bee-keeping, vermiculture, sericulture, etc., on that land during last 365 days preceding the date of survey. If any member of a household was a farmer, the household was treated as a farmer household for the purpose of the survey. **The definition followed in NSS 59<sup>th</sup> Round had kept all agricultural activities (whether nominal or substantial) of households which did not possess and operate any land outside the scope of the survey.**

1.3.2 A critical analysis of the concepts and definitions followed in the Situation Assessment Survey of NSS 59<sup>th</sup> Round with respect to the changed scenario of agriculture in the country revealed the necessity of dropping the criterion of land possession for considering a household to be covered in the survey. Recognizing the fact that significant agricultural activity can be conducted without possessing any land, the definition of ‘farmer’ and ‘farmer households’ followed in NSS 59<sup>th</sup> Round was critically reviewed and the land possession as an eligibility criterion was dispensed with, replacing it with the concept of ‘agricultural production unit’ as one which produces field crops, horticultural crops, livestock and the products of any of the other specified agricultural activities.

1.3.3 With a view to keep the large number of households with insignificant agricultural activities out of survey coverage, it was decided to have a minimum value of agricultural produce for a household to qualify as an ‘agricultural production unit’. Based upon analysis of data of ‘Household Consumer Expenditure’ survey of NSS 66<sup>th</sup> Round (July, 2009 – June, 2010) considering average Monthly Household Consumer Expenditure (MHCE) for home grown consumption of some specific items, a cut off of ₹ 3000 for value of annual agricultural produce was adopted, and the survey was renamed as ‘Situation Assessment Survey of Agricultural Households’.

1.3.4 An agricultural household for 70<sup>th</sup> Round survey was defined as a household receiving some value of produce more than ₹3000 from agricultural activities (e.g., cultivation of field crops, horticultural crops, fodder crops, plantation, animal husbandry, poultry, fishery, piggery, bee-keeping, vermiculture, sericulture etc.) and having at least one member self-employed in agriculture either in the principal status or in subsidiary status during last 365 days. However, as in NSS 59<sup>th</sup> round, households which were entirely agricultural labour households and households receiving income entirely from coastal fishing, activity of rural artisans and agricultural services were not considered as agricultural households and they were kept outside the scope of the survey.

1.3.5 For recording the agricultural expenditure, SAS 2013 (70<sup>th</sup> Round) followed the actual expenditure (out of the pocket expenditure) in order to simplify the data collection. Accordingly, imputed figures in respect of utilisation of input out of home stock or out of free collection as well as received in exchange or borrowed were not considered unlike in SAS 2003 (NSS 59<sup>th</sup> round). Instead, any such utilisation of input was recorded with zero expenditure. Though with such method of accounting it would not be possible to derive true income of the household from agricultural activities, it would be sufficient to provide income from ‘paid expenditure’ approach.

1.3.6 The major differences in SAS of farmers (farmer households) conducted in 59<sup>th</sup> Round and SAS of agricultural households conducted in 70<sup>th</sup> Round are summarised as under:

- a) Possession of land was an essential condition for defining a person as farmer (farmer household) in 59<sup>th</sup> round, but an agricultural household as defined in NSS 70<sup>th</sup> round may or may not possess land.
- b) In 59<sup>th</sup> round, farmers having insignificant farming activities, like kitchen garden, etc., were excluded from the survey coverage. In order to eliminate households pursuing agricultural activities of insignificant nature in 70<sup>th</sup> round, households with at least one member self-employed in agriculture either in principal status or subsidiary status and having total value of produce during last 365 days more than ₹ 3000 were only considered for inclusion in the survey coverage.
- c) In 59<sup>th</sup> Round data was collected for ‘kharif’ and ‘rabi’ seasons from each sample household, whereas in 70<sup>th</sup> Round data was collected for two halves of the agriculture year 2012-13 as July to December, 2012 and January to June, 2013 from each sample household.
- d) In 70<sup>th</sup> Round actual expenditure (out of pocket expenditure) incurred by the agricultural households for running farm and non-farm business was collected.

1.3.7 In the recent past the State of Telangana has been carved out of erstwhile Andhra Pradesh. Separate estimates have been presented for the two new States. Thus, figures of Andhra Pradesh presented in this report are not comparable with the corresponding figures of 59<sup>th</sup> Round.

**1.3.8 Due to the change in coverage and difference in some important concepts and definitions followed in the two rounds, the estimates of SAS 2013 (NSS 70<sup>th</sup> Round) are not strictly comparable with those of SAS 2003 (NSS 59<sup>th</sup> Round). While making any comparison of estimates of these two rounds, sufficient care should be taken to account for these differences.**

## **1.4 Reports of 70<sup>th</sup> Round Situation Assessment Survey (SAS) of Agricultural Households**

1.4.1 The estimates of NSS rounds are released in reports based on comprehensive tabulation of subject parameters and indicators in various cross classifications generated from the sample data. For the use in decision support, policy inferences and analysis, the key findings of Situation Assessment Survey of Agricultural Households of NSS 70<sup>th</sup> round was brought out within a year of completion of field work in a document titled ‘*Key Indicators of Situation of Agricultural Households in India*’. The detailed findings of the survey are planned for release in three other Reports of which the first two reports titled “*Some characteristics of agricultural households in India*” and “*Some aspects of farming in India*” have already been released. The present report, “*Income, expenditure, productive assets and indebtedness of agricultural households in India*” is the third and last report to be published with the results of the *Situation Assessment (SAS) Survey of Agricultural Households* of NSS 70<sup>th</sup> round.

## 1.5 Contents of this Report

1.5.1 This report is based on the information collected on income generated and expenditure incurred by the agricultural households by performing various economic activities and their purchase and sale of productive assets during the agricultural year July 2012- June 2013. The report also discusses about the indebtedness status of the agricultural households at the time of the survey. Even though information on income and expenditure were collected separately for the two halves of the agricultural year, the report discusses the estimates generated for the combined period (i.e. entire agricultural year July 2012- June 2013). However, estimates separately for the two halves of the agricultural year are given in the detailed tables (appendix A).

1.5.2 The report contains three Chapters and three Appendices. Chapter Two gives the concepts and definitions followed in the Survey. Summary of findings of the Survey related to important estimates regarding income, expenditure, productive assets and indebtedness of the agricultural households for the agricultural year July 2012- June 2013 are discussed in Chapter 3. The detailed tables are presented in Appendix A. Appendix B provides the details of the sample design and estimation procedure followed in the survey. A copy of each of the schedules of enquiry –“Schedule -33” used in visit-1 and visit -2 is given in appendix – C.

## 1.6 Features of the Survey: Schedule of Enquiry

1.6.1 The schedule of enquiry on ‘Situation Assessment Survey of Agricultural Households’ (Schedule 33) was designed to collect information on the economic conditions of agricultural households as measured by household consumer expenditure, income from productive assets and indebtedness, their farming practices and preferences, resource availability, their awareness of technological developments and access to modern technology in the field of agriculture. Along with the household and demographic characteristics of the agricultural households, detailed information on the farming and non-farming activities performed by the agricultural households have been collected in separate blocks with respect to the two halves of the agricultural year July 2012- June 2013.

## 1.7 Features of the Survey: Scope and Coverage

### 1.7.1 Geographical coverage

The Situation Assessment Survey (SAS) covered the rural areas of the country.

### 1.7.2 Population coverage: The following rules were adhered to:

1. Floating population, i.e., persons without any normal residence, was excluded. But persons residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place were covered.
2. Foreign nationals were excluded, as well as their domestic servants, if by definition the latter belonged to the foreign national's household (see Appendix B for definition of household).

