At less than 4% of Total Cases, India's Active Caseload of 3.78 lakh continues to retreat

Daily Positivity Rate stands at 3.14%

19 States/UTs have weekly Positivity Rate more than the national average

Posted On: 09 DEC 2020 11:12AM by PIB Delhi

The ongoing trend of contraction of India's total active cases continues. The active caseload of the country stands at **3,78,909**. The share of Active Cases in the total Positive Cases has further shrunk to **3.89%**.

The daily recoveries exceeding the daily new cases have ensured a total net reduction of the Active Caseload. A net decline of **4,957** cases has been recorded in the total active cases in last 24 hours.

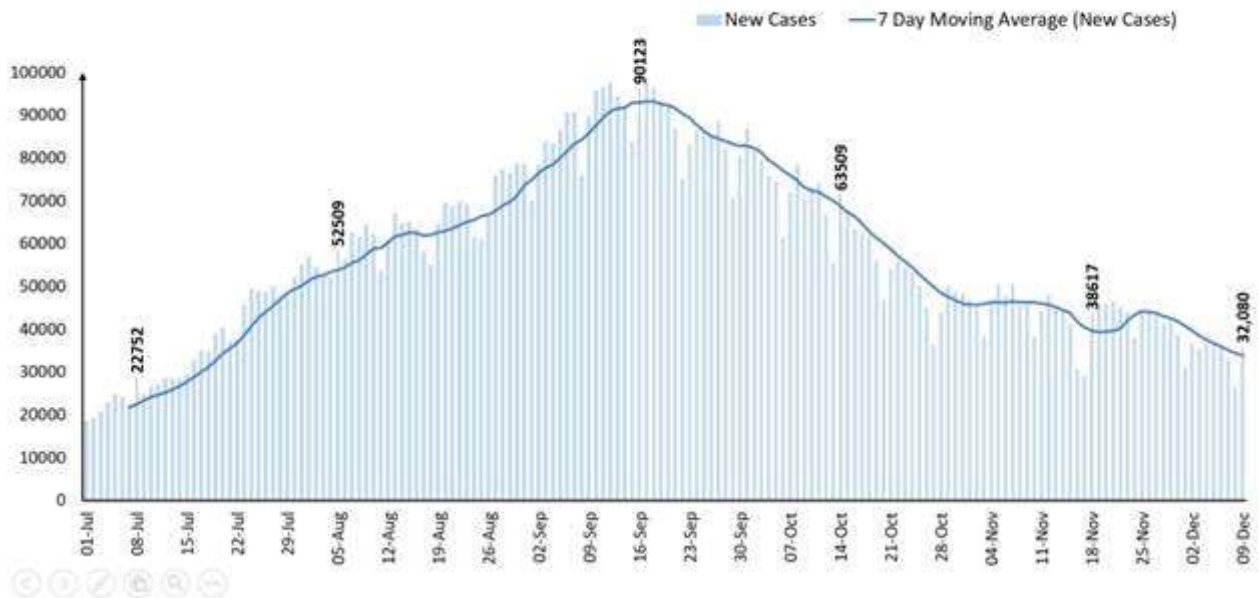

Active cases continue to decline, now below 4 lakhs

India has reported more daily recoveries than the daily new cases during the past 24 hours. While **32,080** persons were found positive in the past 24 hours, India has registered **36,635** new recoveries during the same period.

