India continues its streak of decline in active caseload; at 2.14 lakh after 197 days, 15,968 daily new cases registered in the last 24 hours

India’s active caseload has fallen to 2.14 lakh (2,14,507) today. The share of Active Cases in the total Positive Cases has further shrunk to 2.04%. This is lowest after 197 days. The total active cases were 2,15,125 on 30th June, 2020. A net decline of 2051 cases has been recorded in the total active cases in last 24 hours. The daily cases in India are registering a consistent decline on a daily basis. Less than 16,000 daily new cases (15,968) were added to the national tally in the last 24 hours. On the other hand, 17,817 recoveries were registered in the last 24 hours. Recoveries outnumbering new cases have ensured a steady fall in the Active Cases. The total recovered cases stand at 10,129,111 which translates to a Recovery Rate of 95.51%. The gap between Recovered cases and Active cases continues to grow and presently stands at 99,14,604. 81.83% of the new recovered cases are observed to be concentrated in 10 States/UTs. Kerala has reported the maximum number of single day recoveries with 4,270 recoveries. Maharashtra follows with 3,282 new recoveries. Chhattisgarh recorded another 1,207 daily recoveries. 74.82% of the new cases are concentrated in 7 States and UTs. Kerala reported the maximum daily new cases numbering 5,507 in the last 24 hours. Maharashtra recorded 2,936 new cases while Karnataka reported 751 new cases yesterday. Seven States/UTs account for 70.30% of the 202 case fatalities reported in the past 24 hours. Maharashtra reported 50 deaths. Kerala and West Bengal follow with 25 and 18 new deaths, respectively. The total number of persons found to be positive with the new UK variant genome stands at 102 today. The COVID-19 vaccination drive is scheduled to kick start from 16th January, 2021. The roll-out of COVID-19 vaccine will provide priority to the healthcare workers and the frontline workers who are estimated to be around 3 cr, followed by those above 50 years of age and the under-50 population groups with co-morbidities numbering around 27 cr.

COVID-19 Vaccine Rollout, As India gears up for COVID19 Vaccine roll out, Centre guides States/UTs on Co-WIN management

The Centre has been proactively carrying activities towards preparing for the nationwide roll-out of COVID-19 vaccine in close collaboration with States/UTs and all stakeholders. The Union Ministry of Health & Family Welfare (MoHFW) on Sunday held a VC with administrators from States and UTs on the CoWIN software which forms the backbone of the last mile vaccine administration. The meeting was chaired by Shri Ram Sewak Sharma, Chairman of Empowered Group on Technology and Data Management to combat COVID-19 and member, National Expert Group on Vaccine Administration of COVID-19. The meeting was attended by the State Principal Secretaries, NHM Mission Directors, and State Immunisation officers and senior officers of the Health Ministry. During the meeting the feedback of the States/UTs on the Co-WIN software and its operational use, emanating from the dry runs, was discussed in detail. Shri R. S. Sharma gave an overall view of the Co-WIN software and the principles that shall underpin the technology back-up for the vaccination exercise. He said that robust, dependable and agile technology shall form both the foundation and the back-up for the country’s COVID-19 vaccination which shall be the world’s largest immunisation exercise.

COVID-19 Vaccine Rollout. Dr Harsh Vardhan interacts with Health Ministers of States/UTs to review preparedness and seek their personal leadership in glitch-free Dry Run of 8th Jan.

Dr. Harsh Vardhan, Union Minister of Health and Family Welfare on Thursday interacted with the Health Ministers and Principal Secretaries/ Additional Chief Secretaries of the States/UTs to review the preparedness for the nationwide Mock Drill on the COVID vaccination scheduled for 8th January, through video conference. He also urged for their keen overview and personal indulgence to lead the whole exercise. The second nationwide mock drill on the Covid19 vaccination will be held at three session sites of 736 districts across 33 States/UTs. The objective of the mock drill on COVID19 vaccination is to simulate the actual vaccine administration event. The entire planning of the vaccination drive including beneficiary registration, microplanning and vaccination at the planned session site, will be tested under the leadership of District Collector/District Magistrate. The dry run will also familiarize the State, District, Block and Hospital level officers on all aspects of COVID-19 roll out. This activity will help administrators in strengthening the linkages between planning, implementation and reporting mechanisms, identification of any residual challenges prior to the actual implementation and to provide confidence to the programme managers at all levels to carry out a smooth implementation of the vaccination drive.