3. Persons residing in barracks of military and paramilitary forces (like police, BSF etc.) were kept outside the survey coverage. However, the civilian population residing in their neighbourhood, including the family quarters of service personnel, was covered.
4. Orphanages, rescue homes, ashrams and vagrant houses were outside the survey coverage. However, the persons staying in old age homes, the students staying in ashram/hostels and the residential staff (other than monks/nuns) of these ashrams were covered. Although orphans living in orphanages were excluded, the persons looking after them and staying there were covered. Convicted prisoners undergoing sentence were outside the coverage of the survey.

1.7.3 Period of the Survey: The survey was conducted during the calendar year 2013 (1<sup>st</sup> January 2013 to 31<sup>st</sup> December 2013). The same household was visited twice during the survey period. The period of first visit (visit 1) was January to July 2013 and that of second visit (visit 2) was August to December 2013.

## 1.8 Sample Size

1.8.1 The number of sample villages surveyed by NSSO in 70<sup>th</sup> round was 4529. This is known as Central Sample. In addition to this, a “State Sample” was also surveyed by the State/UT Governments who participated in this survey. The results presented in this document are, however, based on central sample alone. For this particular survey, 8 households were selected in each sample village, for canvassing Sch.33 both in visit 1 and visit 2. A few households of visit 1 became “casualty” while surveying in visit 2. On all-India basis, a total of 35200 households were surveyed in visit-1 and 34907 of them could be surveyed in visit 2. State-wise number of villages surveyed and the number of households in which Schedule 33 was canvassed separately for visit 1 and visit 2 are given in *Statement 1.1*.

**Statement 1.1: Number of villages surveyed and number of households surveyed for Schedule 33: NSS 70<sup>th</sup> round, Central sample**

| State/UT             | number of villages surveyed | number of households surveyed |              |
|----------------------|-----------------------------|-------------------------------|--------------|
|                      |                             | visit-1                       | visit-2      |
| (1)                  | (2)                         | (3)                           | (4)          |
| Andhra Pradesh       | 149                         | 1164                          | 1151         |
| Arunachal Pradesh    | 47                          | 314                           | 312          |
| Assam                | 214                         | 1682                          | 1681         |
| Bihar                | 266                         | 2084                          | 2077         |
| Chhattisgarh         | 85                          | 632                           | 630          |
| Delhi                | 10                          | 49                            | 46           |

# Chapter2

**Concepts and Definitions**

## CHAPTER TWO

### CONCEPTS AND DEFINITIONS

#### 2.1 Conceptual Framework

**2.1.1 Reference Period:** Information is collected primarily for the agricultural year 2012-13 in two visits, viz., *visit-1* and *visit-2*. For crops, information on *expenses* and *receipts from cultivation* are collected for the period July to December 2012 in *visit-1* and for January to June 2013 in *visit-2*. However it is ensured that all the crops, whether principal or not, harvested during agricultural year 2012-13 would be covered in either *visit-1* or *visit-2*. The same reference period is used for collecting information on *productive assets*.

2.1.1.1 For other items of information, different reference periods are used, viz., ‘*as on the date of survey*’ for land possession and outstanding loans, ‘*last 30 days*’ for farming of animals, non-farm business and consumer expenditure and ‘*last 365 days*’ for principal source of income. For information on *productive assets* and *expenses* and *receipts from cultivation*, the reference period is July to December 2012 in *visit-1* and January to June 2013 in *visit-2*.

2.1.1.2 The estimates of number of households presented in this report are based on data with a moving reference point, from 01.01.2013 to 31.07.2013, which spans over a period of seven months. These estimates, therefore, may be taken to represent the number of households existing as on 15.04.2013, the midpoint of the seven month period.

**2.1.1.3: Combined Aggregates Based on Visit-1 and Visit-2 Data:** Information related to expenses for and income/receipts from various activities performed by the agricultural households are collected for different reference period. For wage/ salaried employment, cultivation, purchase and productive assets the reference period is six months whereas, for farming of animals and household consumption expenditure the reference period is 30 days. For working out the combined aggregates only the common households of *visit-1* and *visit-2* are considered. In respect of figures collected for the reference period six months the combined aggregate is calculated as a simple average of *visit-1* and *visit-2* figures. Wherever information is collected for the reference period of last 30 days combined aggregate is calculated as a weighted mean of estimates for common households of *visit-1* and *visit-2* where the weights are 7 and 5 respectively as the survey period of *visit-1* and *visit-2* were 7 and 5 months, respectively.

**2.1.2 Household:** A group of person normally living together and taking food from a common kitchen constitutes a household. By "normally" it is meant that temporary visitors are excluded while temporary *stay always* is included. Thus, a son or a daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer's/host's household. "Living together" is usually given more importance than "sharing

food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict. For example, a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage or otherwise, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, boarding and lodging house, hostel, etc. is considered as a single member household except that a family living in such an establishment is considered as one household only.

**2.1.3 Household size:** The size of a household is defined as the total number of persons normally residing together (i.e., under the same roof) and taking food from the same kitchen (including temporary stay away and excluding temporary visitors).

**2.1.4 Agricultural Household:** For the purpose of Situation Assessment Survey (SAS) of NSS 70<sup>th</sup> round, an agricultural household is defined as a household receiving some value of produce from agriculture activities (e.g., cultivation of field crops, horticultural crops, fodder crops, plantation, animal husbandry, poultry, fishery, piggery, bee-keeping, vermiculture, sericulture, etc.) during last 365 days. However, household which are entirely agricultural labour household are excluded from the coverage. In contrast to the definition of farmer used in 59<sup>th</sup> Round of NSS survey, the necessary condition of 'land possession' had been dispensed with in this round. In this connection, it is also important to note that apart from agricultural labourers, households receiving income entirely from coastal fishing, activity of rural artisans and agricultural services are not considered as agricultural household and they are kept out of the scope of the survey. Further, to eliminate households pursuing agricultural activities of insignificant nature, households with at least one member self-employed in agriculture either in the principal status or in subsidiary status and having total value of produce more than ₹3000/- during the last 365 days are only considered for being selected for this survey.

### 2.1.5 Size Class of Land Possessed

Different estimates obtained from the survey have been presented for seven size classes of land possessed, namely, <0.01 ha., 0.01-0.40 ha., 0.41-1.00 ha., 1.01 – 2.00 ha., 2.01-4.00 ha., 4.01- 10.00 ha. 10.00 + ha.

## 2.2 Other Concepts and Definitions

**2.2.1 Agricultural Production:** Agricultural production included:

- a) Growing of field crops (including fodder crops), fruits, grapes, nuts, seeds, seedlings in the nurseries, bulbs, vegetables and flowers both in open and under glass, etc.
- b) Production of plantation crops like tea, coffee, cocoa, rubber etc.
- c) Forest production in parcels of land which form part of enumeration holding and
- d) Production of livestock and livestock products, poultry and poultry products, fish, honey, rabbits, furbearing animals and silk-worm cocoons. However, rearing pet animals are not considered as agricultural production.

