

Of the total 4.33 cr tests, India conducted more than 1.22 cr tests in the last 2 weeks

More than 1 million tests conducted in the last 24 hour

22 States/UTs have better TPM than the national average

Posted On: 01 SEP 2020 3:11PM by PIB Delhi

The guiding principle within the Centre-led strategy of TEST, TRACK, TREAT has been aggressive testing by the States/UTs. High level of testing on a sustained leads to early diagnosis and enhanced recoveries.

Following this tenet, India's cumulative tests have crossed 4.3 crores today (4,33,24,834). 1,22,66,514 tests were done in the last two weeks alone.

States/UTs are progressively increasing their testing capacity. The States contributing maximum to the overall number of tests include Tamil Nadu, Uttar Pradesh and Maharashtra among others. These three States account for nearly 34% of the total testing.

India's per day testing capacity has crossed 10 lakhs tests. 10,16,920 tests were conducted in the last 24 hours.

There has been a sustained growth in the average weekly numbers of tests. The weekly average

tests have multiplied by more than 4 times since the first week of January 2020.

Expanded diagnostic lab network and facilitation for easy testing across the country have given a substantial boost. The Tests Per Million (TPM) have also seen a sharp increase to 31,394.

22 States/UTs have better TPM than National Average. Goa, Delhi, Andhra Pradesh and Tamil Nadu are reporting maximum number of tests in a day.