For details :

In a massive country-wide exercise, another Mock Drill on COVID19 Vaccine administration to be conducted in all States and UTs on 8th January 2021

The Central Government is gearing up for the roll out of COVID19 vaccine across the country. Union Ministry of Health & Family Welfare (MoHFW) has been pro-actively carrying out the preparations for roll-out of COVID-19 vaccine, in collaboration with States/UTs and all stakeholders, over the past couple of months to ensure that the preparations for roll-out of COVID-19 vaccine are on track. Two COVID vaccines have been given emergency use authorisation by the Drugs Controller General of India (DCGI) recently. The roll out of COVID-19 vaccine is expected to begin in the near future. This milestone entails the need for testing of all planned mechanisms for conducting the vaccination drive in the country. As a simulation of actual execution, another round of dry run/mock drill in all 700+ districts of all States/UTs (except UP and Haryana who have already conducted/ will be conducting the dry run in all districts on 5th January and 7th January respectively) is planned on 8th January 2021 to ensure efficient planning and management for vaccine delivery in each district of all States/UTs. Each district will identify three types of session sites, similar to the previous dry run including a public health facility (District Hospital/Medical College), private health facility and rural or urban outreach sites.

PM chairs meeting with CMs on COVID-19 vaccination

Prime Minister Shri Narendra Modi chaired a high level meeting with Chief Ministers and Administrators of all States and Union Territories to review the status and preparedness for COVID-19 vaccination on 11th January, 2021, via video conferencing. He lauded the constant coordination and communication between the Centre and the States, and timely decision making, which has played a big role in the fight against the virus. As a result, the spread of the virus has been contained vis-a-vis several other countries. Prime Minister noted that the fear and apprehensions that citizens had at the start of the pandemic have now ebbed, and the growing confidence has reflected positively on the economic
activities also. He also appreciated the State governments for working zealously in this battle. Prime Minister said that the country is in a decisive phase of this fight, with the start of the world’s biggest vaccination campaign from 16th January. He underlined that it’s a matter of pride that both the vaccines for which Emergency Use Authorization has been given are made in India. He highlighted that both the approved vaccines are highly cost effective in comparison to other vaccines from across the world, adding that India would have faced great difficulty if it would have had to depend on foreign vaccines. The Chief Ministers expressed happiness at the rollout of vaccination. They discussed some issues and concerns about vaccines, which were clarified in the meeting.

Prime Minister reviews status of COVID-19 and preparedness for COVID19 vaccination

The Prime Minister chaired a high-level meeting to review the status of COVID-19 in the country along with the preparedness of the State/UTs for COVID vaccination, on Saturday. Meeting was attended by Cabinet Secretary, Principal Secretary to PM, Health Secretary, and other senior officials concerned. The Prime Minister took a detailed and comprehensive review of status of COVID management covering various issues. Emergency Use Authorisation or Accelerated Approval has been granted by the National Regulator for two vaccines (Covishield and Covaxin) which have established safety & immunogenicity. The Hon’ble PM was also briefed about the preparedness status of the Centre in close collaboration with the State and UT governments for roll out of the vaccine in the near future. The vaccination exercise is underpinned by the principles of people’s participation (Jan Bhagidari); utilizing experience of elections (booth strategy) and Universal Immunization Program (UIP); no compromise of existing healthcare services, especially national programs and primary health care; no compromise on scientific and regulatory norms, other SOPs; and an orderly and smooth implementation driven by technology. The roll-out of COVID-19 vaccine will provide priority to the healthcare workers and the frontline workers who are estimated to be around 3 cr, followed by those above 50 years of age and the under-50 population groups with co-morbidities numbering around 27 cr.

India-Germany Leaders’ Video-Teleconference

Prime Minister Shri Narendra Modi held a video-teleconference with his German counterpart, Federal Chancellor Dr. Angela Merkel on Wednesday. The Prime Minister appreciated the long-standing role of Chancellor Merkel in providing stable and strong leadership at the European and global stage, and thanked her for guiding the growth of the India-Germany Strategic Partnership. The two leaders discussed key issues of mutual importance including the response to the COVID-19 pandemic, bilateral ties, regional and global issues, particularly India-EU relations. The Prime Minister briefed Chancellor Merkel on the developments in India with regard to vaccine development and assured Chancellor Merkel of India’s commitment to deploy its capacities for the benefit of the world. He conveyed his best wishes for early containment of the new wave of infections in Germany and other European countries. The
Prime Minister welcomed Germany’s decision to join the International Solar Alliance (ISA), and expressed his desire to further strengthen cooperation with Germany under the platform of Coalition for Disaster Resilient Infrastructure (CDRI).