**2.2.2 Cultivation:** All activities relating to production of crops and related ancillary activities are considered as cultivation. Growing of trees, plants or crops as plantation or orchards (such as rubber, cashew, coconut, pepper, coffee, tea etc.) are not considered as cultivation activities for the purpose of this survey. In general, the activities covered under NIC-2008 classes 0111, 0112, 0113, 0114, 0116, 0119 (growing of non-perennial crops other than tobacco) and among class 0128 sub classes 01281, 01282, etc., are considered as cultivation. Only activities of the household in self employment capacity in cultivation are considered for the purpose of the survey

**2.2.3 Livestock:** Livestock are those animals which are used for food, fibre, labour, etc. Animals kept as pets, snakes, reptiles, frogs, fishes are excluded from the coverage of livestock. Only activities of the household in self employment capacity in livestock activities are considered for the purpose of the survey

**2.2.4 Other Agricultural Activities:** Other agricultural activities include all the activities in the agricultural sector, except cultivation and livestock farming activities, like growing of plantation, orchard, forestry, logging, fishery, etc. Only activities of the household in self employment capacity in other agricultural activities are considered for the purpose of the survey

**2.2.5 Transactions in Livestock:** An agricultural household might have purchased and sold livestock for various purposes. It is necessary to understand characteristics of such transaction and distinguish them for reporting in various blocks of this schedule. Purpose of such transactions is classified into three broad groups namely, for the purpose of business, for the purpose of acquiring productive asset and for the purpose of trading.

**2.2.6 Pre-harvest Sale (₹):** Farmers sometimes sold entire produce of a plot of land before harvesting. Land area used and value of such pre-harvest sales are collected for the survey. For pre-harvest sale, generally volume of production is not known. Therefore, care is taken not to include quantity of production for pre-harvest sale, even if it is available while reporting quantity. While reporting land corresponding to the quantity of production, area relating to pre-harvest sale is excluded. Irrigated and un-irrigated land area corresponding to pre-harvest sale are separately reported along with value of pre-harvest sale in designated fields in block 5a of the Schedule.

**2.2.7 Value of Products (₹):** Value of produces for each major crop is calculated multiplying quantity with rate. For crops clubbed together as 'others', value is based on actual sale or assessment of the informant.

**2.2.8 Value of By-products (₹):** Value of by-products for 4 major crops and 'others', if any, are reported based on actual sale or assessment of the informant.

**2.2.10 Seeds:** Expenditure incurred on seeds for 4 major crops as reported in Block 5a are recorded in the same order. When there are more than 4 crops, crops other than 4 major crops are clubbed together and reported. The term 'seeds' also included seedling (baby plant).

**2.2.11 Fertilizer:** Fertilizers are mostly inorganic material of natural or synthetic origin (other than liming materials) that is added to a soil to supply one or more plant nutrients essential to the growth of plants. Generally these are industrially manufactured chemicals containing plant nutrients.

**2.2.12 Manure:** Manure is organic matter used as organic fertilizer in agriculture. Manures contributed to the fertility of the soil by adding organic matter and nutrients. There are three main classes of manures used in soil management:

- a) **‘animal manure’** made from cattle dung, excreta of other animals.
- b) **‘compost’** made from decomposed remnants of organic materials – usually of plant origin, but often including some animal dung or bedding.
- c) **‘plant manure’** which are crops grown for the express purpose of ploughing them in, thus increasing fertility through the incorporation of nutrients and organic matter into the soil.

**2.2.13 Plant Protection Chemicals:** Plant protection chemicals included all pesticides, herbicides, insecticides, fungicides, as well as biotechnology products which helped control the thousands of weed species, harmful insects and numerous plant diseases that could afflict crops.

**2.2.14 Cost of ‘Animal Seeds’:** Expenditure incurred on purchase of ‘animal seeds’ for cattle/buffalo, sheep, goat, piggery etc., poultry & duckery and others. Young animals purchased for the purpose of business only are considered here.

**2.2.15 Animal Feed:** Expenditure incurred on animal feed is collected for the following specific fodder items. The animal feed had been grouped into the following four classes, namely (1) Green fodder, (2) Dry fodder, (3) Concentrates (4) Other feed including minerals (salt etc.) and medicines. If animal feeds are used from home stock or from free collection as well as received in exchange or borrowed, zero expenditure is recorded.

**2.2.16 Green Fodder:** Green fodder is obtained through crop cultivation. Some crops are taken up exclusively for green fodder purpose. These includes Berseem, Lucerne, Cowpea, Guar, Rice bean, Velvet bean, Sorghum (fodder varieties like MP chari, Sorghum sudan grass (a hybrid developed by crossing sorghum and sudan grass), Sudax, Red chari), Napier bajra hybrid (a hybrid developed by crossing crops Napier grass & bajra), Maize (fodder varieties like African tall, J-1006, Vijay composite), Jowar, Oats, Chinese cabbage, Turnip, Fodder beet, all palatable grasses. Some crops that are primarily taken for human consumption are also used as green fodder for animals. These include maize, sugarcane, cowpea, oats etc.

**2.2.17 Dry Fodder:** Dry residue of some crops is used as fodder. These include straws of wheat, paddy, sorghum, barley, jowar, gram etc.

**2.2.18 Concentrates:** Concentrates generally include oil cake, crushed pulses, gram, grains, bran, husk, oil seed and gur.

**2.2.19 Veterinary Charges:** Veterinary charges include charges for medicine, vaccination, artificial insemination etc.

**2.2.20 Expenditure on Human Labour:** The expenditure on payment of wages/salaries by the agricultural household for carrying out cultivation during the reference period is considered. Payment of wages and salaries are made for two different categories of labour:

- a) Regular wage/salary: Labour which is regular in nature. This includes the payments made to persons working in farm and getting in return of salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract). The category not only includes persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.
- b) Casual labour: Labour which is casual in nature. Payments made to person(s) casually engaged in farm and getting wage according to the terms of the daily or periodic work contract are regarded as payments made for casual labour.

Total Payment to both categories made either in cash or in kind is reported. If it is paid in kind, the corresponding monetary value is evaluated at purchaser's price.

**2.2.21 Expenses Incurred for Non-firm Business:** Expenses incurred (paid or payable) towards running the non-farm business during the last 30 days prior to the date of survey is recorded. Only actual expenses out of pocket (both in cash and in kind) are reported. Consumptions of inputs out of home stock or out of free collection as well as received in exchange or borrowed are taken as zero expenses. Further, expenses on inputs actually consumed only are considered. Depending on the type of non-farm business, expenses on inputs included raw materials used, cost of commodities traded, articles used for food and drink preparation, petrol, diesel, lubricants etc., minor repair and maintenance, electricity charges, fuel other than electricity, rent, travelling, freight and cartage expenses, communication expenses (telephone, telegram, fax, postal, courier, e-mail, etc.), consumable stores, packing materials, paper, printing and stationary expenses, service charges for work done by other establishments (e.g. legal, audit, advertising and other accounting services; warehousing expenses, etc.), cost of own construction (building, furniture and fixtures etc.), interest, wages and salaries, etc.

**2.2.22 Value of Output from Non-firm Business (₹):** Value of outputs during the reference period from running non-farm business of the household is collected. The value of output that is not sold is evaluated at price in the local market or based on the assessment of the informant. Value of products lost by theft/damage/destroyed by fire etc. during the reference period is excluded. Depending on the type of non-farm business receipts from non-farm business included value of products and by-products manufactured, sale value of commodities traded, amounts receivable from contractor, receipts from sale of prepared food, refreshment and drinks, earnings from goods and passenger traffic, communication charges receivable from customers (STD/courier, fax, etc.), receipts for educational activity (like tuition fees, examination fees, capitation fees, etc.), receipts from consultation fees and medical services, receipts from services provided to others including commission charges,

market value of own construction (on building, furniture and fixtures, etc.), value of consumption of goods/services produced or traded for own use, rent receivable on plant and machinery and other fixed assets, etc.

