India's Active Caseload further contracts to 4.03 Lakh after 138 days

Total Recoveries surpass 91 lakh

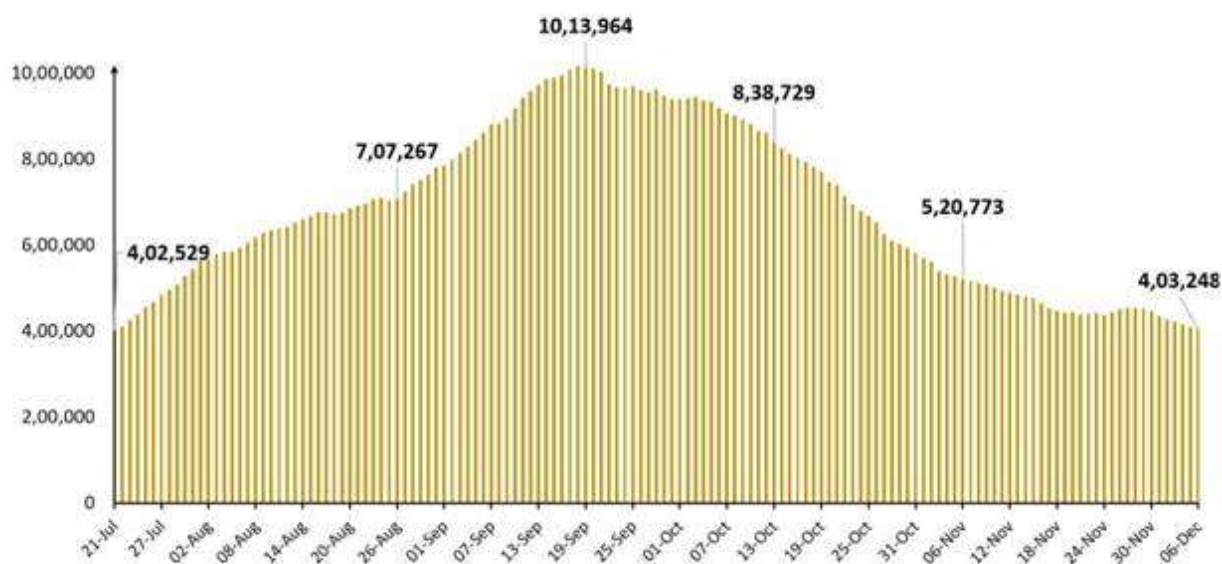

New Cases per million population in India in the last week one of the lowest in the world

Posted On: 06 DEC 2020 11:34AM by PIB Delhi

India's total Active Caseload has significantly **fallen to 4.03 lakh (4,03,248)** today. This is the lowest after 138 days. The total active cases were 4,02,529 on 21st July, 2020.

Continuing with the trend of the last nine days, India has reported more daily recoveries than the daily new cases during the past 24 hours. The trend of more daily recoveries than the daily cases has led to a continuous contraction of India's Active Caseload which presently consists of just **4.18%** of the Total Positive Cases.

Active cases continue to decline, now below 4.05 lakhs

While **36,011** persons in India were found to be infected with COVID, **41,970** new recoveries were registered during the same period. The new recoveries have led to a net decline of **6,441** in the Total Active cases.

New cases per million population in India in the last seven days are **186**. It is one of the lowest in the world.

The difference in New Recoveries outnumbering New Cases has also improved the Recovery Rate to **94.37%** today.

The total recovered cases have crossed **91 lakh (91,00,792)**. The gap between Recovered Cases and Active Cases, that is steadily increasing is nearing **87 lakh (86,97,544)** today.

76.6% of the new recovered cases are observed to be concentrated in 10 States/UTs.

Maharashtra has reported the maximum number of single day recoveries with 5,834 newly recovered cases. Kerala follows closely with 5,820 new recoveries. Delhi registered 4,916 new recoveries.

75.70% of the new cases are from 10 States and UTs.

Kerala reported the highest daily new cases at 5,848. It is followed by Maharashtra with 4,922 new cases. Delhi recorded 3,419 new cases.

482 case fatalities have been reported in the past 24 hours.

Ten States/UTs account for **79.05%** of new deaths. Maharashtra saw the maximum casualties (95). Delhi and West Bengal follow with 77 and 49 daily deaths, respectively.

79% of new deaths in the 10 States & UTs

The daily registered deaths per million population during the past week when compared globally demonstrate that India has one of the lowest at 3 deaths/million population.

New deaths per million population reported in the last 7 days
