

India sustains trend of consistently declining Active Cases

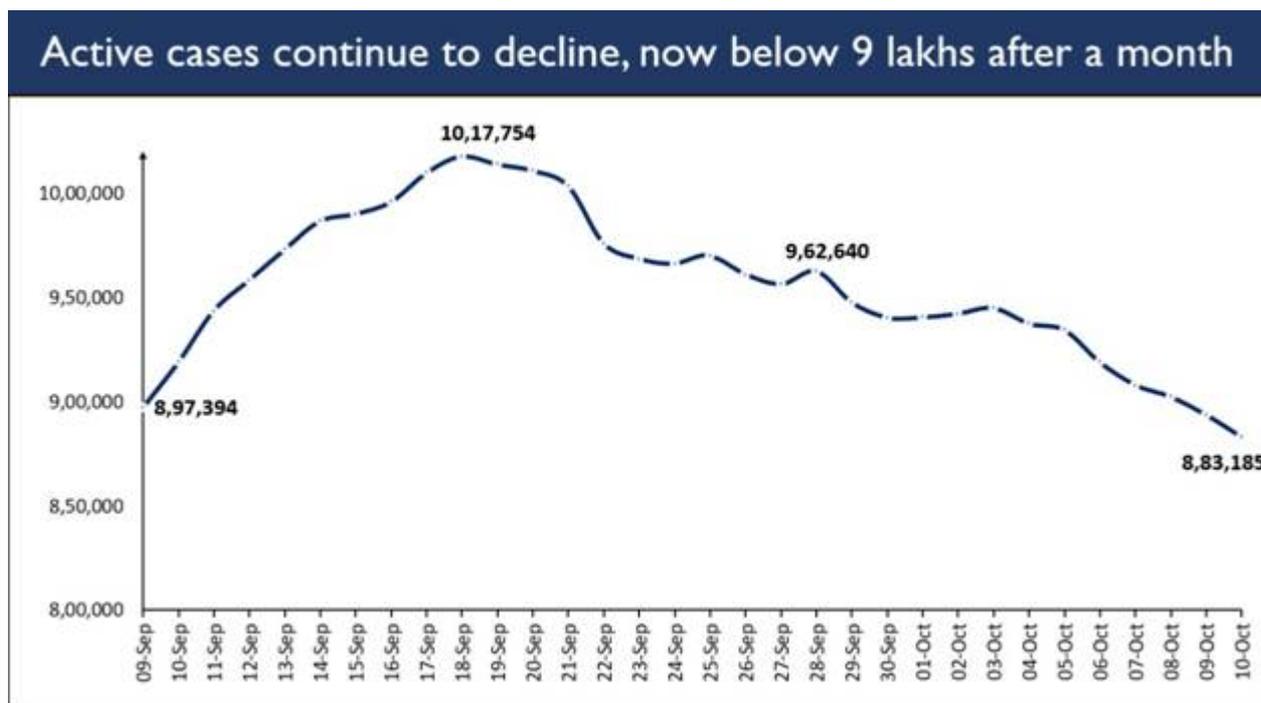

Active caseload below 9 lakh for the second consecutive day

Active Cases nearly 1/8th of Total Cases

Posted On: 10 OCT 2020 11:18AM by PIB Delhi

India continues to report a trend of steadily declining active cases. For the second day after the active cases dropped below the 9L mark after a month, the progressive decline continues.

India's active caseload stands at **8,83,185** today.

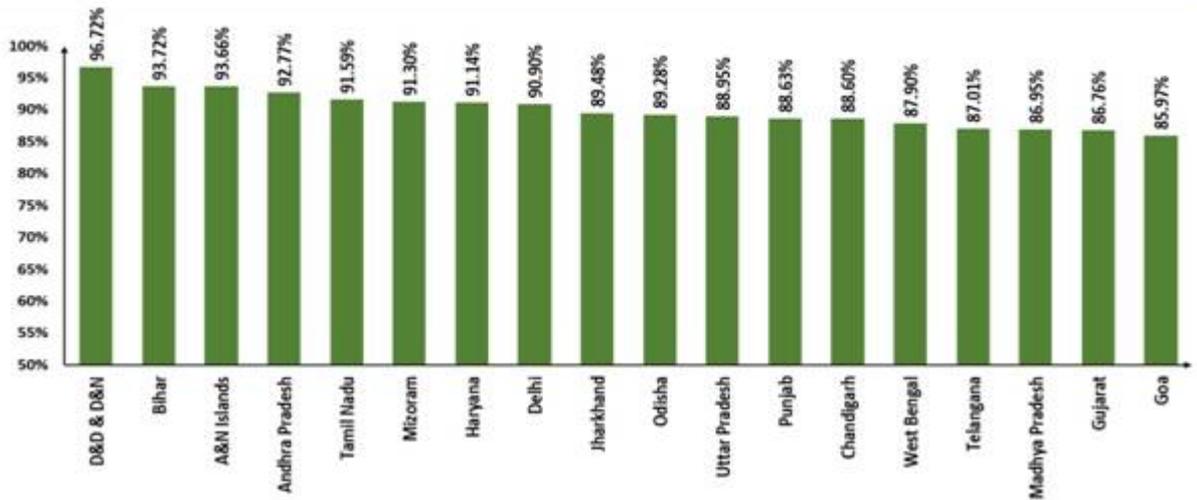

Presently the active cases comprise merely **12.65%** of the total positive cases of the country. These are nearly 1/8th of the total cases in the country.

