प्रस्तावना

राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय के शिक्षा सम्बंधी सामाजिक उपभोग सर्वेक्षण देश के शिक्षा परिदृश्य के विभिन्न संकेतकों जैसे कि साक्षरता दर, उपस्थिति अनुपात, छात्रों को मिलने वाले विभिन्न प्रोत्साहन योजनाओ, शिक्षा पर व्यय, आदि के आंकड़ों के प्रमुख स्रोत हैं । इनका उपयोग आयोजना, नीति-निर्माण और निर्णय लेने में तथा विभिन्न सरकारी संगठनों, शिक्षाविदों, शोधकर्ताओं और विद्वानों द्वारा आगे विश्लेषणात्मक अध्ययन मे इनपुट के रूप में उपयोग किया जाता है ।

2. राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय ने अपने 71वें दौर (जनवरी-जून 2014) के सर्वेक्षण के एक भाग के रूप में, इस विषय पर ऐसे सर्वेक्षणों की श्रृंखला में नवीनतम, "सामाजिक उपभोगः शिक्षा," पर एक राष्ट्रव्यापी सर्वेक्षण किया । राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय ने विगत वर्षो में इन्ही विषयों पर सर्वेक्षण, 35वें दौर (जुलाई 1980-जून 1981), 42वें दौर (जुलाई 1986-जून 1987), 52वें दौर (जुलाई 1995-जून 1996) तथा 64वें दौर (जुलाई 2007-जून 2008) में किये । सभी राज्य सरकारों तथा संघ राज्य क्षेत्र (अण्डमान एवं निकोबार द्वीप समूह, चण्डीगढ़, दादर एवं नगर हवेली तथा लक्षद्वीप को छोड़कर) ने भी कम से कम समान प्रतिदर्श आकार के आधार पर सर्वेक्षण कार्यक्रम में भाग लिया ।

3. राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय का यह सतत प्रयास रहा है कि उपयोगकर्ताओं की अपेक्षाओं को पूरा करने के लिए, शीघ्रातिशीघ्र अपने सर्वेक्षण परिणामों को प्रकाशित कर दिया जाए । इस उद्देश्य को ध्यान में रखते हुए तथा सर्वेक्षण के प्रमुख परिणामों को उपलब्ध कराने हेतू, विस्तृत रिपोर्ट जारी करने से काफी पहले, राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय ने सर्वेक्षण के प्रमुख परिणाम "भारत में सामाजिक उपभोग के मुख्य संकेतकः शिक्षा" प्रकाशित किये तथा साथ ही जून, 2015 में इकाई स्तरीय आंकड़े जारी किए । वर्तमान रिपोर्ट शीर्षक " भारत में शिक्षा" अधिक विस्तार में सर्वेक्षण के निष्कषो की एवं समान विषयों पर पूर्ववर्ती राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय सर्वेक्षण परिणामों की, यथोचित, सामयिक तुलना प्रस्तुत करती है । इस रिपोर्ट में छह अध्याय तथा तीन परिशिष्ट हैं । चूंकि यह भारी-भरकम है, प्रयोक्ताओं की सुविधा के लिए इस रिपोर्ट के साथ विस्तृत तालिकाएं सीडी में दी गई हैं ।

4. सर्वेक्षण अभिकल्प तथा अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति, सर्वेक्षण-साधन विकसित करने तथा यह रिपोर्ट तैयार करने का कार्य किया । क्षेत्र संकार्य प्रभाग (एफओडी) ने क्षेत्र कार्य किया । आंकड़ा विधायन तथा सारणीयन का कार्य समंक विधायन प्रभाग (डीपीडी) ने किया । समन्वय एवं प्रकाशन प्रभाग (सीपीडी) ने सर्वेक्षण संबंधी विभिन्न कार्यकलापों में समन्वयन का कार्य किया ।

5. मैं सर्वेक्षण के विभिन्न चरणों में बहुमूल्य मार्गदर्शन प्रदान करने हेतु राष्ट्रीय प्रतिदर्श सर्वेक्षण के 71वें दौर के कार्य दल एवं राष्ट्रीय सांख्यिकीय आयोग (एनएससी) के अध्यक्ष और सदस्यों का अत्यंत आभारी हूँ। मैं इस रिपोर्ट को तैयार करने में शामिल एनएसएसओ के विभिन्न प्रभागों के अधिकारियों द्वारा किये गये प्रयासों की भी सराहना करता हूँ ।

6. मैं आशा करता हूँ कि यह रिपोर्ट योजनाकारों, नीति-निर्माताओं, शिक्षाविदों और शोधकर्ताओं के लिए उपयोगी सिद्ध होगी। इस रिपोर्ट की विषयवस्तु, अभिन्यास अथवा रिपोर्ट के किसी अन्य पहलू में सुधार के लिये सुझावों का स्वागत है।

स. मल्लिक 10/3/16

(समीरन मल्लिक)
महानिदेशक तथा मुख्य कार्यकारी अधिकारी
राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय

नई दिल्ली
मार्च, 2016

Preface

The surveys on Social Consumption relating to Education, conducted by the National Sample Survey Office (NSSO), are the primary sources of data on various indicators on education scenario of the country, like literacy rates, attendance ratios, incentives received by the students, expenditure incurred for the purpose of education, etc.. These are used for planning, policy formulation, and decision support and as input for further analytical studies by various Government organizations, academicians, researchers and scholars.

2. National Sample Survey Office (NSSO) conducted a nation-wide survey on 'Social Consumption: Education', latest in the series of such surveys on this subject, as a part of its 71st round (January-June 2014) survey. The previous NSS rounds during which surveys on similar subject were taken up, are 35th round (July 1980-June 1981), 42nd round (July 1986-June 1987), 52nd round (July 1995-June 1996) and 64th round (July 2007-June 2008). All the State Governments and Union Territories (except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep) also participated in the survey programme with at least equal matching sample size basis.

3. It has been the persistent endeavour of NSSO to bring out its survey results at the earliest to meet the requirement of its data users. With this aim in mind and with a view to make available the salient results of the survey, well in advance of the release of its detailed report, NSSO brought out 'Key Indicators of Social Consumption in India: Education' containing the key results of the survey and also disseminated the unit level data in June, 2015. The present report titled "Education in India" presents the survey findings in more detail, with temporal comparison with results of earlier NSSO surveys on similar subjects, wherever appropriate. The report is organized in six chapters and three appendices. Detailed tables have been given in a CD, along with this report, to facilitate users' convenience.

4. Survey Design and Research Division (SDRD) undertook the development of survey instruments and the preparation of this document. Field work of the survey was carried out by the Field Operations Division (FOD) and the data processing and tabulation work was done by the Data Processing Division (DPD). Coordination and Publication Division (CPD) coordinated various activities pertaining to the survey.

5. I am highly thankful to the Chairman and Members of the Working Group for NSS 71st round and National Statistical Commission (NSC) for providing their valuable guidance at various stages of the survey. I would also like to appreciate efforts made by the officers of the different Divisions of NSSO involved in preparation of this document.

6. I hope this report will be useful to planners, policy makers, academicians and researchers. Suggestions for improvement in content, layout and other aspects of this document will be highly appreciated.

National Sample Survey Office

विशेषताएं

एन.एस.एस. के 71 वें दौर (जनवरी- जून 2014) में 'सामाजिक उपभोग: शिक्षा' पर एक सर्वेक्षण किया गया । सम्पूर्ण भारत में 4577 ग्रामों से 36479 ग्रामीण परिवारों एवं 3720 खण्डों से 29447 नगरीय परिवारों का सर्वेक्षण किया गया ।

सर्वेक्षण के निष्कर्षो के मुख्य बिन्दु नीचे दिए गए हैं -

I. परिवार की रूपरेखा

- अखिल भारतीय स्तर पर औसत परिवार आकार 4.45 था (ग्रामीण क्षेत्रों में 4.63 एवं नगरीय क्षेत्रों में 4.08)।
- प्रति परिवार 5-29 वर्षीय व्यक्तियों की औसत संख्या 2.04 थी (ग्रामीण क्षेत्रों में 2.15 एवं नगरीय क्षेत्र में 1.79) ।
- प्रति परिवार वर्तमान में शिक्षा ग्रहण कर रहे 5-29 वर्षीय व्यक्तियों की औसत संख्या 1.14 थी, (ग्रामीण क्षेत्र में 1.21 एवं नगरीय क्षेत्र में 1.00)।

[सारणी 1, परिशिष्ट ए]

II. साक्षरता दर

- भारत में (5 वर्ष एवं उससे अधिक उम्र के व्यक्तियों के लिए) साक्षरता दर 76% थी । ग्रामीण क्षेत्रों में साक्षरता दर 71% थी तथा नगरीय क्षेत्रों में 86% थी ।
- पुरुषों एवं महिलाओं के बीच साक्षरता दर में अन्तर (5 वर्ष एवं उससे अधिक उम्र), महिला साक्षरता दर (68%) के मुकाबले पुरुष साक्षरता दर अधिक (83%) के रूप में पाया गया ।

[कथन 3.1]

III. विभिन्न आयु वर्ग के लिए जनसंख्या का पूर्ण शैक्षणिक स्तर

- 15 वर्ष एवं उससे अधिक आयु के ग्रामीण व्यक्तियों के उच्चतम शैक्षणिक स्तर के प्रतिशत वितरण में 35% साक्षर नहीं थें, 23% प्राथमिक स्तर, 17% उच्चतर प्राथमिक स्तर, 20% माध्यमिक एवं उच्चतर माध्यमिक स्तर, तथा 4% स्नातक एवं उससे अधिक स्तर तक साक्षर थे। 15 वर्ष एवं उससे अधिक आयु के नगरीय व्यक्तियों के उच्चतम शैक्षणिक स्तर के प्रतिशत वितरण में 16% साक्षर नहीं थे, 17% प्राथमिक स्तर, 16% उच्चतर प्राथमिक स्तर, 30% माध्यमिक एवं उच्चतर माध्यमिक स्तर तथा 18% स्नातक एवं उससे अधिक स्तर तक साक्षर थे।

[कथन 3.3]

IV. सबसे नजदीक प्राथमिक, उच्च प्राथमिक एवं माध्यमिक विद्यालय से दूरी

- ग्रामीण क्षेत्रों में 94% एवं नगरीय क्षेत्रों में, करीब 93% परिवारों ने अपने घर से 1 कि.मी. की सीमा के अन्दर प्राथमिक विद्यालय की उपलब्धता बताई ।

- करीब 67% ग्रामीण परिवार एवं 83% नगरीय परिवारों ने अपने घर से 1 कि.मी. की सीमा के भीतर उच्चतर प्राथमिक विद्यालय की उपलब्धता दर्ज करवाई जबकि 73% नगरीय परिवारों की तुलना में केवल 37% ग्रामीण परिवारों ने इतनी ही दूरी के अन्तर्गत माध्यमिक विद्यालय की उपलब्धता बताई ।

[रेखा चित्र 3.5]

V. 5 - 29 वर्षीय आयु वर्ग में व्यक्तियों का उपस्थिति स्तर

- 5 - 29 वर्षीय आयु वर्ग में ग्रामीण क्षेत्रों में 59% पुरुष एवं 53% महिलाओं ने वर्तमान में शैक्षणिक संस्थान में उपस्थिति दर्ज करवायी ।
- नगरीय क्षेत्रो में यह प्रतिशत पुरुषों एवं महिलाओं के लिए क्रमश: 57% एवं 55% था ।

[कथन 3.8]

VI. उपस्थिति अनुपात

- ग्रामीण एवं नगरीय क्षेत्रों में पुरुषों एवं महिलाओं, दोनों के लिए प्राथमिक स्तर पर सकल उपस्थिति अनुपात (जी.ए.आर.) करीब 100% था ।
- उच्चतर प्राथमिक स्तर पर जीएआर पुरुषों के लिए 92% (ग्रामीण क्षेत्रों 91% एवं नगरीय क्षेत्रों में 93%) एवं महिलाओं के लिए 88% (दोनों ग्रामीण एवं नगरीय क्षेत्रों में) था ।
- माध्यमिक स्तर पर, पुरुषों (ग्रामीण में 86% एवं नगरीय क्षेत्रों में 90%) एवं महिलाओं (ग्रामीण क्षेत्रों में 84% एवं नगरीय क्षेत्रों में 94%) दोनों के लिए जीएआर 87% था ।
- भारत में कुल उपस्थिति अनुपात (एनएआर) ग्रामीण एवं नगरीय क्षेत्रों में बिना किसी प्रमुख अन्तर के प्राथमिक स्तर पर पुरुषों के लिए 84% एवं महिलाओं के लिए 83 % था ।
- पुरुषों एवं महिलाओं दोनों के लिए उच्चतर प्राथमिक स्तर पर एनएआर, ग्रामीण एवं नगरीय क्षेत्रों में अधिक भिन्नता के बिना क्रमश: 64% एवं 62% था ।
- माध्यमिक स्तर पर एन.ए.आर. पुरुषों के लिए 52% (ग्रामीण क्षेत्रों में 51% एवं नगरीय क्षेत्रों में 56%) एवं 51% महिलाओं के लिए (नगरीय क्षेत्रों में 59% के मुकाबले ग्रामीण में 49%) ।
- 18-23 वर्षीय आयु वर्ग के लिए आयु-विशिष्ट उपस्थिति अनुपात पुरुषों एवं महिलाओं के लिए क्रमश: 35% एवं 28% था ।

[कथन 4.1a, 4.2a एवं 4.3a]

VII. शिक्षा के प्रकार के अनुसार छात्रों[1] की वर्तमान उपस्थिति

- 95% छात्र सामान्य शिक्षा एवं शेष बचे व्यवसायिक/तकनीकी शिक्षा ग्रहण कर रहे थे ।
- सामान्य शिक्षा ग्रहण करने में महिला छात्राओं का प्रतिशत (98% ग्रामीण क्षेत्रों में एवं 93% नगरीय क्षेत्रों में) पुरुषों के मुकाबले कुछ अधिक पाया गया (96% ग्रामीण क्षेत्रों में एवं 89% नगरीय क्षेत्रों में) ।
- 15-29 वर्ष के आयु वर्ग के व्यक्तियों में जिन्होंने वर्तमान में प्राथमिक अथवा उसके ऊपर के स्तर के पाठ्यक्रम में उपस्थिति दर्ज करवाई थी, 85% सामान्य शिक्षा में थे ।

[कथना 4.5a एवं 4.5b]

[1] 5-29 वर्ष के आयु वर्ग के व्यक्ति जो वर्तमान में प्राथमिक एवं उपरी स्तर के लिए कोई कोर्स कर रहे हैं वह छात्र हैं ।

VIII. पाठ्यक्रम के प्रकार के अनुसार उपस्थिति

- सामान्य शिक्षा ग्रहण करने वाले पुरुष छात्रों एवं महिला छात्राओं में क्रमशः 46% एवं 54% मानविकी विषय, 35% एवं 28% विज्ञान विषय तथा 20% एवं 28% वाणिज्य विषय की शिक्षा ग्रहण कर रहे थे ।
- तकनीकी/व्यवसायिक शिक्षा ग्रहण करनेवाले पुरुष छात्रों एवं महिला छात्रों में क्रमशः 46% एवं 29% इंजीनियरिंग पढ़ रहे थे और 4% एवं 14% चिकित्सा शास्त्र (जिसमें नर्सिंग शामिल है) की शिक्षा ग्रहण कर रहे थे ।

[रेखा चित्र 4.7a एवं 4.7b]

IX. संस्था का प्रकार

- ग्रामीण क्षेत्रों में, 72% छात्र प्राथमिक स्तर पर, 76% उच्च प्राथमिक स्तर पर एवं 64% माध्यमिक एवं उच्चतर माध्यमिक स्तरपर सरकारी संस्थानों में शिक्षा ग्रहण कर रहे थे । जबकि नगरीय क्षेत्रों में, प्राथमिक स्तर पर 31%, उच्चतर प्राथमिक स्तर तथा माध्यमिक एवं उच्चतर माध्यमिक स्तरों पर 38% छात्रों ने सरकारी संस्थानों में उपस्थिति दर्ज करवायी ।

[कथन 4.7]

- ग्रामीण क्षेत्रों से 29% एवं नगरीय क्षेत्रों से 23% छात्र व्यवसायिक/तकनीकी पाठ्यक्रम हेतु सरकारी संस्थानों से शिक्षा ग्रहण कर रहे थे, जबकि गैर-सहायता प्राप्त निजी संस्थानों में ऐसे छात्रों का प्रतिशत क्रमशः 48% एवं 50% था ।

[कथन 4.8]

X. मुफ्त शिक्षा प्राप्त करने वाले छात्र

- भारत में प्राथमिक एवं उच्चतर प्राथमिक स्तरों पर करीब 60% विद्यार्थी (70% ग्रामीण क्षेत्रों में एवं 30% नगरीय क्षत्रों में) मुफ्त शिक्षा प्राप्त कर रहे थे ।
- माध्यमिक एवं उच्चतर माध्यमिक स्तरों पर 40% छात्र ग्रामीण क्षेत्रों से एवं 22% नगरीय क्षेत्रों से मुफ्त शिक्षा प्राप्त कर रहे थे ।
- ग्रामीण एवं नगरीय क्षेत्रों से क्रमशः 94% एवं 89% छात्र प्राथमिक स्तर पर सरकारी संस्थानों में मुफ्त शिक्षा प्राप्त कर रहे थे । उच्चतर प्राथमिक स्तर पर तदानुरुप आकड़े क्रमश: 89% एवं 80% थे ।
- ग्रामीण एवं नगरीय क्षेत्रों में निजी गैर-सहायता प्राप्त संस्थानों में प्राथमिक एवं उच्चतर प्राथमिक स्तरों पर मुफ्त शिक्षा प्राप्त करने वाले छात्रों का प्रतिशत बहुत नगण्य था (करीब 1-2%) ।

[कथन 4.13 एवं रेखा चित्र 4.10R एवं 4.10U]

XI. विभिन्न प्रोत्साहन प्राप्त विद्यार्थी

- सरकार एवं अन्य स्रोतों से प्राथमिक स्तर पर 56% विद्यार्थियों (66% ग्रामीण में एवं 28% नगरीय क्षेत्रों में) को मुफ्त पाठ्य पुस्तकें एवं 63% (72% ग्रामीण क्षेत्रों में एवं 33% नगरीय क्षेत्रों में) छात्रों को मिड-डे मील प्राप्त हुआ ।

- उच्चतर प्राथमिक स्तर पर, उन विद्यार्थियों का प्रतिशत जिन्हें मुफ्त पाठ्य पुस्तकें एवं मिड-डे मील प्राप्त हुआ क्रमश: 54% (ग्रामीण क्षेत्रों में 63% एवं नगरीय क्षेत्रों में 30%) एवं 62% (ग्रामीण क्षेत्रों में 70% एवं नगरीय क्षेत्रों में 37%) था ।

[कथन 4.15]

XII. निजी कोचिंग

- भारत में 26% विद्यार्थी (27% पुरुष एवं 24% महिलाएं) शिक्षा के सभी स्तरों पर निजी कोचिंग प्राप्त कर रहे थे ।
- संयुक्त रूप से माध्यमिक एवं उच्च माध्यमिक स्तर पर निजी कोचिंग लेने की घटना अधिकतम थी । (38% पुरूष छात्र एवं 35% महिला छात्राएं)

[सारणी S4.6a एवं सारणी 29, परिशिष्ट ए*]*

XIII. शिक्षा पर निजी व्यय

- वर्तमान शैक्षणिक सत्र के दौरान प्रति विद्यार्थी द्वारा किया गया/या किया जाने वाला औसत व्यय सामान्य शिक्षा के लिए करीब ₹6788, तकनीकी/पेशेवर (व्यवसायिक को छोड़कर) शिक्षा के लिए ₹62841 एवं पेशेवर शिक्षा के लिए ₹27676 था ।

[रेखा चित्र 4.13]

- सामान्य शिक्षा :

प्राथमिक	-	₹4610 (ग्रामीण - ₹ 2811, नगरीय - ₹10083)
उच्चतर प्राथमिक	-	₹5386 (ग्रामीण - ₹3242, नगरीय - ₹11446)
माध्यमिक	-	₹ 7459 (ग्रामीण - ₹5100, नगरीय - ₹13547)
उच्चतर माध्यमिक	-	₹12619 (ग्रामीण - ₹9031, नगरीय - ₹20179)
स्नातक	-	₹13478 (ग्रामीण - ₹11527, नगरीय -₹16771)
स्नातकोत्तर एवं ऊपर	-	₹15999 (ग्रामीण- ₹14604, नगरीय- ₹17744)

[कथन 4.18]

- वर्तमान शैक्षणिक सत्र में सामान्य शिक्षा ग्रहण करने वाले प्रति विद्यार्थी का औसत व्यय :
    - ₹10623 निजी गैर-सहायता प्राप्त संस्थानों में एवं ₹1111 सरकारी संस्थानों में प्राथमिक स्तर पर था ।
    - उच्चतर प्राथमिक स्तर पर, औसत व्यय की विभिन्नता, ₹1869 सरकारी संस्थानों से निजी गैर-सहायता प्राप्त संस्थानों में ₹13808 थी ।
    - माध्यमिक स्तर पर सरकारी संस्थानों का औसत व्यय ₹3724 था जबकि निजी गैर-सहायता प्राप्त संस्थानों में ₹15785 था ।
    - उच्चतर माध्यमिक स्तर पर निजी गैर सहायता प्राप्त संस्थानों का व्यय, सरकारी संस्थानों की तुलना में 3 गुणा अधिक था ।

[सारणियां S4.8a एवं S4.8b]

- वर्तमान शिक्षा सत्र में सरकारी संस्थानों में चिकित्सा की पढ़ाई हेतु औसत व्यय ₹64968, ₹90205 निजी सहायता प्राप्त एवं ₹118657 निजी गैर सहायता प्राप्त संस्थानों में था । इंजिनियरिंग

पाठ्यक्रम के लिए, यह व्यय सरकारी, निजी सहायता प्राप्त एवं निजी गैर-सहायता प्राप्त संस्थानों के लिए क्रमश: ₹42401, ₹69696 एवं ₹78227 था ।

[कथन 4.23]

- सामान्य शिक्षा के लिए करीब 46% एवं तकनीकी शिक्षा के लिए 73% व्यय कोर्स फीस हेतु था।

[सारणियां 38 एवं 39, परिशिष्ट ए]

- उन विद्यार्थियों/छात्रों के लिए जो सामान्य शिक्षा ग्रहण कर रहे थे, 15% निजी कोचिंग पर खर्च हुआ तथा तकनीकी/पेशेवर शिक्षा (व्यवसायिक शामिल) ग्रहण करने वाले छात्रों के लिए यह प्रतिशत 3% ही था ।

[सारणियां 38 एवं 39, परिशिष्ट ए]

XIV. गैर-नामांकन एवं अनियमित शिक्षा

- प्राथमिक स्तर शिक्षा पूरी होने के बाद, नामांकित व्यक्तियों में से 37% पुरुषों एवं 39% महिलाओं (5-29 वर्ष) ने अपनी पढ़ाई छोड़ दी ।

[कथन 5.2]

- उच्च प्राथमिक एवं उससे उपर विद्यालय शिक्षा के प्रत्येक पुर्ण स्तर हेतु 50% से अधिक नामांकित व्यक्तियों (5-29 वर्ष), महिला एवं पुरुष दोनों, ने आगे अपनी पढ़ाई जारी नहीं रखी ।

[कथन 5.2]

- भारत में 5-29 वर्ष के आयु वर्ग के व्यक्तियों का पढ़ाई छोड़ देना/आगे न पढ़ने का प्रतिशत करीब 33% ग्रामीण क्षेत्रों में एवं 38% नगरीय क्षेत्रों में था ।

[कथन 5.5]

- भारत में ग्रामीण क्षेत्रों में 5-29 वर्ष की आयु के व्यक्तियों का करीब 11% एवं 6% नगरीय क्षेत्रों के व्यक्तियों का किसी शैक्षिक संस्थान में नामांकन नहीं हुआ ।

[कथन 5.5]

- 5-29 वर्ष के पुरुषों के लिए आर्थिक क्रियाकलापों में व्यस्तता पढ़ाई छोड़ने का सबसे समान्य/आम कारण (ग्रामीण क्षेत्रों में 30% एवं नगरीय क्षेत्रों में 34%) था, जबकि उसी आयु-वर्ग की महिलाओं (ग्रामीण क्षेत्रों में 33% एवं नगरीय क्षेत्रों में 23%) के लिए, घरेलु क्रियाकलापों में व्यस्त रहना ही प्रमुख कारण था ।

[कथन 5.7]

- ग्रामीण क्षेत्रों में 5-29 वर्ष के व्यक्तियों के लिए गैर-नमांकन का मुख्य कारण 'शिक्षा में रुचि नहीं होना' (पुरुष 33% एवं महिला 27%) था, जबकि नगरीय क्षेत्रों में, करीब 33% पुरुष एवं 30% महिलाओं का 'आर्थिक बाधाओं' की वजह से नामांकन नहीं हुआ ।

[कथन 5.8]

XV. कम्पयूटर एवं इन्टरनेट की उपलब्धता

- करीब 6% ग्रामीण एवं 29% नगरीय परिवारों के पास कम्प्यूटर था ।

[कथन 6.8]

- भारत में, उन परिवारो में जहां कम से कम एक सदस्य की आयु 14 वर्ष एवं उससे अधिक है, करीब 27% के पास सर्वेक्षण वर्ष,2014 में इन्टरनेट की उपलब्धता थी । ये अनुपात ग्रामीण परिवारों के लिए 16% एवं नगरीय परिवारों के लिए 49% था ।

[कथन 6.1]

- 14-29 वर्ष के व्यक्तियों में करीब 18% ग्रामीण एवं 49% नगरीय क्षेत्रों में कम्प्यूटर चलाने में सक्षम थे ।

[कथन 6.2]

Highlights

A survey on 'Social Consumption: Education' was conducted in NSS 71st round (January-June 2014). A sample of 36479 rural households from 4577 villages and 29447 urban households from 3720 blocks was surveyed all over India.

Highlights of the findings of the survey are given below:

I. Household profile

- At all-India level average household size was 4.45 with 4.63 in rural areas and 4.08 in urban areas.
- Average no. of persons aged 5-29 years per household was 2.04 (2.15 in rural and 1.79 in urban areas)
- Average no. of currently attending persons aged 5-29 years per household was 1.14 (1.21 in rural and 1.00 in urban areas)

[Table1, Appendix A]

II. Literacy rates

- Literacy rate among persons (aged 5 years and above) in India was 76%. In rural areas, literacy rate was 71% compared to 86% in urban areas.
- Difference in literacy rate among males and females (aged 5 years and above) was observed with male literacy rate higher (83%) than female literacy rate (68%).

[Statement 3.1]

III. Completed educational level of population for different age-groups

- Percentage distribution of rural persons of ages 15 years & above by highest completed levels of education: 35% were not literate, 23% were literates up to primary, 17% were of level upper primary, 20% were of levels secondary and higher secondary and 4% were graduate & above.
- Percentage distribution of urban persons of age 15 years & above by highest completed level of education: 16% were not literate, 17% were literates up to primary, 16% were of level upper primary, 30% were of level secondary and higher secondary and 18% were graduate & above.

[Statement 3.3]

IV. Distance to nearest primary, upper primary and secondary school

- In rural areas 94% of households and in urban areas, nearly 93% of households reported availability of primary school within 1 km from the house.
- Nearly 67% of rural households and 83% of urban households reported upper primary schools within 1 km from the house while only 37% of rural households compared to 73% of urban households reported secondary schools within such a distance.

[Figure 3.5]

V. Attendance status of persons in age-group 5-29 years

- In rural areas 59% of males and 53% of females in the 5-29 years age-group were currently attending educational institution.
- In urban areas these percentages were 57% and 55% respectively for males and females.

[Statement 3.8]

VI. Attendance ratios

- Gross Attendance Ratio (GAR) at primary level was nearly 100% for both males and females in rural and urban areas.
- GARs at upper primary level were 92% for males (91% in rural and 93% in urban) and 88% for females (in both rural and urban).
- At secondary level, GAR were 87% for both males (86% in rural and 90% in urban areas) and females (84% in rural areas compared to 94% in urban areas).
- Net Attendance Ratios (NAR) in India at primary level were 84% for males and 83% for females without any major differences in rural and urban areas.
- NARs at upper primary level for males and females were 64% and 62% respectively without much variation over rural and urban areas.
- At secondary level NARs were 52% for males (51% in rural and 56% in urban) and 51% for females (49% in rural compared to 59% in urban areas).
- Age-specific Attendance Ratios in the age-group 18-23 years for males and females were respectively 35% and 28%.

