

India crosses landmark milestone of less than 10 lakh Active Cases for 11th consecutive day

The last 10 lakh recoveries added in just 12 days

Posted On: 02 OCT 2020 12:09PM by PIB Delhi

In a landmark achievement, India has sustained the steady trend of active cases being lower than the 10 lakh mark for 11 days in an unbroken chain.

The number of active cases today is **9,42,217**.

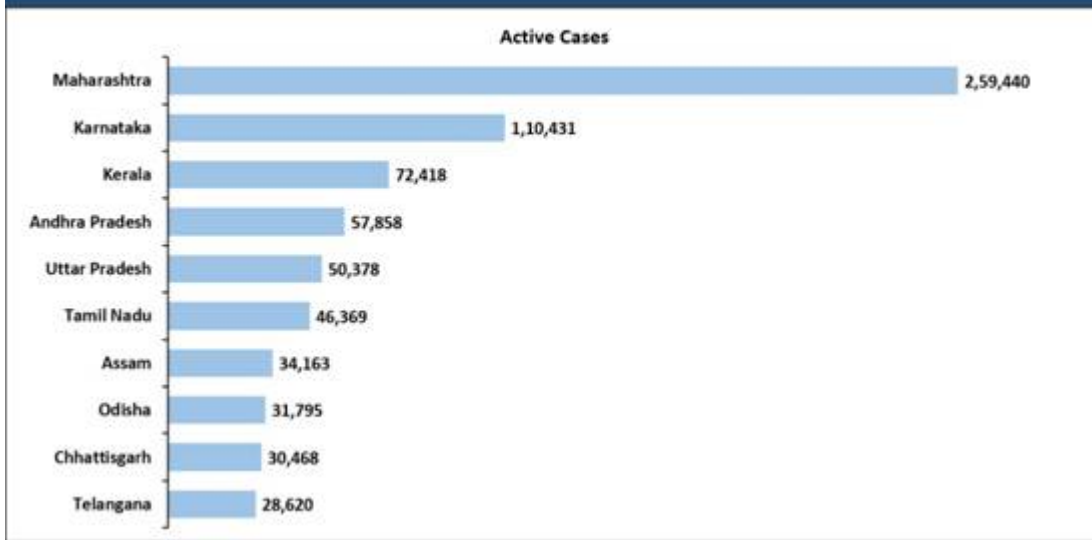

With a very high number of COVID patients recovering every single day, India's steady trend of posting high level of daily recoveries also continues. **78,877 recoveries** have been registered in the last 24 hours in the country. This has resulted in continuous increase in the national recovery rate, which is currently pegged at **83.70%**.

India's total recoveries are **53,52,078** today. The last 10 lakh recoveries were added in just 12 days. With this, India continues to maintain its global position of being the country with maximum number of recovered COVID patients in the world.

76.62% of the active cases are in 10 States/UTs.

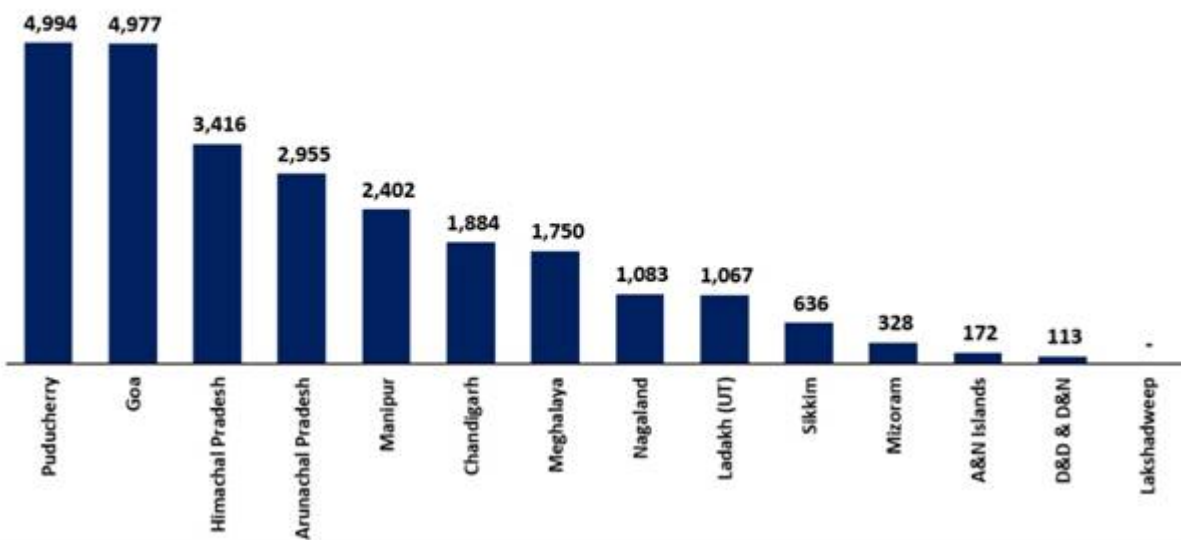

As on date, the active cases contribute only **14.74%** to the positive caseload of the country. Maharashtra is leading the States' tally with more than 2.5 lakh cases. Karnataka follows with more than 1 lakh cases.

