

Highest ever number of recoveries recorded in the last 24 hours; 28,472 patients discharged

More than 7.5 lakh COVID patients have recovered so far

Recovery Rate crosses 63%

19 States/ UTs register higher than 63.13% Recovery Rate

Posted On: 22 JUL 2020 12:34PM by PIB Delhi

Highest ever recoveries have been registered in a single day i.e. 28,472. This is also the highest number of COVID-19 patients cured/discharged in last 24 hours. With this, the number of patients that have recovered stands at 7,53,049. This has strongly boosted the recovery rate among COVID-19 patients to 63.13%.

The constantly increasing number of recovered patients has further widened the difference with active cases (4,11,133 today) to 3,41,916. This difference is showing a progressively growing upward trend.

While the national recovery rate has improved, 19 States and UTs are posting a recovery rate higher than the national average.

Name of State / UT	Recovery Rate
Delhi	84.83%
Ladakh (UT)	84.31%
Telangana	78.37%
Haryana	76.29%
A&N Islands	75.00%
Rajasthan	72.50%
Gujarat	72.30%
Chhattisgarh	71.81%
Assam	71.05%
Odisha	70.96%

Tamil Nadu	70.12%
Manipur	69.48%
Chandigarh	68.97%
Uttarakhand	67.99%
Punjab	67.86%
Madhya Pradesh	67.47%
Dadra and Nagar Haveli, &Daman and Diu	65.67%
Himachal Pradesh	64.72%
Bihar	63.95%

The consistently increasing number of recovered person and growing difference between the active and recovered patients are a testimony that the strategies adopted by the Centre and implemented by the State/ UT governments are bearing desired outcomes. The primary focus has been on early detection through house-to-house surveys, surveillance, contact tracing, effective containment plans, screening of the vulnerable populace and wide-spread testing. The ramped up three-tier health infrastructure and well executed Standard of Care Protocol have aided in effective treatment in the hospitals and through home isolation.

AIIMS, New Delhi along with the Centres of Excellence in the States/UTs have bolstered the clinical treatment and critical care of ICU patients, thereby managing to reduce the Case Fatality rate in India. The e-ICU program of AIIMS, New Delhi is one more avenue of Centre-State cooperation which is aimed at reducing mortality. Conducted twice a week, these tele-consultation sessions have mentored and supported big COVID-19 hospitals in States through shared experiences and technical advice from domain experts in clinical management of ICU patients. With the dedicated efforts of healthcare workers the recoveries are improving and case fatality is continuously falling, which currently stands at 2.41%.
