

On a steep rise, India conducts more than 4.23 cr tests

43% of Total Cases recorded in just 3 States- Maharashtra, AP, Karnataka

Posted On: 31 AUG 2020 12:24PM by PIB Delhi

India has exhibited determined resolve to expand the testing which has led to an exponential hike of COVID-19 testing. Starting from a single test in one lab in Pune in January 2020, the daily testing capacity has been scaled up to more than 10 lakh in August 2020.

The cumulative tests have crossed **4.23 cr** today. **8,46,278** tests were conducted in the past 24 hours.

India has registered **78,512** cases in the last 24 hours (Sunday, 30th August 2020). Hence the report by certain Media Entities of about 80,000 cases in the last 24 hours is without any basis.

Seven States have contributed to 70% of these new cases in the last 24 hours. Of these, Maharashtra has contributed the maximum case load amounting to almost 21%, followed by Andhra Pradesh (13.5%), Karnataka (11.27%) and Tamil Nadu which stands at 8.27%. Uttar Pradesh with 8.27%, West Bengal with 3.85%, and Odisha with 3.84% are the remaining States contributing to the increased caseload.

Of the total cumulative number of cases, 43% are recorded in just three states of Maharashtra, Andhra Pradesh and Karnataka. While Tamil Nadu has contributed 11.66% of the total cases.

~ 43% of total cases are recorded only in 3 states

Maharashtra, Andhra Pradesh and Karnataka also account for about 50% of the deaths added in the last 24 hours due to COVID-19, with Maharashtra leading with 30.48%.

~ 50% of new deaths are recorded only in 3 states

The Union Government is regularly engaging with States/UTs that are reporting a spurt in cases and those with higher fatality rate. They have been advised to undertake aggressive measures to ensure higher testing, effective clinical management to lower fatality and save lives along with efficient monitoring at various levels.