[Statements 4.1a, 4.2a and 4.3a]

VII. Current attendance of students[1] by type of education

- 95% of students were in general education and remaining were in technical/professional education.
- Percentages of female students pursuing general education (98% in rural and 93% in urban areas) was slightly more than corresponding male percentages (96% in rural and 89% in urban).
- Among persons in age-group 15-29 years who were currently attending any course at primary and above levels, 85% of them were in general education.

[Statements 4.5a, 4.5b]

VIII. Attendance by type of courses

- Among the male students pursuing general education, 46% were pursuing humanities compared to 54% of the female students, 35% of the male students were pursuing science compared to 28% female students and 20% of the male students were pursuing commerce compared to 18% of female students.
- Among the male students pursuing technical/professional education, 46% were pursuing engineering compared to 29% among the female students and 4% of the male students were pursuing medicine (which includes nursing) compared to 14% of the female students.

[Figures 4.7a & 4.7b]

[1] *Students are persons in the age-group 5-29 years and currently attending any course at primary & above levels*

IX. Type of institution

- In rural areas, 72% of the students at primary level, 76% at upper primary level and 64% at secondary & higher secondary level attended Government institutions, while in urban areas, 31% at primary level, 38% at upper primary level and also at secondary & higher secondary levels attended Government institutions.

[Statement 4.7]

- 29% of students from rural areas and 23% of students from urban areas, pursuing technical/professional courses, were attending government institutions, whereas percentages of such students attending private unaided institutions were 48% in rural and 50% in urban areas.

[Statement 4.8]

X. Students receiving free education

- At primary and upper primary levels nearly 60% students (70% in rural areas and 30% in urban areas) were getting free education in India.
- At secondary and higher secondary levels, 40% of students from rural areas and 22% from urban areas were getting free education.
- 94% and 89% of students studying in government institutions at primary level respectively from rural and urban areas were getting free education. At upper primary levels, corresponding figures were 89% and 80% respectively.
- Percentage of students studying in private unaided institutions and receiving free education at primary and upper primary levels were very negligible (around 1-2%) in both rural and urban areas.

[Statement 4.13 and Figures 4.10R& 4.10U]

XI. Students received various Incentives

- At primary level 56% of students (66% in rural and 28% in urban areas) got free text books and 63% (72% in rural and 33% in urban) got mid-day meal from government and other sources.
- At upper primary level, the percentages of students who got free text books and mid-day meal were 54% (63% in rural and 30% in urban) and 62% (70% in rural and 37% in urban) respectively.

[Statement 4.15]

XII. Private coaching

- 26% of students (27% of males and 24% of females) were taking private coaching in India combining all levels of education.
- Incidence of taking private coaching was maximum at secondary and higher secondary levels combined. (38% of male students and 35% of female students)

[Tables S4.6a & Table 29, Appendix A]

XIII. Private expenditure on education

- Average expenditure (₹) per student incurred and/or to be incurred during the ***current academic session*** was nearly ₹6788 for general education, ₹62841 for technical/professional (except vocational) and ₹27676 for vocational education.

[Figure 4.13]

- General Education:

primary	-	₹4610 (rural- ₹ 2811, urban- ₹10083)
upper primary	-	₹5386 (rural- ₹3242, urban- ₹11446)
secondary	-	₹ 7459 (rural- ₹5100, urban- ₹13547)
higher secondary	-	₹12619 (rural- ₹9031, urban- ₹20179)
graduate	-	₹13478 (rural- ₹11527, urban- ₹16771)
post graduate & above	-	₹15999 (rural- ₹14604, urban- ₹17744)

[Statement 4.18]

- Average expenditure per student in current academic session, pursuing general education
  - at primary level was ₹1111 in government institutions compared to ₹10623 in private unaided institutions.
  - at upper primary level, average expenditure varied from ₹1869 in government to ₹13808 in private unaided institutions.
  - at secondary level, average expenditure in government institutions was ₹3724 against ₹15785 in private unaided institutions.
  - for level higher secondary expenditure at private unaided institutions was nearly 3 times of that in government institutions.

[Table S4.8a & S4.8b]

- Average expenditure in a current academic session for studying medicine in was ₹64968 in government institutions, ₹90205 in private aided and ₹118657 in private unaided institutions. For engineering course, the expenditures were ₹42401, ₹69696 and ₹78227 in government, private aided and private unaided institutions respectively.

[Statement 4.23]

- Nearly 46% of the expenditure for general education and 73% of the expenditure for technical education were on course fees.

[Tables 38 & 39, Appendix A]

- For students pursuing general education, 15% was spent on private coaching as against 3% for students pursuing technical/professional education (including vocational).

[Tables 38 & 39, Appendix A]

XIV. Never-enrolment and discontinuance of education

- After completing primary level education, 37% of males and 39% of females among the ever enrolled persons (aged 5-29 years) left their study.

[Statement 5.2]

- For each completed level of school education from upper primary & above, more than 50% of ever enrolled persons (aged 5-29 years), both males and females, did not continue their study further.

[Statement 5.2]

- In India, percentages of persons in the age group of 5-29 years dropping out/discontinuing studies were nearly 33% in rural areas and 38% in urban areas.

[Statement 5.5]

- In India, nearly 11% of the persons of aged 5-29 years in rural areas and 6% in urban areas never enrolled in any educational institution.

[Statement 5.5]

- For the males of age 5-29 years, engagement in economic activities was the most common reason for dropping out (30% in rural areas and 34% in urban areas), whereas for the females in the same age-group, the dominant reason was engagement in domestic activities (33% in rural areas and 23% in urban areas).

[Statement 5.7]

- In rural areas the major reason for never-enrolment for persons of ages 5-29 years was 'not interested in education' (33% male and 27% female) while in urban areas, nearly 33% males and 30% females in the age group of 5-29 years never enrolled because of 'financial contraints'.

[Statement 5.8]

XV. Access to computer and internet

- Nearly 6% of rural households and 29% of urban household possessed computer.

[Statement 6.1]

- In India, among households with at least one member of age 14 years and above, nearly 27% had internet access in the survey year, 2014. The proportions were 16% among rural households and 49% among urban households.

[Statement 6.1]

- Among persons of age 14-29 years, nearly 18% in rural areas and 49% in urban areas were able to operate a computer.

[Statement 6.2]

Chapter One

Introduction

1.1 Perspective

1.1.1 The National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MOSPI), Government of India, since its inception in 1950 has been conducting nationwide integrated large scale household sample surveys, employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects.

1.1.2 In its 71st round of survey, conducted during the period 1st January, 2014 to 30th June, 2014 (in this report this period is referred to as 2014), NSSO carried out a household survey on 'Social Consumption: Education'. The last such survey was conducted during 64th round of NSS (July 2007-June 2008). This report presents estimates of various characteristics pertaining to social consumption of education at national as well as State/UT levels in 2014, based on the results of NSS 71st round survey.

1.2 Objective of the Survey

1.2.1 Education is the foundation of a society. One can appositely say, a strong nation can be built by ensuring that each citizen of that nation is educated. In most of the countries, the government spends substantial amount on the creation as well as on effective functioning of the educational infrastructure. But to avail such facilities individuals also have to incur expenditure in the form of course fees, examination fees, cost of books and stationery etc. While information on the expenditure incurred by governments on education is available from various administrative records of the government, the estimate on the extent of private expenditure incurred can only be obtained through household survey.

1.2.2 NSSO had conducted an all-India household survey on education during the period January – June, 2014. The purpose of the survey was to collect information on participation of persons aged 5-29 years in pursuit of education in the country; the extent of use of educational infrastructure, facilities and incentives provided by the government and private areas and its impact on current attendance status of population in the educational institutions; private expenditure incurred by households on education and the extent of drop-outs and discontinuation from education, and its causes. Moreover, some specific and important indicators to judge the holistic picture of participation in education system of a country can only be obtained from a household survey. Such indicators are –

- Literacy
- Access to educational institutions
- Completed education level attained by the population
- Current attendance

- Private expenditure on education
- Reasons for studying in private institutions
- Reasons for taking private coaching
- Drop-out/discontinuation with reasons thereof during a particular period
- Proportion of never-enrolled persons with reasons; etc.

1.2.3 These indicators on education are primarily required for planning, policy formulation and decision making at various levels within and outside the government. The results of this survey are likely to be used by the Ministry of Human Resource Development, Department of Electronics and Information Technology etc. apart from private data users and policy makers.

1.3 Past NSS Surveys on Education

1.3.1 NSSO conducted first all-India survey on social consumption in its 35th round (July1980 - June 1981) to obtain data on nature & quantum of benefits received by the people from public expenditure on various services such as health services (including mass immunisation and family welfare programmes), educational services, public distribution, etc. Subsequently, the subject of social consumption was covered by the NSSO in its 42nd round (July 1986 - June 1987), 52nd round (July 1995 - June 1996) and 64th round (July 2007-June 2008). These surveys were conducted on the same lines as the 35th round survey with some modifications in subject coverage. These surveys covered both qualitative and quantitative aspects of educational services received by households. Qualitative aspects included literacy, educational level attained, current attendance/enrolment, drop-outs, reason for drop-outs, etc. Whereas, quantitative aspects of educational services included expenditure incurred by households in availing themselves of these services with its break-up into tuition fees, transport costs, etc.

1.3.2 In NSS 47th round (July-December 1991), by a 'Survey on Literacy and Culture (and Form for literacy test)', data on qualitative aspects of educational services were collected. In that survey, a test in several Indian languages was conducted on the spot on persons of age 15 years or more who were reported as literates but had not completed primary education. Moreover, information on numeric ability (addition, subtraction, multiplication and division) was also collected to identify the functional literates.

1.3.3 In the quinquennial surveys of employment and unemployment, particulars of attendance in educational institutions are also recorded in addition to person-wise information on literacy and educational attainment which are collected in all the household surveys of NSSO.

1.4 NSS 71st round Survey on Social Consumption: Education

1.4.1 Subject coverage

1.4.1.1 For the purpose of this survey, 'education' covered the following:

I. School education commencing from class I to X or XII, as the case may be, irrespective of the recognition status of the educational institution,

II. Higher secondary / Pre-university education leading to certificate/ diploma/ degree etc. It also included enrolment in private unrecognised institutions, which had regular classes and following the syllabus and pattern of the education as in recognised schools or colleges and which sponsored students for public examinations as private or external candidates,

III. General University education, whether full time or part time, leading to certificate/ diploma/ degree etc. The Universities not recognised by University Grant Commission were not covered,

IV. Correspondence courses conducted by Universities, Deemed Universities or Institutions authorised by competent authorities for awarding regular degrees or diplomas or certificates,

V. Higher secondary / Pre-university / Under-graduate/ Post-graduate / Professional/ Technical education leading to certificate/diploma/degree etc. conducted by recognised open university/schools,

VI. Technical or Professional courses, leading to degree/diploma/certificates, conducted by Universities, Deemed Universities or institutes like, National Institute of Fashion Technology, National School of Drama, Satyajit Ray Film and Television Institute, Film and Television Institute of India, LokNayak Jayaprakash Narayan National Institute of Criminology and Forensic Science, etc. or Institutions, authorised by competent authorities like All India Council of Technical Education (AICTE), Medical Council of India (MCI) etc.,

VII. Professional courses conducted by Institutes like The Institute of Chartered Accountants of India, The Institute of Cost and Works Accountants of India, The Institute of Company Secretaries of India, Actuarial Society of India, etc.,

VIII. All types of courses of duration three months or more, conducted by Institutions like Industrial Training Institute (ITI), National Vocational Training Institute, Regional Vocational Training Institutes, etc., authorised by competent authorities,

IX. All the courses at primary level and above, whether recognised or not, conducted by recognised educational institutions and not covered under above-mentioned categories.

The following courses were specifically excluded:

- *Art, music and similar type of courses conducted by individuals in their houses or unrecognised/ unaffiliated institutions,*
- *Classes taken by Private tutors,*
- *Education in Nursery/Kindergartens/Preparatory levels. However their enrolment status and dropout / discontinuance status were included,*
- *The non-formal system of education being implemented through various programs by government or other agencies. However their enrolment statuses and dropout/ discontinuance status were included.*

1.4.2 Geographical coverage: The survey covered the whole of the Indian Union.

1.4.3 Population coverage: The following rules were adhered to determine population coverage:

1. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., were excluded, but residential staffs therein were listed. The persons of the first category were considered as members of their parent households and were counted there. Convicted prisoners undergoing sentence were outside the coverage of the survey.
2. Floating population, i.e., persons without any normal residence were not listed. But households residing in open space, roadside shelter, under a bridge, etc. and more or less staying regularly in the same place, were listed.
3. Neither the foreign nationals nor their domestic servants were listed, if by definition the latter belonged to the foreign national's household. If, however, a foreign national became an Indian citizen for all practical purposes, he or she was covered.
4. Persons residing in barracks of military and paramilitary forces (like police, BSF, etc.) were kept outside the survey coverage due to difficulty in conduct of survey therein. However, civilian population residing in their neighbourhood, including the family quarters of service personnel, were covered.
5. Orphanages, rescue homes, *ashrams* and vagrant houses were outside the survey coverage. However, persons staying in old age homes, *ashrams/hostels (other than students)* and the residential staff (other than monks/ nuns) of these ashrams were listed. For orphanages, although orphans were not listed, the persons looking after them and staying there were considered for listing.
6. In this particular survey, students residing in the students' hostels were excluded from the hostel as they were considered as members of the household to which they belonged before moving to the hostel. However, residential staffs were listed in the hostel.

1.4.4 Sampling design

1.4.4.1 A stratified multi-stage design was adopted for the 71st round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural areas and Urban Frame Survey (UFS) blocks in the urban areas. The ultimate stage units (USU) were households in both rural and urban areas. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from each rural/ urban FSU.

1.4.4.2 **Selection of first-stage units:** A total of 4577 villages were surveyed in rural India and the number of urban blocks surveyed was 3720 as First-stage units (FSUs) in NSS 71st round for the central sample at all-India level, selected by Probability Proportional to Size with Replacement (PPSWR). In addition to these, 'State samples' were also surveyed by State/UT Governments who participated in this survey. The results presented in this report are solely based on the central samples. State/UT wise FSUs surveyed in central samples are given in Statement 1.1 at the end of this chapter.

1.4.4.3 **Selection of second-stage units:** Stratification of the households was done on the basis of having any student (aged 5-29 years) receiving technical/professional or general education (details are given in Appendix B). For this particular survey, 8 households were selected using Simple Random Sampling without Replacement (SRSWOR) from each sample village/block. The total number of households in which Schedule 25.2 was canvassed, was 36479 and 29447 in rural and urban India respectively. State/UT-wise number of households in which Schedule 25.2 was canvassed is given in Statement 1.1.

1.4.4.4 **Sub-rounds:** The survey period of this round was divided into two sub-rounds of three months' duration each as follows:

sub-round 1 : January - March 2014
sub-round 2 : April - June 2014

1.5 Main features of the Survey

1.5.1 Information about particulars of household characteristics like household size, principal industry and principal occupation of household, household type, religion, social group, distance from nearest school having primary/upper primary/secondary level classes, whether the household has a computer/ any access to internet and household's usual consumer expenditure in a month etc. were collected.

1.5.2 Demographic and other particulars of all the household members, particulars of IT literacy for household members aged 14 years & above and the particulars of current educational attendance and current enrolment status for household member aged 5-29 years were canvassed.

1.5.3 The education particulars of the household members, aged 5 - 29 years, who were currently attending educational institutions at primary level and above, were recorded. Information on course, level, class/grade/year, type of institution, medium of instruction, etc., were also collected on *basic course*.

1.5.4 Particulars of private expenditure on education of the household members were collected.

1.5.5 Particulars of household members, aged 5 - 29 years, who were currently not attending any educational institution, were collected along with information on whether ever enrolled, age at entry in school, age of discontinuation / drop-out etc.

1.6 Comparability with previous rounds of Survey

1.6.1 Though the survey on 'Social Consumption: Education' conducted in 2014 was broadly similar to that undertaken in the 64th round of NSS, keeping in mind the field experiences of earlier round and to fulfil the requirements of the stakeholders following modifications or additions were made in the concepts and definitions.

Structural changes:

i. It has to be kept in mind for comparability of data with previous round that the survey period for the current round was of six months (January-June 2014), whereas it was of one year in NSS 64th round (July 2007- June 2008).

ii. In 64th round two items of information, viz. *number of dependants studying away from home*, and *amount sent to them*, were considered in the block on household characteristics. However, in this current round dependants staying in hostel, away from home, for the purpose of study, were considered as household members unlike the previous round.

iii. Information on expenditure on education was collected for only one basic course instead of at most two courses as was done in the 64th round.

iv. In NSS 64th round, the structures of primary and upper primary levels were taken as followed in different States/UTs. But for this round, these levels were taken uniformly (classes I-V for primary level and VI-VII for upper primary) irrespective of the practices followed in different States/UTs.

v. For type of institution, government and local bodies had been merged as government institutions in this round.

vi. Information on usual household consumer expenditure (₹) in a month was collected through a single question, in place of the five questions in earlier round.

Other changes:

vii. No specific item to capture information on vocational education was incorporated in this round. As per Ministry of Human Resource Development, vocational education is a part of the professional/technical education. According to this Ministry's guidelines, professional/technical education generally pertains to higher education, but in case of school education (i.e. up to secondary level) it is considered vocational education. Therefore, though no separate code for vocational course had been kept in this survey, it can be obtained as a part of technical/professional education from the captured data.

viii. Structures of course codes and level of current attendance codes in the block related to education particulars on basic course have been simplified.

ix. Some new items of enquiry such as *language mainly spoken at home*, whether *taking private coaching* and *purpose of taking private coaching* had been included to capture information on important contemporary issues on education.

x. As per requirement of Department of Electronics & IT, few items on access and use of computer were included in demographic block and in block on household characteristics.

xi. Some items of expenditure were clubbed in this round compared to earlier round.

1.7 Key Indicators of the 71st round Survey on Social Consumption: Education

1.7.1 A Key Indicator document titled *"Key Indicators of Social Consumption in India Education"* was released in June, 2015, within a year of completion of field work of the survey to facilitate decision support, policy inferences and socio-economic analysis. The document contained *inter-alia* a brief summary of the significant information on the key indicators and State/UT tables on key indicators in addition to its conceptual framework.

1.8 Reference period

1.8.1 The estimates presented in this report are based on data collected during 01.01.2014 to 30.06.2014, a period of six months. Therefore, these estimates may be taken as on 31.03.2014, the mid-point of the six-month period.

1.8.2 Expenditure on education is related to current academic session of study of a student for the basic course only. If the current academic session spanned over 12 months, then it was restricted to 12 months period.

1.9 Contents of this Report

1.9.1 This report brings out the detailed results of NSS 71st round. It is presented in six chapters and three appendices. Following is the introductory chapter (Chapter One). Concepts and definitions used in this survey are illustrated in details in Chapter Two. Chapter Three to Chapter Six give the summary findings on various aspects of education from the results of the survey. Appendix A provides the detailed tables. Brief discussions on sample design and estimation procedure are given in Appendix B and lastly in Appendix C, the schedule of enquiry (Schedule 25.2) which was canvassed at the selected households is provided.

1.9.2 The analysis is focussed at all-India level while the corresponding state level estimates of few important parameters have been summarised in the state-level statements placed at the end of each chapter and also in some Appendix Tables. Mostly, ratios/distributions are presented, while the aggregates of population/household are given as marginal row/column totals in the detailed Appendix tables.

1.9.3 It is important to note that some estimates for the smaller States/UTs and at some detailed levels in the statements or in Appendix tables (in Appendix A) may be subject to high sampling fluctuations as such estimates may be based on very small sample sizes. For this reason, discussions in chapter three to chapter six are mainly focussed on relatively larger States selected in terms of population (Ref: 18 States in Fig. 3.2, Chapter Three). In some cells of appendix tables zero or negligible figures are reported, which are due to either zero sample vales or very small sample values. Such estimates should be used and interpreted with due care. In many cases, in the Statements and State tables in Chapter Three to Chapter Six, such figures are replaced by dash (‘-‘).

1.9.4 The rural and urban figures in this report are related to persons/students from rural and from urban areas respectively; and not relating to the places where the students studied.

1.9.5 In this survey, information was collected on the places of hostel where the students were staying in terms of State code to determine the State where the hostel was located. Since Telangana was not a separate State at the beginning of the survey, no specific code was assigned for the State of Telangana in the Schedule of enquiry. Thus, the location of the hostel could not be separated for the State of Telangana on the basis of available information.

Statement 1.1: Number of FSUs (villages/blocks) surveyed and number of households surveyed for Schedule 25.2: NSS 71st round, Central sample

State/UT	number of FSUs (villages/blocks) surveyed		no. of households surveyed		
	rural	urban	rural	urban	rural + urban
(1)	(2)	(3)	(4)	(5)	(6)

Chapter Two

Concepts & Definitions

2. 1 Basic Concepts

2.1.1 Students' Hostel: A hostel is meant for providing accommodation to students, irrespective of whether run by any educational institution or not. A hostel, as distinct from a mess, is not managed by the students on a cooperative basis.

2.1.2 Household: A group of person normally living together and taking food from a common kitchen constitutes a household. It includes temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but excludes temporary visitors and guests (expected total period of stay less than 6 months).

2.1.2.1 Exceptions

(a) Students residing in students' hostels are considered as members of the household to which they belonged before moving to the hostel irrespective of the period of absence from the household they belonged. Hence, they are not regarded as forming single-member households unlike previous rounds.

(b) Any woman who has undergone childbirth during last 365 days is considered a member of the household which incurred the cost of childbirth irrespective of her place of residence during the last 365 days.

(c) A child aged less than 1 year is considered a member of the household to which its mother belongs.

Even though the determination of the actual composition of a household was left to the judgment of the head of the household, the following procedures were adopted as guidelines.

(i) Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., constitutes a single-member household except students residing in students' hostels. If, however, a group of persons among them normally pool their income for spending, they together are treated as forming a single household.

(ii) More emphasis is given on 'normally living together (with the exception of students staying in students' hostels)' than on 'ordinarily taking food from a common kitchen'. In case the place of residence of a person is different from the place of boarding, he or she is treated as a member of the household with whom he or she resides.

(iii) A resident employee or domestic servant, or a paying guest (but not just a tenant in the household) is included in the employer's/host's household. However, in special

case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, he has been counted as a member of the household formed by other members of his family.

(iv) If a member of a family (say, a son or a daughter of the head of the family) stays elsewhere for reasons other than study (i.e. other than student staying in students' hostel), he/she is not considered as a member of his/her parent's household.

2.1.3 Household size: The size of a household is the total number of persons in the household, keeping in mind the exception for member of the household residing in a students' hostel for the purpose of study and any woman who has undergone childbirth during last 365 days. A child aged less than 1 year is considered a member of the household to which its mother belongs.

2.1.4 Household type: The household type, based on the means of livelihood of a household, was decided on the basis of the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities was considered; but the incomes of servants and paying guests were not taken into account.

In **rural** areas, a household belongs to any one of the following six household types:

- self-employed in agriculture
- self-employed in non-agriculture
- regular wage/salary earning
- casual labour in agriculture
- casual labour in non-agriculture
- others

For **urban** areas, the household types are:

- self-employed
- regular wage/salary earning
- casual labour
- others

2.1.4.1 Procedure for determining household type in rural areas: The broad household types in rural areas used in this round are *self-employed*, *regular wage/salary earning*, *casual labour* and *others*. A household which does not have any income from economic activities is classified under *others.* Within each of the broad category of *self-employed* and *casual labours* two specific household types are distinguished, depending on their major income from agricultural activities (sections A of NIC-2008) and non-agricultural activities (rest of the NIC-2008 sections, excluding section A). The specific household types for self-employed are: *self-employed in agriculture* and *self-employed in non-agriculture.* For casual labour, the specific household types are: *casual labour in agriculture* and *casual labour in non-agriculture*. In the determination of the household type in the rural areas, first the household's income from economic activities are

considered. Rural household are first categorized as '*self-employed*', '*regular wage/salary earning*' or '*casual labour*' depending on the single major source of its income from economic activities during last 365 days. Further, for those households which are categorized either as *self-employed* or *casual labours*, specific household types (s*elf-employed in agriculture or self-employed in non-agriculture* and *casual labour in agriculture or casual labour in non-agriculture*) are assigned depending on the single major source of income from agricultural or non-agricultural activities.

For **urban** areas the different urban types correspond to four sources of household income, unlike the rural areas where five sources are considered. An urban household is assigned the type *self-employed, regular wage/salary earning*, *casual labour* or *others* corresponding to the major source of its income from economic activities during the last 365 days. A household which does not have any income from economic activities is classified as '*others'*.

2.1.5 Household's usual consumer expenditure (₹) in a month: Household's usual consumer expenditure is the sum total of monetary values of all goods and services usually consumed (out of purchase or procured otherwise) by the household on domestic account during a month and was collected by a single question. This has the following components which are given below:

A. Usual expenditure for household purposes in a month.
B. Purchase value of any household durables (mobile phones, TV sets, fridge, fans, cooler, AC, vehicles, computers, furniture, kitchen equipment, etc.) purchased during the ***last one year*** and the expenditure ***per month*** obtained by dividing by 12.
C. If any household consumption (usually) from (a) wages in kind (b) home-grown stock (c) free collection was there, then the approximate monthly value of the amount usually consumed in a month was imputed.

Then the sum of A+B+C is taken as household's usual consumer expenditure in a month in whole number of rupees. Unusual expenditures, such as expenditure on social ceremonies, capitation fee, hospitalization, tours etc. were excluded from household's usual monthly consumer expenditure. Usual monthly per capita consumer expenditure (UMPCE) for a household is the household's usual consumer expenditure in a month divided by that household size.

2.1.6 Quintile class of UMPCE: This refers to the 5 quintile classes of the rural/urban all-India distribution (estimated distribution) of households by UMPCE. In the tables, the different quintile classes are referred to simply as 1 (lowest quintile class), 2, 3, 4 and 5 (highest quintile class).

A single set of UMPCE distribution (separately for rural and urban) was generated for each State/UT and at all-India level based on all the members of the household. UMPCE quintile distribution, for a part of the population, say, persons with age group 5-29, 14 years and above, students etc. in a particular State/UT in rural/urban areas, was assumed to be same as the

UMPCE distribution of the entire population of that State in rural/urban areas. UMPCE distribution of households is same as the UMPCE distribution of the persons belonging to those households.

The lower and upper limits of quintile classes of UMPCE at all-India level, based on the results of this survey, are given in Statement 2.1 below.

Statement 2.1: Lower and upper limits of UMPCE in different quintile classes for each sector

quintile class of UMPCE	UMPCE (₹)			
	rural		urban	
	lower limit	upper limit	lower limit	upper limit
(1)	(2)	(3)	(4)	(5)
1	0	786	0	1200
2	786	1000	1200	1667
3	1000	1286	1667	2250
4	1287	1667	2250	3333
5	1667	-	3333	-

Ref: Table 58, Appendix A

2.1.7 Education: The term ‘education’ generally refers to developing knowledge, skill or character of individuals through a process of learning such as self-study, attendance in formal or informal educational institutions, etc. The coverage under ‘education’ for the purpose of this survey is given in Chapter One.

2.1.8 Computer: For this survey, a computer meant any of the following devices *viz.* desktops, laptops, notebooks, netbooks, palmtops, smart phones, tablets etc. The following categories are defined basically for the convenience of identifying a ‘computer’ for capturing appropriate information while eliminating the chance of missing out.

I. **Desktop:** A desktop computer (or desktop PC) is a computer that is designed to stay in a single location without portability. Generally, the monitor, keyboard and mouse in a desktop computer are separate units.

II. **Laptop:** A laptop computer is a portable personal computer light and small enough to sit on a person's lap. A laptop computer can be powered by battery or plugged into the unit. The main utility of a laptop computer is that it allows a person to travel with its computing resource.

III. **Notebook:** A notebook is an extremely lightweight personal computer, a portable computer *smaller than a laptop model*, capable of being run on batteries and electrical current. Technically and traditionally, the difference between a laptop and a notebook is the matter of size only; functionally they are the same.