**Ministry of Education issues guidelines for identification, admission and continued education of migrant children**

In order to mitigate the impact of challenges thrown by the COVID-19 pandemic for out of school children, it was felt necessary for every State/UT to devise a proper strategy for preventing increased drop outs, lower enrolments, loss of learning and deterioration in the gains made in providing universal access, quality and equity in the recent years. Thus the Ministry of Education had issued guidelines for identification, admission and continued education of migrant children. In order to ensure that school going children have access to education with quality and equity and to minimize the impact of the pandemic on school education across the country, the Ministry of Education has prepared and issued detailed guidelines on steps to be taken by the States and UTs during school closure and when the school re-open. The main features of the Guidelines are: Continued Education for Out of School Children (OoSC) and Children with Special Needs (CWSN), Identifying Out of School Children, Enrolment Drives and Awareness Generation, Student Support while Schools are closed, Student Support on School Reopening, Teacher Capacity Building.

**INPUTS FROM PIB FIELD OFFICES**

- **Arunachal Pradesh:** In Arunachal Pradesh, 5 new COVID-19 cases detected on Tuesday. There are 61 active cases in the State.
- **Assam:** In Assam, total COVID-19 cases rise to 2,16,690 with 55 new cases, total discharged patients 2,12,632 and 1,064 total death.
- **Nagaland:** In Nagaland, 10 new COVID-19 cases detected on Tuesday. Total cases rise to 11,997.
- **Sikkim:** In Sikkim, total COVID-19 cases rise to 5,996 with 7 new cases on Tuesday, total discharged patients 5,459, active case 313 and 129 total death.
- **Kerala:** The first flight carrying COVID vaccines for the first phase of vaccination in Kerala, the first state in the country to report the disease caused by the novel coronavirus, has arrived at Cochin International airport this morning. Kerala will get 4,33,500 doses of Covishield vaccine manufactured by the Pune-based Serum Institute of India. The first flight from Pune carried the vaccine doses for Ernakulam and Kozhikode districts. The vaccine for Thiruvananthapuram will arrive later today. These vaccines will be stored in Regional Vaccine stores in the three districts. While Thiruvananthapuram will receive 1,34,000 doses of the vaccine, Ernakulam and Kozhikode will receive 1,80,000 and 1,19,500 doses respectively. So far, 3,62,870 people have registered themselves for the vaccination, which will commence from January 16. A total of 133 Centres has been set up across the state. 100 doses will be provided a day in each centres. State Health Minister K.K. Shylaja has stated that depending on the availability of the vaccine, the number of shots and centers will be increased.
- **Tamil Nadu:** As on date, Tamil Nadu recorded 8,27,614 total cases, 12,236 deaths, 6,807 Active cases and 8,08,571 discharges.
- **Karnataka:** As on date, Karnataka recorded 9,28,806 total cases, 12,149 deaths, 8,909 Active cases and 9,07,729 discharges.
- **Andhra Pradesh:** Andhra Pradesh received its first consignment of coronavirus vaccine on Tuesday, the same day when Pune-based Serum Institute of India dispatched first batches of Covishield—one of the two vaccines approved for emergency use in India. Around 4.77 lakh doses were received as the nation readies to begin the ‘biggest vaccination drive’ this Saturday. The vials were taken to the State Cold Storage Centre at Gannavaram Community Health Centre under high security. A total of 4,97,000 vials...
have been sanctioned to the state for the first phase. As many as 3.8 lakh health workers—including Integrated Child Development Services staff—are set to get immunised at 332 session sites in the first phase. Later, the process will be followed for nine lakh frontline workers such as state and Central government employees, Armed forces personnel, home guards, prison staff, disaster management volunteers, civil defence staff, municipal workers and revenue employees. Then, 90 lakh people above the age of 50 years and with co-morbidities will be inoculated against Covid-19. Village volunteers have been instructed to conduct a door-to-door survey for preparation of a database of co-morbid persons. State has one state and four regional cold storage centre (one each at Kurnool, Kadapa, Guntur and Visakhapatnam), 13 district vaccine storage units and 1,659 cold chain points. Meanwhile, Covid-19 cases in the Andhra Pradesh went up to 8,85,234 as on Tuesday. The total recoveries have touched 8,75,690 and deaths 7,133, leaving 2,411 active cases. The overall positivity rate in the state dropped to 7.14 per cent after a total of 1.23 crore sample tests.