76% of active cases in the 10 States & UTs

14 States & UTs in the country have less than 5,000 active cases.

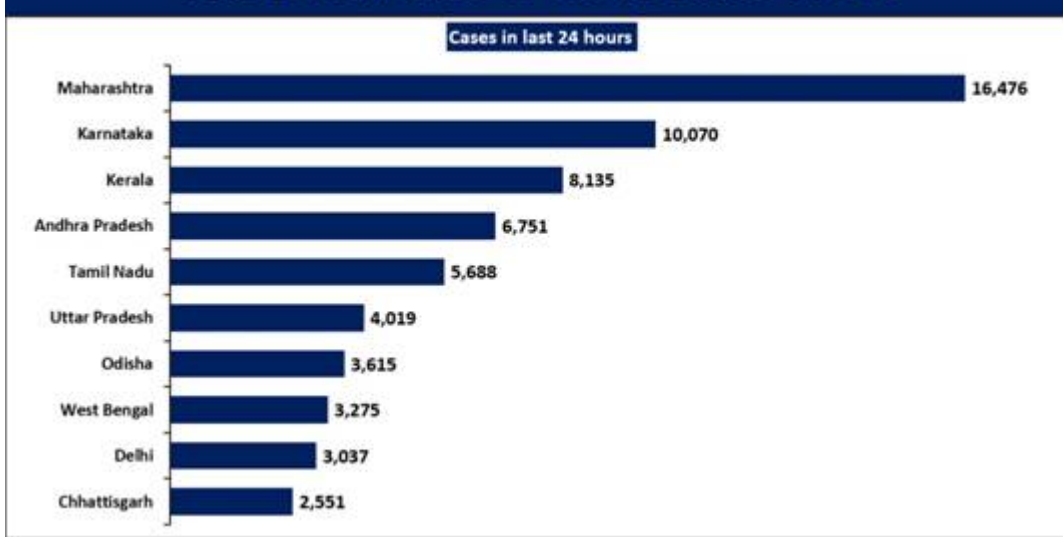

14 States & UTs have less than 5,000 active cases

A total of **81,484** new confirmed cases have been reported in the last 24 hours in the country.

78.07% of the new cases are concentrated in ten States/UTs. Maharashtra contributed more than 16,000 to the new cases. Karnataka has contributed around 10,000 cases and Kerala follows with more than 8,000.

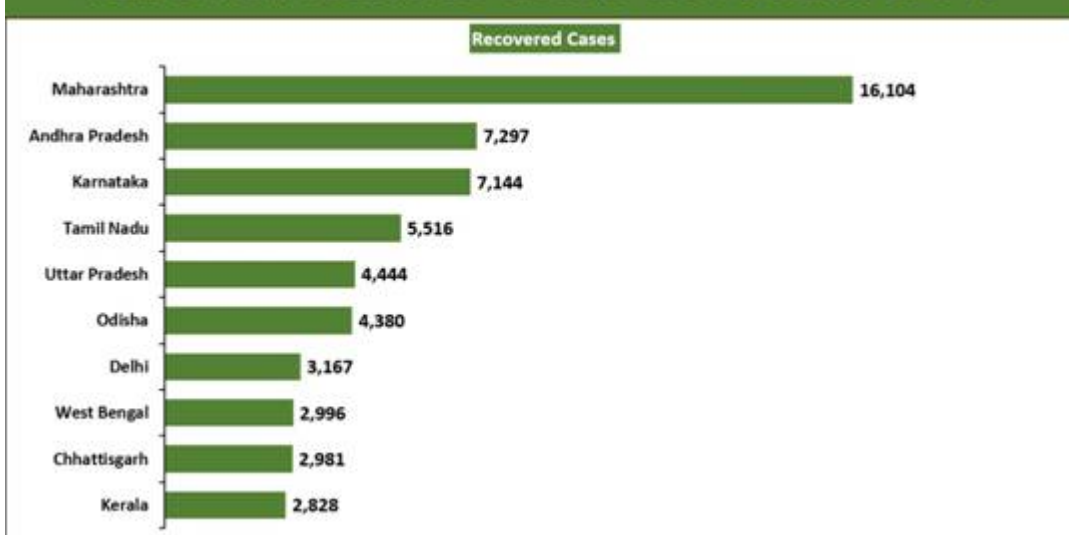

78% of new cases in the 10 States & UTs

10 States/UTs account for **72%** of the newly recovered cases.

Maharashtra has the highest number of newly recovered cases followed by Andhra Pradesh and Karnataka.

72% of new recovered cases in the 10 States & UTs
