# India's Active Caseload further retracts to 3.62% of Total Cases

## Total Recoveries exceed Total Active cases by more than 90 lakhs

## India records one of the lowest daily cases and daily deaths per million population in the last 7 days

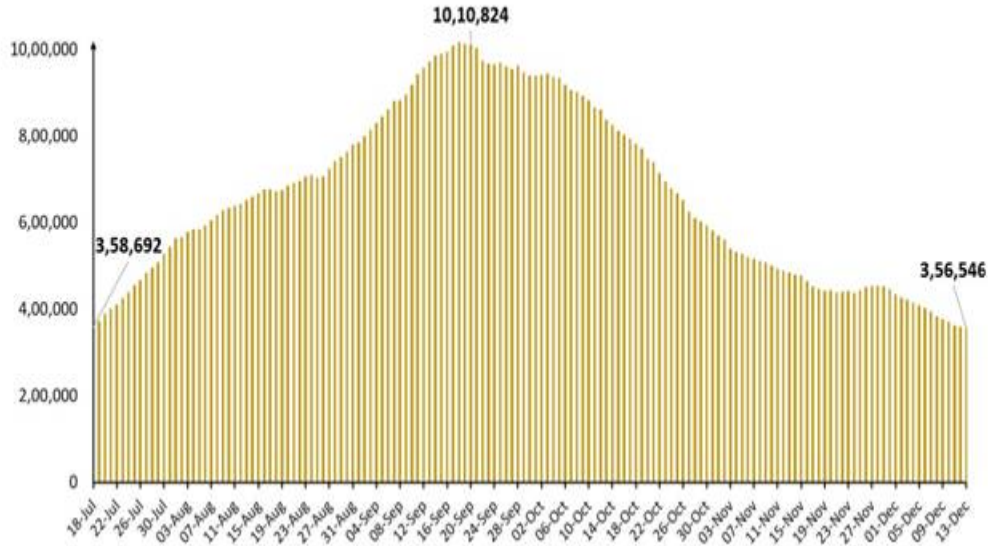

Posted On: 13 DEC 2020 10:52AM by PIB Delhi

Steadily following the trend set over the past few weeks, India's active caseload **has fallen to 3.62% of the total active cases.**

India has reported more daily recoveries than the daily new cases during the past 24 hours. The trend of more daily recoveries than the daily cases has led to a continuous contraction of India's Active Caseload which presently stands at **3,56,546 today.**

While **30,254** persons in were found to be COVID positive in the country in the past 24 hours, **33,136** new recoveries were registered during the same period. This has led to a net decline of **3,273** cases from the total Active Caseload in the last 24 hours.

## Active cases continue to decline, now below 4 lakhs

India reported one of the lowest cases per million population in the world (**158**) in the last 7 days; much lower than many other countries of the Western Hemisphere.
