

India's Case Fatality Rate (CFR) lowest at 2.15% since 1st Lockdown

Total recoveries nearly 11 lakh

More than 36,500 recovered in last 24 hours

Posted On: 01 AUG 2020 2:43PM by PIB Delhi

India continues to maintain the record of registering and maintaining the lowest COVID-19 mortality rate at the global platform. The Case Fatality Rate stands at 2.15% today and it is lowest since the 1st Lockdown started. It has been continuously reducing from around 3.33% in mid-June.

This is a testimony to the focused, coordinated, pre-emptive, graded and evolving “Test Track Treat” strategy and efforts of the Centre along with the State/UT governments. Emphasis on early detection through aggressive testing and effective clinical management of the hospitalized cases have resulted in the continuously falling Case Fatality Rate indicating that India has been able to successfully contain the fatality rate of COVID-19.

Case Fatality Rate Lowest since the First Lockdown (25th March)

Along with the CFR been kept a low rate, the successful implementation of effective containment strategy, aggressive testing and standardized clinical management protocols based on a comprehensive Standard of Care approach have resulted in a consistent addition of more than 30,000 recoveries/day.

The total number of recovered cases is nearly 11 lakh. With 36,569 patients discharged in the last 24 hours, the total recoveries have jumped to 10,94,374. The recovery rate stands at 64.53% amongst COVID-19 patients.

With such consistent increase in recoveries, the gap between recovered patients and active COVID-19 cases currently stands at 5,29,271. Active cases (5,65,103) are under medical supervision.

The 3-tier hospital infrastructure with seamless patient management has ensured prompt triaging and treatment. As on today, there are 1488 dedicated COVID Hospitals with 2,49,358 isolation beds, 31,639 ICU beds and 1,09,119 oxygen supported beds, 16,678 ventilators. 3231 dedicated COVID Health Centres with 2,07,239 Isolation beds, 18,613 ICU beds and 74,130 oxygen supported beds and 6,668 ventilators have also been operationalised. Moreover, 10,755 COVID Care Centres with 10,02,681 beds are now available to combat COVID-19 in the country. The Centre has also provided 273.85 lakh N95 masks and 121.5 lakh Personal Protective Equipments (PPEs) and 1083.77 lakh HCQ tablets to the States/ UTs / Central Institutions.