Telangana: All arrangements have been made in Telangana for the ensuring the proper implementation of Covid vaccination programme which it to begin on 16th of this month. Chief Minister Shri K.Chandrasekhar Rao participated in the video conference of PM with all states’ CMs on 11th of this month and held a review meeting with the all Ministers and District Collectors on the same day and took stock of the ground situation. A total of 3.64 lakh doses of COVISHIELD vaccine have reached Hyderabad from Serum Institute of India, Pune on Tuesday and they will be sent to 866 Cold Chain Units in the state by Thursday evening. On the first day i.e. on 16th of this month – vaccination will begin in 139 selected centres and as many as 30 people will be vaccinated in these centres on the first day and number of beneficiaries and centres will be increased gradually. Two Vaccination Centres – i.e. Gandhi Hospital, Hyderabad and Narsingi Primary Health Centre in Ranga Reddy district - have been selected for PM’s interaction with health staff through video conferencing slated on the 16th. The state Health Department has kept ready 1200 beds in 235 hospitals (57 Govt and 178 Private hospitals) and 720 ambulances in the state to treat the people in case of adverse events following immunization. Health Minister Shri EetalaRajender has written a letter to all Sarpanches (Gram Panchayat Presidents) in the state urging them to actively involve themselves in vaccination programme and ensure that the registered persons reach the Vaccination Centre as per schedule so that the vaccination programme goes off smoothly. Chief Secretary held a teleconference with all District Collectors on Tuesday to review the arrangements done for vaccination programme. Total number of Covid cases in the state stands at 2,90,640 and number of fatalities at 1,571. Number of recoveries reached 2,84,611. While number of active cases in the state is 4,458 out of which 2,461 are in home isolation.

Maharashtra: 9.63 lakh doses of Covishield vaccine have been received in the state. The first consignment of Covishield vaccine arrived in Mumbai today. In all, 1,39,500 doses of the vaccine were received. The consignment of the vaccines is stored at the storage facility at F/South Ward Office situated in Parel and it will be delivered across the Mumbai at designated Vaccination Centres for national inoculation drive set on 16th January. Health Minister Rajesh Tope has said that the preparations for the launching of the drive are in full swing and all arrangements have been done for the drive. He said more than seven lakh 84 thousand health workers are registered on COWIN portal and the doses will be administered to those workers who have been registered till last midnight. Vaccination will be done across 511 centres in the next three months. Maharashtra’s Health Secretary Pradeep Vyas has said that a minimum of 100 people will be vaccinated at each of these centres which have been set up at primary healthcare units, district and civic hospitals across the state. At 72, Mumbai has the largest number of vaccinationcentres followed by Pune which has 55 centres while Thane has 42, Nashik 23 and
Ahmednagar 21 centres. 17,749 people from Maharashtra have registered as vaccinators on the COWIN app.

Maharashtra recorded 2,936 new cases of coronavirus on Tuesday, taking the state’s tally of total cases to 19,74,488. According to the state’s public health department, 3,282 patients were discharged on the same day, taking the total number of recoveries to 18,71,270. With 50 fatalities, the state's death toll has risen to 50,151. The number of active cases in the state stand at 51,892. Maharashtra’s recovery rate stands at 94.77 percent while the case fatality rate stands at 2.54 percent. Maharashtra has conducted 1.35 crore tests so far and the positivity rate stands at 14.63 percent. With 473 new cases, Mumbai’s caseload has increased to 2,99,799. The city reported 441 recoveries and seven deaths during the day.