IV. **Netbook:** A netbook is a portable computer that is about half the size of a traditional laptop. These computers are a great solution for users who just want a basic computer

to get onto the Internet with and do basic applications such as a word processing. The main difference between netbook and notebook is its functionality. Netbook is used for content consumption such as listening to music or watching movies while Notebook is used for content making.

V. **Palmtop:** A small computer that literally fits in the palm of one's hand is called a Palmtop. Other names for Palmtops are 'hand-held computers' or 'Personal Digital Assistants (PDAs)'.

VI. **Smartphone:** A smartphone is a mobile phone with built-in applications and internet access with more advanced computing capability and connectivity than an ordinary mobile phone.

VII. **Tablet:** A tablet computer, or simply tablet, is a one-piece mobile computer. Devices typically have a touch screen, with finger or stylus gestures replacing the conventional computer mouse. An on-screen concealable virtual keyboard is usually used for typing.

2.1.9 Educational level: It refers to the different stages of educational attainment. It is the highest level a person has completed successfully. The levels with codes are: not literate, literate without any schooling, *literate without formal schooling*: through NFEC, though TLC/AEC, others; *literate with formal schooling*: below primary, primary, upper primary/middle, secondary, higher secondary; diploma/certificate course (up to secondary), diploma/certificate course (higher secondary), diploma/certificate course (graduation & above), graduate, postgraduate and above. If a person has successfully passed the final year of a given level, then and only then he/she was considered to have attained that level of education. For example, for a person studying in Class IX, the educational level will be upper primary and not secondary.

2.1.10 Level of current attendance: In this case, the current educational level where a student is pursuing his current education is considered. Here the levels are: never attended, ever attended but currently not attending, currently attending in: NFEC, TLC/AEC, other non-formal education, pre-primary (nursery/ Kindergarten, etc., primary (class I to V), upper primary/middle, secondary, higher secondary, diploma/certificate course (up to secondary), diploma/certificate course (higher secondary), diploma/certificate course (graduation & above), graduate, postgraduate and above.

2.1.11 Literate: A person is considered literate if he/she can read and write a simple message in at least one language with understanding.

2.1.12 Literacy rate: Percentage of literates in a population is taken as its literacy rate.

2.1.13 School education levels: A uniform pattern across the country for the number of years of schooling at primary level, upper primary/middle level, secondary level and a higher secondary level is yet to be achieved. However, for this survey, the primary level refers to Classes I-V, the

upper primary/middle to Classes VI-VIII, the secondary to Classes IX-X and the higher secondary to Classes XI-XII. Elementary level education refers to Class I-VIII.

2.1.14 Type of Education: Education was broadly divided into two categories: (i) general education and (ii) technical / professional education.

2.1.14.1 General education: In this survey, it included general school education from the primary to the higher secondary level and normal university education for a degree.

2.1.14.2 Technical/professional education: Technical/professional courses involve the hands on training in addition to theoretical classes. Education in engineering, medicine, agriculture, management, chartered accountancy, cost accountancy, art, music, driving, pilot training etc. are examples of technical/ professional courses.

2.1.15 Vocational Courses: For the purpose of this survey, vocational courses were not defined separately from the technical/professional courses. Any technical/ professional course with the *level of current attendance* as *secondary* or below or *diploma/certificate course (up to secondary)* was considered as vocational course. Moreover, courses offered by Industrial Training Institute (ITI), National Vocational Training Institute, Regional Vocational Training Institutes etc. were also considered as vocational courses.

2.1.16 Student: For the purpose of this survey, a household member was considered as student if he was aged between 5 to 29 years and currently attending a course at primary level and above.

2.1.17 Course: A course is (i) a structured educational programme having a specified syllabus, duration, level, etc. and (ii) necessarily involves appearing in some kind of examination/performance appraisal for getting the degree/diploma/certificate or advancing to the next class/level. Depending upon the subjects covered and the mode of instruction, the courses were categorised broadly as (a) general and (b) technical/professional. For the purpose of this survey, only those courses covered under the definition of 'education' in earlier paragraph were considered.

2.1.18 Basic course: When a particular student was undertaking more than one course, the basic course was identified as per following criteria –

- If an individual was pursuing more than one course then the course, which was of the highest level, was considered as the basic course.
- If all the courses simultaneously pursued currently were in the same level then the course of the technical education was the basic course.
- In absence of any technical education, the course, which involved higher cost, was taken as the basic course.
- If a person was enrolled both in regular course and course through distance learning then regular course was treated as the basic course irrespective of the cost involved.

2.1.19 Academic session: The academic session was defined in relation to the duration of the basic course in which he/she was enrolled and attending in the following manner –

i) If duration of the course was less than one year, the academic session covered full duration of the course,
ii) If duration of the course was equal to or more than one year, then the academic session was considered as one-year.
iii) For the educational institutions pursuing three to six months semester system, academic session was still taken as one year if the duration of the course was equal to or more than one year.

2.1.20 Current academic session: This referred to the academic session relating to the basic course, the student was currently attending.

2.1.21 Recognised School/Institution: A recognised school/ institution is one in which the course(s) of study followed is/ are prescribed or recognised by the Government or a university or a Board constituted by law or by any other agency authorised in this behalf by the Central or State Government. With regard to its standard of efficiency, it also satisfies criteria of one or more of the authorities, e.g. Directorate of Education, Municipal Board, Secondary Board, etc. It runs regular classes and sends candidates for public examination, if any.

2.1.22 Type of institution: This referred to the type of management by which the institution was run. It may be run by Government (Central/State/Local) or a private body either receiving or not receiving government aid. Thus, the types were: (a) Government, (b) Private aided and (c) Private unaided. It may be noted that a Government institution may be run either by the government directly or through a governing body/managing committee, etc. set-up by the government. A private aided institution was one, which was run by an individual or a private organisation and received maintenance grant from the Government. A private unaided institution was one, which was managed by an individual or a private organisation and was not receiving any maintenance grant from Government.

2.1.23 Medium of instruction: It is the language used for the instruction in the course for which a student is enrolled. In case, more than one language are used while teaching different subjects then the language used for teaching maximum number of subjects is to be treated as medium of instruction.

2.1.24 Free education: Education is free of tuition fee in Government schools in most of the States and also in private schools in some States up to certain education levels. There are some schools where students up to a certain level are not required to pay tuition fees. Nevertheless, a fixed sum of money has to be paid such as development fee, library fee, etc. Education in such

schools was still considered to be free. This applied to the institution as a whole and not to the specific situation obtaining for the student.

2.1.25 Exemption from Tuition Fees: This refers to exemption from payment of tuition fees granted to some students on some special consideration in those institutions where it is reported that the education is not free. The exemption may be full or partial.

2.1.26 Expenditure on education: All the private expenditures (item-wise) incurred and/or to be incurred during the ***current academic session*** on the education of the student on the *basic course* were considered. If duration of the course was more than one year, then **current academic session** was taken as of one-year even if the course followed three to six months semester system and accordingly the expenditure was recorded. For the expenditure, which was incurred for the remaining part of the current academic session, imputation was done on an objective basis. All the expenditures incurred and/or to be incurred during the current academic session on the education of household members were considered irrespective of the source of expenditure, i.e. whether the expenditure had been incurred and/or to be incurred by the sample household or not.

In case, academic session had not started for a student as on date of survey and it was not possible to obtain information for the coming academic session, expenditure information was collected with reference to the last academic session.

2.1.26.1 Course Fee: The total amount of tuition fee for the academic session was considered on the basis of specified monthly/bi-monthly/quarterly/half-yearly/annual rates. This item also included examination fees, development fees and other compulsory payments such as session charge, library fees, games fees, laboratory fees and other similar payments, which may be one time or on periodical basis. Donation or any other such payments including capitation fee charged by the institution was considered if it is a compulsory payment and was officially accounted for by a valid receipt. If the academic session of the course was of duration less than one-year, imputation was done only for the remaining duration of the course.

2.1.26.2 Other compulsory payments: These were the payments, besides tuition fee, examination fee, development fee, which were obligatory for a course, usually at the beginning of the academic session. A receipt is given for such payments. A special fee for getting admission under management quota is an example of such payment. Any payment made voluntarily such as donation, bribes, etc. were not considered as compulsory payments.

2.1.27 Attendance and enrolment: The current attendance status refers to whether a person is currently attending any educational institution. It may so happen that a person, who is enrolled, is not currently attending the institution. ***While most of the official educational statistics are based on enrolment, the NSSO Survey, because of its household approach, bases its analysis on the current attendance status.***

2.1.27.1 Gross attendance ratio (GAR): For each class-group, this is the ratio of the number of persons in the class-group to the number persons in the corresponding official age-group. For example, for Class group I-V the ratio (in %), corresponding to normative age-group of 6-10, is

$$= \frac{\text{Number of persons attending Classes I-V}}{\text{Estimated population in the age-group 6-10 years}} \times 100$$

For the remaining class-groups of school education, i.e. VI-VIII, IX-X and XI-XII, the corresponding official age-groups were taken as 11-13, 14-15 and 16-17 respectively.

2.1.27.2 Age-specific attendance ratio: For each age-group this measure gives an idea of proportion of persons of a particular age-group currently attending educational institutions, irrespective of the level or class in which they are studying. For example, for age-group 6-10, this attendance ratio is

$$= \frac{\text{Number of persons in age-group 6-10 currently attending educational institutions}}{\text{Estimated population in the age-group 6-10 years}} \times 100$$

2.1.27.3 Net attendance ratio: For each education class-group, this is the ratio of the number of persons in the official age-group attending a particular class-group to the total number persons in the age-group. For example, for Class group I-V the ratio (in %) is

$$= \frac{\text{Number of persons of age 6-10 years currently attending Classes I-V}}{\text{Estimated population in the age-group 6-10 years}} \times 100$$

Similarly it can be obtained for the remaining class-groups of school education, i.e. VI-VIII, IX-X and XI-XII, with the corresponding official age-groups as 11-13, 14-15 and 16-17 years respectively.

2.1.28 Age at first enrolment in school/Age at entry in school: It is the age in completed years when a person started attending the primary level class. If a person was admitted for the first time at a higher class in the primary level, then the age at the entry was considered.

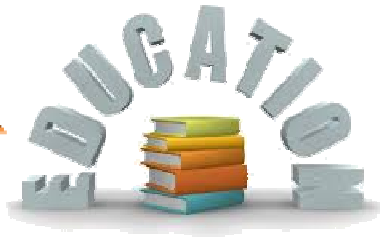

2.1.29 Dropouts/ Discontinuance: An ever-enrolled person currently not attending any educational institution may be due to either: (i) he/ she has discontinued after completing the last level of education for which he/ she was enrolled or (ii) he/ she has discontinued education before attaining a specific level. For the first category, for example, if a person had completed the middle level but did not enrol for the next higher level of education, he/ she was **not** considered as a dropout. It was considered as a case of discontinuation. However, if the person enrolled for the secondary level but did not complete it, then he/ she was considered a dropout. For the purpose of this survey, both the types were treated alike for recording information.

In block 7 of the schedule, the level refers to the last enrolment level of the household member.

[This page is intentionally left blank]

Chapter Three

Level of Education, Current Enrolment & Attendance Status

3. 1 Introduction

3.1.1 In the NSS 71st round survey, the levels of education, i.e. the highest completed level, included non-formal education, below primary, primary, upper primary/middle, secondary, higher secondary, diploma/ certificate courses, graduation, post-graduation and above. This information was collected for all the household members of the selected sample households. Information on current enrolment and attendance status were obtained for the households members in the age group 5-29 years from the sample households.

3.1.2 This chapter consists of the major findings on the following characteristics:

- Literacy rates and level of education
- Distance to nearest school from the household
- Demographic profile of persons in age group 5-29 years
- Enrolment & attendance statuses

3.1.3 Following discussions in Chapter Three to Chapter Six are with reference to the survey year, 2014 unless mentioned otherwise.

3. 2 Estimated population

3.2.1 The rural population in India for the age-group 5-29 years was estimated around 36 crores and for urban it was approximately 14.5 crores. Around 47% of rural population and 44% of urban population came under that age-group. Demographic profile of such population is given in Para 3.6. Age-group wise estimated population for all the States and UTs, separately for males and females, are provided in Table S3.5, presented at the end of this Chapter.

3. 3 Literacy rates

3.3.1 Literacy rate is considered as one of the important parameters to indicate the literacy as well as the illiteracy status of the population of a well defined geographical region as per the adopted definition.

> A person who can read and write a simple message in any language with understanding is considered *literate* in NSS surveys.

3.3.2 Statement 3.1 gives the literacy rates across various age-groups in the years 2014 (NSS 71st round), 2011-12 (NSS 68th round, Employment & Unemployment Survey) & 2007-08 (NSS 64th round survey on Education). It can be prominently observed from this Statement, that

literacy rates had gradually increased from 2007-08 to 2014 across various age-groups and genders for both rural and urban areas. Literacy rates for population in the age-groups 5 years & above and 7 years & above were almost similar. Nevertheless, it is also found that literacy rates in rural India were much lower in comparison to urban India across different age groups. Male-female gap in literacy rates reduced marginally over these periods for all the ages and age group 5 years & above. However for the age-group 7 years & above, gender-wise difference in literacy rate had the maximum reduction from 19 percentage points difference in the year 2007-08 to 15 percentage points in the year 2014. Considering entire population, rural-urban gap was more glaring among females (18 percentage points) than males (12 percentage points) for 2014.

Statement 3.1: Comparison of literacy rates (%) over periods for persons in different age-groups

age	literacy rate (%)								
	rural			urban			rural + urban		
	male	female	person	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
2014 (NSS 71st round)									
Age 5 & above	80	62	71	91	81	86	83	68	76
Age 7 & above	80	62	71	91	81	86	83	68	76
All age (age 0 & above)	72	57	65	84	75	80	76	62	69
2011-12 (NSS 68th round)									
Age 5 & above	78	61	69	90	80	85	82	66	74
Age 7 & above	79	61	70	91	80	86	83	66	75
All age (age 0 & above)	72	56	64	84	75	80	75	61	68
2007-08 (NSS 64th round)									
Age 5 & above	77	57	67	90	78	84	80	63	72
Age 7 & above	77	57	67	90	78	84	81	62	72
All age (age 0 & above)	68	51	60	82	72	77	72	56	65

Ref: Table 5, Appendix A and NSS Report Nos. 532 and 566 respectively for 64th and 68th rounds figures

3.3.3 Figures 3.1R and 3.1U give the comparison of adult (age 15 years & above) literacy rates between males and females over the years 2007-08 to 2014 for rural and urban areas

Fig. 3.1R: Adult (age 15 years & above) Literacy Rates (in %) for rural sector

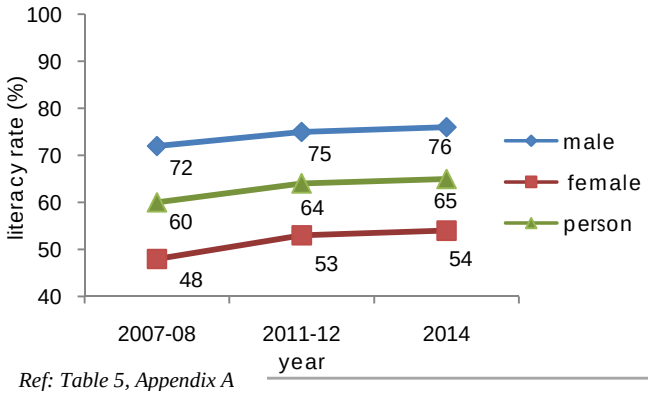

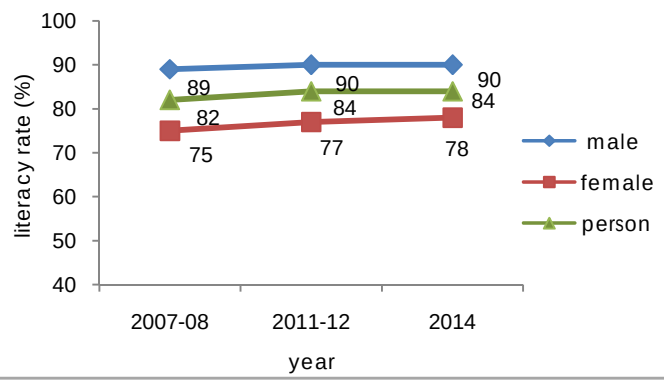

Fig 3.1U: Adult (age 15 years & above) Literacy Rates (in %) for urban sector

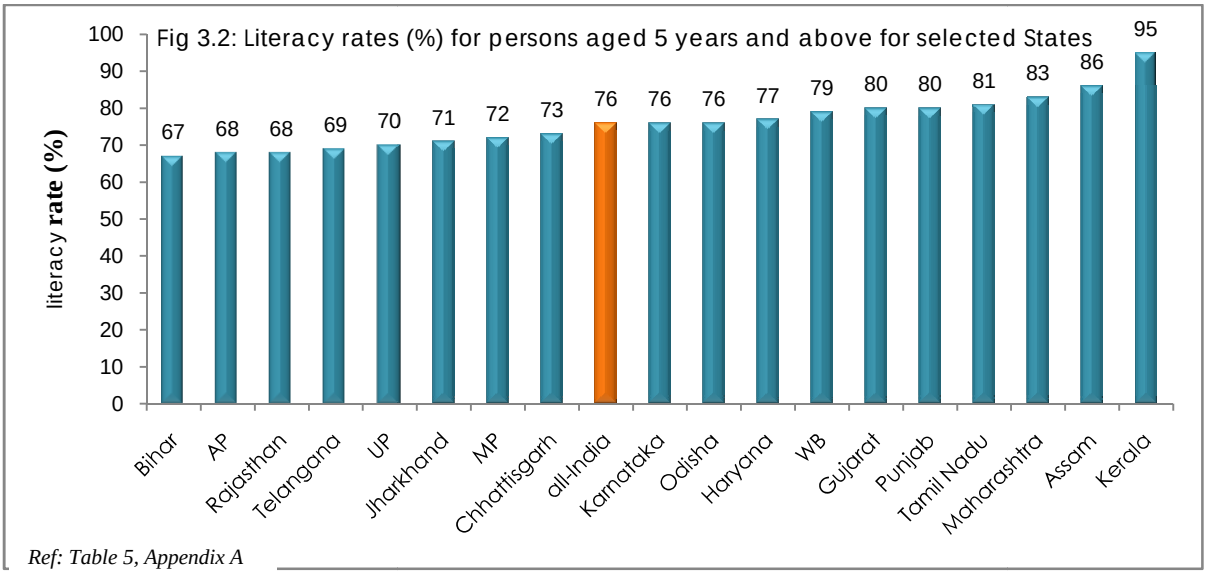

Ref: Table 5, Appendix A

respectively. In rural areas the line diagrams showing the male-female literacy rates were almost parallel indicating a constant gender-difference over the years. This gap had narrowed marginally in urban areas in the year 2014. The rural-urban difference in female literacy was

most prominent for adults (age 15 years & above) among all the age-groups (Ref: Statement 3.1); 24 percentage points for females to 14 percentage point difference for males in the year 2014.

3.3.4 Tables S3.1a-S3.1d, at the end of this Chapter give the State/UT wise literacy rates in 2014 for various age-groups. Literacy rates for persons of all ages in rural India showed more State/UT-wise variability compared to urban India. Among the selected States, where rural female literacy rates were 50% or less, are- Rajasthan (46%), Telangana (46%), Andhra Pradesh (48%), Bihar (50%) and Madhya Pradesh (50%) for age 0 years and above. Only Kerala had more than 90% literates (except for age 0 years & above). Following figure in Fig. 3.2 at a glance provide the literacy rates for persons age 5 years & above for the selected States.

Ref: Table 5, Appendix A

3.3.5 Rural-urban and male-female variation in literacy rates, as observed in earlier paragraphs, also exist among social groups (Ref: Statement 3.2). It can be noticed that in rural areas male-female differences was comparatively less among social group 'others' than rest of the social groups. In urban areas, male literacy rate was 90% or more for all the social groups except for social group SC (86%). In rural areas none of the social groups had more than 90% literates. State/UT wise literacy rates and distribution of population (aged 7 years & above) by their completed level of education are respectively provided in Tables S3.1e and S3.3a-S3.3d for each social group for rural and urban areas combined.

Statement 3.2: Percentage of literates (age 7 years & above) by social group

social group	rural		urban		rural + urban	
	male	female	male	female	male	female
(1)	(2)	(3)	(4)	(5)	(6)	(7)
ST	73	55	90	76	75	57
SC	75	56	86	72	78	60
OBC	81	61	90	78	84	66
others	87	73	95	88	90	79
all (incl. n.r.)	**80**	**62**	**91**	**81**	**83**	**68**

Ref: Table 4s, Appendix A

3.3.6 Figures 3.3R and 3.3U show the literacy rates (for entire population) gradually increased as one moves to higher quintile class of usual monthly per capita consumer expenditure (UMPCE) in both rural and urban areas. It is interesting to observe that for rural areas all-India literacy rate laid between third and fourth quintile classes, whereas in urban areas it was in between second and third quintile classes of UMPCE.

Fig 3.3R: Literacy rates (%) of persons for different quintile classes of UMPCE (rural)

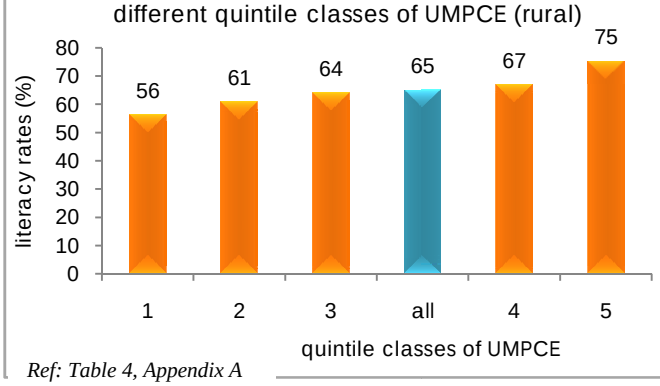

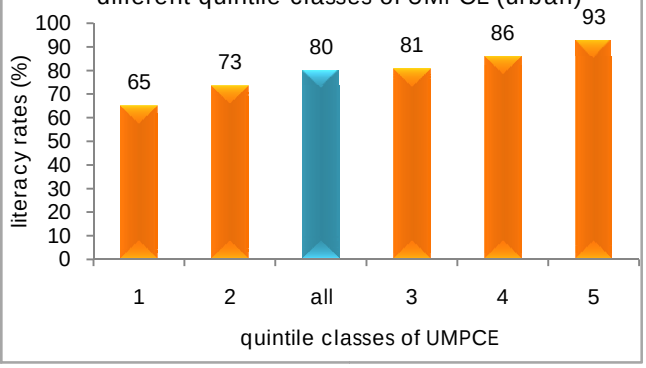

Fig 3.3U: Literacy rates (%) of persons for different quintile classes of UMPCE (urban)

Ref: Table 4, Appendix A

3.4 Completed level of education

3.4.1 Distribution of population by completed level of education at different levels for each gender in rural and urban areas provide a comprehensive picture of educational status of entire population of the country.

3.4.2 Statement 3.3 shows the distribution of adult population by their completed level of education for three different periods from the year 2007-08 to 2014, separately for males and females in rural and urban India. In rural areas percentages of *'not literate'* persons (aged 15 years and above) decreased continuously over the period 2007-08 to 2014 for both male and female. It is seen that, the share of persons who completed the level of upper primary did not change much during the above mentioned period for both males and females. The share of population who had completed graduation and above was around 4 times for males and 6 times for females in urban areas than the rural counterparts. This was a more or less consistent scenario over the periods, in spite of the fact that percentage share of adult population with education graduation and above in rural India had significantly increased in 2014 (5.7% for males and 2.8% for females) over 2007-08 (3.8% for males and 1.6% for females).

3.4.3 State/UT wise information on distribution of population by completed level of education is given in Tables S3.2 at the end of this Chapter. It can be referred from this table that the percentage of population with completed level of education higher secondary & above (excluding diploma/certificate) was less than 10% in the States of Chhattisgarh (9.1%), Jharkhand (8.4%), and Bihar (6.8%) among the selected States.

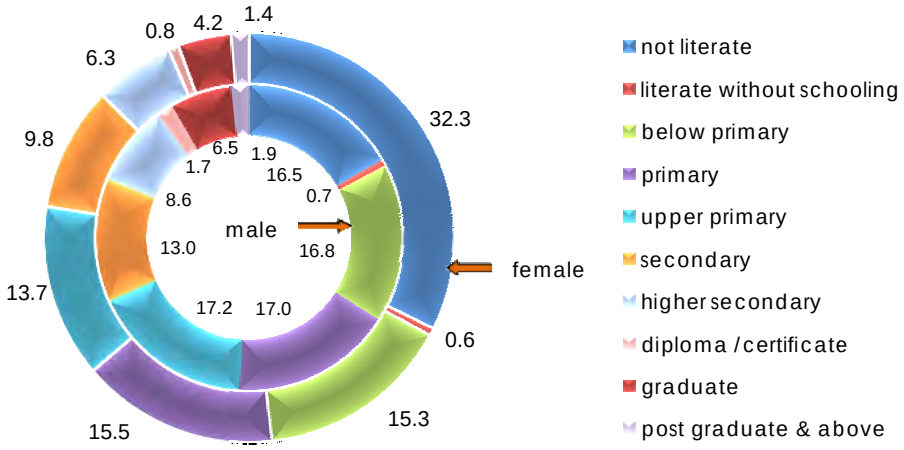

Statement 3.3: Percentage distribution of population (15 years & above) by completed level of education in 2014 (71st round) , 2011-12 (68th round) and 2007-08 (64th round)

completed level of education	male			female			person		
	2014	2011-12	2007-08	2014	2011-12	2007-08	2014	2011-12	2007-08
(1)	(2)	(3)	(4)	(5)	(8)	(9)	(10)	(11)	(12)
rural									
not literate	24.2	25.3	28.2	45.7	47.5	52.5	34.8	36.3	40.3
literate and up to primary	24.0	24.7	28.2	20.9	21.3	23.0	22.5	23.0	25.6
upper primary	20.1	19.7	19.9	14.2	13.8	12.3	17.2	16.8	16.2
secondary and higher secondary	24.5	23.9	19.0	15.7	14.6	10.3	20.2	19.3	14.6
diploma/certificate	1.5	1.2	0.8	0.7	0.4	0.3	1.1	0.8	0.6
graduation & above	5.7	5.1	3.8	2.8	2.4	1.6	4.3	3.8	2.7
all (incl. n.r.)	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**
urban									
not literate	10.1	9.9	11.3	21.8	22.6	25.4	15.8	16.1	18.0
literate and up to primary	16.9	16.5	19.7	17.8	17.0	20.0	17.4	16.7	19.8
upper primary	16.9	16.9	18.8	14.9	15.1	15.9	15.9	16.1	17.4
secondary and higher secondary	32.1	32.7	30.5	28.1	28.8	25.6	30.2	30.7	28.1
diploma/certificate	3.6	3.1	2.4	1.7	1.3	0.8	2.7	2.2	1.7
graduation & above	20.4	20.8	17.2	15.7	15.2	12.3	18.1	18.1	14.9
all (incl. n.r.)	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**

Ref: Table 5, Appendix A and NSS Report Nos. 532 and 566 respectively for 64th and 68th rounds figures

3.4.4 The distribution of population with age 7 years & above for males and females by completed level of education can be seen at a glance from Fig. 3.4. This reveals disparities in the proportion of literates across genders, wider at higher levels of education. The same phenomenon also got reflected on each completed level of education.

Fig 3.4: Percentage distribution of male & female population (aged 7 years & above) by completed level of education

Ref: Table 5, Appendix A

3.4.5 Statement 3.4 below indicates how the distribution pattern of the literates by the completed level of education changes with higher UMPCE classes.