The total recovered cases are close to 60 Lakhs (**59,88,822**) thereby enhancing the difference with respect to the active cases.

82,753 patients have recovered and discharged in the last 24 hours whereas the new confirmed cases stand at **73,272**. The national Recovery Rate has progressed to **85.81%**.

18 States/UTs have recorded Recovery Rate more than the national average.

18 States & UTs have Recovery Rate more than the national average

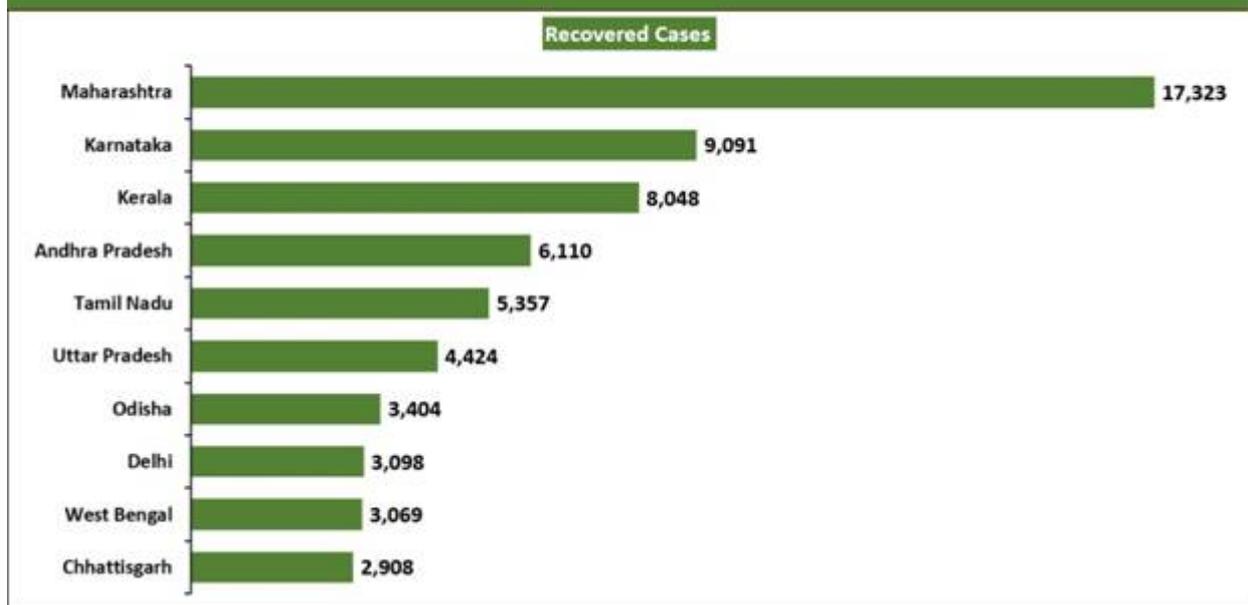

This is the result of collaborative action by States/UTs under Centre's strategy of comprehensive testing, tracking, quick hospitalization and adherence to the Standard Treatment Protocol.

76% of the new recovered cases are observed to be concentrated in 10 States/UTs .

Maharashtra continues to contribute the maximum with more than 17,000 single day recovery.