- Gujarat: In Gujarat, the first batch of vaccine with two lakh 76 thousand doses reached Ahmedabad airport Tuesday morning from Pune. State Deputy Chief Minister Nitin Patel along with senior officials of the Health Department received the first batch of vaccines. The first batch of vaccine received from Pune Institute have been preserved at the Regional Storage Centre in Gandhinagar. Apart from Gandhinagar, similar Regional Storage Centres have been set up at Ahmedabad, Vadodara, Rajkot, Surat and Bhavnagar. Each Regional Centre has a capacity to preserve and store eight to ten lakh vaccine doses. First Phase of vaccination will begin at 256 booths across the state on Saturday. Health workers and frontline Corona Warriors will be vaccinated during the First Phase. Meanwhile, Gujarat has recorded 602 new cases of Covid 19 during the last 24 hours. According to the state health department, the recovery rate has further improved to 95.34 percent. The total number of Covid 19 cases detected so far in Gujarat has reached up to 2 lakh 53 thousand 161. Out of these, 2 lakh 41 thousand 372 patients recovered. 855 patients recovered during the last 24 hours. Maximum 133 new cases reported from Ahmedabad, while Surat recorded 121 new cases. At present total active cases in the state are 7439.

- Madhya Pradesh: Madhya Pradesh is all set to launch Covid Vaccination from January 16 along with the rest of the country. 5.06 lakh doses of vaccine have been received in the state today, which will be kept in 1,200 storage systems at state level. The vaccine will go to 8 zillas after the quantity has been decided, said Dr Santosh Shukla, State immunisation officer, Madhya Pradesh. Meanwhile the state reported 471 corona-positive cases on Tuesday. In the first phase of Covid vaccination, 4 lakh 16 thousand health workers have been registered including 85 thousand private health workers along with all government health workers. The work of registration for Covid vaccination of frontline workers, including police personnel, security personnel, home guards and sanitation workers is underway. The last date of registration is January 25. Meanwhile the Covid positive rate has gone down below 2 per cent on Tuesday. The Covid positive rate was 1.9 per cent. Consistently, the number of corona-positive cases is declining in the state. The two major cities Bhopal and Indore reported below 100 covid cases on Tuesday. Indore reported 76 covid-positive cases, while Bhopal reported 97 covid-positive cases.

- Chhattisgarh - Chhattisgarh reported 729 positive cases on Tuesday, which takes the tally of positive cases to 2,90,813. On the same day, 1039 patients recovered from the infection, which takes the total recoveries to 2,79,236. While 10 deaths also occurred on Tuesday, the total active cases at present are 8060. Raipur reported the maximum number, that is, 121 cases, followed by Durg at 102 cases.

- Rajasthan: Rajasthan received its first consignment of 20,000 Covid-19 doses today afternoon. The vaccine was packed in three boxes which were transported to the state level storage centre in Jaipur. Rajasthan reports 429 new COVID-19 cases, 568 recoveries and 2 deaths on Tuesday. There are 6585 active cases at present. Total cases have touched 3,13,425, while total recoveries stand at 3,04,104 now. Also, 2736 people have lost their lives to COVID-19 in all.

- Goa: The first lot of COVID 19 vaccine for Goa has reached today early morning. The two boxes carrying 2350 vials with 10 doses each, totaling 23,500 shots of the vaccine has been handed over to the
Health Department officials. The vaccines are being stored appropriately by the authorities, and would be distributed to all centres 24 hours prior to vaccination day, stated Goa CM Pramod Sawant. With the report of 92 new cases in Goa on Tuesday, the total cases have gone up to 51,983. This apart, 94 recoveries and no death have also been reported on the same day. With this, the number of recoveries has gone up to 50,437, while the recovery rate in the state is 97.03%. There are 797 active cases at present.

Avoid the Three Cs

Be aware of different levels of risk in different settings.

There are certain places where COVID-19 spreads more easily:

1. **Crowded places** with many people nearby
2. **Close-contact settings** especially where people have close-range conversations
3. **Confined and enclosed spaces** with poor ventilation

The risk is higher in places where these factors overlap.

Even as restrictions are lifted, consider where you are going and #StaySafe by avoiding the Three Cs.

**WHAT SHOULD YOU DO?**

1. Avoid crowded places and limit time in enclosed spaces
2. Maintain at least 1m distance from others
3. When possible, open windows and doors for ventilation
4. Keep hands clean and cover coughs and sneezes
5. Wear a mask if requested or if physical distancing is not possible

If you are unwell, stay home unless to seek urgent medical care.
**THREE RULES FOR SAFETY**

1. **Always wear face-cover/mask**
2. **Maintain distance from others**
   - 6 Feet
   - 2 Gali
3. **Wash hands frequently and thoroughly with soap and water**

* 'Recovered' and 'Active' has data for states but 'Deaths' plot is NOT to scale.