**2.2.23 Productive Assets:** Assets represented all the things owned by the household which had money value, e.g. land, buildings, livestock, agricultural machinery and implements, etc. Assets which are used repetitively for producing goods or providing services are treated as productive asset. In this survey, information on productive assets used for farm and non-firm business are collected separately along with information on land and residential buildings.

**2.2.24 Loans (cash and kind):** The information pertaining to the household's indebtedness as on the date of survey is collected and each loan is record separately irrespective of the type of loan and amount outstanding. Loans included borrowing in cash and/or kind (including hire purchases/credit purchase). Borrowings in kind are evaluated at current retail price prevalent in the local market. An advance payment received for forward delivery of goods also considered as loan. Cash loans taken for short period without any security are excluded.

For each loan, the total amount due on the date of survey (i.e., the outstanding principal *plus* the interest due) is recorded. Initial discount allowed, if any, in the principal is taken into account while recording the total amount of loan outstanding on the date of survey.

In the case of credit purchase, it is ascertained whether such credits are really due on the date of survey or not. Dues are considered only after the expiry of the stipulated due date of payment of such charges.

# Chapter3

**Summary of Findings**

## CHAPTER THREE

### SUMMARY OF FINDINGS

#### 3.1 Introduction

**3.1.1** The *Situation Assessment Survey of Agricultural Households* was conducted in NSS 70<sup>th</sup> round (January - December 2013) to have a comprehensive picture of the farming community in India. The survey collected information on various aspects of farming activities from the agricultural households in rural India. The survey, with its two visits, made a detailed assessment of the situation of the agricultural households for the agricultural year July 2012 - June 2013.

**3.1.2** This chapter presents estimates related to the economic characteristics of the agricultural households such as their receipts from and expenditure incurred in farm and non-farm business. It also provides estimates of their indebtedness, consumption expenditure, productive assets and income generated from all economic activities including farm and non-farm business and wage/salary employment.

**3.1.3** The information pertaining to the parameters like income from different sources, expenditure incurred for farm and non-farm business, net investment in productive assets, which are discussed in this report (except indebtedness) had been collected separately for the two halves of the agricultural year July 2012 - June 2013. Even though in the detailed tables (Appendix A) these estimates are presented for both the halves of the agricultural year and also for the combined period, the discussions in this chapter are restricted to estimates for the combined period (i.e., the whole agricultural year July 2012 - June 2013). The estimates of indebtedness of the agricultural households are presented ‘as on date of survey’ as the information is available for the loan outstanding as on the date on which the household was surveyed. Wherever State wise figures are discussed, it is restricted to 18 major States only. However, in the detailed tables (Appendix A) estimates are presented for those States for which number of sample households was at least 300. Figures of all UTs have been clubbed together and shown under the head ‘*group of UTs*’ as sample number of households for each of the UTs was less than 300. The all-India level estimates of different parameters are also discussed with respect to the size classes of land possessed and decile classes of MPCE. However, State-wise and social group-wise details within each such size classes are available in the detailed tables provided the sample number of households belonging to a particular social group in a State was at least 100.

#### 3.2 Estimated number of Agricultural Households

**3.2.1** During the agricultural year July 2012 - June 2013, rural India had an estimated total of 90.2 million agricultural households<sup>1</sup>. These agricultural households were about 57.8 percent<sup>2</sup> of the total estimated rural households of the country during the same period. Uttar Pradesh, with an estimated 15.5 percent share of rural households in the country, accounted

<sup>1</sup>The definition of Agricultural Household for the purpose of the survey is given in Para. 2.1.4 of Chapter 2

<sup>2</sup>With respect to 156.1 million rural households as estimated by the Land and Livestock Holdings Survey of NSS 70<sup>th</sup> round

for about 20 percent of the total agricultural households in rural India. Among the major States, Rajasthan had the highest percentage of agricultural households (78.4 percent) among its rural households followed by Uttar Pradesh (74.8 percent) and Madhya Pradesh (70.8 percent). Kerala had the least percentage share of agricultural households (27.3 percent) among its rural households preceded by other southern States like Tamil Nadu (34.7 percent) and Andhra Pradesh (41.5 percent). Details are given in *Statement 3.1*.

**Statement 3.1: Percentage share of agricultural households and rural households in major States during the agricultural year July 2012 - June 2013**

| State             | percentage share (%) of |                  | agricultural households as percentage of rural households | estimated number (00) of |                    |
|-------------------|-------------------------|------------------|-----------------------------------------------------------|--------------------------|--------------------|
|                   | agricultural households | rural households |                                                           | agricultural households  | rural households** |
| (1)               | (2)                     | (3)              | (4)                                                       | (5)                      | (6)                |
| Andhra Pradesh    | 4.0                     | 5.6              | 41.5                                                      | 35968                    | 86763              |

Ref: NSS Report No.569: Some Characteristics of Agricultural Households in India

\*all India figures include all States and UTs which are not shown in the Statement

\*\* The estimate of rural households as per the results of the Land and Livestock Holdings Survey of NSS 70<sup>th</sup> round

### 3.3 Land Possessed by the Agricultural Households

**3.3.1** The area of land possessed by the agricultural households is an important indicator as the quantum of agricultural production is dependent on the area of land available for agricultural activities. Even though, the possession of land and its operation for agricultural activities was not a necessary condition for a household to be considered as Agricultural Household in the Situation Assessment Survey of 70<sup>th</sup> round, the survey, during its visit 1, collected information on land possessed by the agricultural household.

**3.3.2** As per the results of the survey, about 69 percent of the agricultural households in rural India were estimated to have possessed land less than 1 hectare. Another 17 percent had

land between 1.00 hectare and less than 2.00 hectares. Only 0.4 percent of the agricultural households were estimated to have possessed land 10 hectares or more. The agricultural households with land less than 1.00 hectares were highest among Scheduled Castes (82.7 percent) and lowest among 'Others' (63.6 percent). These results underline the fact that India is a land of marginal and small agricultural households. Details are in *Statement 3.2*.

**Statement 3.2: Per 1000 distribution of agricultural households by size class of land possessed (ha.) during July 2012 - June 2013**

Ref: NSS Report No.569: Some Characteristics of Agricultural Households in India

### 3.4 Average Monthly Income and Consumption Expenditure per agricultural household

**3.4.1** The survey collected information on the receipts and expenditure relating to cultivation, farming of animals and non-farm business, separately for the two halves of the agricultural year July 2012 - June 2013. Income from wage/salary employment was also recorded for the same period. Based on this information, average monthly income per agricultural household has been worked out for the agricultural year July 2012 - June 2013 by adding up income from wages/salary, net receipt from cultivation, farming of animals and non-farm business. *Net receipt was worked out by deducting total expenses from total receipts for each source of income. Expenses included only the actual expenses incurred (out of the pocket expenses) for farm and non-farm business. Imputed expenses in respect of inputs out of home stock or out of free collection as well as receipt in exchange or borrowed were not considered for reporting expenses for the purpose of the survey. Income of the agricultural households from various other non-economic activities such as pension, remittances, etc. were not collected in the survey and not included in the average monthly income presented here.*

**3.4.2** For working out the combined aggregates only the common households of *visit-1* and *visit-2* were considered. In respect of figures collected for the reference period six months (e.g. Income from crop production, wage/ salary income), the combined aggregate was calculated as a simple average of *visit-1* and *visit-2* figures. Wherever information was collected for the reference period of last 30 days (e.g. income from livestock, non-farm business) combined aggregate was calculated as a weighted mean of estimates for common households of *visit-1* and *visit-2* where the weights are 7 and 5 respectively as the survey period of *visit-1* and *visit-2* were 7 and 5 months, respectively.