Statement 3.4: Percentage distribution of literates (for all age) by completed level of education for each quintile class of UMPCE

completed level of education	quintile class of UMPCE					
	1	2	3	4	5	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)
rural						
literate but below primary	39.3	33.6	29.2	25.7	19.1	28.6
primary	25.9	25.3	24.2	22.8	18.1	23.0
upper primary	19.9	21.7	21.6	21.3	20.1	20.9
secondary & higher secondary	13.1	16.6	20.8	24.2	30.7	21.6
diploma/certificate	0.2	0.5	0.8	1.2	2.8	1.2
graduation & above	1.6	2.3	3.4	4.8	9.3	4.6
all (incl. n.r.)	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**
urban						
literate but below primary	31.9	24.4	18.3	13.6	8.0	18.2
primary	24.0	20.3	18.1	13.2	7.9	16.1
upper primary	20.3	22.2	19.1	16.3	10.3	17.2
secondary & higher secondary	18.8	25.2	30.4	34.3	31.5	28.7
diploma/certificate	0.8	1.2	2.2	3.4	4.5	2.6
graduation & above	4.2	6.5	11.8	19.2	37.8	17.1
all (incl. n.r.)	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**

Ref: Table 4, Appendix A

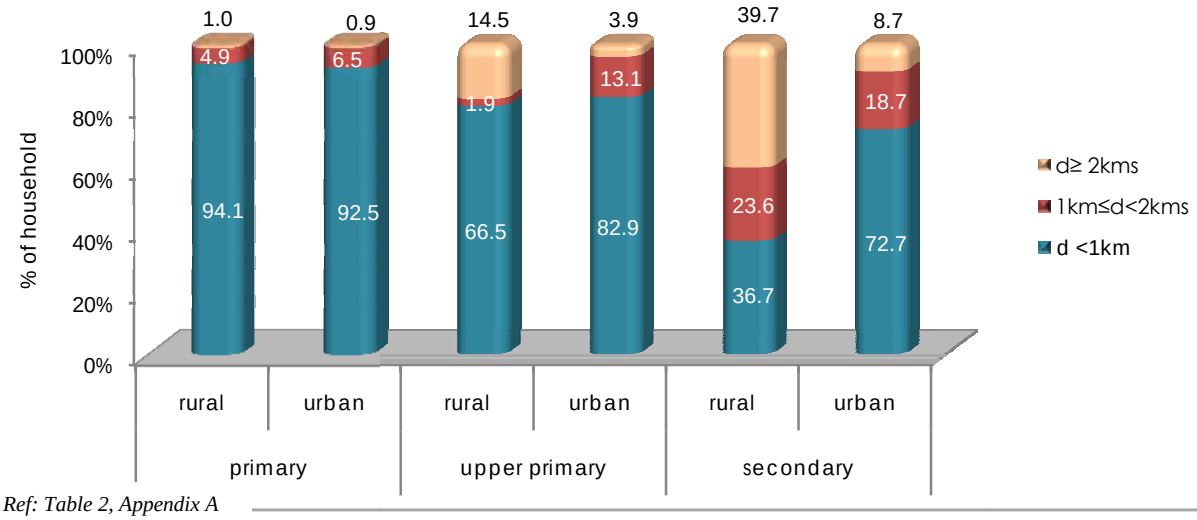

3.4.6 It is not surprising to see that the share of literates with secondary level and onwards increased more towards the higher classes of UMPCE in both rural and urban areas. Specially, in case of the highest completed level graduation and above the share of literates in the top UMPCE class in rural areas (9.3%) was almost 6 times of that in the bottom UMPCE class (1.6%); whereas in urban areas this jump was 9 times (4.2% in 1st quintile class to 37.8% in 5th quintile class).

3. 5 Distance to nearest primary, upper primary and secondary school

3.5.1 Distance to nearest school from residence is one of the important factors affecting access to education and attendance. In this survey, information was obtained from all the sample households on distance from the nearest school providing school education at primary, upper primary and secondary levels irrespective of whether any household member was studying in that school or not.

3.5.2 In terms of physical access to primary schooling within less than 1 kilometer radius from residence, it is observed from Fig. 3.5 that there was no significant difference between rural and urban India, but these gaps were quite prominent in respect of proximity to upper primary and more significantly to secondary schools. 40% of the rural households had accessibility to the schools having secondary level classes, which were beyond 2 kilometers distance. For urban it was only for 9% of households.

Fig. 3.5: Percentage distribution of households by distance (d) from nearest school for different level of classes

Ref: Table 2, Appendix A

3.5.3 In most of the States, nearly 90% of the households had primary schools within 1 kilometer distance from their residence, except in Assam (87% of hh) and Kerala (67% of hh). In respect of having accessibility to secondary schools within less than 1 kilometer distance from residence, less than 1/3rd of the households in Assam, Jharkhand, Bihar, Odisha and Kerala, among the 18 selected States, did not have that scope.

3. 6 Demographic profile of person in the age-group of 5-29 years

3.6.1 In Statement 3.5, demographic profile of persons in the age-group 5-29 years are presented for broad categories, i.e. rural, urban, male, female and age-group. Nearly 46% of total population of India was in the age-group 5-29 years. State/UT wise estimated populations in this age-group in rural and urban areas (both males and females) are given in Table S3.5 at the end of Chapter Three.

Statement 3.5: Percentage share of population in the age-group 5-29 years in the total population

age-group (years)	rural			urban			rural + urban		
	male	female	person	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
5	1.8	1.6	1.7	1.2	1.2	1.2	1.6	1.5	1.5
6-13	18.1	16.4	17.2	13.9	13.1	13.5	16.8	15.4	16.1
14-17	8.6	7.6	8.1	7.4	6.8	7.1	8.3	7.4	7.8
18-24	12.5	12.1	12.3	13.5	13.2	13.3	12.8	12.4	12.6
25-29	6.8	7.5	7.2	8.5	8.8	8.6	7.3	7.9	7.6
5-29	**47.8**	**45.3**	**46.5**	**44.6**	**43.1**	**43.9**	**46.8**	**44.6**	**45.7**

Ref: Table 11, Appendix A

3.6.2 Figures 3.6 series give the percentage distribution of persons by age-group among the population between 5-29 years.

Fig. 3.6RM: Percentage distribution of rural males by age-groups in age 5-29 years

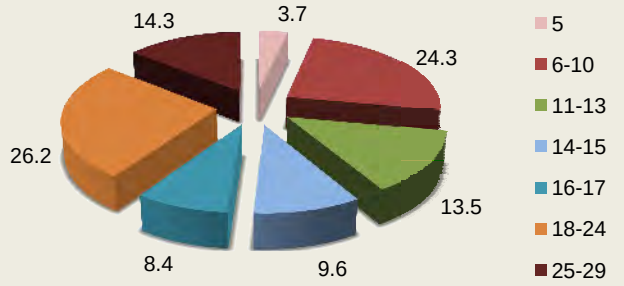

Fig. 3.6RF: Percentage distribution of rural females by age-group in age 5-29 years

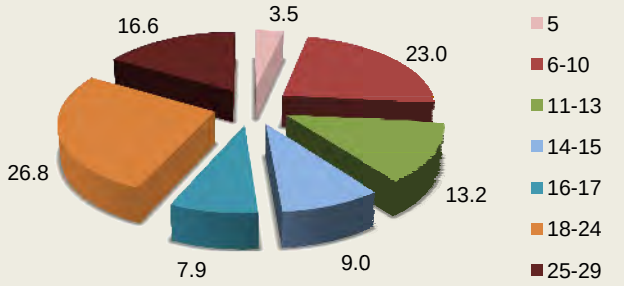

Fig. 3.6UM: Percentage distribution of urban males by age-groups in age 5-29 years

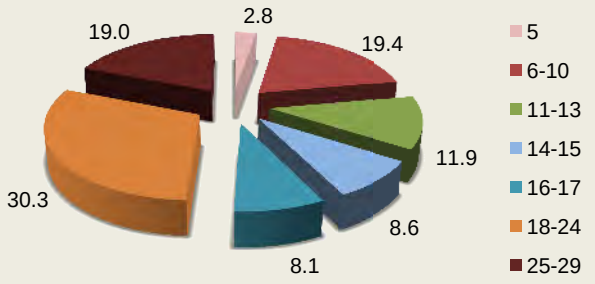

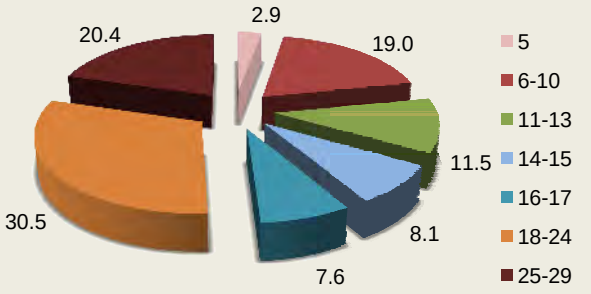

Fig. 3.6UF: Percentage distribution of urban females by age-group in age 5-29 years

Ref: Table 11, Appendix A

3. 7 Attendance & enrolment status

3.7.1 Current attendance status refers to whether a person is currently attending any educational institution. Current attendance necessarily implies current enrolment but not the vice-versa. However persons, who were temporarily not attending due to reasons like illness, vacation etc. were treated as currently attending in this survey. Same treatment was applicable for the persons, who were awaiting their results after completing a particular course and certain to take admission in any further course during the current year (2014).

3.7.2 While every person, who is attending an educational institution, is necessarily enrolled in that institution but it may so happen that a person, who has enrolled in current academic session/year, is not currently attending the institution. In order to identify those persons, who were currently not enrolled or currently enrolled but currently not attending or never attended, their latest enrolment status was noted.

3.7.3 Statement 3.6 reveals that a very small proportion of the persons, aged 5-29 years, were currently enrolled but not attending the educational institutions. There was no noticeable rural-urban disparity observed among the persons currently attending educational institutions, but gender disparity can be observed in rural areas with 59% of males and 53% of females in the 5-29 age-group reported to be attending educational institutions.

Statement 3.6: Percentage distribution of persons of age 5-29 years by current enrolment and attendance status

gender	currently not enrolled	currently enrolled but not attending	currently attending in					
			below primary	elementary	secondary	higher secondary	graduation & above	all levels (incl.diploma)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
rural								
male	39.4	1.4	1.9	37.2	8.3	5.3	4.4	58.7
female	45.1	1.2	1.9	34.6	7.6	4.6	3.6	53.0
person	42.1	1.3	1.9	35.9	7.9	5.0	4.0	55.9
urban								
male	41.5	1.3	1.8	30.8	7.7	5.9	7.9	57.0

person	42.3	1.3	1.8	34.3	7.9	5.2	5.2	55.9

Ref: Table 7, Appendix A

3.7.4 It is interesting to compare the distribution of currently attending population in this age-group by level of current attendance with the population share for corresponding official age-group of that level of attendance. Around 36% of rural population and 30% of urban population in the age-group 5-29 years were currently attending elementary level of education, i.e. primary and upper primary. Corresponding population in the official age-group of elementary education, i.e. 6-13 years were respectively 37% and 31% in rural and urban areas respectively (Ref: Table 11, Appendix A). This may fairly indicate that almost entire population in age-group 6-13 years were actively participating in the education system. It is noticed that for higher levels of education, active participation in terms of current attendance of the population in the corresponding official age-groups were gradually decreasing.

3.7.5 States where nearly half of persons were currently not enrolled were- Karnataka (48.2%), Gujarat (48.1%), Odisha (47.1%) and Andhra Pradesh (46.5%). Detailed figures on State/UT wise current enrolment and attendance status separately for male-female and rural-urban areas are given in Tables S3.4 at the end of this Chapter.

3.7.6 Variation in current attendance and enrolment status of persons across the quintile class of UMPCE, separately for rural and urban areas, can be obtained from Statement 3.7. It is not surprising to see that in higher quintile classes of UMPCE, share of population in age-group 5-29 years currently attending secondary and above level were gradually increasing. The higher was the level, the steeper was the increase. In rural areas, only around 1% of population in the bottom quintile class was currently attending graduation and above level, whereas it was 9% in the top quintile class of UMPCE. Similar situations had also prevailed in urban areas: 2.5% in lowest quintile class to about 18% in highest quintile class of UMPCE.

Statement 3.7: Percentage distribution of persons of age 5-29 years by current enrolment and attendance status for each quintile classes of UMPCE

level of attendance/ enrolment		quintile class of UMPCE					
		1	2	3	4	5	all
(1)		(2)	(3)	(4)	(5)	(6)	(7)

Ref: Table 8, Appendix A

3.7.7 It can be illustrated from Statement 3.8 that about 7% of males and 12% of females had not stepped into the education system at all, while another 34% were found to have been enrolled at some time but currently not attending any educational institutions. In rural areas the percentages of never enrolled in age group 5-29 years were approximately double than that of their urban counterparts.

Statement 3.8: Percentage distribution of current attendance status of persons (aged 5-29 years)

status	rural		urban		rural + urban	
	male	female	male	female	male	female

Ref: Table 55, Appendix A and NSS Report no. 532 for 64th round figures

3.7.8 A reduction in the share of never-enrolled persons in the year 2014 over the year 2007-08 was observed in both rural and urban areas, more significantly for the females. One can easily find out that the share of currently attending population in age-group 5-29 years gradually increased over these periods in both rural and urban areas for males and females.

3.7.9 Graphical presentations of current attendance and enrolment status by social groups and religions in both rural and urban areas are given below.

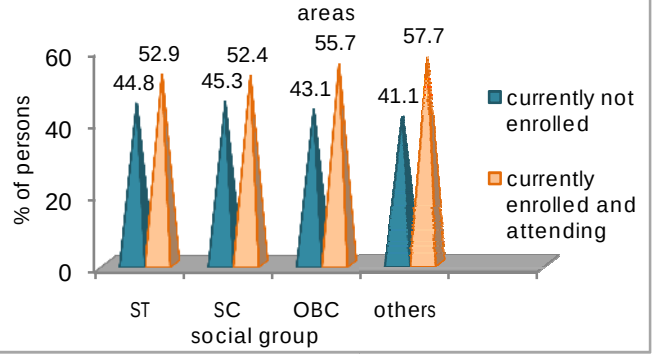

3.7.10 Figures 3.7R and 3.7U suggest that no prominent difference existed between rural and urban areas within any social group as far as current attendance and enrolment statues of the population (age 5-29 years) are concerned. The distribution of population between currently not enrolled and currently attending statuses did not differ significantly across social groups.

Fig. 3.7R: Percentage of persons (aged 5-29 years) by current attendance and enrolment status within different social groups in rural areas

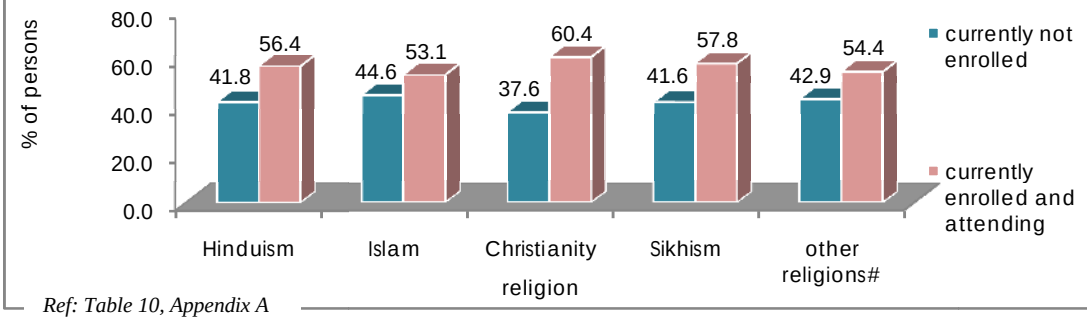

Ref: Table 9, Appendix A

Fig. 3.7U: Percentage of persons (aged 5-29 years) by current attendance and enrolment status within different social groups in urban areas

3.7.11 Similarly across religions (Figures 3.8R & 3.8U) not much difference in the distribution pattern was observed between currently not enrolled and currently attending persons, with an exception for rural Islam population, where the percentage of population currently not enrolled (50.4%) was more than that of currently attending (48.2%).

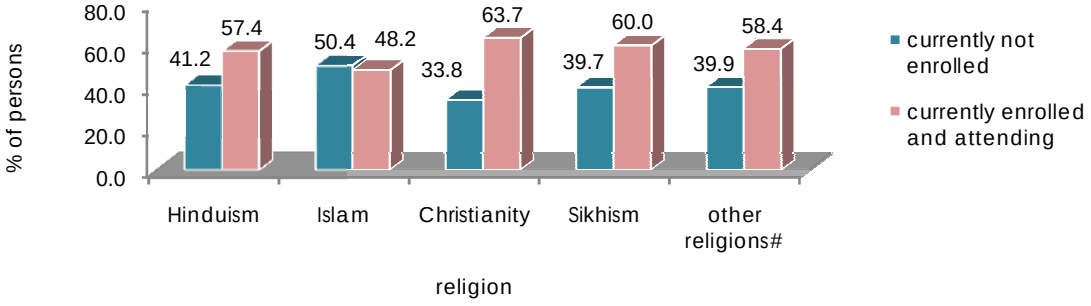

Fig 3.8R: Percentage of persons (aged 5-29 years) by current attendance and enrolment status within different religions in rural areas

Chapter Four

Participation & Expenditure on Education

4. 1 Introduction

4.1.1 Participation and expenditure on education is focused on the participation of 'students' in the formal system of education in only one 'basic course' during the 'current academic session'. The above terms within quotes ('') are described in Chapter Two.

4.1.2 This chapter presents some relevant survey findings on the participation of students in education system with the aid of tabular and graphical presentations. These will be helpful to figure out the present status of major characteristics of education in terms of level of current attendance; types of courses being studied; types of educational institution students are studying; whether any kind of scholarship/stipend are being given to the students; whether the students are getting mid-day meals/free books etc.; whether taking private coaching and the reason thereof; item-wise amount of private expenditure incurred on basic course during current academic session (Refer to Chapter Two for definition) etc. The level of education referred to in this Chapter means the level of current attendance or level of attendance. These two phrases are used interchangeably.

4.1.3 Our society is dynamic and so are the different parameters of education. So it is imperative to study the changing pattern of such indicators over time as well. This Chapter also presents a comparative discussion on few important indicators for 2007-08 (NSS 64th round) & 2014 (NSS 71st round).

A. Participation in Education

4.2 Attendance Ratios

4.2.1 Attendance ratios are taken as important indicators for providing a surrogate measure for the proportion of a population currently attending educational institutions. Gross Attendance Ratio (GAR), Net Attendance Ratio (NAR) and Age-specific attendance ratio (AAR) are taken as three such principal indicators.

4.2.2 School education is divided into primary, middle or upper primary, secondary and higher secondary levels. In this survey these terms refer to Classes I-V, VI-VIII, IX-X and XI-XII respectively for which the corresponding official age-groups are taken as 6-10, 11-13, 14-15 and 16-17 years respectively.

4.2.3 In this report, all the ratios, up to higher secondary level, are exclusive of diploma/ certificate courses. Additional information is given for post higher secondary level including

diploma/certificate courses (level graduation and above) to have comparability with the results of previous round. GAR and NAR are based on general school education.

4.2.4 Gross Attendance Ratio (GAR) & Gender Parity Index (GPI)

4.2.4.1 In the gross attendance ratio, for a particular level of education, the denominator consists of all persons in the official age-group for that level, whether attending or not, while the numerator consists of the persons who are studying in that particular level (including persons outside the official age-group). Therefore, it can work out to be **more than 100 as well in some cases**. Refer to Chapter Two for concepts and definition of GAR.

For each level of education, GAR is the ratio of the number of persons in the class-group to the number persons in the corresponding official age-group. This ratio can be more than 100.

4.2.4.2 In Statement 4.1a, gross attendance ratios have been presented for all the broad population categories, i.e. rural-urban and male-female. For levels primary to higher secondary, GAR was 91% and 88% for rural males and females respectively, marginally lower as compared to 93% for both males and females in urban areas. Generally, it showed downward trend. However a sharp decline is noticed in GAR from higher secondary level onwards.

4.2.4.3 The degree of variation in GAR among the State/UTs can be seen from Table 14a, in Appendix A. This ratio describes the attendance in school education in totality and therefore has special significance.

Statement 4.1a: Gross Attendance Ratio (%) for different levels of education

level of education	rural		urban		rural + urban	
	male	female	male	female	male	female
(1)	(2)	(3)	(4)	(5)	(6)	(7)
primary	102	100	102	102	102	101
upper primary	91	88	93	88	92	88
secondary	86	84	90	94	87	87
higher secondary	63	58	73	75	66	63
primary to higher secondary	91	88	93	93	91	89
above higher secondary	12	9	18	18	14	12

Ref: Table 14a, Appendix A

4.2.4.4 The level of participation at various stages of school education varies significantly across different quintile classes of usual monthly per capita consumer expenditure i.e. UMPCE (Statement 4.1b) after primary level. In both rural and urban India, while only 67% people in the lowest UMPCE quintile class participated in secondary education, it increased to 105% and 111% respectively in rural and urban India for the highest UMPCE quintile class. This disparity was increased further at higher secondary level in both the areas. At above higher secondary levels, GARs were only 4% and 6% in the bottom quintile class respectively for rural and urban areas, whereas these were respectively 21% and 33% in rural and urban India for the top quintile class of UMPCE.

Statement 4.1b: Gross Attendance Ratio (%) for different levels of education for each quintile class of UMPCE

quintile class of UMPCE	level of education					
	primary	upper primary	secondary	higher secondary	primary to higher secondary	above higher secondary
(1)	(2)	(3)	(4)	(5)	(6)	(7)

all	**102**	**91**	**92**	**74**	**93**	**18**

Ref: Table 14d, Appendix A

4.2.4.5 GAR at various level of school education for social groups is given in Statement 4.1c. No noticeable variation was present in GAR up to the level of upper primary among the social groups. At secondary level, this ratio for social group ST was much lower (77% for male and 79% for female) than the overall percentages (87% for both male and female). In higher secondary level, both SC and ST had lower GARs. Noteworthy gender variation was also observed in GAR for ST (56% for male and 48% for female) and 'others' (81% for male and 75% for female) at higher secondary level.

Statement 4.1c: Gross Attendance Ratio (%) for different levels of education for each social group

social group	level of education					
	primary	upper primary	secondary	higher secondary	primary to higher secondary	above higher secondary
(1)	(2)	(3)	(4)	(5)	(6)	(7)
male

all (incl. n.r.)	**101**	**90**	**87**	**64**	**90**	**13**

Ref: Table 14b, Appendix A

4.2.4.6 Statement 4.1d elaborates the GARs at various levels of school education for different religions. The lowest GAR at secondary and higher secondary levels for both males and females were observed in respect to the religion 'Islam'. At higher secondary level GAR was the highest for people with religion 'Sikhism' and at above higher secondary levels it was the highest (18% for male and 19% for female) for the religion 'Christianity'.

Statement 4.1d: Gross Attendance Ratio (%) for different levels of education for each religion

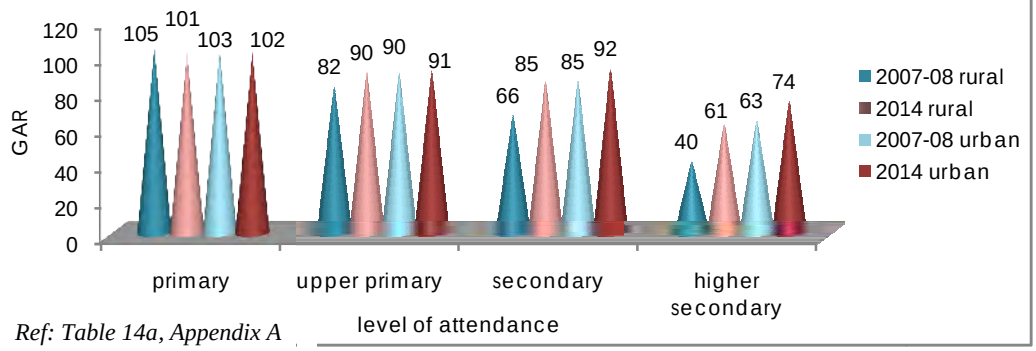

religion	level of education					
	primary	upper primary	secondary	higher secondary	primary to higher secondary	above higher secondary
(1)	(2)	(3)	(4)	(5)	(6)	(7)

[@] *includes Jainism, Buddhism, Zoroastrianism and others*

4.2.4.7 Considerable improvement was seen in GAR from the 64th round of NSS survey, especially in rural areas beyond upper primary level. Fig. 4.1 suggests that in urban India, GAR had also improved by a fair margin at higher secondary level.

Fig. 4.1: Gross Attendance Ratios (%) for different levels of education in 2007-08 (64th round) & 2014 (71st round)

Ref: Table 14a, Appendix A

4.2.5 Net Attendance Ratio

4.2.5.1 For the country as a whole, 84% of male and 83% of female children in the age-group 6-10 years, the official age-group for Classes I-V, were reported to be attending primary classes. There were no major rural-urban or male-female differences observed in 2014 in India till elementary level (primary and upper primary). At secondary and above levels, rural-urban gap was more prominent among females compared to males. Refer to Chapter Two for concepts and definition of NAR and Table 15a in Appendix A for State/UT figures. In general it can be stated that except for primary level, variation in NAR existed at State levels and it was much more prominent in post higher secondary level.

Statement 4.2a: Net Attendance Ratio (%) for different levels of education

level of attendance	rural		urban		rural + urban	
	male	female	male	female	male	female
(1)	(2)	(3)	(4)	(5)	(6)	(7)
primary	84	82	85	84	84	83
upper primary	64	61	67	64	64	62
secondary	51	49	56	59	52	51
higher secondary	36	33	45	47	38	37
above higher secondary	12	8	18	17	14	11

Ref: Table 15a, Appendix A

For each level of education, NAR is the ratio of the number of persons in the official age-group attending a particular class-group to the total number persons in that age-group.

4.2.5.2 NAR showed a continual increase with the movement towards higher quintile class of UMPCE at each level of attendance in both rural and urban India, as can be seen from Statement 4.2b. Variation in NAR across UMPCE was wider after elementary level. These ratios varied between the lowest and the highest quintile classes from nearly 1.5 times at secondary level to 5 times at post higher secondary level for both the areas.

Statement 4.2b: Net Attendance Ratio (%) for different levels of education for each quintile class of UMPCE

quintile class of UMPCE	level of attendance				
	primary	upper primary	secondary	higher secondary	above higher secondary
(1)	(2)	(3)	(4)	(5)	(6)

all (incl. n.r.)	**83**	**63**	**52**	**38**	**12**

Ref: Table 15b, Appendix A

4.2.5.4 No major difference in NAR was observed among social groups for elementary level. ST persons had the lowest NAR in all the higher levels after upper primary. (Ref.: Statement 4.2c)

4.2.5.5 Statement 4.2d summarises net attendance ratios religion-wise. For religious group 'Islam', NAR was considerably lower in comparison to national NAR across all levels of attendance for both males and females.

Statement 4.2d: Net Attendance Ratio (%) for different levels of education for each religion

religion	level of attendance				
	primary	upper primary	secondary	higher secondary	above higher secondary
(1)	(2)	(3)	(4)	(5)	(7)
male

[@] includes Jainism, Buddhism, Zoroastrianism and others

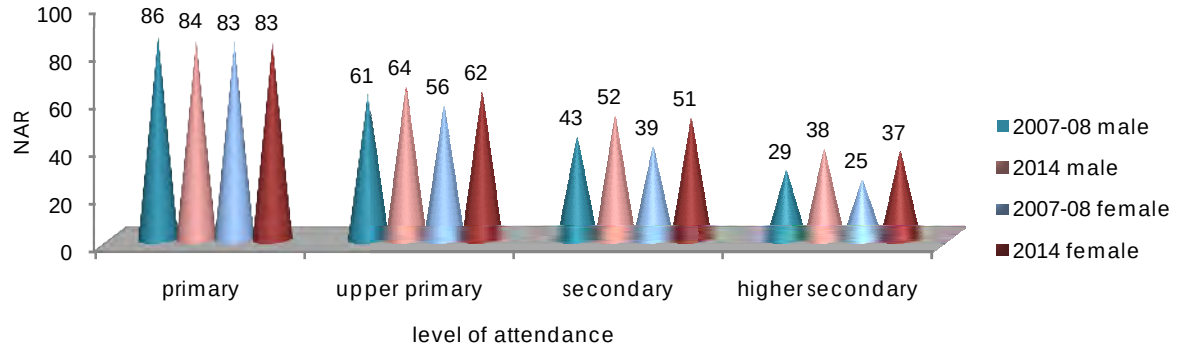

4.2.5.6 Charts (Fig. 4.2a & Fig.4.2b), showing comparison of NAR over last round, separately for male-female and rural-urban, are given below. A remarkable improvement is evident in NAR in 2014 over 2007-08 from secondary level onwards in both rural and urban areas. Improvement was more rapid in the higher levels of current attendance. At secondary level NAR became more than 50% in 2014 from 38% in 2007-08 in rural areas.