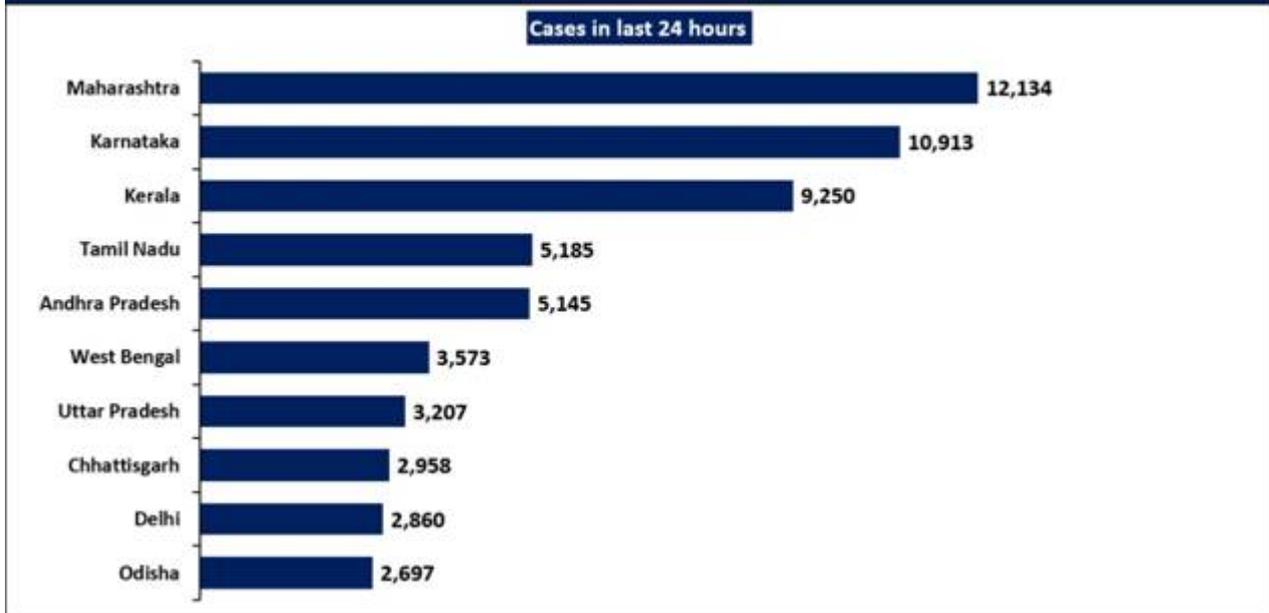

76% of new recovered cases in the 10 States & UTs

73,272 new confirmed cases were recorded in last 24 hours.

79% of these are from 10 States and UTs. Maharashtra is still reporting a very high number of new cases with more than 12,000 cases followed by Karnataka with nearly 11,000 cases.

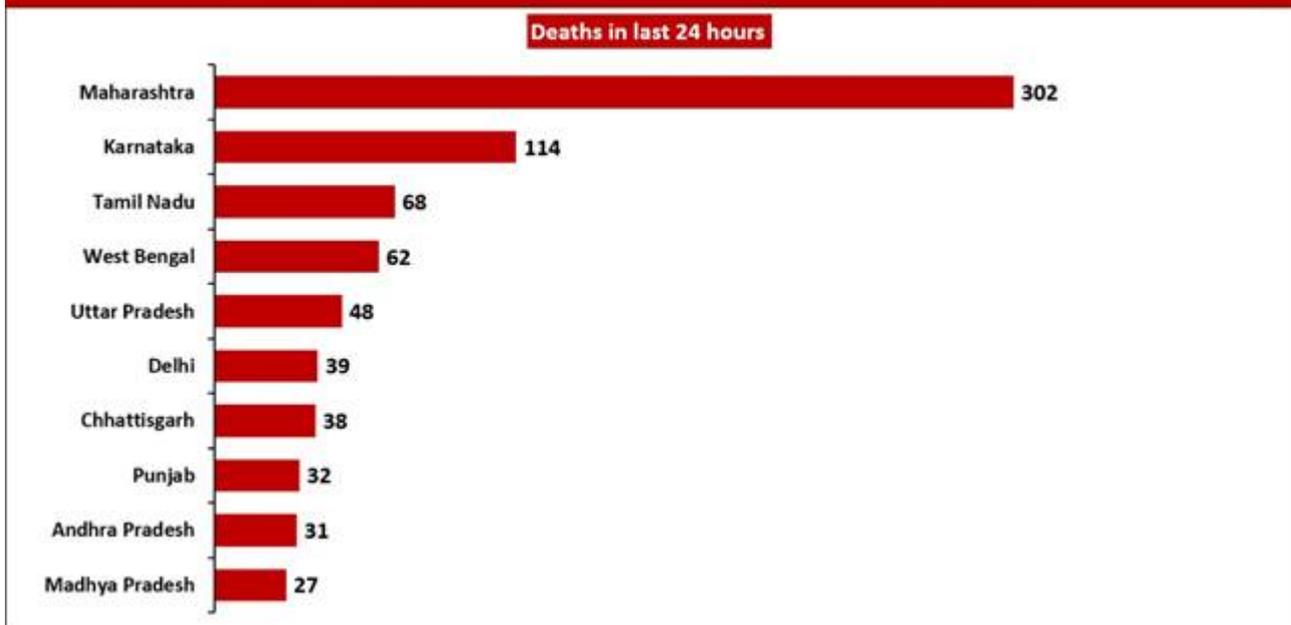

79% of new cases in the 10 States & UTs

926 case fatalities have been reported in the past 24 hours. Of these, **nearly 82%** are concentrated in ten States/UTs.

More than **32%** of new fatalities reported are from Maharashtra (302 deaths).

82% of new deaths in the 10 States & UTs