**3.4.3** The average monthly income from different sources and average monthly consumer expenditure per agricultural household for the agricultural year July 2012 - June 2013 for each size class of land possessed are given in *Statement 3.3*.

**3.4.4** During the agricultural year July 2012 - June 2013 the average monthly income per agricultural household was estimated as ₹6426. Nearly 60 percent of the average monthly income per agricultural household was estimated to have generated from farm business (cultivation and farming of animals). About 32 percent of the average monthly income per agricultural household was contributed by income from wage/salary employment. Agricultural households in the lower size classes of land possessed were mostly dependent on wage/salary employment than farm business (cultivation and farming of animals) for their income during the agricultural year July 2012 - June 2013. For the households belonging to the lowest size class, farming of animals fetched more income than cultivation during this reference period. Percentage share of income from cultivation in the average monthly income increased with increase in land possession from a little less than 1 percent in the lowest size class of land possessed to about 86 percent in the highest size class of land possessed. Share of income from non-farm business in the average monthly income decreased with increase in land size except for land size class 2.

**Figure 2: Distribution of average monthly income per agricultural household by their sources for each size class of land possessed during July 2012- June 2013**

**3.4.5** The monthly consumption expenditure of the agricultural households was collected during both the visits of the survey. Along with the value of consumption out of purchase, value/imputed value of home produced stock, receipts in exchange of goods and services, gifts and loans and free collection were also considered for working out the average monthly consumption expenditure. The average monthly consumption expenditure per agricultural household during the agricultural year July 2012 - June 2013 was estimated as ₹6223. During the agricultural year July 2012 - June 2013, the average monthly consumption expenditure of the agricultural households possessing less than 0.01 hectares of land was ₹5108. It increased with the size class of land possessed to ₹14447 for the agricultural households possessing land 10 hectares or more.

**Statement 3.3: Average monthly income (₹) from different sources and consumption expenditure (₹) per agricultural household during July 2012 - June 2013 for each size class of land possessed (ha.)**

| size class of land possessed (ha.) | average monthly income       |                                          |                        |                                         |                  | average monthly consumption expenditure (₹) |

Ref: Summary Table T2

\*cultivation includes field crops and plantation/orchard crops

Note: Net receipt was worked out by deducting the out of pocket expenditure from total receipts where as consumption expenditure figures include imputed value of consumption out of home produced stock, gifts & loans, free collection, receipts in exchange of goods & services

**3.4.7** The share of average monthly income from agricultural activities (i.e. cultivation and farming of animals taken together) and non-farm business, in general, showed an increasing trend as we move up the decile classes. However, share of income from wage/salary employment decreased with increase in MPCE.

### 3.5 Inter-State Variation in Average Monthly Income and Consumption Expenditure per agricultural household

**3.5.1** The average monthly income per agricultural household from different sources for the major States for the period July 2012 - June 2013 is given in *Statement 3.5*. Among the major States, the highest average monthly income was reported by agricultural households of Punjab followed by Haryana and Kerala. The lowest average monthly income was reported by Bihar followed by West Bengal and Jharkhand.

**3.5.2** The share of agricultural activities (cultivation and livestock activity) in the total average monthly income per agricultural household out of the four sources was 60 percent in the rural India as a whole but was, reportedly, as low as 30.3 percent for West Bengal, 34.5 percent for Kerala and 43.2 percent for Tamil Nadu. The share of agricultural activities in the total monthly income per agricultural household was highest for Madhya Pradesh (76.5 percent) followed by Assam (74.8 percent) and Telangana (72.9 percent). During the agricultural year July 2012 - June 2013, agricultural activities accounted for more than half of the average monthly income per agricultural household in all the major States except West Bengal, Kerala and Tamil Nadu.

**3.5.3** The share of wage/salary in the average monthly income per agricultural household was highest for West Bengal (53.4 percent) followed by Kerala (44.2 percent) and Tamil Nadu (41.6 percent) whereas, at all India level, income from wage/salary accounted for 32.2 percent of the average monthly income per agricultural household.

**Statement 3.5: Average monthly income (₹) from different sources and consumption expenditure (₹) per agricultural household during July 2012 - June 2013 for major States**

| State            | average monthly income       |                                  |                                         |                                         |                  | average monthly consumption expenditure (₹) |
|------------------|------------------------------|----------------------------------|-----------------------------------------|-----------------------------------------|------------------|---------------------------------------------|
|                  | income from wages/salary (₹) | net receipt from cultivation (₹) | net receipt from farming of animals (₹) | net receipt from non- farm business (₹) | total income (₹) |                                             |
| (1)              | (2)                          | (3)                              | (4)                                     | (5)                                     | (6)              | (7)                                         |

Ref: Summary Table T3

**3.5.4** The average monthly consumption expenditure per agricultural household during July 2012 - June 2013 also showed a wide variation over different States. Punjab reported an average consumption expenditure of ₹ 13311 per household, which was more than two times the all India average (₹ 6223) and just above three times that of Odisha (₹ 4307) which reported the lowest monthly consumption expenditure per agricultural household during the agricultural year July 2012 - June 2013. Kerala (₹ 11008) and Haryana (₹ 10637) were the other two States which reported high average monthly consumption expenditure per agricultural household. Besides Odisha, Chhattisgarh (₹ 4489) and Jharkhand (₹ 4688) were the other two States that reported low average monthly consumption expenditure during the same period.

### 3.6 Productive Assets Owned by the Agricultural Households

**3.6.1** The focus of the survey being the agricultural households, the expenditure made on productive assets is an important aspect while estimating the parameters related to their economic characteristics. These are the assets used repeatedly for the production process by the agricultural households both in farm business and non-farm business. Assets considered for farm business included various agricultural machinery and implements, livestock among others. The immovable assets like land and building were separately accounted for farm business and non-farm business.

**3.6.2** The survey collected information on the expenditure incurred (both by way of purchase and major repair/improvement) on various productive assets used for crop production, livestock activity and also for the household non-farm business during both halves of agricultural year July 2012 - June 2013. Corresponding to each such asset, any receipt earned by the household by way of sale was also reported so as to work out the 'net investment' in productive assets. The survey also collected similar information related to *residential building including land*.

### 3.6.3 Average Monthly Expenditure per Agricultural Household on Productive Assets Used for Farm and Non-farm Business

**3.6.3.1** Statement 3.7 provides the average monthly expenditure incurred on productive assets used in farm and non-farm business per agricultural household during July 2012 - June 2013 for each size class of land possessed. In rural India as a whole, average monthly expenditure incurred per agricultural household on productive assets used for farm and non-farm business (i.e., excluding expenses on '*residential building including land*') during the agricultural year July 2012 - June 2013 was estimated as ₹1087. As shown in Statement 3.6, nearly 93 percent of the average monthly expenditure on productive assets was spent on productive assets used in farm business (agricultural machinery and implements (33 percent), livestock and poultry (18 percent) and other assets in farm business (42 percent)).

**3.6.3.2** Average monthly expenditure incurred on productive assets used in farm business showed a wide variation across the size classes of land possessed ranging from less than one-third of the all India average in the lowest size class (0.01 ha.) of land possessed to more than nine times the all India average in case of agricultural households possessed 10.00 + ha. land.