Fig. 4.2a: Net Attendance Ratio (%) in rural and urban areas in 2007-08 (64th round) & 2014 (71st round)

Ref: Table 15a, Appendix A

Fig. 4.2b: Net Attendance Ratio (%) for males and females in 2007-08 (64th round) & 2014 (71st round)

Ref: Table 15a, Appendix A

4.2.5.7 It is observed that male-female gaps in NARs were narrowing over the years. Improvement in NAR was more in females. NAR became 52% (in 2014) from 43% (in 2007-08)

for males and 51% from 39% for females over these periods at secondary level. In general NAR of the country is improving even at the higher levels of attendance.

4.2.6 Age-specific attendance ratio (AAR)

4.2.6.1 For each age-group this measure gives an idea of proportion of persons of a particular age-group currently attending educational institutions, irrespective of the level or class in which they are studying. These ratios are given in this report for all education, i.e. general and technical/professional education combined. Refer to Chapter Two for concepts and definition of AAR.

4.2.6.2 Statement 4.3a gives the AAR for different age-groups separately for males and females in rural and urban areas. AAR was only 3% for the age group 24-29 years. Rural-urban gap in AAR was prominent especially among the females in the higher age-groups. Table 16a, in the Appendix A provides the State/UT wise AARs. In lower age-groups (6-13 years) no prominent variations were observed among the States. Noticeable variations were observed in the higher age-groups, specifically in age-group of 18-23 years; 19% in the State of Odisha to 50% in Kerala.

Statement 4.3a: Age Specific Attendance Ratio (%) for different age-groups

age group (years)	rural		urban		rural + urban		
	male	female	male	female	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
6-13	90	88	92	91	90	89	90
14-17	75	72	81	83	77	75	76
18-23	32	24	40	38	35	28	32
24-29	4	2	6	3	4	2	3

Ref: Table 16a, Appendix A

4.2.6.3 It can be seen from Statement 4.3b that AAR was increasing in higher quintile classes of usual monthly per capita consumer expenditure for both rural and urban areas, more glaringly for age-group 18-23 years. For the age-group 24-29 years AARs were almost negligible in rural areas (1% in bottom quintile class to 5% in the top quintile class) and in urban areas, AARs in this age-group varied from 2% to 8% in the lowest to the highest quintile classes of UMPCE.

Statement 4.3b: Age Specific Attendance Ratio (%) for different age-groups for each quintile class of UMPCE

quintile class of UMPCE	age-group (years)			
	6-13	14-17	18-23	24-29
(1)	(2)	(3)	(4)	(5)
rural				
1	83	61	16	1
2	88	68	20	1
3	90	73	25	3
4	93	79	31	3
5	96	88	46	5
all	**89**	**74**	**28**	**3**

Statement 4.3b: Age Specific Attendance Ratio (%) for different age-groups for each quintile class of UMPCE

quintile class of UMPCE	age-group (years)			
	6-13	14-17	18-23	24-29
(1)	(2)	(3)	(4)	(5)
urban				
1	84	61	17	2
2	91	79	26	2
3	95	87	37	4
4	97	93	50	6
5	98	98	67	8
all	**92**	**82**	**39**	**5**

Ref: Table 16d, Appendix A

4.2.6.4 Social-group wise age-specific attendance ratios can be seen from Statement 4.3c. Males and females belonging to social group ST had the lowest AARs for all the age-groups. In the age-group 14-17 years AARs for ST males and females were respectively 70% and 65%. AARs for the OBCs were almost similar to that of all the social groups combined. 'Others' had little improved AARs, especially in the higher age-groups. In the age-group 18-23 years, the highest AAR among all the social groups was observed among 'others' (40%) during 2014.

Statement 4.3c: Age Specific Attendance Ratio (%) for different age-groups for social groups

social group	age-group (years)			
	6-13	14-17	18-23	24-29
(1)	(2)	(3)	(4)	(5)

Ref: Table 16b, Appendix A

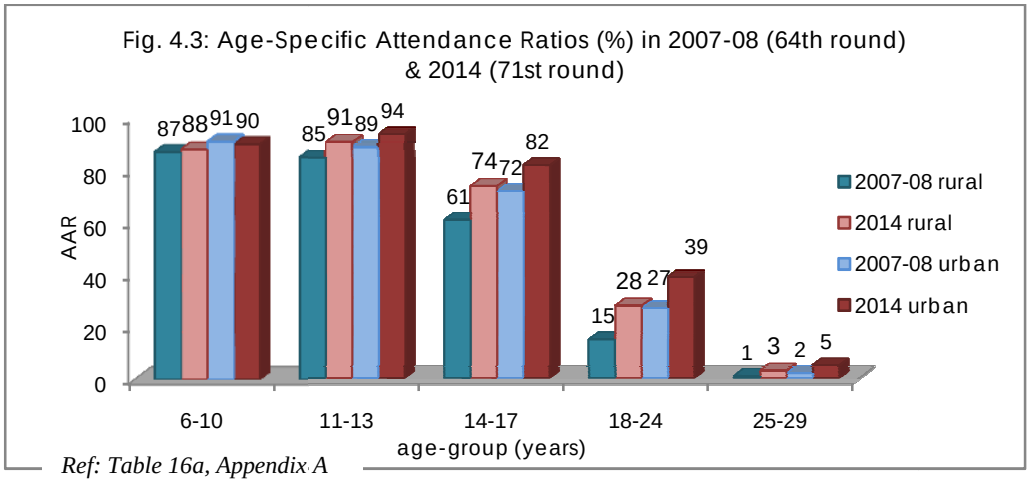

4.2.6.5 Statement 4.3d provides the AAR for different age-groups for major religions. It came into notice that in 2014, AAR was distinguishably higher in the age-group 18-23 years for the religion 'Christianity'. AARs for the people following 'Islam' were lower than that of all-India AARs, in all the age-groups.

Statement 4.3d: Age Specific Attendance Ratio (%) for different age-groups for religions

religion	age-group (years)			
	6-13	14-17	18-23	24-29
(1)	(2)	(3)	(4)	(5)

all (incl. n.r.)	**90**	**76**	**32**	**3**

Ref: Table 16c, Appendix A [@] includes Jainism, Buddhism, Zoroastrianism and others

4.2.6.6 Changing pattern of AARs over the years can be seen at a glance from the chart below. In the age-group 6-10 years AARs in both rural and urban areas were almost stagnant during the years 2007-08 and 2014. Noticeable improvement in AAR is visible in the age-groups 14-17 and 18-24 years. AARs in age-group 18-24 years rose to 28% and 39% respectively in rural and urban India in 2014, from 15% (in rural) and 27% (in urban) in 2007-08.

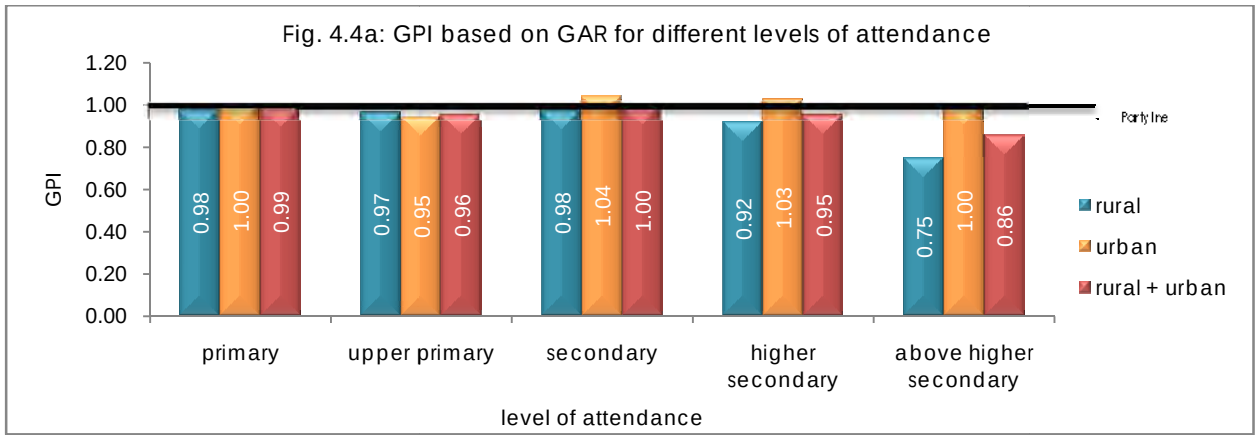

Ref: Table 16a, Appendix A

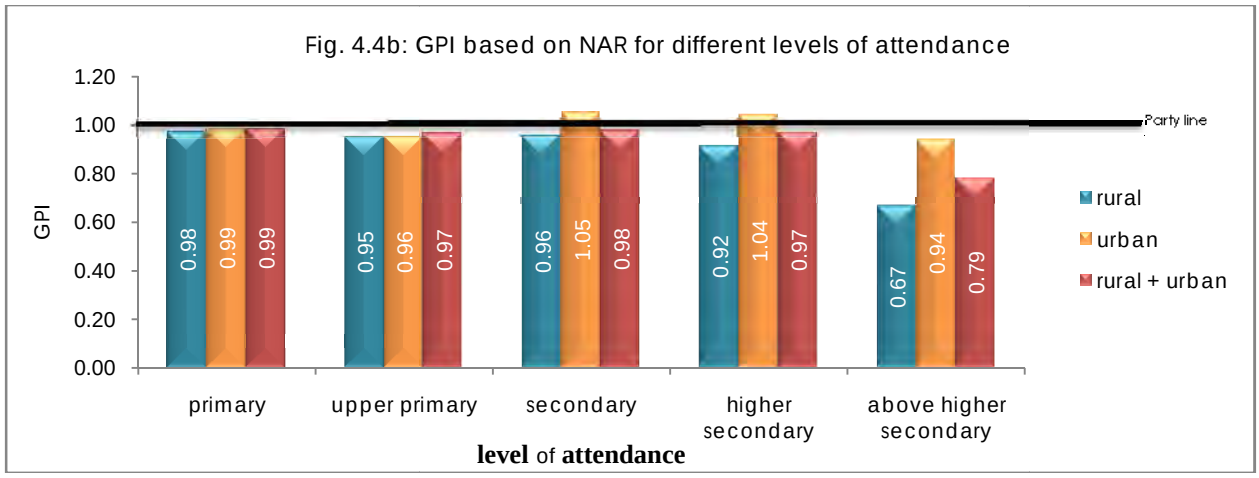

4.2.7 Gender Parity Index (GPI)

4.2.7.1 Gender Parity Index (GPI) measures the relative participation in education of male and female students at different levels of attendance. GPIs have been calculated as the ratios of GARs and NARs for female to male.

4.2.7.2 The following Figure 4.4a indicates GPI based on GAR is marginally less than 1 mostly in rural areas, pointing towards relatively less female participation. At above higher secondary it was much less than 1 (only 0.75) in rural India. It is more than 1, indicating more female participation comparatively, at secondary and higher secondary levels in urban India.

4.2.7.3 Figure 4.4b provides GPI based on NAR. It is seen from this figure that GPI based on NAR followed similar patterns that of based on GAR with marginal changes in values.

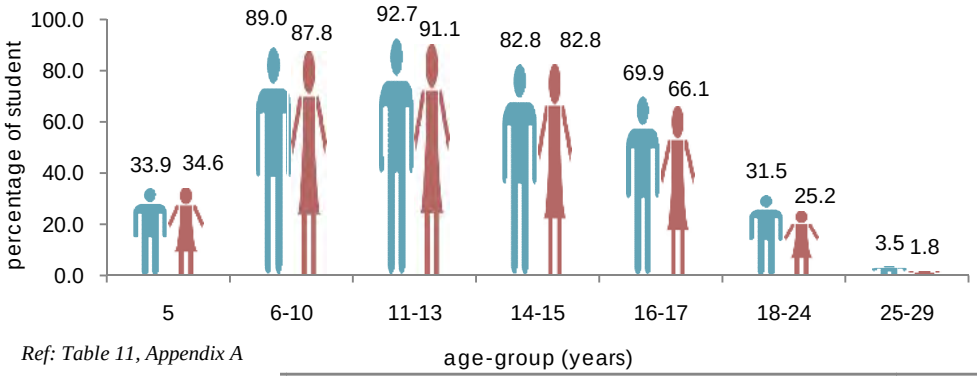

4. 3 Pattern of Current attendance

4.3.1 Analysis of the patterns of current attendance of the students by demographic and educational characteristics provides a holistic picture of students' participation in the formal education system of the country. This information, which is very important for the policy makers and researchers, are presented in the following paragraphs.

4.3.2 Current attendance by age-group

4.3.2.1 AAR and current attendance by age-group give similar kind of information. Fig. 4.5 shows the percentage of students in different age-groups similar to the official age-groups corresponding to different levels of current attendance from primary and above for males and females.

Fig. 4.5. Percentage of students in various age-groups currently attending educational institutions for each gender

Ref: Table 11, Appendix A

4.3.2.2 In the age-group 6-10 years almost 90% of the population and in age-group 11-13 years more than 90% of the population were students. From 18-24 years variations in percentage of students betweens males and females is quite visible. Only 1.8% of total female population in age-group 25-29 years were students, which was almost half of that of males. State/UT wise information on the percentage of students currently attending primary levels and above is given in Tables S4.1 at the end of this Chapter.

4.3.2.3 Statement 4.4a gives the distribution of students by their current level of attendance for different age-groups in rural and urban areas. From this statement one can also has an idea about the percentage of students outside the official age-group attending a particular level. In India a large percentage (34.3%) of population with age 5 years were studying at primary level though the official age-group for this level is 6-10 years. In 11-13 years 22% of students were studying in primary with the fact that this age-group officially refers to upper primary level. Again 30% of students in age-group 14-15 years were studying in below secondary levels.

Statement 4.4a: Percentage of students in various age-groups between 5 – 29 years and their distribution (%) across level of current attendance for rural and urban areas

age-group (years)	% distribution of 'students' by level of current attendance						percentage of 'students' in the age-group
	primary	upper primary	secondary and higher secondary	graduation & above	diploma	all (incl. n.r.)	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

Ref: Table 11, Appendix A

4.3.2.4 In Statement 4.4b percentage distribution of students by their current level of attendance for a particular age-group for males and females are shown. Share of students in primary and upper primary classes did not differ much between males and females in each age-group. However, variation in share of male and female students currently attending in secondary and above levels can be observed in higher age-groups especially in 18-24 years and 25-29 years.

Statement 4.4b: Percentage distribution of students by level of current attendance in various age-groups between 5 – 29 years for each gender

age-group (years)	level of current attendance					
	primary	upper primary	secondary & higher secondary	graduation & above	diploma	all (incl. n.r.)
(1)	(2)	(3)	(4)	(5)	(6)	(7)

Ref: Table 11, Appendix A

4.3.3 Current attendance by level of attendance

4.3.3.1 Distribution (in %) of male and female students by level of current attendance is presented separately for rural and urban areas with the help of the following pie-charts.

4.3.3.2 In rural areas, 44% of male and 45% of female students were at primary level while another 22% and 23% were at upper primary level respectively for males and females. The proportion of students at graduation and above (including diploma of various levels) in urban was nearly double of the corresponding rural proportions. There were no major differences in the distribution pattern of males and female students by their current level of attendance in both urban and rural areas.

Fig. 4.6RM: Percentage distribution of rural male students by level of current attendance

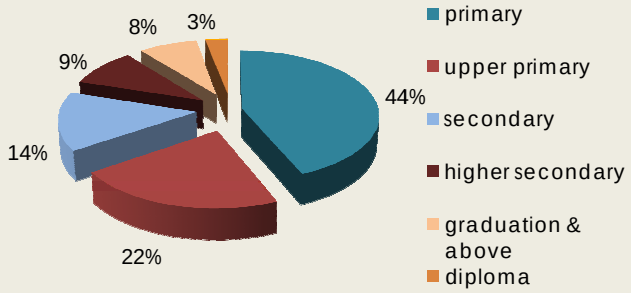

Fig. 4.6RF: Percentage distribution of rural female students by level of current attendance

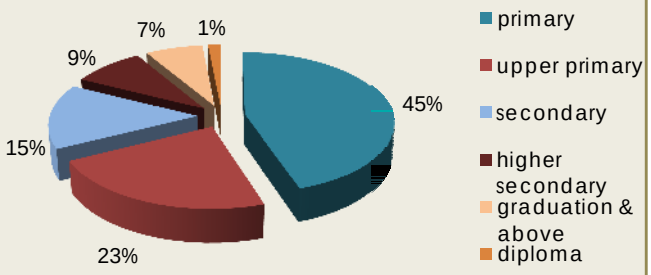

Fig. 4.6UM: Percentage distribution of urban male students by level of current attendance

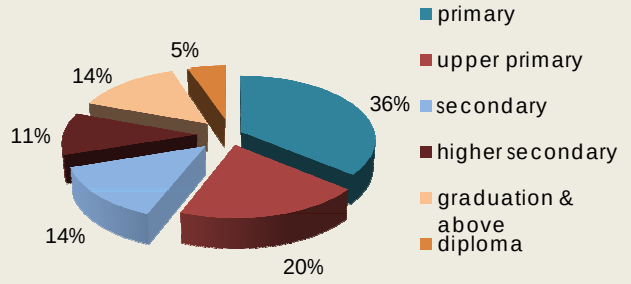

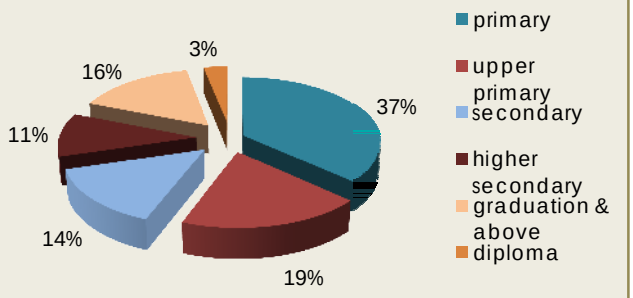

Fig. 4.6UF: Percentage distribution of urban female students by level of current attendance

Ref: Table 11, Appendix A

4.3.4 Current attendance by type of education

4.3.4.1 Education is broadly classified into two categories in this survey (i) general and (ii) technical/ professional (Details are given in Chapter Two: Concepts & Definitions). Though no information was specifically collected on vocational education, it can be obtained separately as a part of technical/professional education.

- General education includes general school education from the primary to the higher secondary level, normal university education for a degree.
- Technical/professional courses involve the hands on training in addition to theoretical classes.
- Any technical/ professional course with the *level of current attendance* as *secondary* or below or *diploma/certificate course (up to secondary)* will be considered as vocational course, along with courses offered by Industrial Training Institute (ITI), National Vocational Training Institute, Regional Vocational Training Institutes etc.

4.3.4.2 In the following statements (Statements 4.5a & 4.5b) students are distributed by the type of education on the basic course they were currently attending.

Statement 4.5a: Percentage distribution of students by type of education for age-groups 15-29 years and 5-29 years

age-group (years)	type of education			
	general	technical/professional (except vocational)	vocational	all (incl. n.r.)
(1)	(2)	(3)	(4)	(5)
15-29	85.0	12.6	2.4	100.0
5-29	95.2	4.0	0.8	100.0

Ref: NSS KI (71/25.2): Key Indicators of Social Consumption in India Education

4.3.4.3 The major share of students in 5-29 years age group in general education (95%) is not surprising, considering the fact that about 80% of urban and 90% rural students were in the level higher secondary or below (Reference Figs: 4.6 series), which mostly comes under general education. It is expected that adult students (age 15 years & above) will more opt for specialized courses. Therefore, distribution of students within age 15-29 years by the type of education they were currently attending is also given along with distribution of all students in Statement 4.5a. As shown in this Statement, nearly 13% and 2% of students in age-group 15-29 years were attending technical and vocational courses respectively, three times of that for ages 5-29 years. It can also be observed from Statement 4.5b that female students were less opting for technical/professional courses (7%) than their male counterparts (11%) in urban areas.

Statement 4.5b: Percentage distribution of students by type of education received for each gender

gender	percentage distribution of students by type of education		
	general	technical/professional (incl. vocational)	all (incl. n.r.)
(1)	(2)	(3)	(4)
rural			
male	96.2	3.8	100.0
female	97.8	2.2	100.0
person	96.9	3.1	100.0
urban			
male	89.3	10.7	100.0
female	93.0	7.0	100.0
person	91.0	9.0	100.0
rural+ urban			
male	94.2	5.8	100.0
female	96.4	3.6	100.0
person	95.2	4.8	100.0

Ref: Table 12, Appendix A

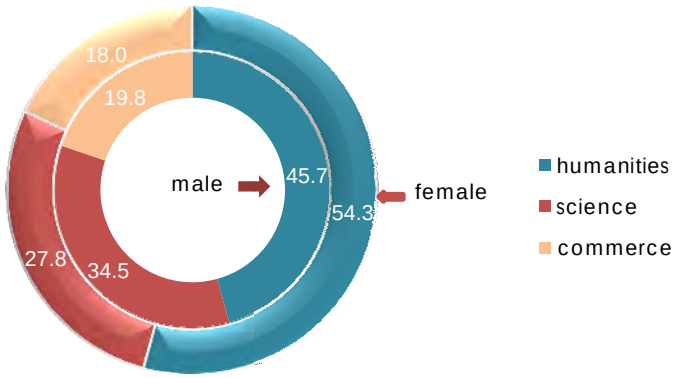

4.3.4.4 Detailed State/UT wise figures for rural and urban areas separately and also for age-groups 5-29 years and 15-29 years (for rural and urban areas combined) are given in Tables S4.2a & S4.2b respectively at the end of Chapter Four. Among States, 9.1% of students from rural areas in Kerala and 7.1% in Tamil Nadu were pursuing technical/professional (excluding vocational) education whereas corresponding figures in urban areas were 15.3% in Andhra Pradesh and 11% in Tamil Nadu. In rest of the selected States in both rural and urban areas lower shares of students were pursuing technical/professional education.

4.3.5 Attendance by type of courses

4.3.5.1 In Statement 4.5b, it is observed that most of the students were opting for general education, than technical/vocational education. Figures 4.7a & 4.7b provides the distribution of students, separately for male and female, by different courses they were currently attending under general and technical/professional education respectively.

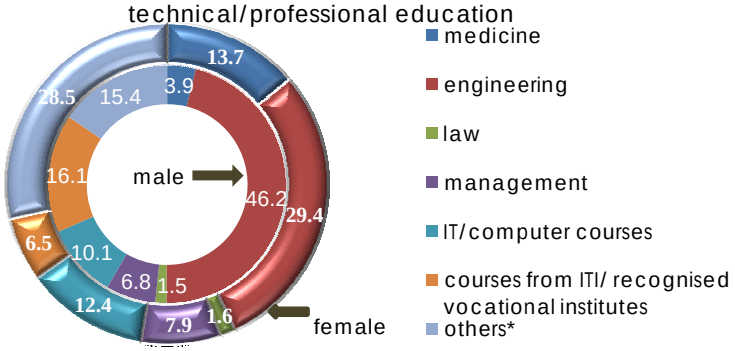

4.3.5.2 Humanities was the most attended course in general education, with about 54% of female students were studying this in comparison to 46% of male students. For both males and females, percentage of students studying Commerce was least (20% in males and 18% in case of females). From Fig. 4.7b it is seen that among male students studying in technical/ professional courses, nearly half of them (46%) were in engineering, whereas for female students studying technical/professional courses, 43% were in medicine (incl. nursing) and engineering courses combined. 16% of male students and around 7% of female students were pursuing courses from ITI or from recognized vocational institutions. Overall, it can be observed that for general education, the distribution of students by courses did not differ much for males and females; whereas for technical/professional education this difference can be seen more clearly for some courses like Engineering, Medicine and courses from ITI.

Fig. 4.7a: Percentage distribution of students by course for general education

Ref: Table 12, Appendix A

Fig. 4.7b: Percentage distribution of students by course for technical/professional education

Ref: Table 12, Appendix A

4.3.5.3 Distribution (in %) of students pursuing various courses under general education by different levels of current attendance is briefed in Statement 4.6a below. For general education distribution pattern is more or less similar for males and females. For Humanities and Commerce, almost equal parentages of students are attending higher secondary and graduation and above levels for both the genders. Interestingly, unlike humanities and commerce courses,

students studying Science in graduation & above levels were nearly one-third to half of those attending higher secondary levels for males and females respectively.

Statement 4.6a: Percentage distribution of students by level of current attendance in general education

course	level of attendance					
	primary & upper primary	secondary	higher secondary	graduation & above	diploma	all (incl. n.r.)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
male						
up to class X	81.4	18.6	-	-	-	100.0
humanities	0.0	0.2	48.2	48.3	3.3	100.0
science	0.1	0.0	69.9	26.1	3.8	100.0
commerce	0.0	0.1	46.6	48.8	4.8	100.0
female						
up to class X	81.4	16.8	-	-	-	100.0
humanities	0.0	0.2	49.4	47.1	3.4	100.0
science	0.0	0.1	64.1	31.4	4.4	100.0
commerce	0.1	0.0	44.8	51.0	4.0	100.0

Ref: Table 12, Appendix A

4.3.5.4 Statement 4.6b gives the share of male and female students by level of current attendance in technical/professional courses.

Statement 4.6b: Percentage distribution of students by level of current attendance in technical /professional education

course	level of attendance				
	up to secondary	higher secondary	graduation & above	diploma	all (incl. n.r.)
(1)	(2)	(3)	(4)	(5)	(6)
male					
medicine	0.0	2.8	50.9	46.3	100.0
engineering	0.0	1.0	54.4	44.7	100.0
law	0.0	4.1	77.0	18.9	100.0
management	0.5	0.2	80.6	18.7	100.0
IT/computer courses	0.1	1.7	45.7	52.4	100.0
courses from ITI etc.	0.0	4.2	2.7	93.1	100.0
female					
medicine	0.1	0.8	55.3	43.8	100.0
engineering	0.0	0.5	69.1	30.4	100.0
law	0.0	10.2	64.6	25.2	100.0
management	0.0	1.4	82.8	16.4	100.0
IT/computer courses	0.0	1.7	62.4	35.9	100.0
courses from ITI etc.	0.0	6.2	8.3	85.5	100.0

Ref: Table 12, Appendix A

4.3.5.3 As per Statement 4.6b, in engineering courses, the distribution of male students studying at diploma levels was substantial (45%) along with students studying at graduation and above levels (54%), but for females pursuing engineering courses most of them (69%) were at the levels of graduation & above. In management courses, the most of the students were studying at higher levels (graduation and above) for both males and females.

4.3.6 Attendance by type of institution

4.3.6.1 Different types of institutions, on the basis of their management are government, private body receiving aid from government, i.e. private aided and private body not receiving aid from government, i.e. private unaided.

4.3.6.2 The distributions of students by type of institution, attending different levels of education in 2007-08 and 2014 is presented in Statement 4.7. In rural areas, majority of the students were attending government institutions predominantly up to higher secondary levels in both the survey years, but the percentage of students studying in govt. schools is gradually decreasing over the years. A completely different picture was observed in urban areas. Approximately 69% of urban students attended private (aided & unaided) institutions at primary level in 2014 rising from 59% in 2007-08. As a result, students studying at primary level in government institutions dropped from 40% to 31% between these periods. The shift from government to private institutions was overall followed in urban areas up to the level of higher secondary in comparison to that in the rural areas.

Statement 4.7: Percentage distribution of students by type of institution attended for various levels of school education in 2014 (NSS 71st round) and 2007-08 (NSS 64th round)

type of institution	rural		urban		rural + urban	
	2014	2007-08	2014	2007-08	2014	2007-08
(1)	(2)	(3)	(4)	(5)	(6)	(7)
primary						
govt.	72.3	81.4	30.9	39.6	62.0	72.6
private aided	5.0	3.9	17.5	16.1	8.1	6.5
private unaided	22.5	14.3	51.4	43.0	29.7	20.3
total (incl. n.k.)	100.0	100.0	100.0	100.0	100.0	100.0
upper primary						
govt.	75.8	78.3	38.0	44.2	66.0	69.9
private aided	7.9	9.2	20.2	21.8	11.1	12.3
private unaided	16.2	12.1	41.5	33.0	22.8	17.3
total(incl. n.k.)	100.0	100.0	100.0	100.0	100.0	100.0
secondary & higher secondary						
govt.	63.5	66.0	37.5	45.2	55.8	59.4
private aided	15.5	18.8	25.6	27.0	18.5	21.4
private unaided	20.9	14.5	36.5	26.8	25.5	18.4
total(incl. n.k.)	100.0	100.0	100.0	100.0	100.0	100.0

Ref: Tables 12 & 18, Appendix A and NSS Report No. 532 for 64th round figures

4.3.6.3 Statement 4.8 describes distribution of students by types of institutions separately for general and technical/professional types of education for students from rural and urban areas. This reveals that majority of students pursuing general education were studying in government institutions (70%), whereas in urban areas it was just opposite; only 36% of students were studying in government institutions.

