India's trajectory of active cases continues to follow a steadily dipping path. The total Active Caseload has dropped to **3.05 lakh (3,05,344)** today.

This has been made possible by the trend of recoveries exceeding new cases and low number of fatalities per day which have ensured a total net reduction of the Active Caseload.

India's present active caseload consists of just **3.04%** of India's Total Positive Cases. The new recoveries of **29,690** in the last 24 hours have led to a net decline of **3,407** in the Total Active cases.

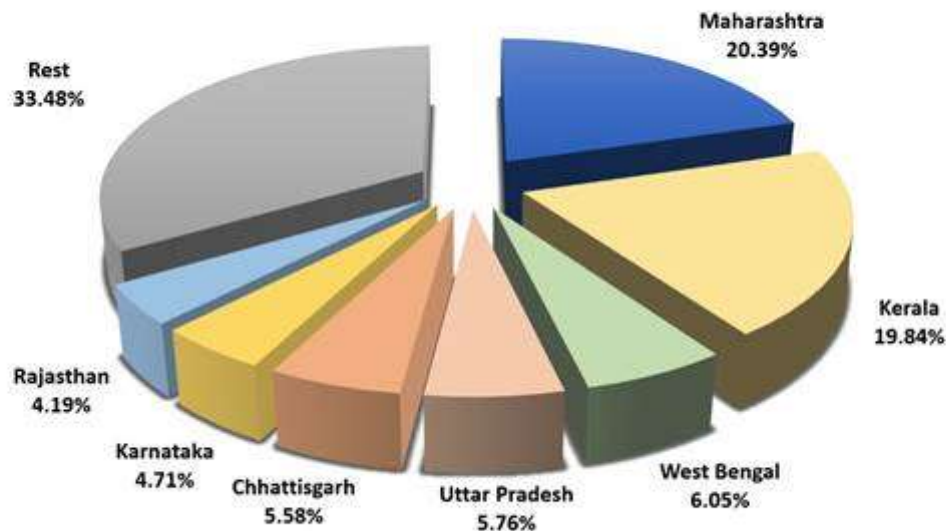

Active cases continue to decline, now below 3.1 lakhs

10 States/UTs account for 66% of the total active cases in the country.
