## UPDATES on COVID-19

**Recovered cases 1.75 times the number of Active cases**

**Gap between recovered and active cases cross 2 lakhs**

**National Recovery Rate further improves to 62.09%**

Posted On: 09 JUL 2020 6:20PM by PIB Delhi

In a significant achievement, the number of recovered cases has overshoot the number of COVID-19 active cases by 2,06,588. The number of recovered cases is 1.75 times (almost twice) the number of active cases. During the last 24 hours, a total of 19,547 patients have been cured, taking the cumulative figure of recoveries among COVID-19 patients to 4,76,377 as of today. This is a result of focussed attention on effective surveillance through house-to-house contact tracing, early detection, and isolation as well as timely and effective clinical management of COVID-19 cases.

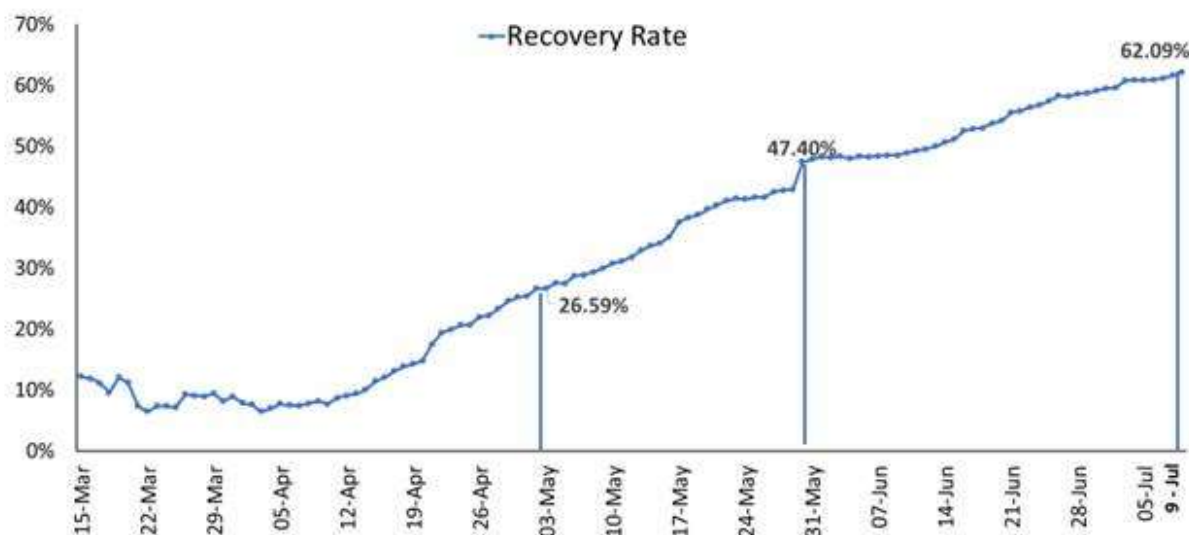

Presently, there are 2,69,789 active cases and all are under active medical supervision.

## Active & Recovered Cases – Progressive Increase in Recoveries

India's COVID-19 recovery rate is also steadily increasing. The recovery rate among COVID-19 patients has increased to 62.09% today.

## Rising Recovery Rate

It would perhaps be not fair to compare India to other countries in terms of absolute numbers, India has 195.5 cases per million population which is amongst the lowest in the world. The proactive delineation of containment and buffer zones, aggressive testing, early and timely detection and adherence to clinical protocols & better ICU/hospital management also manifests in India having one of the lowest fatalities in the world. Deaths per million population in India are 15.31 which translates to a fatality rate of 2.75%. Whereas, the global deaths per million population stand at 68.7.

India is also seeing steady increase in growth of daily testing numbers. During the last 24 hours 2,67,061 samples have been tested. As on date, 1,07,40,832 samples have been tested for identification of COVID-19 in the population.

Concerted efforts by MoHFW and ICMR have resulted in an impressive augmentation of the testing labs network in the country, which boasts of 1132 labs comprising 805 labs in the government sector and 327 private labs. The details are:

- **Real-Time RT PCR** based testing labs: 603 (Govt: 373 + Private: 230)
- **TrueNat** based testing labs: 435 (Govt: 400 + Private: 35)
- **CBNAAT** based testing labs: 94 (Govt: 33 + Private: 61)
