India's Total Recovered Cases cross landmark peak of 95 lakhs

At 95.40% Recovery Rate amongst highest in the world

Active cases slump to 3.13 lakh

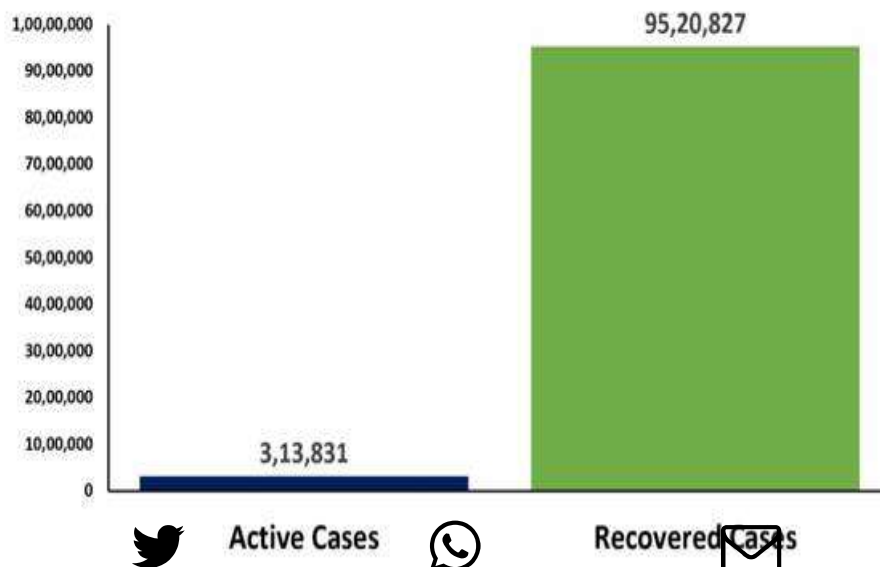

Posted On: 18 DEC 2020 11:25AM by PIB Delhi

India has registered a landmark achievement in the fight against the global pandemic today. The ongoing trend of exponential increment in India's total recoveries continues. The total recovered cases of the country have crossed a crucial peak of **95 lakh (95,20,827)**.

The chasm between active cases and recovered cases is continuously widening. Recoveries have surpassed the active cases by more than **92 lakh (92,06,996)**. The Recovery Rate has also increased to **95.40%**. **India is one of the top countries with the highest recovery rate globally.**

The total Recovered Cases are more than **30 times** the number of active cases. India's present active caseload of **3,13,831** consists of just **3.14%** of India's Total Positive Cases..