Steady decline in number of deaths. Daily Fatalities below 300 continuously since the last 12 days. Total Active Caseload, at 2.27 lakhs, further shrinks to 2.19%. Total 71 persons detected with the new UK mutant strain

There is a steady decline in the number of daily deaths recorded in the country. **Less than 300 new deaths are being recorded in the country from the last 12 days.**

**Only one new death per million population** is reported in India in the last 7 days. In another achievement, the trajectory of contraction in India’s total active cases continues unabated. The active caseload of the country stands at 2,27,546. The share of Active Cases in the total Positive Cases has further shrunk **below 2.2% (2.19%).** The daily recoveries exceeding the daily new cases have ensured a total net reduction of the Active Caseload. **21,314 new recoveries** were registered during the last 24 hours. A net decline of **3,490 cases** has been recorded in the total active cases in last 24 hours. The daily cases in India have been below 20,000 in the recent days. **18,088 new cases** were registered during the last 24 hours. 96 new cases per million population have been recorded in the last 7 days in India. The number of cases is much higher in countries such as Brazil, Russia, France, Italy, USA and UK. The cumulative recoveries in India has moved further close to 1 cr and stand at **99,97,272** today. New Recoveries outnumbering the daily New Cases has also improved the Recovery Rate to **96.36%**. 76.48% of the new recovered cases are contributed by ten States/UTs. With 4,922 persons recovering from COVID, Kerala has recorded the maximum number of recoveries. Maharashtra has registered another 2,828 daily recoveries while Chhattisgarh has reported 1,651 new recoveries in the past 24 hours. Ten States/UTs have contributed **79.05%** of the new cases. Kerala has reported 5,615 cases in the last 24 hours. Maharashtra recorded 3,160 new cases while Chhattisgarh has registered 1,021 new cases yesterday. **73.48%** of the 264 case fatalities that reported in the past 24 hours are from Ten States/UTs. 24.24% of new fatalities reported are from Maharashtra which reported 64 deaths. Chhattisgarh also saw a fatality count of 25 while Kerala reported 24 new deaths. The total number of cases infected with the new strain of the novel Coronavirus first reported in the UK now stands at 71.

Telephone Conversation between Prime Minister Shri Narendra Modi and Prime Minister of UK The Rt Hon Boris Johnson

Prime Minister Shri Narendra Modi had a telephone conversation yesterday with the Prime Minister of UK The Rt Hon Boris Johnson. Prime Minister Johnson reiterated his thanks for India's invitation for him as the Chief Guest of the forthcoming Republic Day celebrations, but regretted his inability to attend in view of the changed COVID-19 context prevailing in the UK. He reiterated his keennees to visit India in the near future. Prime Minister expressed his understanding of the exceptional situation in the UK, and conveyed his best wishes for the quick control of the pandemic spread. The leaders reviewed ongoing cooperation between both countries, including in the area of making COVID-19 vaccines available for the world. They reiterated their shared belief in the potential of the India-UK partnership in the post-BREXIT, post-COVID context, and agreed to work towards a comprehensive roadmap for realising this potential.

Dr. Harsh Vardhan inaugurates CEPI Centralized network lab at DBT-THSTI Faridabad through virtual platform

The Minister for Science & Technology, Health & Family Welfare and Earth Sciences Dr. Harsh Vardhan inaugurated one of the seven labs of the world called as the centralized network lab of Coalition for Epidemic Preparedness Innovations (CEPI) established at Translational Health Science & Technology Institute (THSTI), Faridabad, through virtual platform in New Delhi yesterday. THSTI is an institute of the Department of Biotechnology (DBT). This is the only laboratory of such kind in India and is also accredited by National Accreditation Board for Testing and Calibration Laboratories (NABL) (ISO 17025:2017). Speaking on the occasion, Dr. Harsh Vardhan lauded DBT and BIRAC for “working relentlessly over the past ten months to develop effective interventions for combating the COVID pandemic”. He said, “Today, the country is in the forefront of developing vaccines against COVID-19”, and added, “already two of the 30 vaccines have already been cleared by the Drug Controller” for use and the rest are in advanced stages. Dr. Harsh Vardhan also released the e-Book on S & T solutions for COVID -19 that showcases the initiatives undertaken by the Department of Biotechnology for the mitigation of this Pandemic. The E-Book showcases the indigenous COVID-19 interventions developed by DBT supported initiatives.

