

India's COVID-19 recoveries cross the historic peak of 1.5 million

Highest ever single day recoveries of 54,859 today

Recoveries exceed the active cases by more than 9 lakh

Case Fatality Rate touches a new low of 2%

Posted On: 10 AUG 2020 11:52AM by PIB Delhi

India's COVID-19 recoveries have crossed the historic peak of 1.5 million today. Recovery of 15,35,743 patients has been made possible because of the policy of TESTING aggressively, TRACKING comprehensively & TREATING efficiently. Better ambulance services, focus on Standard of Care and use of non-invasive oxygen have given the desired results.

With the highest ever single day recoveries of 54,859 in the last 24 hours, the Recovery Rate amongst the COVID-19 patients has scaled another high of almost 70%.

The record high recoveries have ensured that the actual caseload of the country viz. the active cases has reduced and currently comprises only 28.66% of the total positive cases. India has posted more than 9 lakh recoveries than the active cases (6,34,945).

The coordinated efforts of Centre and State/UT governments on early detection through aggressive testing and efficient clinical management of hospitalized cases have shown results with continuously regressing Case Fatality Rate. It is 2%, as on date, and steadily declining. Early identification of cases has also led to steeply falling percentage active cases.

Early Identification of cases leading to decrease in % Active Cases

Early identification helps to ensure timely and prompt isolation of the mild and moderate cases and hospitalisation of the severe and critical cases thereby leading to effective management of cases.

It is important to note that the COVID-19 infection still remains concentrated in 10 States that contribute more than 80% of the new cases. The aggressive testing and tracking through house-to-house surveys and well implemented containment strategies and surveillance in these areas may lead to an initial increase in positive cases. However, well implemented strategies will ensure it reduces over time.
