

## Sustained Decline in number of Daily Fatalities; daily deaths below 300 since the last 16 days

### Total number infected with New Strain of Coronavirus from UK stands at 90; no addition in the last 24 hours

Posted On: 10 JAN 2021 12:32PM by PIB Delhi

The focused efforts of Centre and State/UT governments on effective clinical management of the hospitalized cases have ensured sustained decline in India's Fatality Rate which is **1.44%** today. With effective containment strategy, aggressive testing and standardized clinical management protocols based on holistic Standard of Care Protocol across government and private hospitals, the number of new deaths have dipped.

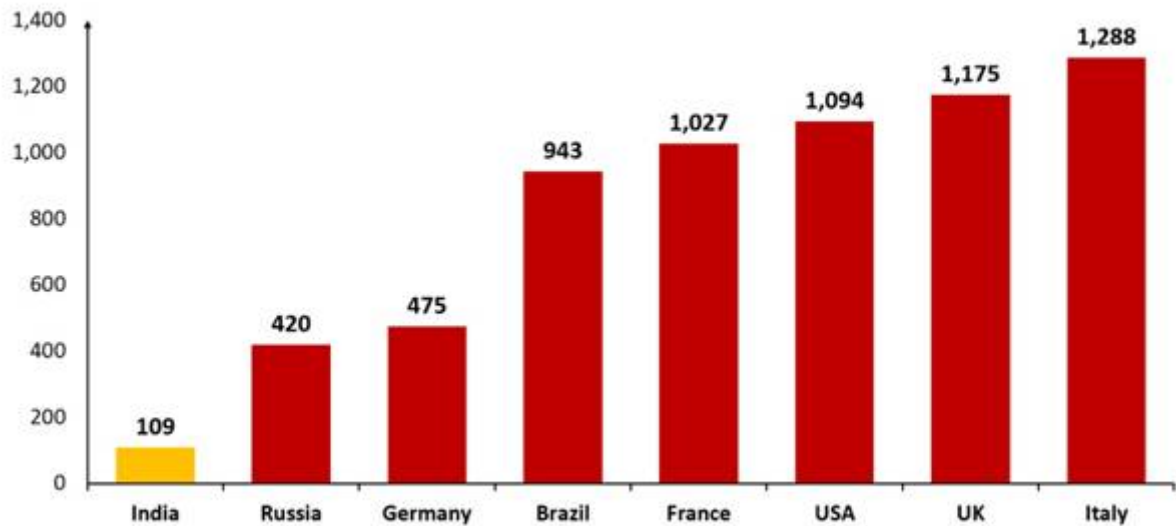

**Less than 300 new deaths** are being recorded in the country since the **last 16 days**.

As part of the COVID management and response policy, there has been a sharp focus of the Central Government on not only containing the COVID, but to reduce deaths and to save lives by providing quality clinical care to the critical and severe patients of COVID. Collaborative efforts of the Union and State/UT governments have resulted in strengthening of the health facilities across the country.

India has one of the **lowest Deaths per Million population (109)**. Countries like Russia, Germany, Brazil, France, USA, UK and Italy have much higher deaths per million population.