PM CARES Fund Trust allocates Rs.201.58 crores for installation of 162 dedicated PSA Medical Oxygen Generation Plants in public health facilities

The Prime Minister’s Citizen Assistance and Relief in Emergency Situations (PM CARES) Fund Trust is allocating Rs.201.58 crores for installation of additional 162 dedicated Pressure Swing Adsorption (PSA) Medical Oxygen Generation Plants inside public health facilities in the country. The total project cost includes Rs.137.33 crores towards supply and commissioning of the plants and Management fee of Central Medical Supply Store (CMSS) and around Rs.64.25 crores towards Comprehensive Annual Maintenance Contract. The procurement will be done by the Central Medical Supply Store (CMSS) – an autonomous body of Ministry of Health and Family Welfare. A total of 162 plants with total capacity of 154.19 MT are to be installed in 32 States/UTs [Annexure-I]. The Govt. hospitals where these plants are to be installed have been identified in consultation with the States/UTs concerned. The plants have a warranty for first 3 years. For the next 7 years, the project includes CAMC (Comprehensive Annual Maintenance Contract). Routine O&M is to be done by the hospitals/States. After the CAMC period, entire O&M will be borne by the hospitals/States. This mechanism will further strengthen public health system and enable long term systematic augmentation of medical oxygen availability in a cost effective manner. Adequate and uninterrupted supply of oxygen is an essential pre-requisite for managing moderate and severe cases of COVID -19, in addition to various other medical conditions where this need arises.

PM calls upon the scientific community to strengthen value creation cycle in Science, Technology and Industry
The Prime Minister, Shri Narendra Modi on Monday exhorted the scientific community to promote value-creation cycle of science to mass creation. He was speaking on the occasion of National Metrology Conclave 2021 where he dedicated National Atomic Timescale and Bhartiya Nirdeshak Dravya Pranali to the Nation and laid the foundation stone of National Environmental Standards Laboratory today through video conference. The Prime Minister pointed out, historically, any country has progressed in direct correlation to its effort to promote science. He termed this ‘value creation cycle’ of Science, Technology and Industry. Explaining further, the Prime Minister said that a scientific invention creates a technology and technology leads to industry development. The industry, in turn, invests further in science for new research. This cycle keeps on taking us in the direction of new possibilities. CSIR-NPL has played a major role in taking forward this value cycle, the Prime Minister added. This value creation cycle of science to mass-creation has become all the more important in today’s world when the country is moving forward with the goal of Aatmnirbhar India, Shri Modi said.

**PM Congratulates the nation on vaccine approval of Serum Institute of India and Bharat Biotech**

The Prime Minister, Shri Narendra Modi has called the DCGI approval of Serum Institute of India and Bharat Biotech vaccines, a decisive turning point to strengthen a spirited fight against Corona. In a series of tweets, the Prime Minister said, “A decisive turning point to strengthen a spirited fight! DCGI granting approval to vaccines of @SerumInstIndia and @BharatBiotech accelerates the road to a healthier and COVID-free nation. Congratulations India. Congratulations to our hardworking scientists and innovators.” He said, “It would make every Indian proud that the two vaccines that have been given emergency use approval are made in India! This shows the eagerness of our scientific community to fulfil the dream of an Aatmanirbhar Bharat, at the root of which is care and compassion,”

**PM lays Foundation Stone of AIIMS at Rajkot.**

The Prime Minister, Shri Narendra Modi laid the foundation stone of AIIMS Rajkot through a video conference on thursday. Union Minister Dr Harsh Vardhan, Governor Gujarat Acharaya Devvrat, Chief Minister Gujarat, Shri Vijay Rupani were present on the occasion. Speaking on the occasion, the Prime Minister remembered the efforts of the millions of doctors, health workers, scavengers and other frontline corona warriors who have constantly put their lives at stake to protect humanity. He lauded the efforts of the scientists and all those who provided food to the poor in this difficult period with full dedication. The Prime Minister remarked that this year showed that when India unites, it can effectively cope up with the most difficult crisis. He said India is in a much better position as a result of the effective steps and India's record of saving victims of Corona has been much better than other countries. He said in India, every necessary preparation about the vaccine is going on. He said that efforts are in the final stages for making the vaccine made in India, rapidly reaching every nook and corner. He said India's preparation is in full swing, to run the world’s largest immunization campaign.