Recovered Cases are 30 times the number of Active Cases

Active Cases

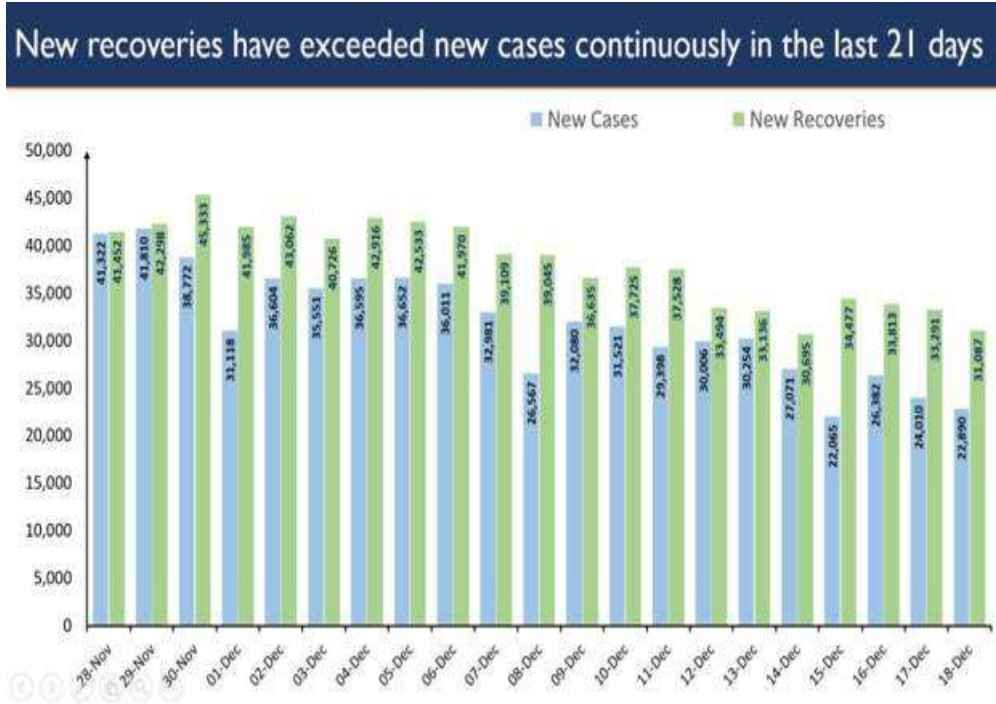

Recovered Cases

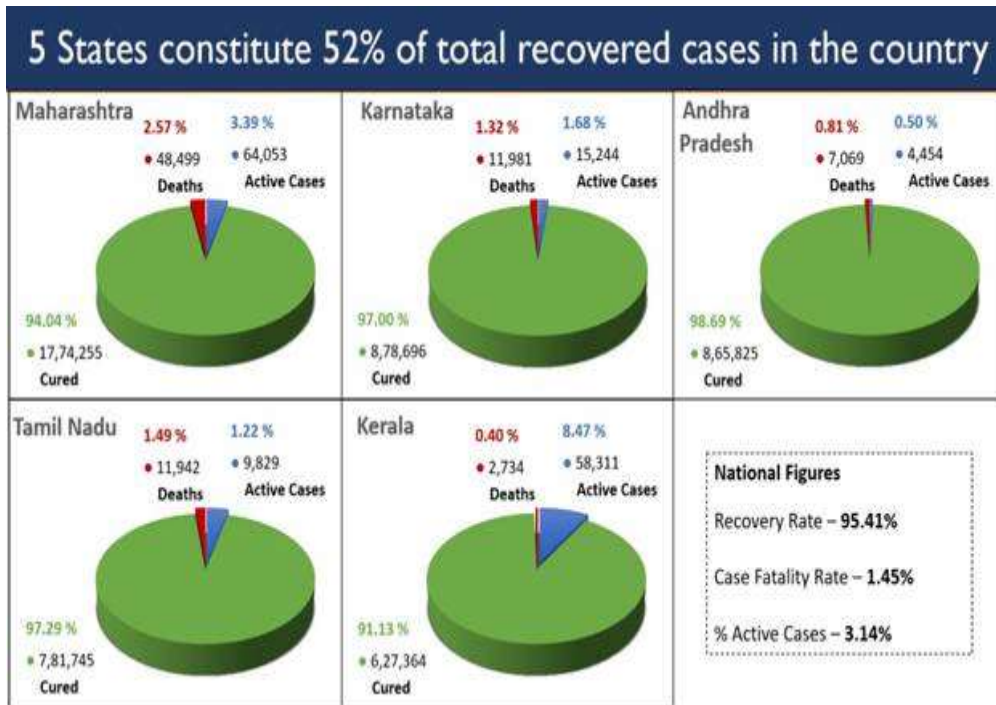

New daily recoveries outnumbering new cases have ensured a consistent decline in the active cases along with increase in the total recoveries. In the last 24 hours, only **22,890** persons were found to be infected with COVID in India. In the same period, India has registered **31,087** new recoveries.

New recoveries have exceeded new cases continuously **since the last 21 days**.

Five States account for **almost 52%** (51.76%) of the total recovered cases in the country.

75.46% of the new recovered cases are observed to be concentrated in 10 States/UTs.

Kerala has reported the maximum number of single day recoveries with 4,970 newly recovered cases. 4,358 people recovered in Maharashtra the past 24 hours followed by 2,747 in West Bengal.

76.43% of the new cases are from 10 States and UTs.

Kerala continues to report the highest daily new cases at 4,969. It is followed by West Bengal and Chhattisgarh with 2,245 and 1,584 new cases, respectively.

338 case fatalities have been reported in the past 24 hours.

Ten States/UTs account for **75.15%** of new deaths. Maharashtra saw the maximum casualties (65). West Bengal and Delhi follow with 44 and 35 daily deaths, respectively.

Daily deaths in India are on a sustained decline. **Less than 500 daily deaths** have been registered since the **last 13 days**.