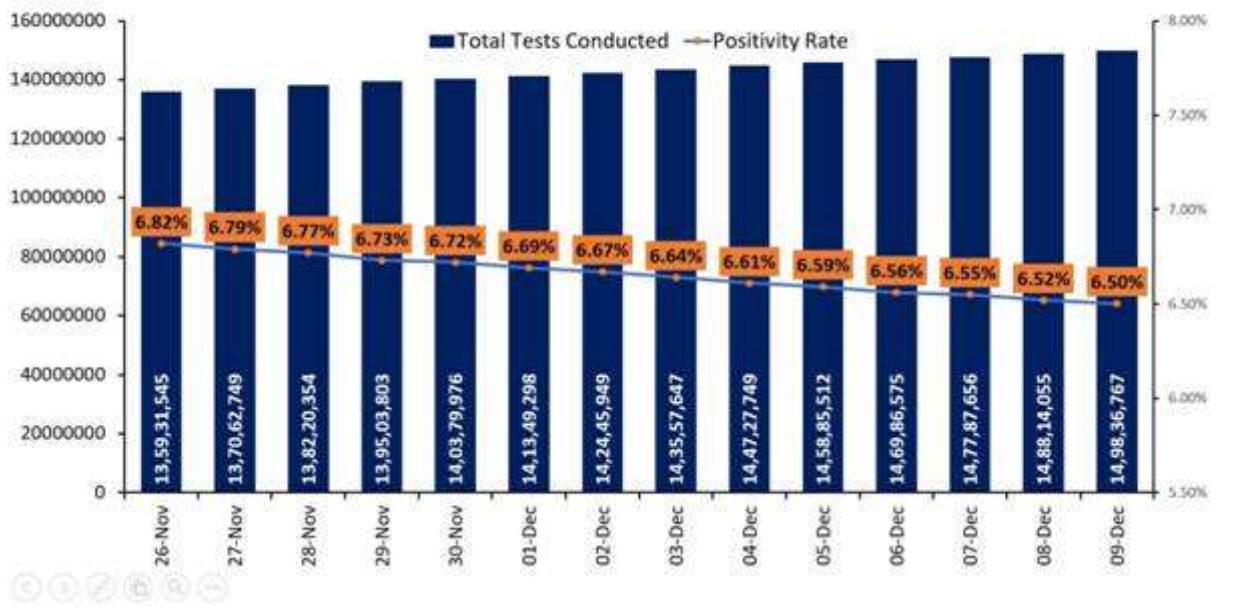

Decline in daily new cases continues

India's total cumulative tests are nearing **15 Cr (14,98,36,767)**. Keeping in line with its commitment to conduct more than one million tests every day, **10,22,712** samples were tested in the last 24 hours. The testing capacity of the country has grown to 15 lakh tests per day.

India's testing infrastructure has seen a significant boost with **2,220 labs** across the country.

Cumulative positivity rate continues to decline as tests conducted cross 14.9 crore

An average of more than 10 lakh tests conducted daily has ensured that the cumulative positivity rate is sustained at low levels and is presently following a downward trajectory.

The cumulative national Positivity Rate stands at **6.50%** today. The daily positivity rate is just **3.14%**. Higher volumes of testing eventually lead to low Positivity Rate.

19 States/UTs have weekly positivity rate more than the national average.

19 States/UTs have weekly positivity rate more than the national average

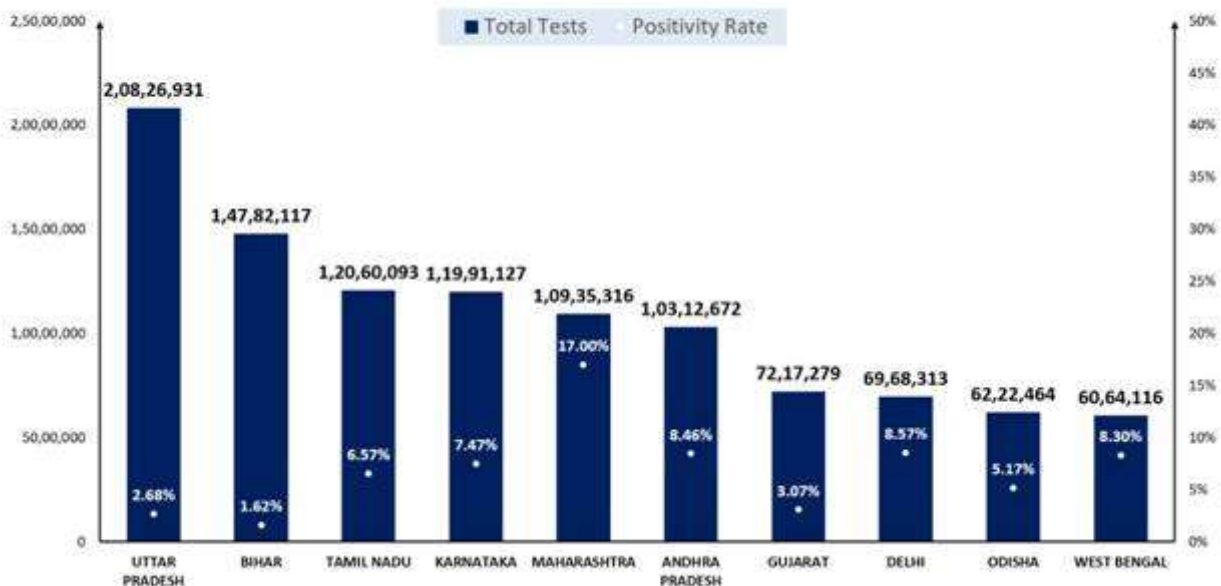

Below are the States with highest cumulative testing along with their respective positivity rates.