**Statement 3.6: Percentage distribution of average monthly expenditure (₹) incurred on productive assets used for farm and non-farm business per agricultural household by size class of land possessed during the agricultural year July 2012 - June 2013**

| size class of land possessed (ha.) | percentage distribution of average monthly expenditure incurred on productive assets used in |                                       |                         |             |                    |            |
|------------------------------------|----------------------------------------------------------------------------------------------|---------------------------------------|-------------------------|-------------|--------------------|------------|
|                                    | farm business                                                                                |                                       |                         |             | non- farm business | all        |
|                                    | livestock and poultry                                                                        | agricultural machinery and implements | other productive assets | total       |                    |            |
| (1)                                | (2)                                                                                          | (3)                                   | (4)                     | (5)         | (6)                | (7)        |
| <0.01                              | 66.8                                                                                         | 5.6                                   | 6.5                     | 79.2        | 20.8               | 100        |

Ref: Summary Table T4

**3.6.3.3** Even though the actual expenditure on assets used for non-farm business did not show any notable variation over different size classes of land possessed, their percentage share in the total expenditure on productive assets (farm and non-farm together) steadily decreased from the lowest size class to the highest size class of land possessed ranging from 21 percent to a mere 2 percent. The details are in *Statement 3.6 and Statement 3.7*

**Statement 3.7: Average monthly expenditure (₹) incurred on productive assets used for farm and non-farm business per agricultural household by size class of land possessed during the agricultural year July 2012 - June 2013**

| size class of land possessed (ha.) | average monthly expenditure (₹) incurred on productive assets used in |                                       |                         |             |                    |             |

Ref: Summary Table T4

### 3.6.4 Average monthly expenditure per agricultural household on productive assets by decile classes of MPCE

**3.6.4.1** Expenditure incurred on productive assets used in farm and non-farm business by the agricultural households belonging to the bottom 80 percent in terms of monthly per capita consumption expenditure (MPCE) were reported to be lesser than that of the all India average. The reported expenditure on productive assets for these households during July 2012 - June 2013 ranged from about one-fourth to two-third of the all India average of ₹1087. The corresponding expenditure for the agricultural households belonging to the top decile class was about four times the all India average. However, the variation in percentage share of

expenditure on productive assets used for farm business to the total expenditure, over different decile classes of MPCE did not exhibit any clear pattern unlike in the case of size classes of MPCE. The details are in *Statement 3.8* below.

**Statement 3.8: Average monthly expenditure (₹) incurred on productive assets used for farm and non-farm business per agricultural household by decile class of MPCE during the agricultural year July 2012 - June 2013**

| decile class of MPCE | average monthly expenditure (₹) incurred on productive assets used in |                                       |                         |             |                    |             |
|----------------------|-----------------------------------------------------------------------|---------------------------------------|-------------------------|-------------|--------------------|-------------|
|                      | farm business                                                         |                                       |                         |             | non- farm business | all         |
|                      | livestock and poultry                                                 | agricultural machinery and implements | other productive assets | total       |                    |             |
| (1)                  | (2)                                                                   | (3)                                   | (4)                     | (5)         | (6)                | (7)         |

Ref: Summary Table T5

### 3.6.5 Inter-state variation in Average monthly expenditure per agricultural household on productive assets used in farm and non-farm business

**3.6.5.1** Average monthly expenditure per agricultural household incurred on productive assets used for farm and non-farm business during July 2012 - June 2013 exhibited a wide variation among the major States. The expenditure was as low as less than one-tenth of the all India average in the case of Jharkhand (₹ 99) and as high as more than twelve times in the case of Haryana (₹ 13694). Chhattisgarh, Assam, West Bengal and Bihar were the other States which reported to have incurred the low expenditure on productive assets used in farm and non-farm business during this period. It is worth-while to note that the states of Haryana and Kerala reported very large monthly expenditure on productive assets. However, their major share of expenditure came from the 'other productive assets' used for farm business which *inter alia* included land and building also.

**3.6.5.2** The share of monthly expenditure incurred for productive assets used for non-farm business in the total expenditure on productive assets (excluding 'residential building and land') was 6.8 percent for agricultural households in the rural India as a whole. The share was reportedly highest for Kerala (14.4 percent) followed by Maharashtra (about 13.7 percent) and the share was lowest for Haryana (0.1 percent). The details are in *Statement 3.9*.

**Statement 3.9: Average monthly expenditure (₹) incurred on productive assets used for farm and non-farm business per agricultural household during the agricultural year July 2012 - June 2013 in major States**

| State            | average monthly expenditure incurred on productive assets used in |                                       |                         |             |                    |             |
|------------------|-------------------------------------------------------------------|---------------------------------------|-------------------------|-------------|--------------------|-------------|
|                  | farm business                                                     |                                       |                         |             | non- farm business | all         |
|                  | livestock and poultry                                             | agricultural machinery and implements | other productive assets | total       |                    |             |
| (1)              | (2)                                                               | (3)                                   | (4)                     | (5)         | (6)                | (7)         |

Ref: Summary Table T6

### 3.7 Expenses and Receipts for Crop Production

**3.7.1** While collecting information on various activities performed by the agricultural households during the 365 days prior to the date of survey, about 65 percent of the agricultural households reported crop production (field crops and plantation/orchard crops) as their *principal source of income*<sup>3</sup>. About 48 percent<sup>4</sup> of the estimated average monthly income per agricultural household during the agricultural year July 2012 - June 2013 was also from crop production activities. Hence, item-wise expenses for and receipts from crop production activities is an important aspect of the situation assessment of agricultural households in the country.

**3.7.2** A very detailed item-wise expenditure on each of the agricultural inputs used for crop production was collected in the survey (block 6 of Schedule 33) separately for the two halves of the agricultural year. Even if some expenses were incurred prior to the reference period with regard to the cultivation of crops harvested during the reference period, the same was considered for reporting. However, only the actual expenses (out of the pocket expenses) were considered for reporting under this block. Imputed expenditure against inputs which were not purchased (such as farm saved, received in exchange of goods, borrowed, etc.) was not considered for the purpose of this survey. Instead, uses of all such inputs were reported with zero expenditure. *Since the value of certain critical inputs like family labour, seeds and*

<sup>3</sup> NSS Report No. 569: Some Characteristics of Agricultural Households in India<sup>4</sup> Statement 3.4

manure from own sources etc. were not included in the expenses side, the estimates of receipts from crop production are likely to be over-estimates. The estimates related to crop production presented in this chapter also includes estimates related to agricultural production from plantation/orchard crops.

**3.7.3** The receipts from crop production included value of harvested quantity of crops, pre-harvest sale and value of by-products. The value of harvested quantity was ascertained either by sale price (if some quantity of the produce was sold off during the reference period) or by the existing local market price for the specific crop.

**3.7.4** *Statement 3.10* gives the average monthly expenses and receipts for crop production during the agricultural year July 2012 - June 2013. At all India level, average monthly expenditure on crop production per cultivating agricultural household was estimated as ₹ 2192. Of which, about 24 percent on *fertilizers and manure*, 21 percent on *Human labour* and another nearly 11 percent on *seeds* were spent.