4.3.6.4 About 70% of students from rural areas, studying in technical/professional courses, were studying in private institutions. This figure was over 75% for students from urban areas. Going further, major technical course-wise comparison is presented in Fig. 4.8 below. From the chart it

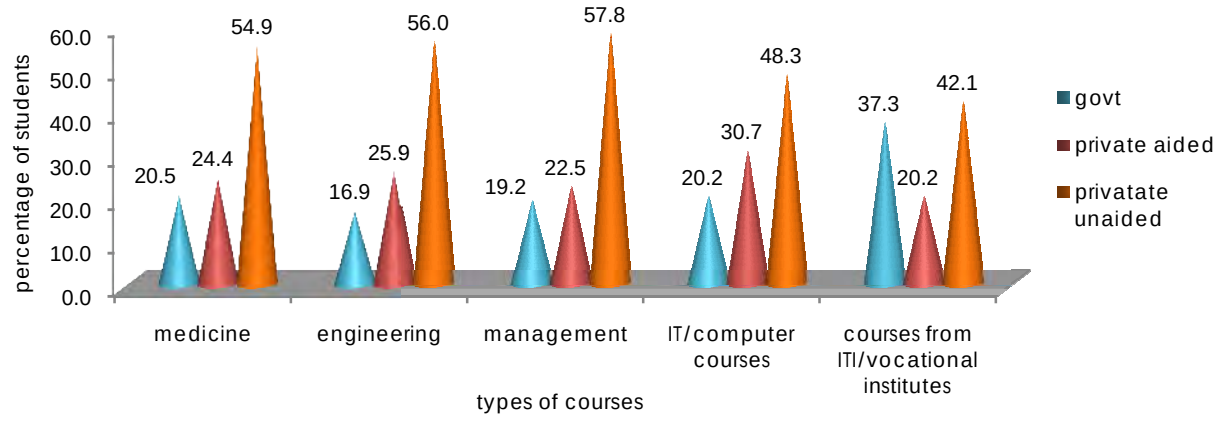

can be seen that nearly a quarter of students were studying in private aided institutions for medicine & engineering, whereas more than half of the students in medicine, management & engineering courses were attending classes in private unaided institutions. Incidence of students studying in government institutions was very less, below 20% for engineering and management courses. Situation was somehow different for courses from ITI etc. with 37% of students were in government institutions.

Statement 4.8: Percentage distribution of currently attending students pursuing different types of education by type of institution

type of education	type of institution	rural			urban			rural + urban		
		male	female	person	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)

4.3.6.5 Reasons for preferring private institutions

4.3.6.5.1 In this survey a question on reason for preferring private institutions was asked for students who were studying in private educational institutes. The following statement (Statement 4.9) gives an account of various reasons for preferring private institutions at various levels of current attendance for both the areas.

4.3.6.5.2 In general it can be noted that irrespective of levels of attendance, the most important reasons for studying in private institutions was *'better environment of learning'* as perceived by the students in both rural and urban areas. In rural areas the second most important reason was *'government institution is not available nearby'* from secondary level onwards. At graduation and above levels, 28% rural students and 36% urban students were studying in private institutions as they could not get admission in government institutions.

Statement 4.9: Percentage distribution of students studying in private institution by reason for preferring private institutions for different levels of attendance

level of attendance	reason for preferring private institution						
	govt. inst. is not available nearby	better environment of learning	English is the medium of instruction	quality of education in govt. inst. is not satisfactory	tried for govt. inst. but could not get admission	can't say	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
rural							
primary	3.7	58.7	11.6	22.4	0.3	3.4	100.0
upper primary	12.4	54.4	9.1	19.7	0.7	3.7	100.0

Ref: Tables 21a-21c, Appendix A

4.3.7 Medium of Instruction and Language spoken at home

4.3.7.1 Percentage of students with the languages mainly spoken at home are given in Statement 4.10. This statement also provides information up to higher secondary levels about the medium of instruction (only English & language same as the language mainly spoken at home) in which they were studying.

4.3.7.2 More than 80% of students speaking Hindi, Bengali and Gujarati were throughout studying with medium of instruction same as their speaking language up to higher secondary levels. Though more than 90% of students speaking Odiya were studying in Odiya up to secondary level but at higher secondary level it drastically dropped to 32% only. English was the most preferred medium of instruction (more than 50% of students) at higher secondary level for the students speaking in languages Dogri, Kashmiri, Konkani, Malayalam, Manipuri, Nepali, Odiya, Sindhi, Telegu and Urdu.

Statement 4.10: Percentage of students with medium of instruction of study English or same as that of language spoken at home for different levels of attendance

language mainly spoken at home	percentage of students	primary		upper primary		secondary		higher secondary	
		medium of instruction							
		same as that spoken in home	English	same as that spoken in home	English	same as that spoken in home	English	same as that spoken in home	English

4.3.8 Attendance by nature of institution

4.3.8.1 Information was collected in NSS 71st round on nature of the institution, i.e. whether the institution is recognised or not, only for the unaided private institutions and findings are presented in Statement 4.11 in the form of percentage of students attending recognised and unrecognised private unaided institutions at primary and upper primary level.

4.3.8.2 It was seen that at primary level, nearly 17% of students from rural areas who were studying in private unaided institutions were in unrecognized institutions, whereas such incidence was much less for students from urban areas (around 7%). At upper primary level the share of students in unrecognized institutions were around 12% and 5% respectively in rural and urban areas.

Statement 4.11: Percentage of students attending recognized and unrecognized private unaided institutions at primary and upper primary levels

nature of institution	rural			urban			rural + urban		
	male	female	person	male	female	person	male	female	person
(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)

Ref: Table 17, Appendix A

4.3.9 Proportion of repeaters in general education

4.3.9.1 In this survey, for each student, information on repeating class/grade with that of previous year was obtained from each selected household. The result is presented in Statement 4.12 for levels up to higher secondary.

Statement 4.12: Percentage of repeaters among currently attending students by broad class-group of school education

level of attendance	rural			urban			rural + urban		
	male	female	person	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
primary	3.4	3.0	3.2	2.3	2.5	2.4	3.1	2.9	3.0
upper primary	3.8	3.2	3.6	2.4	1.6	2.0	3.5	2.8	3.2
secondary	6.3	5.4	5.9	5.3	2.7	4.1	6.0	4.7	5.4
higher secondary	4.5	3.5	4.1	3.9	3.0	3.4	4.3	3.4	3.9

Ref: Table 57, Appendix A

4.3.9.2 Statement 4.12 indicates that, the percentage of repeaters was in the range 2-6% for nearly all the population categories and level of attendance. It was highest in the secondary level. In rural areas such incidences were a little higher compared to urban areas. Another noteworthy fact is that the proportion of females repeating in a class was generally less than the males. State/UT wise details for repeaters at each level of attendance, combining both the areas, are presented in Table S4.5 at the end of this Chapter.

4.3.10 Change in educational institution

4.3.10.1 In this survey the students were asked whether they had changed their educational institution during last one year, and if so, what the nature of the change was. State/UT-wise information on this characteristic is given in Table S4.4 at the end. It came into notice that only 16% of students had changed their educational institutions at all-India level. 11% of students shifted institutions from government to government. In the State of Jharkhand nearly 40% of students changed their institutions during the reference period, in Uttar Pradesh this share was 29%. Generally it was observed for all the States where a substantial no. of students changed their institutions; it was from Government to Government.

4.4 Incentives received

4.4.1 In this survey information was obtained for each student on various educational incentives received by them, such as,

- free education or tuition fee waived,
- scholarship/stipend/reimbursement,
- books or stationery free or at a subsidised price,
- mid-day meal,
- students' concession in public transport etc.

In following paragraphs various aspects of the incentives received by the students are discussed.

4.4.2 Receiving free education and an exemption in tuition fee

4.4.2.1 All such cases where no fee is required to be paid by any student, irrespective of their socio-economic conditions, to the institution for a particular level are considered to be instances of free education at that level.

4.4.2.2 In rural areas at primary and upper primary levels, nearly 70% of students were receiving free education. It is interesting to note here that most of these students were studying in government institutions in rural areas as discussed in earlier sections. In urban areas where most of the students were attending private institutions, only 30% of students in primary and 34% of students in upper primary level were getting free education. Details are in Statement 4.13.

Statement 4.13: Percentage of currently attending students getting free education or exemption from tuition fees at different levels of general education

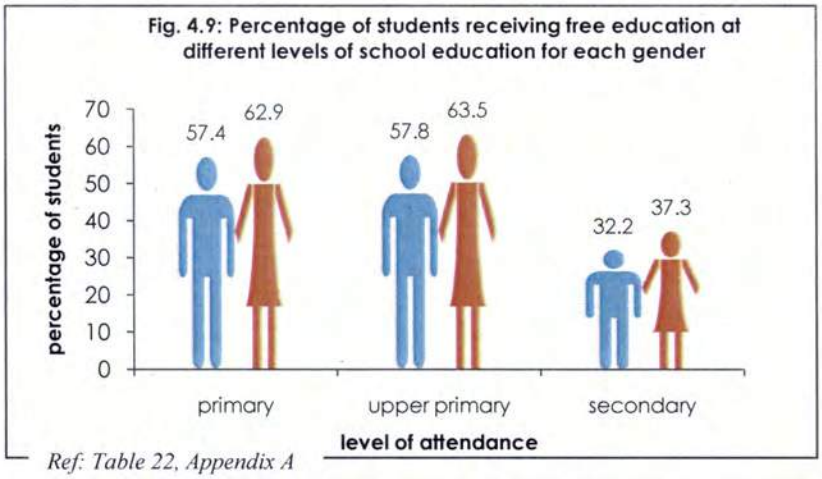

type of waiver	rural			urban			rural + urban		
	male	female	person	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
primary									
free education	66.9	73.5	69.9	27.8	31.4	29.5	57.4	62.9	59.9
tuition fee fully waived	0.4	0.5	0.5	0.9	1.2	1.1	0.5	0.7	0.6
tuition fee partly waived	0.2	0.4	0.3	0.6	1.1	0.8	0.3	0.6	0.4
upper primary									
free education	67.3	72.7	69.8	31.3	37.3	34.0	57.8	63.5	60.4
tuition fee fully waived	0.4	1.2	0.8	0.7	1.3	1.0	0.5	1.2	0.8
tuition fee partly waived	0.3	0.5	0.4	1.3	1.6	1.4	0.6	0.8	0.7
secondary & higher secondary									
free education	37.4	42.7	39.8	19.2	25.2	22.0	32.2	37.3	34.5
tuition fee fully waived	1.3	1.3	1.3	1.1	1.3	1.2	1.2	1.3	1.3
tuition fee partly waived	1.4	1.1	1.3	1.3	1.4	1.3	1.4	1.2	1.3

Ref: Tables 22a & 22b, Appendix A

4.4.2.3 The instances of tuition fee waived, fully or partly were very nominal in both rural and urban areas at all levels of attendance. Percentage of students getting free education at different levels of general education differed significantly across States. (Ref: Table 22, Appendix A).

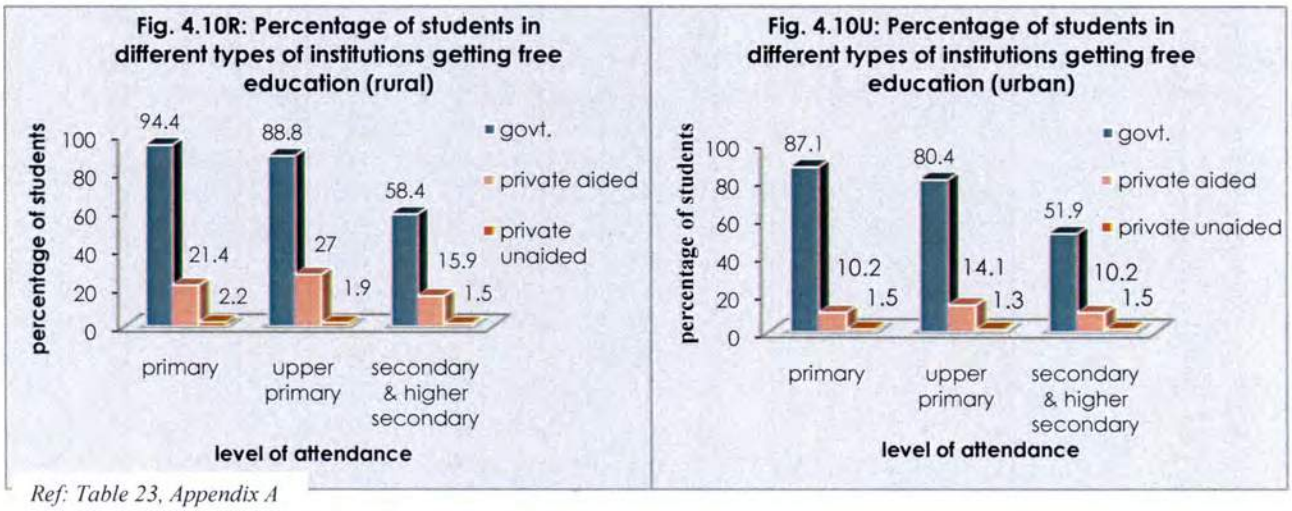

Extensive disparities in proportion of students getting free education were observed among all the States for each level of current attendance.

4.4.2.4 Figure 4.9 displays that for all the levels up to secondary, proportions of female students getting free education were higher than their male counterparts. For example, 63% of female students at primary level were receiving free education in comparison to 57% of male students.

Ref: Table 22, Appendix A

4.4.2.5 From Figs. 4.10R and 4.10U, it can be seen that almost 94% students from rural areas and 87% students from urban areas at primary level studying in govt. institutions were receiving free education. That proportion fell as one reaches higher levels. In private unaided institutions the percentage of students receiving free education was negligible. In private aided schools, the percentage of students receiving free education was the highest at upper primary level in both rural and urban areas.

Ref: Table 23, Appendix A

4.4.3 Scholarship & Stipend

4.4.3.1 Statement 4.14 is about proportion of students receiving scholarships in rural and urban areas for each quintile class of UMPCE. Female students were getting more scholarships/

stipends/reimbursements than males in all the quintile classes in both the areas, except for very nominal decrease for 5th quintile class in urban areas. Percentage of students receiving scholarships decreased gradually as one moves to higher quintile classes. On the whole, 24% students from rural areas and 11% students from urban areas received scholarship/stipend in 2014.

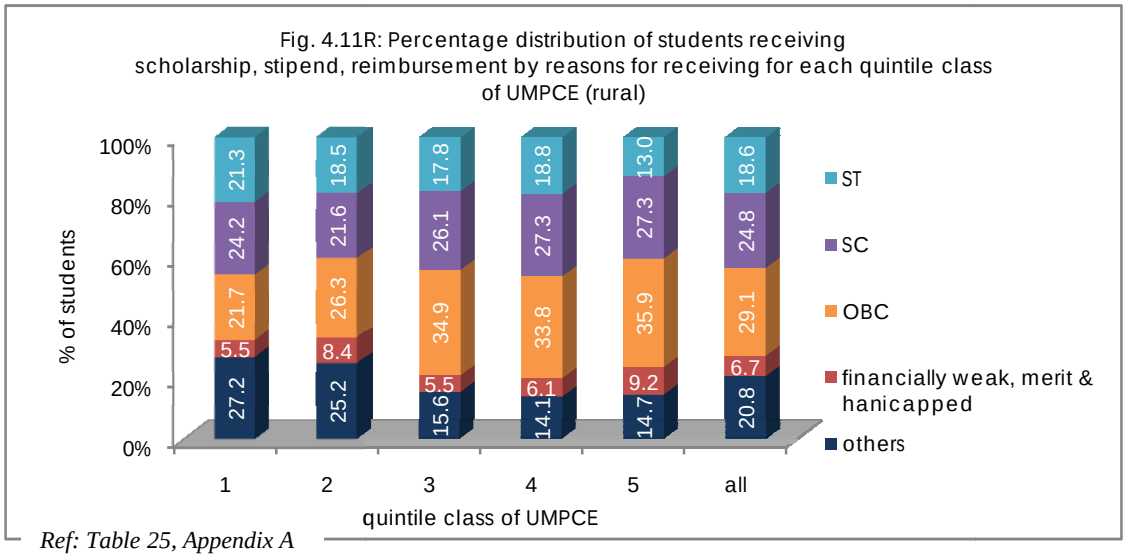

Statement 4.14: Percentage of students receiving scholarship for each quintile class of UMPCE

quintile class of UMPCE	receiving scholarship etc.					
	rural			urban		
	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1	30.7	36.0	33.2	16.0	20.1	18.0
2	26.4	29.9	28.1	11.4	14.0	12.6
3	22.5	24.4	23.3	9.7	11.8	10.7
4	19.0	24.0	21.2	7.6	8.5	8.0
5	11.9	14.8	13.1	5.6	5.5	5.6
all	**21.9**	**26.1**	**23.8**	**10.0**	**12.2**	**11.0**

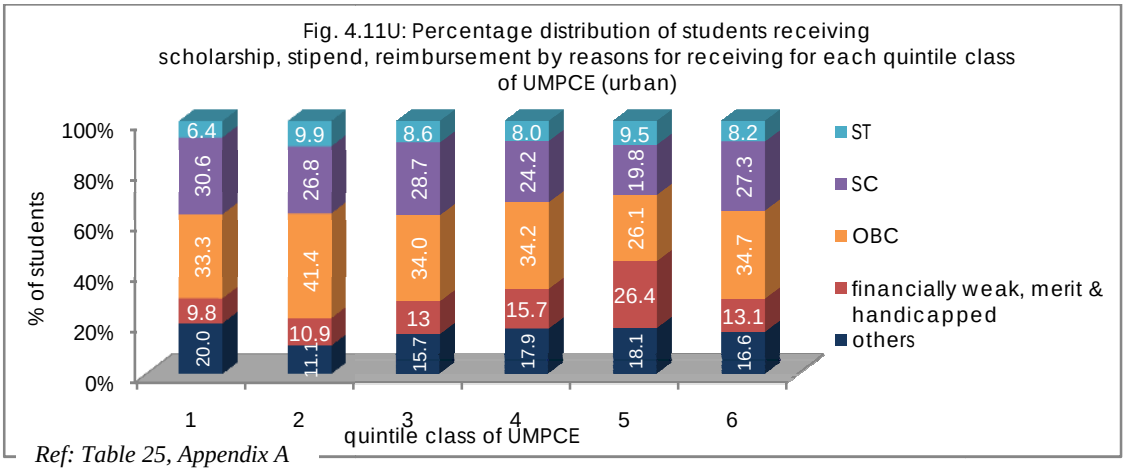

Ref: Table 25, Appendix A

4.4.3.2 Grounds for receiving scholarships/stipends are given in Figures 4.11 series with distribution of students by reasons for receiving scholarships for each quintile class of UMPCE separately in rural and urban areas.

4.4.3.3 In rural areas, the maximum share of students receiving scholarships was for the reason 'OBC' (nearly 29% of among the students receiving scholarships). Moreover share of students receiving scholarships etc. due to financially weak background or merit or handicapped were less (6.7%) in rural areas in comparison to corresponding share (13%) in urban areas. In urban areas too major reasons for getting scholarships was 'OBC' for all the quintile classes. The proportion of students receiving scholarship/stipends due to the reason 'ST' was considerable higher in rural areas than in urban areas in the survey year.

Ref: Table 25, Appendix A

Ref: Table 25, Appendix A

4.4.4 Other incentives

4.4.4.1 Proportion of students receiving other educational incentives in the form of free text books and stationeries from the institutions/charitable organizations/individuals etc. are given in Statement 4.15 along with the proportion of students getting mid-day meal and receiving concessions in public transport. State-wise information on these is provided in Tables S4.3a & S4.3b respectively for level of current attendance in primary and upper primary. In addition, information on type of agencies (Government and others) providing mid-day meals to the students are given in the tables at the end of this Chapter.

Statement 4.15: Percentage of students receiving different facilities for different levels of general education

level of current attendance	totally free		mid-day meal		receiving concessions among those availing public transport
	books	stationery	from govt.	from others	
(1)	(2)	(3)	(4)	(5)	(6)
rural					
primary	65.9	4.5	71.6	0.6	31.3
upper primary	62.6	4.4	69.3	0.9	58.8
secondary & higher secondary	22.0	1.9			54.9
graduation & above	1.7	0.2			43.0
urban					
primary	27.7	3.5	32.2	1.1	16.9
upper primary	30.1	3.4	35.7	1.5	43.2
secondary & higher secondary	12.7	1.5			45.2
graduation & above	2.4	0.3			32.9
rural + urban					
primary	56.4	4.3	61.8	0.7	24.1
upper primary	54.1	4.1	60.5	1.1	53.7
secondary & higher secondary	19.2	1.8			52.2
graduation & above	2.0	0.3			39.5

Ref: Table 27, Appendix A

4.4.4.2 Proportion of students getting free mid-day meal in the institutions at primary and upper primary classes was around 62%. Among the students getting mid-day meal around 98% of them were getting so from government agencies for both primary and upper primary levels (Ref: table

S4.3a & S4.3b). It is observed from the above Statement that percentage of students from rural areas were getting more educational incentives like free text books and mid-day meal. Here it has to be kept in mind that a good number of students in urban areas were attending education in private institutions. At primary level 72% of rural students were getting mid-day meal from different sources (government and others) in 2014 in comparison to only 33% of urban students. At higher levels of education (secondary level onwards) incidences of getting free books fell down drastically (56% in primary to 19% in secondary & higher secondary). Around 4% of the students, in primary and upper primary levels were receiving free stationeries in India. More than half of students attending upper primary, secondary and higher secondary levels, availing the facilities of public transport, got concessions in transport fare.

4.4.4.3 From Tables S4.3(a & b), it is noticed that in 86% of students in Assam and 85% of students in West Bengal at primary level and 84% of students in Odisha and 80% in West Bengal at upper primary level were receiving mid-day meal among the selected States. In the States of Punjab, Telangana and Uttar Pradesh; less than 50% of students were getting mid-day meal at elementary level of education.

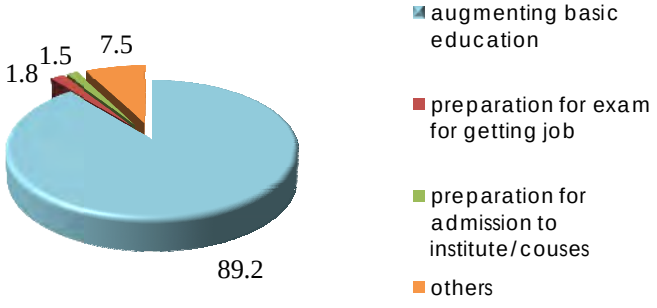

4.5 Private coaching

4.5.1 Attending private coaching classes individually or in a group, at home or at any other place, offered by a single or more tutors for different reasons is in vogue among students. In this survey information on students attending private coaching with reasons thereof at different levels of attendance were captured and State-wise results are presented in Tables S4.6 series.

4.5.2 From Tables S4.6a and S4.6b at the end of Chapter Four, it is noted that in States like Tripura (around 81%) and West Bengal (around 78%), majority of students were attending private coaching classes (combining school education and higher education), whereas at all-India level 1/4th of students were taking private coaching.

4.5.3 Distribution of students taking private coaching by different purposes is presented in Fig. 4.12 below with the help of a pie-chart. At all-India level, 89% of students were taking private coaching for augmenting basic education.

Fig. 4.12: Percentage distribution of students taking private coaching by purpose

Ref: Table 29, Appendix A

4.5.4 As presented in Statement 4.16, percentage of students taking private coaching in different quintile classes of UMPCE were more or less following similar pattern, except for the lowest UMPCE class for both rural and urban areas. 38% of students in the highest quintile class were taking private coaching in urban areas in comparison to 25% of students from rural areas. Gender-wise variations were not distinctly visible among quintile classes (in both rural and urban areas).

Statement 4.16: Percentage of students taking private coaching for each quintile class of UMPCE

quintile class of UMPCE	rural			urban		
	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1	19.0	15.1	17.2	29.3	28.6	28.9
2	25.5	24.0	24.8	33.5	30.6	32.1
3	24.5	21.0	23.0	36.1	32.5	34.5
4	25.2	21.2	23.4	38.7	35.7	37.3
5	25.6	23.4	24.7	40.0	35.6	38.1
all	**24.0**	**20.9**	**22.6**	**35.6**	**32.5**	**34.2**

Ref: Table 30, Appendix A

4.6 Students staying in hostel

4.6.1 Statement 4.17 indicates that out of 100 students, staying in hostel for the purpose of study, the maximum of them (49%) were attending up to X-th Standard. Among male students staying in hostel, 17% were in engineering courses. Among female students, the shares of students staying in hostel were more in science & humanities courses (around 10%) than in engineering course (8.4%).

Statement 4.17: Percentage distribution of students by courses, for students staying in hostel

course	male	female	person
(1)	(2)	(3)	(4)
general			
up to class X	46.9	52.7	49.2
humanities	8.3	10.1	9.0
science	12.9	10.2	11.8
commerce	3.9	3.8	3.9
technical/professional			
medicine	1.6	6.8	3.7
engineering	17.2	8.4	13.7
courses from ITI/ recognised vocational institutes	2.4	1.1	1.9
others*	6.8	6.7	6.8
all	**100.0**	**100.0**	**100.0**

Ref: Table 13, Appendix A

**includes law, management, IT/computer courses, agriculture, education, chartered accountancy & similar courses and any other courses not mentioned elsewhere*

B. Expenditure on Education

4.7 Private expenditure on education

4.7.1 Education has all along remained an important development priority, necessitating intervention by government for its easy access to different sections of society. Nevertheless, individuals attending educational institutions incur expenditure in the form of payment of course fees (including tuition fee, examination fees etc.), purchase of books, stationeries and uniforms, expenses on conveyance, private coaching, etc. This is referred to as private expenditure on education in this survey. Information on this had been obtained from all the sampled households and findings are summarized here at current prices.

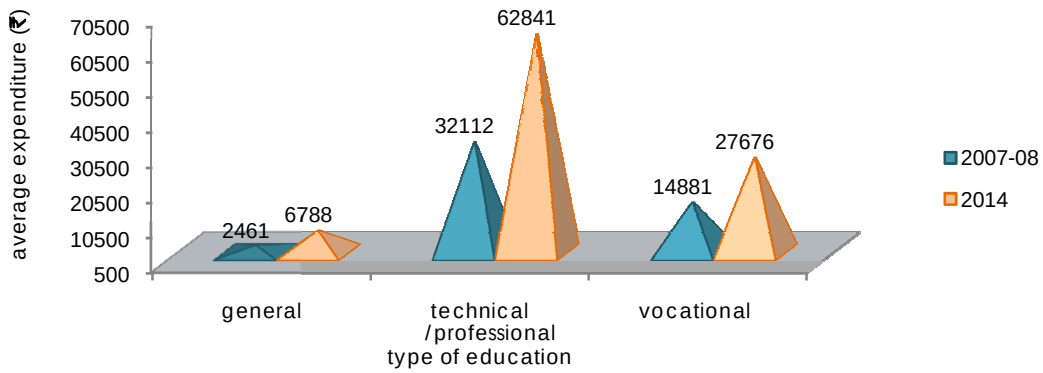

All the private expenditures incurred and/or to be incurred during the *current academic session* on the *basic course* attended by a household member were considered.

4.8 Average expenditure on education

4.8.1 The average annual private expenditure per student on the basic course during current academic session are presented in Fig. 4.13 in comparison with NSS 64th round (2007-08) separately for general, technical and vocational education.

4.8.2 In this survey, average expenditure on technical/professional and vocational education were about 9 times and 4 times respectively of that on general education whereas in the previous survey (2007-08) those were 13 times and 6 times respectively. At current price, the expenses on technical/professional and vocational become nearly doubled and for general education it was almost less than 3 times in year 2014 over 2007-08. Detailed State/UT wise average expenditure for these three types of education is given in Tables S4.7 at the Chapter-end.

