India's Active Caseload slumps to 2.50 lakh; comprises 2.43% of Total Cases

More than 99 lakh Cumulative Recoveries, highest globally, registered

Posted On: 02 JAN 2021 11:10AM by PIB Delhi

The trend of more daily recoveries than the daily cases has led to a continuous contraction of active cases. India's Active Caseload dropped down to **2.50 lakh** which presently stands at **2,50,183 today**.

India's active caseload **comprises merely 2.43% of the total cases, now under 2.5%**.

While **19,079** persons in India were found to be COVID positive, **22,926** new recoveries were registered during the same period. This has led to a net decline of **4,071** cases from the total Active Caseload in the last 24 hours.

Active cases continue to decline, now just 2.5 lakhs

Five States viz. Kerala, Maharashtra, Uttar Pradesh, West Bengal and Chhattisgarh contribute 62% of total active cases.

India has recorded one of the lowest new cases per million population in the last 7 days (**101**). Brazil, Russia, France, Italy, USA and UK have much higher cases per million population reported in the last 7 days.