**Statement 3.10: Average monthly expenses and receipts for crop production per cultivating agricultural household for each size class of land possessed (ha.)**

| size class<br>of land<br>possessed<br>(hectares) | average expenses (₹) |                           |                                  |                 |                                             |               |                              |        |        |                               |                   | average<br>receipts<br>(₹) |

\* of machinery and equipment

Ref: Summary Table T7

**3.7.5** Distribution of expenses for crop production for each size classes of land possessed as given in *Statement 3.10* reveals that the share of expenses on ‘seeds’ and *human labour* did not show much variation across different size classes of land possessed. However, it is worthwhile to note that about 11 percent of the total monthly expenditure on crop production by agricultural households possessing less than 0.01 hectares of land was on *interest* against the all India share of about 1 percent. For agricultural households belonging to the remaining size classes of land possessed, estimated share of expenditure on *interest* was less than 2 percent only. The agricultural households of the lowest size class of land possessed (<0.01 ha.) reported to have spent nearly 29 percent of the total expenditure for crop production as rent for land, interest and hiring animal labour where as the all India average share of expenditure on these factors was just about 10 percent of the total expenditure for crop production. The highest share of expenses as lease rent for land (16 percent) was reported by agricultural households possessing 10.00 + ha. of land.

**3.7.6** During the agricultural year July 2012 - June 2013, the average monthly receipts from crop production for the cultivating agricultural households was estimated as ₹ 5542. It included value of harvested products, by-products and value of pre-harvest sale.

### 3.7.7 Inter-State variations in Expenditure and Receipts from Crop Production

**3.7.7.1** A comparison of share of various agricultural inputs in the total average monthly expenditure for crop production for major States as given in *Statement 3.11* shows some interesting results. Among the major States, Gujarat (19.2 percent), Jharkhand (18.9 percent) and Rajasthan (17.6 percent) had the higher share of expenditure on seeds compared to the all India share of 11 percent. States like Kerala, Odisha (4.6 percent) and Punjab (5.4 percent) reported lower share of expenditure on seeds during the agricultural year July 2012 - June 2013.

**Statement 3.11: Percentage distribution of average monthly expenditure for crop production by type of input for major States**

| State            | percentage distribution of average monthly expenditure for crop production by type of input |                     |                            |                     |              |                    |                   | average monthly expenditure (₹) | average monthly receipts (₹) |

\* includes expenditure on irrigation, minor repair and maintenance of machinery and equipments, interest, animal labour, diesel, electricity, cost of hiring machinery, etc.

Ref: Summary Table T8

**3.7.7.2** A little more than one-fourth of the total crop production expenses for Punjab were spent as lease rent for land when the all India average was only 7.2 percent. Andhra Pradesh (19.6 percent), Haryana (11.7 percent) and Odisha (10.2 percent) were the other States with high share of expenditure on lease rent for land. In the case of Maharashtra share of expenditure on lease rent for land was reported to be very negligible at 0.3 percent. Assam (0.6 percent), Rajasthan (1.2 percent) and Jharkhand (1.4 percent) were the other States

which reported very low share of expenditure on lease rent for land out of the total monthly expenditure incurred for crop production activities.

**3.7.7.3** In the case of Kerala, 47.3 percent of the total average monthly expenditure on crop production was spent on *human labour*. West Bengal (35.5 percent), Odisha (29.8 percent) and Assam (28.9 percent) were the other States which reported high share of expenditure on *human labour*.

### **3.8 Expenses and Receipts for Farming of Animals**

**3.8.1** As per the results obtained from the survey, about 72 percent of the agricultural households were engaged in farming of animals during the 365 days prior to the date of survey. At all India level, only about 4 percent of the agricultural households reported this activity as their principal source of income. However, about 23 percent of the agricultural households possessing less than 0.01 hectares of land depended on farming of animals for their principal income during the 365 days prior to the date of survey.<sup>5</sup>

**3.8.2** Information on item-wise disposition of produce, value of outputs for farming of animals during 30 days prior to the date of survey was collected from the surveyed agricultural households during both the visits of the survey. Information on the item wise expenditure incurred during the same period was also collected for inputs used in farming of animals. Based on the common households surveyed during both the visits, average monthly expenditure for and receipts from farming of animals for the agricultural year July 2012 - June 2013 were estimated. *Statement 3.12* provides the percentage distribution of average monthly expenditure on farming of animals per agricultural household engaged in the activity during the agricultural year July 2012 - June 2013. As in the case of crop production, imputed expenses in respect of family labour, animal feed from own sources etc. were not considered for reporting for working out expenses for farming of animals also.

**3.8.3** In rural India as a whole, the average monthly expenditure for farming of animals per agricultural household engaged in farming of animals was estimated as ₹1388 for the agricultural year July 2012 - June 2013. Out of this average monthly expenditure, 77 percent was incurred for *animal feed*.

**3.8.4** Among the major States, estimated average monthly expenditure on farming of animals was highest for Punjab (₹ 3561) followed by Haryana (₹ 3256) and Gujarat (₹ 2399). The lowest average monthly expenditure on farming of animals was reported by Jharkhand (₹283) followed by Chhattisgarh (₹ 491) and Odisha (₹ 501)

\*All other expenses include interest and lease rent for land

<sup>#</sup> for farming of animals

Ref: Summary Table T9

**3.8.5** For all the major States, expenditure on animal feed was the largest component in the average monthly expenditure on farming of animals. The cost of animal seeds (young animals) had a considerable share in the average monthly expenditure for States like Bihar (29.5 percent), Maharashtra (24.6 percent) and West Bengal (23 percent).

**3.8.6** Statement 3.13 provides the percentage distribution of average monthly receipts from farming of animals per agricultural household engaged in the activity by type of livestock product during the agricultural year July 2012 - June 2013. At all India level average monthly receipts from farming of animals per agricultural household was estimated as ₹2604 during the agricultural year July 2012 - June 2013. About 69 percent of the average monthly receipt was derived from production of milk. Sale of live animals had a share of about 18 percent in the total average monthly income from this activity.

**Statement 3.13: Percentage distribution of average monthly receipts from farming of animals per agricultural household engaged in farming of animals by type of livestock product during July 2012 - June 2013 for major States**

\*All other receipts included value of honey, hide, bones, manure etc.

Ref: Summary Table T9

**3.8.7** Among the major States, the highest average monthly income from farming of animals was reported by Haryana followed by Punjab and Gujarat whereas, the lowest average monthly income from this activity was reported by Chhattisgarh.

**3.8.8** Income from production of milk accounted for the major share in the average monthly income from farming of animals for most of the major States. However income from sale of live animals had the highest share in the average monthly income in the case of Jharkhand (94 percent), Odisha (81 percent) Assam (55.7 percent) and Chhattisgarh (41.1 percent).

**3.8.9** Percentage distribution of average monthly expenditure for farming of animals by type of inputs during the period July 2012 - June 2013 for different size classes of land possessed is given in Statement 3.14. The results indicated that expenses on animal feed constituted major share of the average monthly expenditure for farming of animals for agricultural households irrespective of the size of land possessed by them. Labour charges constituted 2.1 percent of the average monthly expenditure at all India level. However, the agricultural households possessing more than 4 hectares of land spent a higher share of expenditure on labour charges compared to the all India average.

Ref: Summary Table T10

### 3.9 Net Receipt from Household Non-Farm Business

**3.9.1** In order to estimate the total monthly income of agricultural households, information on non-agricultural economic activities performed by the agricultural households during the reference period was also collected in the survey. While information on income from wage/salaried employment was collected against each of the members of the agricultural household, detailed expenses and value of output related to non-agricultural entrepreneurial activities performed by the household were recorded activity-wise.

**3.9.2** Statement 3.16 provides the average monthly expenses, receipts and net receipt from non-farm business per agricultural household reporting non-farm business during the period July 2012 - June 2013 for the major States. As per the results obtained from the survey, about 10 percent of the agricultural households were engaged in non-farm business during the agricultural year July 2012 - June 2013.