Fig. 4.13: Average expenditure (₹) per student for different types of education

Ref: Key Indicators of Social Consumption in India

4.8.3 States with average expenditure below national average were mainly States with higher population like Uttar Pradesh, Bihar, and West Bengal etc. Lowest expenditure (₹ 2,993) among the selected States was observed for students from Chhattisgarh. In Haryana and Punjab the average expenditure per student on general education were nearly double of that of the national average. (Reference Table 32, Appendix A)

4.8.5 Table 33 in Appendix A suggests that variation in average expenditure on technical/professional education among the selected States though present but not so prominent like general education.

4.9 Expenditure on education by level of attendance

4.9.1 From Statement 4.18, it is observed that with the higher level of current attendance the expenditure on general education has increased. The rural-urban difference became narrowed at the higher levels of general education. At primary level, expenditure per student in urban areas was ₹10083, which was nearly four times than that in rural areas. It is noted that at graduate level, average expenditure for female students was slightly more than their male counterparts in rural areas.

Statement 4.18:Average expenditure (₹) per student pursuing general education at different levels of current attendance

level of attendance	rural			urban			rural + urban		
	male	female	person	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

Ref: Table 32, Appendix A and NSS Report No. 532 for 64th round figures

4.9.2 Average expenditures on different levels of general education in the year 2007-08 are also given at current price in Statement 4.18. In all the levels of attendance, average expenditure increased 2-3 times over that in the year 2007-08; but noticeably at primary level, this jump was more than 3 times in rural areas. It is to be kept in mind that the comparisons are made at current prices.

4.9.3 To show the average expenditure per student at different levels of technical/professional (including vocational) education in rural and urban areas, Statement 4.19 is presented.

Statement 4.19: Average expenditure (₹) per student pursuing technical/professional education at different levels of current attendance

gender	level of attendance						
	up to secondary	higher second-ary	graduate	PG and above	diploma/certificate		
					up to secondary	higher secondary	graduate and above
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
rural							
male	29861	7383	59979	50067	26148	33800	61515
female	14200	5446	62201	56526	21772	37301	45621
person	29766	6547	60832	52358	25379	34730	56650
urban							
male	16500	24703	82298	80391	30268	39902	70189
female	18000	13521	77224	84262	29218	38119	70990
person	16840	19728	80414	82181	30043	39395	70459
rural + urban							
male	26610	10864	74341	68152	27773	36274	66138
female	17769	7140	71683	75891	25150	37651	60029
person	25985	9247	73342	71431	27272	36651	64165

Ref: Table 33, Appendix A

4.9.4 From Graduation level onwards, differences in expenditure on male and female students were nominal in both the areas. In general, the expenditures on students from urban areas were more than their rural counterparts from higher secondary level onwards. This gap became the widest at higher secondary level and then narrowed gradually in the higher levels.

4.10 Expenditure on education by quintile classes of UMPCE

4.10.1 Statements 4.20 & 4.21 will give an insight how usual monthly per capita consumer expenditure has connection with the expenditure on education.

4.10.2 It is quite obvious from these Statements that the higher is the UMPCE higher is the average expenditure on education at all-levels of attendance up to graduate level. At primary level average expenditure incurred by the students in the lowest quintile class was ₹1027 whereas the same for the highest quintile class, it was ₹7595 in rural areas. On an average, students from urban areas at primary levels belonging to the lowest to the highest quintile classes spent in the range of ₹3465 to ₹28658. The gradient of increase at primary level was much steeper (8 times in the highest quintile class than that of lowest quintile class) in comparison to higher levels of attendance. At graduate level, this increase varied between 2.5-3 times in both rural and urban areas.

Statement 4.20: Average expenditure (₹) per student pursuing general education by level of education for each quintile class of UMPCE

level of attendance	quintile class of UMPCE				
	1	2	3	4	5
(1)	(2)	(3)	(4)	(5)	(6)
rural					
primary	1027	1667	2462	3375	7595
upper primary	1281	1950	2793	3241	8044

Ref: Table 34a, Appendix A

4.10.3 For technical/professional education no definite pattern of spending on education was observed over the UMPCE classes, except for the fact that in all levels of current attendance in both rural and urban areas, maximum expenditure was incurred by the students belonging to the top quintile class.

Statement 4.21: Average expenditure (₹) per student pursuing technical /professional education by level of education for each quintile class of UMPCE

level of attendance	quintile class of UMPCE				
	1	2	3	4	5
(1)	(2)	(3)	(4)	(5)	(6)

4.11 Expenditure on education by type of institutions

4.11.1 Type of institutions is an important determinant of the average expenditure in respect to different levels of attendance as well as various courses opted by the students in both general and technical education. This section will furnish such information.

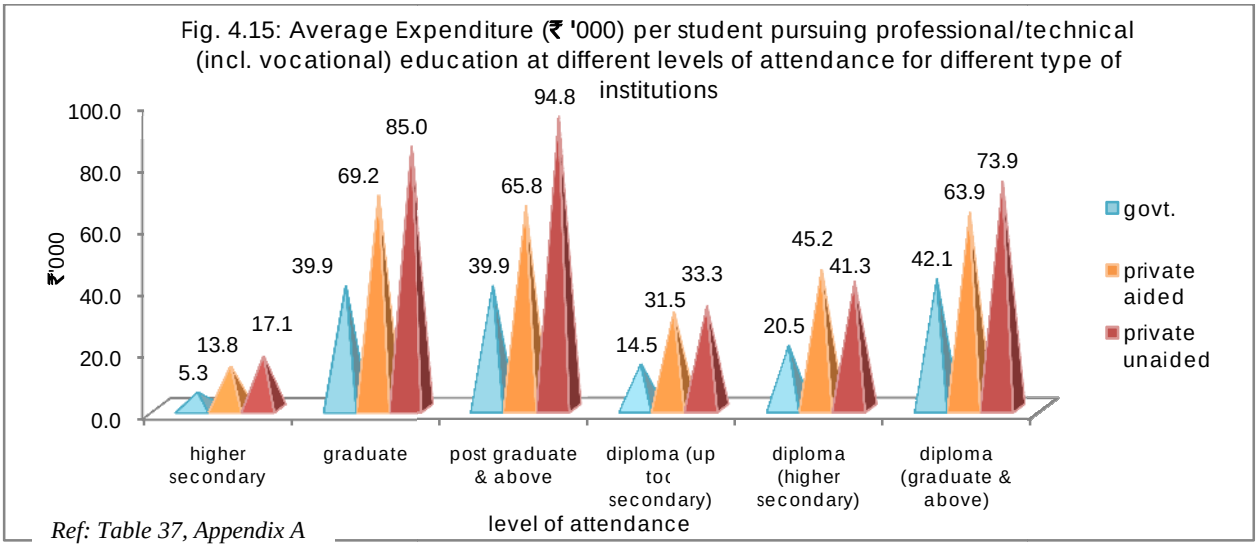

4.11.2 In general education, a huge difference is noted in average educational expenditure incurred by the students attending schools run by Government and the private ones (Fig. 4.14), more prominently for levels of attendance in primary to secondary. At primary level, average expenditure incurred by a student attending government schools was ₹1111, nearly one-tenth to that in private unaided institutions (₹10623). This proportion was one-third at the level of higher secondary (₹6916 in government institution to ₹20740 in private unaided institutions). Average expenditure per student up to higher secondary level for each State/UT is given in Tables S4.8a & S4.8b. It can be observed from Table S4.8a that average expenditure at primary level varied from ₹610 in Uttar Pradesh to ₹3241 in Kerala in government institutions.

Fig. 4.14: Average Expenditure (₹) per student pursuing general education at different levels of attendance for different type of institutions

Ref: Table 36, Appendix A

4.11.3 Figure 4.15 shows the average expenditure on technical/professional (incl. vocational) education in government and private institutions at different levels of attendance. Average expenditure did not vary much between 'graduate' and 'post graduate & above' levels in both government and private aided institution. Educational expenditure for diploma/certificate courses at various levels varied widely in both government and private institutions. State/UT wise average expenditure per student pursuing technical/professional courses at graduate, post graduate and diploma levels are given in Table S4.9a & S 4.9b at the end of the present Chapter. Expenditure on technical education (incl. vocational) in government institutions varied from ₹7921 in Jharkhand to ₹58502 in Rajasthan at graduate level whereas in private unaided institutions this expenditure was lowest in Andhra Pradesh(₹58918) and the highest in Haryana(₹127244) among the selected States.

Ref: Table 37, Appendix A

4.11.4 The expenditure on education for students studying in government institutions was expectedly much lower up to X-th standard in comparison to other types of institutions in both rural (₹1552) and urban (₹3291) areas. Irrespective of the courses rural-urban difference in expenditure is quite apparent in private institutions, both aided and unaided. Average expenditure for students from urban areas was nearly 1.5-2 times of that of rural areas in private institutions; it was also much higher in relation to expenditure in government run institutions. Details are provided in Statement 4.22 at all-India level. The State/UT wise details are available in Table 43, Appendix A.

Statement 4.22: Average expenditure (₹) per student pursuing general education for different courses and types of institutions

type of institution	up to X	humanities	science	commerce
(1)	(2)	(3)	(4)	(5)
rural				
govt.	1552	6666	9302	7592
pvt. aided	6140	8619	15594	14814
pvt. unaided	8807	11044	18828	21397
urban				
govt.	3291	8725	14489	11586
pvt. aided	12487	11345	24419	19254
pvt. unaided	16536	16758	37158	28573
rural +urban				
govt.	1798	7155	10895	9419
pvt. aided	9205	9329	19661	17706
pvt. unaided	12221	12503	26482	25462

Ref: Table 43, Appendix A

4.11.5 It is evident from Statement 4.23 that average expenditure on technical/professional education in private aided & unaided institutions varied between nearly 1.5-2.5 times to that in govt. institutions. However, not much difference in average expenditure was noted for students studying in govt. institutions in rural and urban areas, barring medical course. Among various courses, cost of studying medicine was the highest. Average expenditure was more than one lakh

rupees for studying medicine (₹118657) and management (₹105188) courses in private unaided institutions during 2014.

Statement 4.23: Average expenditure (₹) per student pursuing technical/professional education for different courses and type of institutions

type of institution	medicine	engineering	management	IT/computer courses	courses from ITI/recognized vocational institutes
(1)	(2)	(3)	(4)	(5)	(6)

Ref: Table 44, Appendix A

4.12 Components of expenditure

4.12.1 The private education expenditure is composed of various items of educational expenditure, viz. course fees; books, stationery and uniform; transport; private coaching; etc. Course fee included examination fees, development fees and other compulsory payments such as session charge, library fees, games fees, laboratory fees and other similar payments, which may be made at one time or on periodical basis.

Donation or any other such payments including capitation fee charged by an institution was considered in course fee if it was a compulsory payment and was officially accounted for by a valid receipt.

4.12.2 The share of each of the above components in average expenditure has been presented in Statement 4.24 below for general and technical education in rural and urban areas. In rural India, course fee, which includes tuition fee, examination fee and other compulsory payments, accounted for 41% of total expenditure while another 27% was spent on books and stationery. In urban areas, more than 50% of educational expenditure was spent on course fee. A substantial amount was spent on private coaching by students in general education in both areas. Students from urban areas spent considerably lesser amount on books and stationery compared to their rural counterparts. The component-wise share in technical/professional education shows that, course fee alone covered nearly 3/4th of the total expenditure in urban areas and more than 2/3rd in rural areas. It is also observed that approximately 6% of total expenditure was spent on transport. Share of private coaching in technical education (around 2%-3% for rural and urban areas both) was very less in comparison to that in general education (14%-16%). Share of expenditure on books and stationeries was much lower for technical/professional education compared to general education in both rural and urban areas.

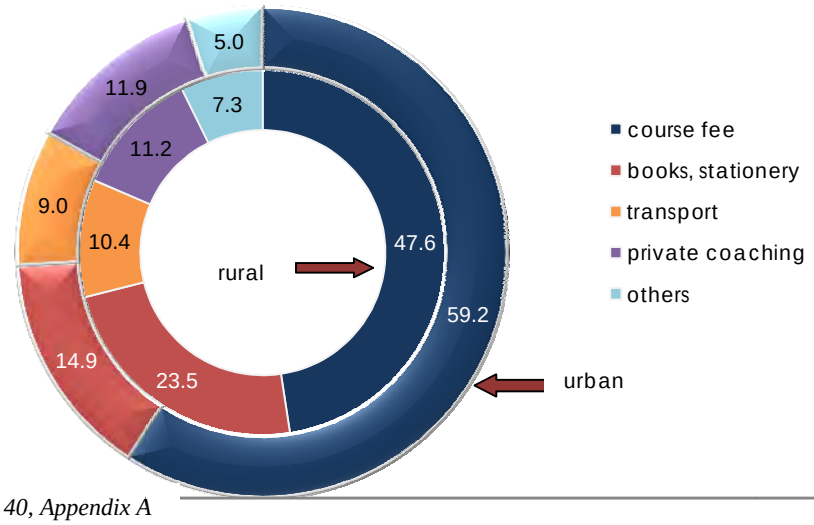

Statement 4.24: Major components of expenditure and their share (%) in total expenditure for general and technical/professional education

component of expenditure	general education		technical/professional education (including vocational)	
	rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)
course fee	40.6	51.3	69.9	74.3
books, stationery etc.	27.3	17.7	11.3	9.5
transport	11.7	10.5	6.3	6.2
private coaching	14.1	16.5	2.3	3.1
other expenditure	6.4	4.0	10.2	6.9
total	**100.0**	**100.0**	**100.0**	**100.0**

Ref: Tables 38 & 39, Appendix A

4.12.3 The component-wise share of expenditure, combining general and technical education at all-India level during 2014 is shown in Fig. 4.16. Course fees constituted the largest share (48% in rural and 59% in urban areas), followed by books and stationery (24% in rural and 15% in urban). Private coaching was another major contributor towards expenses on education, 11% in rural and 12% in urban areas.

Fig. 4.16: Percentage distribution of item-wise expenditure on education

Ref: Table 40, Appendix A

4.12.4 In earlier Statements it has been noticed that course fee is the prime component of the educational expenditure. In the following Statements 4.25 and 4.26, average expenditure per student at various levels of attendance in government and private (aided & unaided) institutions are separately provided for general and technical/professional (incl. vocational) education.

4.12.5 In a nutshell it can be said that a huge gap in course fees existed between government and private institutions as well as between private aided and private unaided institutions at all levels of attendance in general education across rural and urban areas. For instance, at primary level in urban India average course fee was ₹381 per student in government institutions. In private aided and private unaided institutions, corresponding course fees were nearly 17 times and 22 times to

that in government institutions respectively. However in higher education rural-urban gap in course fees narrowed in government institutions but remarkable variations were present in private institutions specifically after secondary level.

Statement 4.25: Average expenditure (₹) per student on course fee pursuing general education at different levels by type of institution

level of attendance	type of institution					
	govt.		private aided		private unaided	
	rural	urban	rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)	(6)	(6)
primary	70	381	2984	6446	4271	8513
upper primary	151	508	2584	6310	5363	11174
secondary	479	861	2238	5914	6566	12126
higher secondary	1323	1747	4288	8389	7966	17059
graduate and above	3184	4608	5825	9350	10998	17738
diploma	3634	4370	8291	9969	12251	20141

Ref: Table 41, Appendix A

4.12.5 In technical/professional education the gap between course fees in government and private institutions were widened from higher secondary to post graduate & above levels (Statement 4.26). At higher secondary level, average course fees in govt. and private unaided institutions were ₹1572 and ₹11309 respectively. It is to be mentioned here that in both the diploma levels no major variation in average course fees per student studying in private aided and unaided institutions was observed.

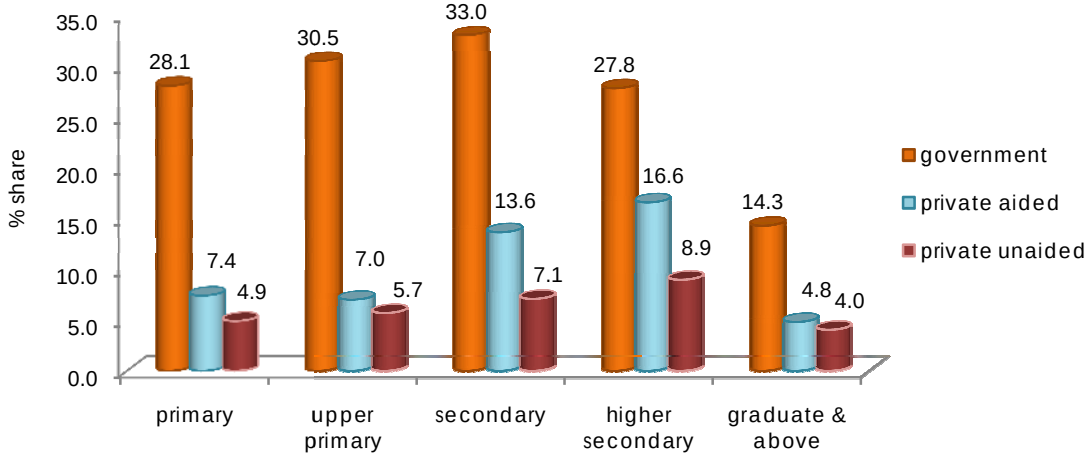

Statement 4.26: Average expenditure (₹) per student on course fee, pursuing technical /professional education at different levels by type of institution

level of attendance	type of institution		
	govt.	private aided	private unaided
(1)	(2)	(3)	(4)
higher secondary	1572	7775	11309
graduate	25783	49914	64442
post graduate and above	24349	47800	75574
diploma (up to secondary)	6501	20860	22219
diploma (higher secondary and above)	17659	38630	41585

Ref: Table 42, Appendix A

4.12.6 It was seen in previous paragraphs that private coaching was another major component of educational expenditure other than course fees. The following two figures will give an idea about the share of expenditure on private coaching over different levels of attendance for different types of institutions in both general and technical education.

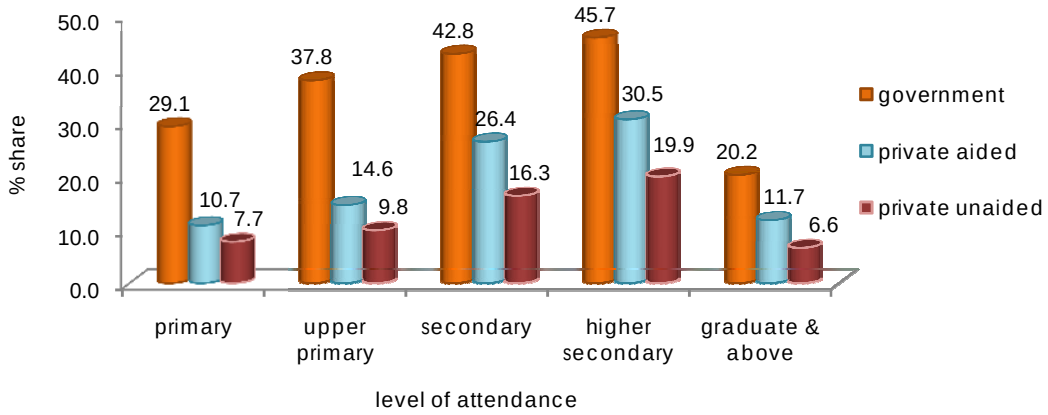

Fig. 4.17a: Percentage share of expenditure on private coaching in total expenditure for different types of institutions at various level of attendance for general education

Ref: Table 38, Appendix A

4.12.7 Uniformly, it was seen that students attending government institutions were spending proportionately more on private coaching than students attending private institutions. In rural areas share of private coaching was the highest at secondary level for students attending government institutions (33%), on the other hand, in urban areas this was the highest at higher secondary level (46%). Comparatively, students studying in private institutions were spending less on private coaching in both rural and urban areas.

Fig. 4.17b: Percentage share of expenditure on private coaching in total expenditure for different types of institutions at various level of attendance for technical/professional education

Ref: Table 39, Appendix A

Chapter Five

Drop-outs and Discontinuance

5.1 Introduction

5.1.1 This Chapter focuses on persons of age 5 - 29 years who were currently not attending any educational institution according to the current survey. A section of them had never been enrolled in any educational institution in the past and in that sense had not entered the education system of the country; formal or non-formal. Others had been enrolled at some point of time in the past, but were not currently attending any institution, either because they did not enroll for the next higher level of education after completing their last level of enrolment (i.e. they discontinued education) or because they could not complete education of their last enrolment level for some reasons (i.e. they dropped out of education).

5.1.2 All persons in the age-group 5-29 years and currently not attending any educational institutions were further divided as ever-enrolled or never-enrolled according to their enrolment in any educational institution in the past. For the ever-enrolled and currently not attending persons further questions were asked about the level of last enrolment and whether they had completed that level successfully or not. Information was also obtained from them about level and type of education (general or technical/professional) at last enrolment, age when discontinued/ dropped out, type of institution last attended, etc. besides their reason for discontinuance/ dropping out. Reasons for never-enrolment were also sought from the never-enrolled persons.

5.1.3 This Chapter highlights different dimensions of drop-out/discontinuance and never-enrolment with the help of some Statements and graphs.

5.2 Drop-out/discontinuance by level of last enrolment

5.2.1 As stated earlier, ever-enrolled persons currently not attending education are either (i) drop-out or (ii) discontinued. Statement 5.1 will briefly give an idea about these by the level of last enrolment status of the individual in the age-group 5-29 years. Though in the survey they are treated together, figures on these two indicators are shown specifically in this Statement to find out changes in 2014 over 2007-08.

5.2.2 It is revealed that the percentage of drop-outs had reduced over the years by a fair margin in all the levels of last enrolment except diploma. Specially, percentage of persons who had been last enrolled in upper primary and secondary levels but left without completing those levels reduced by nearly 10 percentage points in 2014 over 2007-08. In case of last level of enrolment as higher secondary it came down to around 11% in 2014 from 19% in 2007-08. Percentage of persons (age 5-29 years) who did not enroll further after completing their last enrolment at

primary level, remained almost same (13%) in both the survey years. For the last enrolment levels upper primary to higher secondary and diploma, percentages of discontinued persons increased in 2014. Though the percentages of persons who discontinued study lowered in the year 2014 from the year 2007-08 indicating more persons continued with their education after completion of graduation and above levels, still their proportions were quite high (41% in graduates and 52% at post graduate & above) in 2014.

Statement 5.1: Percentage of dropped out/discontinued persons among ever-enrolled (age 5-29 years) by level of last enrolment

level of last enrolment	completed level of last enrolment (discontinuance)		did not complete level of last enrolment (drop-out)	
	2014	2007-08	2014	2007-08
(1)	(2)	(3)	(4)	(5)
primary	12.9	13.0	10.1	12.0
upper primary	25.9	17.3	16.2	26.5
secondary	30.0	27.3	20.7	30.2
higher secondary	34.7	32.5	10.8	19.2
diploma	35.0	25.3	4.4	2.3
graduate	41.3	45.2	4.7	8.4
post graduate & above	51.8	60.0	2.9	4.0
all (incl. below primary & n.r.)	**25.2**	**20.4**	**12.7**	**19.4**

Ref: Table 45, Appendix A and NSS Report no. 532 for 64th round figures

5.3 Distribution of ever-enrolled persons (age 5-29 years) by enrolment status

5.3.1 After completing any particular level of education a person may further enroll in the next higher level of education with or without attending that level or may not get enroll in the next higher level, i.e. discontinued the study. Statement 5.2 provides relevant information on these i.e. the enrolment status of ever-enrolled persons in age-group 5-29 years for different completed levels of school education.

Statement 5.2 : Percentage of ever-enrolled persons aged 5-29 years by enrolment status to next higher level for each completed level of school education

level of education (completed)	enrolled in next higher level and currently attending		did not enrolled in next higher level		enrolled in next higher level but currently not attending	
	male	female	male	female	male	female
(1)	(2)	(3)	(4)	(5)	(6)	(7)
primary	63.2	60.6	18.7	22.1	18.0	17.2
upper primary	47.9	47.7	31.0	32.1	21.0	20.2
secondary	46.4	43.7	38.9	45.1	10.0	9.0
higher secondary	47.5	47.6	35.3	41.1	5.4	4.6

Ref: Table 46, Appendix A

5.3.2 No major gender-variation was observed at any completed level of education among ever-enrolled persons who were enrolled in the next higher level and were currently attending. It is also noticed that more percentage of female students than male students discontinued studies, i.e. did not enroll in next higher level, for each completed level of education. After completing secondary level education, 39% of males and 45% of females did not enroll in upper levels of education.

5.3.3 Moreover, 21% of males and 20% females after completing upper primary level enrolled in the next higher level, i.e. secondary level but dropped-out without completing that level of education. Like for persons currently attending, no prominent differences noticed for between dropped-out males and females who enrolled in the next higher level but currently not attending for each completed level of education as can be seen in the Statement 5.2.

5.3.4 Percentage of persons among ever-enrolled (age 5-29 years) for different completed levels of education who are currently not attending in each State/UT are given in Table S5.2 at the end of this Chapter.

5.4 Drop-out/discontinuance by age-group

5.4.1 Figures 5.1a & 5.1b provide the proportion of persons (age 5-29 years) who were ever-enrolled but currently not attending any educational institutions by broad age-groups separately for rural-urban and male-female. Proportion of drop-out/discontinued persons in urban areas throughout remained lower compared to rural areas for all the age-groups. The highest incidence of drop-out/discontinuance was observed for the persons in the age-group 25-29 years, not so surprising because most of the persons in that age-group perhaps did not study further after completing graduation/post-graduation level.

5.4.2 On the other hand, especially after age-group 14-15 years, percentage of drop-outs/discontinues among females was relatively higher than their male counterparts. In the age-group 18-24 years, 71% of ever-enrolled females were not participating in the formal education

Fig. 5.1a: Percentage of persons among ever-enrolled (age 5-29 years) who are currently not attending in different age-group for rural and urban areas

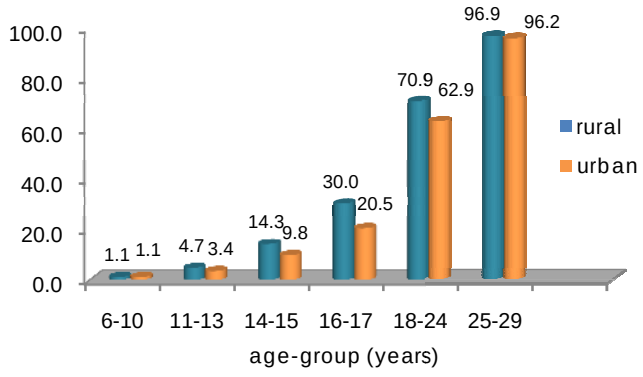

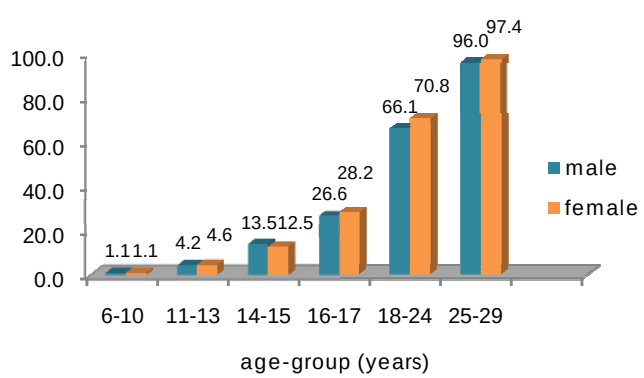

Fig. 5.1b: Percentage of persons among ever-enrolled (age 5-29 years) who are currently not attending in different age-group for males and females

Ref: Table 47, Appendix A

system compared to 66% of that of males.

5.5 Drop-out/discontinuance by household type

5.5.1 Statement 5.3 provides the distribution of drop-outs/discontinuance among persons in the age-group 5-29 years by household types separately for rural and urban areas. It is important to note here, this is not the proportion of drop-out/discontinued persons in respect of a particular household type. No prominent divergence in the patterns of male and female drop-outs/discontinuance by household types was observed. State/UT wise figures by household types separately for rural and urban areas are given in Tables 5.3R & 5.3U at this Chapter end.

