Less than 50,000 cases reported in the last 24 hours
Difference between Recovered and Active Cases steadily Increasing

India has reported less than 50,000 daily new cases in the last 24 hours with 45,674 persons having tested positive for COVID-19. New daily cases have been trending downward since 15th of October.

Keeping with the trend of recoveries outnumbering new cases, **49,082** patients have recovered in the last 24 hours. This trend has been observed for the 37th day today. This has played a pivotal role in pushing down the active caseload which is presently 5.12 lakhs.

The active caseload in the country is **5,12,665** today. These cases contribute only **6.03%** of India's total positive cases, indicating a sustained downward trend.
The Recovery Rate of **92.49%** is a reflection of the **78,68,968** recovered cases. The gap between Recovered cases and Active cases presently stands at **73,56,303**. This gap has been steadily increasing.

Increasing gap between active & recovered cases

76% of the new recovered cases are observed to be concentrated in 10 States/UTs.

Kerala displaced Maharashtra to have the maximum number of single day recoveries.7,120 people recovered in Kerala during the last 24 hours followed by 6,478 in Maharashtra.

76% of new recovered cases in the 10 States & UTs

State/UT	Recovered Cases