**3.9.3** Among the major States, Kerala had the highest share of agricultural households engaged in non-farm business with nearly one-fourth of its agricultural households engaged in this activity during the agricultural year July 2012 - June 2013. West Bengal (17.7 percent) and Odisha (15.3 percent) were the other States which had reported high share of agricultural households engaged in non-farm business during the same period. The lowest share of agricultural households performing non-farm business during this period was reported by Chhattisgarh (2.7 percent) followed by Madhya Pradesh (4.5 percent) and Bihar (6.3 percent).

**3.9.4** In rural India as a whole, the monthly average net receipt per agricultural household engaged in non-farm business from the activity was ₹5290 during the period July 2012 - June 2013. The estimated monthly average net receipt from non-farm business was highest for Kerala followed by Tamil Nadu and Rajasthan. The lowest average net receipt was reported by Chhattisgarh followed by Jharkhand and Madhya Pradesh.

**Statement 3.16: Average monthly expenses and receipts per reporting agricultural household from non-farm business for major States during the period July 2012 - June 2013**

| State            | expenses<br>(₹) | receipts<br>(₹) | net receipts<br>(₹) | number per 1000 agricultural<br>households engaged in non-<br>farm business |

Ref: Summary Table T11

**3.9.5** Non-farm business was reported by a slightly higher percentage of households possessing land less than 0.40 hectares compared to the all India average. However, the average net receipt per agricultural household from non-farm business during July 2012 -

June 2013 was reported to be the lowest for the agricultural households belonging to these size classes of land possessed. The details are in Statement 3.17 below.

**Statement 3.17: Average monthly expenses and receipts per agricultural household from non-farm business for each size class of land possessed during the period July 2012 - June 2013**

| size class of land possessed<br>(hectares) | expenses (₹) | receipts<br>(₹) | net receipts<br>(₹) | number per 1000<br>agricultural households<br>engaged in non-farm<br>business |

Ref: Summary Table T12

### 3.10 Indebtedness of Agricultural Households

**3.10.1** Information on the amount of outstanding loan as on date of survey (i.e. the day on which data was collected from the household) was collected from each of the surveyed agricultural households during the first visit. Along with the outstanding amount, information on source and nature of the loan was also collected. In this survey, loans included all kind of outstanding loans irrespective of the purpose for which loans were taken. The survey revealed that about 52 percent of the agricultural households in the rural India were estimated to be indebted at the time of the survey. The average amount of outstanding loan per agricultural household was estimated approximately as ₹47000.

**3.10.2** Statement 3.18 provides the average amount of outstanding loan per agricultural household and percentage of indebted agricultural households for each size class of land possessed. At all India level, the percentage of indebted agricultural households increased with size class of land possessed between 41.9 percent in the lowest size class of land possessed and 78.7 percent among agricultural households possessing 10.00 + ha. land. The average amount of outstanding loan also increased with the size class of land possessed except for the lowest size class (<0.01 ha.) where the average outstanding loan amount was slightly higher than that of the next lowest size class of land possessed.

**Statement 3.18: Percentage of indebted agricultural households and average amount (₹ 00) of outstanding loans per agricultural household for each size class of land possessed**

| size class of land possessed | average amount (₹ 00) of outstanding loan per agricultural household | percentage of indebted agricultural households | estimated number of agricultural households (00) |
|------------------------------|----------------------------------------------------------------------|------------------------------------------------|--------------------------------------------------|
| (1)                          | (2)                                                                  | (3)                                            | (4)                                              |

Ref: Summary Table T13 and T14

**3.10.3** Among the major States, Andhra Pradesh had the highest share of indebted agricultural households in the country (92.9 percent) followed by Telangana (89.1 percent) and Tamil Nadu (82.5 percent). Assam (17.5 percent), Jharkhand (28.9 percent) and Chhattisgarh (37.2 percent) were the major States with lower share of indebted agricultural households. The details are in Statement 3.19

**Statement 3.19: Average amount (₹ 00) of outstanding loan per agricultural household by size classes of land possessed for major States**

Ref: Summary Table T13

**3.10.4** The average amount of outstanding loan was the highest for Kerala followed by Andhra Pradesh and Punjab. Assam followed by Jharkhand and Chhattisgarh were the States with lowest amount of average outstanding loan at the time of the survey.

**3.10.5** In general, the agricultural households belonging to the higher size classes of land possessed (say, possessing 2.01 hectares or more land) had higher average outstanding loan compared to those belonged to the lower size classes of land possessed for all major States, except for a few cases .

**3.10.6** The level of indebtedness among the agricultural households belonging to the lowest size class of land possessed (i.e. possessing less than 0.01 hectares of land), which also included the landless agricultural households, has significance in the situation assessment of agricultural households due to their lower level of income, increased dependence on wage/salary employment as the principal source of income, etc. Among the agricultural households in the lowest size class of land possessed, the largest amount of outstanding loan was reported by agricultural households in Andhra Pradesh followed by Rajasthan and Kerala.

### 3.10.7 Source of loans

**3.10.7.1** Statement 3.20 gives the per 1000 distribution of outstanding loan amount by source of loans for different size classes of land possessed. At all India level, about 60 percent of the outstanding loans were taken from institutional sources<sup>6</sup> which included Government (2.1 percent), Co-operative society (14.8 percent) and banks (42.9 percent). Among the non-institutional sources, 'agricultural/professional money lenders (25.8 percent) had the major share in terms of outstanding loans.

**Statement 3.20: Per 1000 distribution of outstanding loans by sources of loan taken for each size class of land possessed**

| size class of<br>land possessed | per 1000 distribution of loans by sources of loan amount |                             |      |                           |                                                  |                             |                           |        |      | average<br>amount<br>(₹ 00) of<br>outstanding<br>loans per<br>agricultural<br>household |

Ref: Summary Table T14

**3.10.7.2** It may be seen from Statement 3.20 that the share of institutional loans increases with increase in the size of land possessed. For the agricultural households belonged to the lowest size class of land possessed (i.e. possessing less than 0.01 hectares of land), only about 15 percent of the outstanding loans were from institutional sources (government, co-operative society, bank), whereas the share was about 79 percent for the households belonging to the highest size class of land possessed (i.e. possessing 10.00 + hectares of land).

<sup>6</sup> In case of formal employment, loan from employer can be treated as institutional. Since information was not collected in such details, the entire source 'employer/landlord' is treated as 'non-institutional' for the purpose of this report.

**3.10.7.3** Figure 8 gives the percentage of outstanding loans which were taken from the institutional sources for major States. Kerala, where about 90 percent of the outstanding loans were reported to have taken from the institutional sources, had the highest share of institutional loans among the major States followed by Gujarat (79.2 percent) and Maharashtra (76.5 percent). Jharkhand reported the lowest share of institutional sources in the total outstanding loans, with 28 percent, followed by Bihar (28.9 percent) and Telangana (34.5 percent). (Refer Summary Table T15 at the end of this Chapter).

**3.10.7.4** Per 1000 distribution of outstanding loans by source of loan taken by agricultural households with different principal sources of income is given in *Statement 3.21*. Agricultural households whose principal source of income was reported as livestock activity had the lowest share of institutional sources in the total outstanding loans at the time of the survey.

**Statement 3.21: Per 1000 distribution of outstanding loans by sources of loan taken for each principal source of income**

| source of principal income   | per 1000 distribution of loans by source of loan |                      |            |                   |                                        |                   |                     |           |             |