Uttar Pradesh has the highest cumulative testing with more than 2 Cr tests. Bihar, Tamil Nadu, Karnataka, Maharashtra and Andhra Pradesh are among the States with highest cumulative testing with more than 1 Cr tests.

States with highest cumulative testing and their respective positivity rate

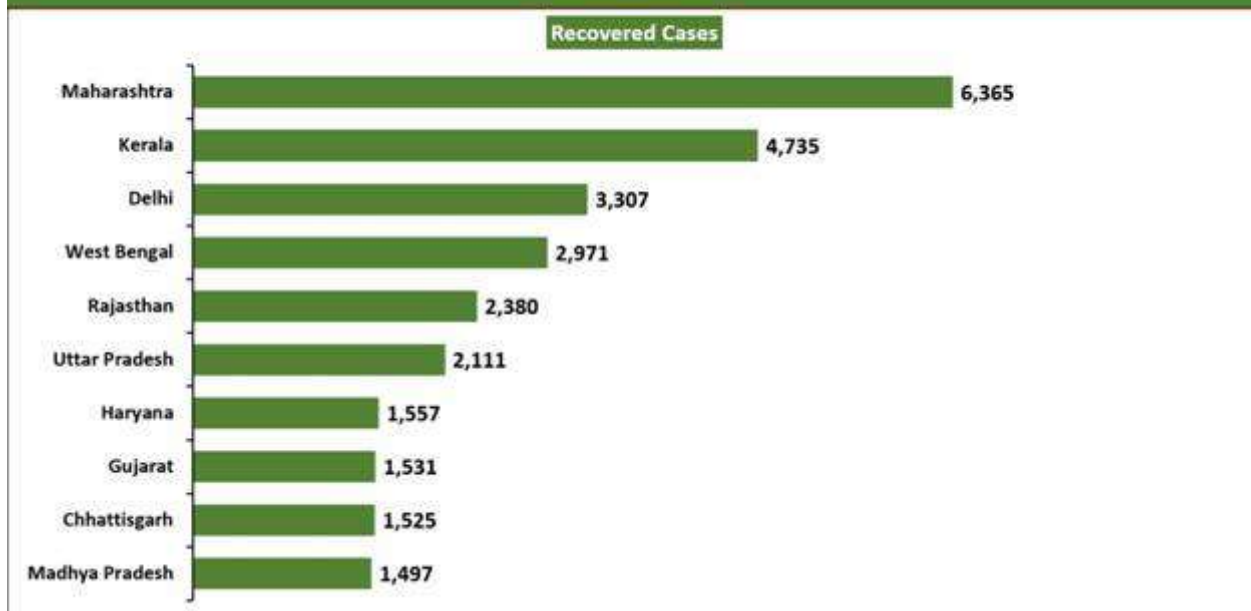

The Recovery Rate has also increased to **94.66%**. Total Recoveries have surpassed **92 lakhs** today (**92,15,581**).

76.37% of the new recovered cases are observed to be concentrated in 10 States/UTs.

Maharashtra has reported the maximum number of single day recoveries with 6,365 newly recovered cases. 4,735 people recovered in Kerala in the past 24 hours followed by 3,307 in Delhi.

76% of new recovered cases in the 10 States & UTs

75.11% of the new cases are from 10 States and UTs.

Kerala continues to report the highest daily new cases at 5,032. It is followed by Maharashtra with 4,026 new cases.

402 case fatalities have been reported in the past 24 hours.

Ten States/UTs account for **76.37%** of new deaths. Delhi saw the maximum casualties (57). Maharashtra and West Bengal follow with 53 and 49 daily deaths, respectively.