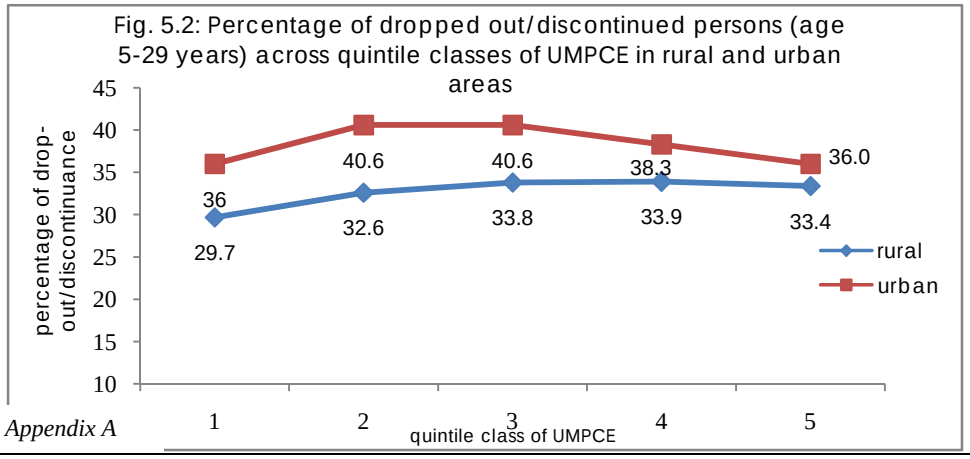

Statement 5.3 : Percentage distribution of drop-outs/discontinued persons (age 5-29 years) by household type

household type	gender		
	male	female	person
(1)	(2)	(3)	(4)

5.6 Drop-out/discontinuance for quintile classes of UMPCE

5.6.1 From Fig. 5.2, in rural areas percentage of dropped-out/discontinued persons in the age-group 5-29 years was 36% in both the bottom and top quintile classes of UMPCE with upward and then downward movement in between. Whereas in urban areas, these percentages gradually increased up to 4th quintile classes (30% to 34%) and then slightly reduced in the top quintile class (33%).

Ref: Table 49, Appendix A

5.7 Drop-out/discontinuance from education: a comparison with NSS 64th Round (2007-08)

5.7.1 In general, proportion of dropping out/discontinuance among all persons (age 5-29 years), both in rural and urban areas had not changed significantly over time with the observation that there was a marginal reduction in that proportion for males and marginal increase for females. Details are given in Statement 5.4 below.

Statement 5.4: Percentage of persons (age 5-29 years) dropped out/discontinued education in NSS 64th round (2007-08) and NSS 71st round (2014)

year	rural	urban	rural +urban
(1)	(2)	(3)	(4)
male			
2014	32.7	38.2	34.3
2007-08	33.4	39.6	35.0
female			
2014	32.5	38.5	34.2
2007-08	31.7	38.2	33.5

Ref: Tables 11 & 48, Appendix A and NSS Report no. 532 for 64th round figures

5.8 Never-enrolment in education by social group

5.8.1 It is very much indicative from Statement 5.5 that at all-India level, proportion of never enrolled persons in age group 5-29 had been distinctively decreased in 2014. Variations in proportions of never enrolled persons across social groups were prominent. In rural areas, it varied from nearly 15% for social group ST to 7% for 'others' whereas in urban areas these figures were 8% for ST to 4% for 'others'.

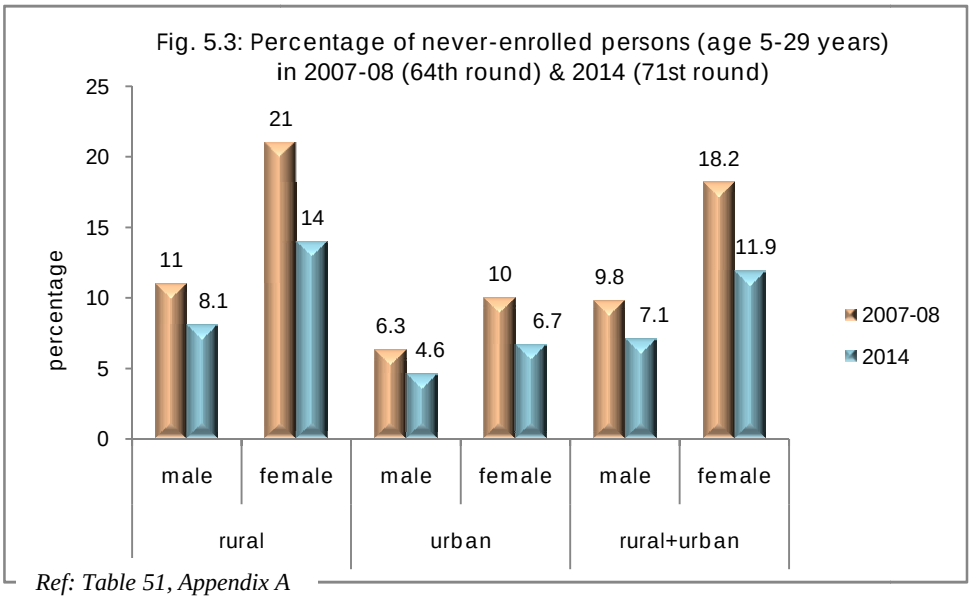

Statement 5.5: Percentage of never-enrolled persons (age 5-29 years) for each social group

social group	rural	urban	rural +urban
(1)	(2)	(3)	(4)
ST	14.8	8.1	14.0
SC	12.8	7.6	11.7
OBC	10.8	6.3	9.5
others	6.7	3.6	5.5
all	**10.9**	**5.6**	**9.4**
all (2007-08)	**15.8**	**8.0**	**13.8**

Ref: Table 52, Appendix A

5.9 Never-enrolment: comparison with NSS 64th Round (2007-08)

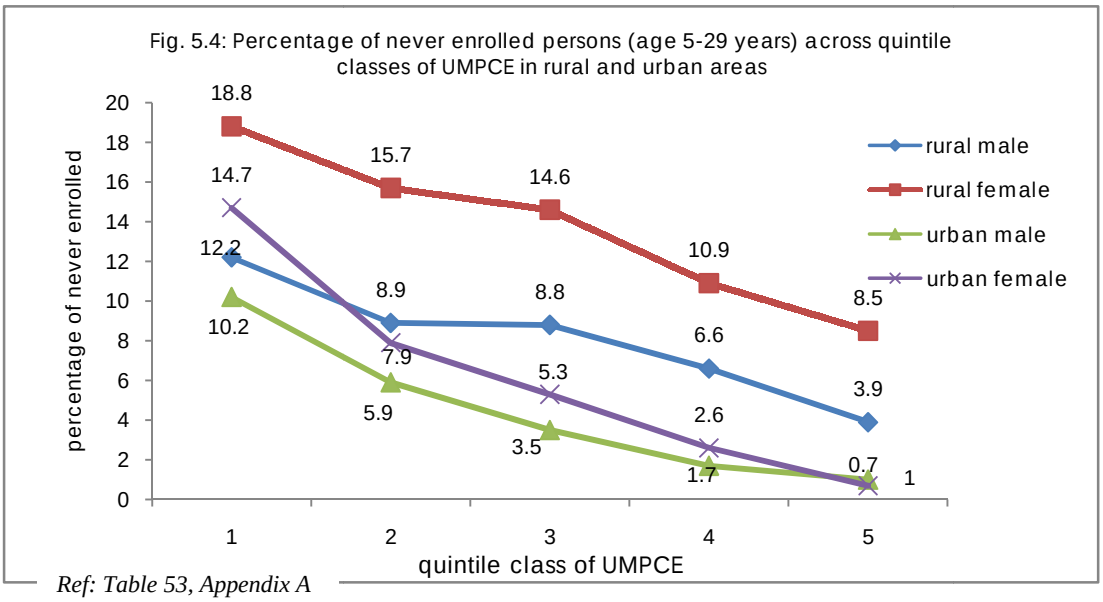

5.9.1 There was a substantial reduction in the proportion of never enrolled persons in the year 2014 over the year 2007-08 for both males and females in both rural and urban areas. (Ref. Fig. 5.3). Specifically for females in both rural and urban areas this proportion were lowered by more than 30% in the year 2014.

Ref: Table 51, Appendix A

5.10 Never-enrolment for quintile classes of UMPCE

5.10.1 Percentages of never-enrolled persons in the age-group 5-29 years for quintile classes for UMPCE are shown in Fig. 5.4 below.

Ref: Table 53, Appendix A

5.10.2 Proportion of never-enrolled persons started diminishing with the increase in the quintile classes in both rural and urban areas for males and females. In rural as well as in urban areas, the gap between never-enrolled male and female became narrowed in the higher quintile classes. Noticeably for urban areas this gap almost vanished at the top quintile class, whereas in the bottom quintile class of UMPCE, this proportion of never enrolled female was around 50% higher than their male counterparts.

5.11 Never-enrolment by religion

5.11.1 In Statement 5.6, proportion of never-enrolled persons in age-group 5-29 years for different religious groups are discussed. Variation in the propotion among religions follwed almost similar patterns in both rural and urban areas. These were the highest among religion 'Islam' (15% in rural and 10% in urban) and the lowest among the religion 'Christianity' (5% in rural and 2% in urban)

Statement 5.6: Number (per 1000) of never-enrolled persons (age 5-29 years) for different religions

religion	rural	urban	rural + urban
(1)	(2)	(3)	(4)
Hinduism	104	47	89
Islam	154	100	134
Christianity	49	20	39
Sikhism	53	34	48
other religions[@]	71	21	51

Ref: Table 52, Appendix A

[@]includes Jainism, Buddhism, Zoroastrianism and others.

5.12 Reasons for discontinuance or dropping out

5.12.1 For each person of age 5-29 years who had ever been enrolled but was currently not attending, the major reason, as perceived by them, for drop-outs /discontinuance was obtained in this survey. The findings are summerised in Statement 5.7 at all-India level.

Statement 5.7: Per 1000 distribution of drop- outs/discontinued persons (aged 5-29 years) by reasons for dropping out/discontinuance

major reason	rural		urban		rural + urban	
	male	female	male	female	male	female
(1)	(2)	(3)	(4)	(5)	(6)	(7)
not interested in education	251	162	208	143	238	156
financial constraints	236	154	237	149	236	152
engaged in domestic activities	59	329	24	231	48	297
engaged in economic activities	299	39	336	69	310	49
school is far off	6	42	2	18	5	34

other reasons*	48	57	58	70	51	62
all	**1000**	**1000**	**1000**	**1000**	**1000**	**1000**

Ref: Table 48, Appendix A

$ this reason was meant for females only

***include:** timings of educational institution not suitable, language/medium of instruction used unfamiliar, inadequate number of teachers, quality of teachers not satisfactory, unfriendly atmosphere at school, preparation for competitive examination and others. **Additionally for females only:** non-availability of female teacher, non-availability of girls' toilet.

5.12.2 For the males, engagement in economic activities (31%) was the most common reason for dropping out, whereas for the females the dominant reason was engagement in domestic activities (30%). It is also noticed that in urban areas the second major reason for leaving education was marriage (17.1%) for females. Financial constraints was another prevalent ground for all the population categories for leaving study before completing desired level of education.

Percentages of drop-out/discontinuance by reasons for each State/UT are given in Statement S5.1 at the end of this Chapter.

5.13 Reason for never-enrolment

5.13.1 The break-up of the proportion of never-enrolled persons (age-group 5-29 years) by reasons for non-enrolment, as perceived by them, for different categories of persons is given in Statement 5.7.

Statement 5.8: Per 1000 distribution of never-enrolment (for persons aged 5-29 years) by reasons for non-enrolment

major reason	rural		urban		rural + urban	
	male	female	male	female	male	female
(1)	(2)	(3)	(4)	(5)	(6)	(7)
not interested in education	332	270	295	271	325	270
financial constraints	215	163	328	300	236	185
engaged in domestic activities	48	234	38	134	46	218
engaged in economic activities	89	17	69	11	85	16
school is far off	18	29	4	17	16	27
marriage	$	6	$	4	$	6
no tradition in the community	29	67	22	63	28	67
other reasons*	268	213	243	200	263	211
all	**1000**	**1000**	**1000**	**1000**	**1000**	**1000**

Ref: Table 51, Appendix A $ this reason was meant for females only

***include:** timings of educational institution not suitable, language/medium of instruction used unfamiliar, inadequate number of teachers, quality of teachers not satisfactory and others; **Additionally for females only:** non-availability of female teacher, non-availability of girls' toilet.

5.13.2 In rural areas the major reason for never enrolment came out as 'not interested in education' (33% of male and 27% of females). In urban areas it was seen that 33% of males and 30% of females never enrolled because of 'financial contraints'.

Chapter Six

Access to Computer & Internet

6.1 Introduction

6.1.1 This survey also captured some information on various facets of ability to operate computer along with possession of computer by the households and access to internet facility for household members aged 14 years and above as per the request of Department of Electronics and Information Technology with the relevant concepts and definitions provided by them.

6.1.2 In this survey any of the devices such as desktops/laptops/notebooks/netbooks/ palmtops/smart phones etc. were considered as computers. This present Chapter will be beneficial in understanding different characteristics of access to computer and the ability of Indian population to operate it, in a nutshell.

6.2 Possession of computer and access to internet facilities

6.2.1 A household possessing any of the devices mentioned in Para 2.1.8 in Chapter Two, were considered as household possessing computer. If any member of the household aged 14 years & above had access to use internet facility, then the household was considered to have internet facilities. The access may be within the household or outside the household.

> Possession of the computer devices by the household was not mandatory for internet access.

6.2.2 Statement 6.1 shows the percentage of households having computer and access to internet facility respectively in rural and urban areas for each quintile class of household's usual consumer expenditure in a month (UMPCE). It is observed that huge variations were present across the UMPCE classes in rural and urban areas for both of these two indicators. Only around 1% of rural households in the bottom quintile classes as compared to around 16% of rural households in the top quintile class possessed computer. In urban areas these proportions varied from 6% in bottom quintile class to 58% in the top quintile class of UMPCE.

6.2.3 This same scenario existed in respect to having internet facilities. The fact is that starting with 5% of households in the lowest UMPCE class, this proportion reached to around 34% in the highest quintile class. However in urban areas, more than 50% of the households had access to internet facilities in the 4^{th} (55%) and 5^{th} (75%) quintile classes.

Statement 6.1: Number (per 1000) of households having computer and having access to use internet facility (for households with at least one member of aged 14 years and above) for each quintile classes of UMPCE

quintile class of UMPCE	rural		urban	
	households having computer	households having internet facility	households having computer	households having internet facility
(1)	(2)	(3)	(4)	(5)
1	9	49	61	193
2	24	71	108	297
3	38	116	204	448
4	48	163	318	550
5	157	336	580	749
all	**62**	**161**	**292**	**487**

Ref: Tables 3a & 3b, Appendix A

6.2.4 It can be seen from Table 3a in Appendix A, that there was wide State/UT-wise variation in the percentage of households having computer in both rural and urban areas. Among selected States, combining rural and urban areas, only 3.9% of households in Chhattisgarh and 4.2% in Bihar to 31.3% of households in Kerala against the national average of 13.7% of households possessed computer. In addition, it can be mentioned here that noticeable rural-urban difference in the proportion of households having computer was also observed.

6.2.5 To find out the State-wise accessibility to internet facility, it came into notice from Table 3b in Appendix A, that among the selected States, Chhattisgarh had the lowest percentage (2.5%) of households having access to internet facility in rural areas whereas in Kerala more than half of the rural households had internet access. In urban areas too, Chhattisgarh had the least access to internet (24.9%) whereas States like Kerala (62.1%) and Maharashtra (64.6%) had prominently higher share of households having internet access.

6.3 Ability to operate computer

6.3.1 For age 14 years and above, ability to operate computer at different age-groups is presented in Statement 6.2, gender-wise. Males were shown to be more able in this regard than females for all-age groups. The maximum proficiency in operating computer was seen in the age-group 14-29 years invariably for males and females in both rural and urban areas. In brief, 46% of Indian population with age 14 years & above can operate computer.

Statement 6.2: Number (per 1000) of population (age 14 years and above) able to operate a computer

gender	rural				urban				rural + urban			
	age group (years)											
	14-29	30-45	46-60	60 and above	14-29	30-45	46-60	60 and above	14-29	30-45	46-60	60 and above
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
male	227	64	22	6	536	309	209	106	323	143	82	38
female	135	19	5	1	438	173	87	28	229	67	31	229
person	**183**	**41**	**14**	**3**	**489**	**243**	**148**	**68**	**278**	**105**	**56**	**24**

Ref: Table 6, Appendix A

6.3.2 For those who can operate a computer it is essential to know whether they can use the basic functions of word processing like creating a document, naming/renaming of files, editing etc. or can use internet by using a search engine and fine-tune this for gathering desired information, visiting websites etc. or can communicate through internet by sending or reading e-mails, composing a message, attaching a file etc. Statement 6.3 provides such information.

Statement 6.3: Number (per 1000) of persons (age 14 years and above and can operate computer) by types of ability to use a computer

sector	able to use computer word processing/typing			able to use internet for searching desired information			able to use internet for sending e-mails		
	male	female	person	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
rural	104	52	78	100	45	73	89	39	65
urban	334	225	281	331	207	271	311	193	254
rural + urban	**177**	**106**	**142**	**173**	**95**	**135**	**160**	**87**	**124**

Ref: Table 6, Appendix A

6.3.4 It indicates that the proportion of urban males (aged 14 years and above) with ability to use computer for various purposes was more than 3 times of their rural counterparts. In rural areas, the proportions of females were almost half of that of males for different types of abilities to use computer. In urban areas too, females were way behind males in terms of ability to use computers.

Appendix B

Sample Design and Estimation Procedure

[This page is intentionally left blank]

SAMPLE DESIGN AND ESTIMATION PROCEDURE

1. Introduction

1.1 **Subject Coverage**: The 71st round (January 2014 – June 2014) of NSS was devoted to the subject of Social Consumption and earmarked for surveys on 'Health' and 'Education'. The last survey on education was conducted during 64th round of NSS (July 2007 - June 2008).

2. Outline of Survey Programme

2.1 **Period of survey and work programme**: The period of survey was of six months duration starting on 1st January 2014 and ending on 30th June 2014.

2.2 **Sub-rounds:** The survey period of this round was divided into two sub-rounds of three months' duration each as follows:

sub-round 1 : January - March 2014
sub-round 2 : April - June 2014

In each of these two sub-rounds equal number of sample villages/ blocks (FSUs) was allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period. Attempt had been made to survey each of the FSUs during the sub-round to which it was allotted. *Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, Leh (Ladakh) and Kargil districts of Jammu & Kashmir and rural areas of Arunachal Pradesh and Nagaland.*

2.3 **Schedules of enquiry**: During this round, the following schedules of enquiry were canvassed:

Schedule 0.0 : List of Households
Schedule 25.0 : Social consumption: Health
Schedule 25.2 : Social consumption: Education

2.4 **Participation of States:** In this round all the States and Union Territories except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep participated. The following was the matching pattern of the participating States/ UTs.

State/UT	Extent of matching
Nagaland (U)	triple
Andhra Pradesh, Telangana, Jammu & Kashmir, Manipur	double
Maharashtra (U)	one and half
Remaining States/ UTs	equal

3. Sample Design

3.1 **Outline of sample design:** A stratified multi-stage design was adopted for the 71st round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from each rural/ urban FSU.

3.2 **Sampling Frame for First Stage Units:** For *the rural sector*, the list of 2011 census villages (henceforth the term 'village' would mean Panchayat wards for Kerala) constituted the sampling frame. In case of Kerala, due to non-availability of Panchayat wards based on Census 2011, the available list of Panchayat wards based on Census 2001 was used as the rural frame. For the urban sector, the latest updated list of UFS blocks (phase 2007-12) was considered as the sampling frame.

3.3 **Stratification**: Stratum had been formed at district level. Within each district of a State/UT, generally speaking, two basic strata were formed: (i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population of 1 lakh or more as per Census 2011, each of them formed a separate basic stratum and the remaining urban areas of the district had been considered as another basic stratum.

3.3.1**Special stratum in the rural sector**: There are some villages in Nagaland and Andaman & Nicobar Islands which remain difficult to access. As in earlier rounds, a special stratum was formed at State/UT level comprising these villages.

3.4 **Sub-stratification:**

3.4.1 **Rural sector**: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed was 'r/2'. The villages within a district as per frame were first arranged in ascending order of population. Then sub-strata 1 to 'r/2' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

3.4.2 **Urban sector:** If 'u' be the sample size allocated for an urban stratum, the number of sub-strata formed was 'u/2'. For all strata, if u/2 >1, implying formation of 2 or more sub-strata, all the UFS blocks within the stratum were first arranged in ascending order of total number of households in the UFS Blocks as per UFS phase 2007-12. Then sub-strata 1 to 'u/2' were demarcated in such a way that each sub-stratum had more or less equal number of households.

3.5 **Total sample size (FSUs):** 8300 FSUs were allocated for the central sample at all-India level.

3.6 **Allocation of total sample to States and UTs:** The total number of sample FSUs were allocated to the States and UTs in proportion to population as per *Census 2011* subject to a

minimum sample allocation to each State/ UT. While doing so, the resource availability in terms of number of field investigators was kept in view.

3.7 **Allocation of State/ UT level sample to rural and urban sectors**: State/UT level sample size was allocated between two sectors in proportion to population as per *Census 2011* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 each for rural and urban sector separately) were allocated to each State/ UT.

3.8 **Allocation to strata:** Within each sector of a State/ UT, the respective sample size was allocated to the different strata in proportion to the population as per Census 2011. Stratum level allocation was adjusted to multiples of 2 with a minimum sample size of 2.

For special strata in the rural areas of Nagaland and A & N Islands, 4 FSUs were allocated to each.

3.9 **Allocation to sub-strata:** Allocation for each sub-stratum was 2 in both rural and urban sectors.

3.10 **Selection of FSUs:**

For the rural sector, from each stratum/sub-stratum, required number of sample villages was selected by Probability Proportional to Size With Replacement (PPSWR), size being the population of the village as per Census 2011.

For the urban sector, from each stratum/sub-stratum, FSUs were selected by Probability Proportional to Size With Replacement (PPSWR), size being the number of households of the UFS Blocks.

Both rural and urban samples were drawn in the form of two independent sub-samples and equal number of samples was allocated among the two sub rounds.

3.11 **Selection of hamlet-groups/ sub-blocks - important steps**

3.11.1 **Criterion for hamlet-group/ sub-block formation:** After identification of the boundaries of the FSU, it was determined whether listing will be done in the whole sample FSU or not. In case the approximate present population of the selected FSU was found to be 1200 or more, it was divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector by more or less equalising the population as stated below.

approximate present population of the sample FSU	**no. of hg's/sb's to be formed**
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	-

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun, Nainital, Hardwar and Udham Singh Nagar),Poonch, Rajouri, Udhampur, Reasi, Doda, Kistwar, Ramban, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

approximate present population of the sample village	no. of hg's to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
1500 to 1799	6
……and so on	-

3.11.2 **Formation and selection of hamlet-groups/ sub-blocks:** In case hamlet-groups/ sub-blocks are to be formed in the sample FSU, the same was done by more or less equalizing population. Note that while doing so, it was ensured that the hamlet-groups/ sub-blocks formed were clearly identifiable in terms of physical landmarks.

Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU wherever hamlet-groups/ sub-blocks were formed in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation was treated as sample hg/ sb number 1.

3.12 **Formation of second stage strata and allocation of households**:

Three SSS were formed for Schedule 25.2 as per following criteria:

SSS	composition of SSS within a sample FSU	number of households surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1	households with at least one student receiving technical/professional education	2	1
SSS 2	from the remaining, households having at least one student receiving general education	4	2
SSS 3	other households	2	1

3.13 **Selection of households:** From each SSS, the sample households were selected by SRSWOR.

4. **Estimation Procedure**

4.1 **Notations:**

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb [j = 1, 2 or 3]

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

D* = (D – 1) for FSUs with D ≥ 1

Z = total size of a rural/urban sub-stratum (= sum of sizes for all the FSUs of a sub-stratum)

z = size of sample village/UFS block used for selection.

n = number of sample FSUs surveyed including 'uninhabitated' and 'zero cases' but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics *x*, *y* under estimation

$\hat{X}$, $\hat{Y}$ = estimate of population total X, Y for the characteristics *x*, *y*

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/ sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

4.2 **Formulae for Estimation of Aggregates for a particular sub-sample and stratum × sub-stratum:**

4.2.1 **Schedule 25.2:**

4.2.1.1 **Rural/ Urban:**

(i) For j-th second-stage stratum of a stratum × sub-stratum:

$$\hat{\boldsymbol{Y}}_j = \frac{\boldsymbol{Z}}{\boldsymbol{n}_j}\sum_{\boldsymbol{i}=1}^{\boldsymbol{n}_j}\frac{1}{\boldsymbol{z}_i}\left[\frac{\boldsymbol{H}_{i1j}}{\boldsymbol{h}_{i1j}}\sum_{\boldsymbol{k}=1}^{\boldsymbol{h}_{i1j}}\boldsymbol{y}_{i1jk} + \boldsymbol{D}_i^{*}\times\frac{\boldsymbol{H}_{i2j}}{\boldsymbol{h}_{i2j}}\sum_{\boldsymbol{k}=1}^{\boldsymbol{h}_{i2j}}\boldsymbol{y}_{i2jk}\right]$$

(ii) For all second-stage strata combined:

$$\hat{Y} = \sum_{j} \hat{Y}_j$$

4.3 **Overall Estimate for Aggregates for a sub-stratum**:

Overall estimate for aggregates for a sub-stratum ($\hat{Y}_{st}$) based on two sub-samples in a sub-stratum is obtained as: $\hat{Y}_{st} = \frac{1}{2}\sum_{m=1}^{2} \hat{Y}_{stm}$

4.4 **Overall Estimate for Aggregates for a stratum**:

Overall estimate for a stratum ($\hat{Y}_s$) will be obtained as

$$\hat{Y}_s = \sum_{t} \hat{Y}_{st}$$

4.5 **Overall Estimate of Aggregates at State/UT/all-India level**:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the State/ UT/ all-India.

4.6 **Estimates of Ratios**:

Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates Y and X for two characteristics *y* and *x* respectively at the State/ UT/ all-India level.

Then the combined ratio estimate $(\hat{R})$ of the ratio $\left(R = \frac{Y}{X}\right)$ will be obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$.

4.7 **Estimates of Error**: The estimated variances of the above estimates will be as follows:

4.7.1**For aggregate** $\hat{Y}$:

$$\hat{Var}(\hat{Y}) = \sum_{s} \hat{Var}(\hat{Y}_s) = \sum_{s}\sum_{t} \hat{Var}(\hat{Y}_{st})$$ where $\hat{Var}(\hat{Y}_{st})$ is given by

$\hat{Var}\left(\hat{Y}_{st}\right) = \frac{1}{4}\left(\hat{Y}_{st1} - \hat{Y}_{st2}\right)^2$, where $\hat{Y}_{st1}$ and $\hat{Y}_{st2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

4.7.2 **For ratio** $\hat{R}$:

$$\hat{MSE}(\hat{R}) = \frac{1}{4\hat{X}^2}\sum_{s}\sum_{t}\left[\left(\hat{Y}_{st1} - \hat{Y}_{st2}\right)^2 + \hat{R}^2\left(\hat{X}_{st1} - \hat{X}_{st2}\right)^2 - 2\hat{R}\left(\hat{Y}_{st1} - \hat{Y}_{st2}\right)\left(\hat{X}_{st1} - \hat{X}_{st2}\right)\right]$$

4.7.3 **Estimates of Relative Standard Error (RSE)**:

$$\hat{RSE}\left(\hat{Y}\right) = \frac{\sqrt{\hat{Var}\left(\hat{Y}\right)}}{\hat{Y}} \times 100$$

$$\hat{RSE}\left(\hat{R}\right) = \frac{\sqrt{\hat{MSE}\left(\hat{R}\right)}}{\hat{R}} \times 100$$

5. **Multipliers**:

The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a sub-sample and schedule type are given below:

Sch. type	sector	formula for multipliers	
		hg / sb 1	hg / sb 2
25.2	rural/urban	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{H_{stmi1j}}{h_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D^{*}_{stmi} \times \frac{H_{stmi2j}}{h_{stmi2j}}$
	(j = 1, 2, 3)		

Note:

(i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.

(ii) Multipliers are computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

(iii) For estimating number of villages possessing a characteristic, D^{*}_{stmi} = 0 in the relevant multipliers and there is only one multiplier for the village.