India's Covid vaccine is a leap of science, says Vice President

The Vice President of India and Chairman of Rajya Sabha Shri M. Venkaiah Naidu has hailed the emergency authorization of two Covid vaccines as India's leap of science that benefits the humanity at large. Writing on social media on Monday, Shri Naidu stressed that this is an indication of how Atmanirbhar Bharat can benefit not only the Indians but the larger humanity. Hailing the national resolve shown by the country last year in containing the Covid-19, Shri Naidu called for the same spirit in taking the vaccine to the people during this year. Shri Naidu said; "India is in the forefront of shielding the humanity from the deadly disease by demonstrating its ability to mass produce the much needed vaccine and offer its own version as well. India's indigenous vaccine (Covaxin) has certain unique features based on the whole virus approach. This is a commendable achievement and all concerned deserve kudos for foresight perseverance and fruition of spirited efforts."

Press Statement by the Drugs Controller General of India (DCGI) on Restricted Emergency approval of COVID-19 virus vaccine

The Subject Expert Committee of Central Drugs Standard Control Organisation (CDSCO) met on 1st and 2nd January, 2021 and made recommendations in respect of proposal for Restricted Emergency Approval of COVID-19 virus vaccine of M/s Serum Institute of India and M/s Bharat Biotech as well as Phase III clinical trial of M/s Cadila Healthcare Ltd. The Subject Expert Committee consists of domain knowledge experts from the fields of pulmonology, immunology, microbiology, pharmacology, paediatrics, internal medicine, etc. M/s Serum Institute of India, Pune has presented a Recombinant Chimpanzee Adenovirus vector vaccine (Covishield) encoding the SARS-CoV-2 Spike (S) glycoprotein with technology transfer from AstraZeneca/Oxford University. M/s Bharat Biotech has developed a Whole Virion Inactivated Corona Virus Vaccine (Covaxin) in collaboration with ICMR and NIV (Pune), from where they received the virus seed strains. This vaccine is developed on Vero cell platform, which has well established track record of safety and efficacy in the country & globally. After adequate
examination, CDSCO has decided to accept the recommendations of the Expert Committee and accordingly, vaccines of M/s Serum and M/s Bharat Biotech are being approved for restricted use in emergency situation and permission is being granted to M/s Cadila Healthcare for conduct of the Phase III clinical trial.

How the Domestic Medical Equipment Industry “Adapted, Evolved and Expanded” to meet COVID19 challenge in 2020

2020 witnessed tremendous achievements in the medical supplies sector in the country. At the beginning of the pandemic, India was almost totally dependent on imported Ventilators, PPE Kits and N-95 Masks. There were, in fact, no standard specifications for these products which are essential in the fight against the pandemic. The Central Government recognised the challenges posed by the pandemic in the very initial stages and successfully ensured more than adequate availability and supplies of essential medical items across the country. The average cost of ventilators in India in February-March, 2020 was approximately Rs. 15 lakh and nearly all were imported. Due to the Indian industry taking up manufacturing of ventilators, the average cost now ranges between Rs. 2 to Rs.10 lakhs. In the last 9 months, the Ministry has ensured delivery of 36,433 ventilators to Government hospitals in States/UTs. **This is important because from independence of the country till pre-COVID times, all the public health facilities in the country had only about 16,000 ventilators but in less than 12 months 36,433 ‘Make in India’ ventilators have been supplied to all the public health facilities.** All export restrictions on ventilators have now been removed and “Make in India” ventilators are being exported. In the case of PPE kits, from a miniscule domestic production capacity in March, India has now become the world’s second largest manufacturer with a production capacity of more than 10 lakh PPE coveralls per day which are also exported to several countries.

DBT-BIRAC supported indigenously developed DNA Vaccine Candidate by Zydus Cadila, approved for Phase III clinical trials.

The Nation’s first indigenously developed DNA vaccine candidate against COVID-19, ZyCoV-D, by M/s Zydus Cadila has been approved by Drugs Controller General of India (DCGI), for conduct of the Phase III clinical trials. The candidate has been supported by the National Biopharma Mission (NBM) under the aegis of BIRAC and the Department of Biotechnology, Government of India. Zydus Cadila completed Phase-I/II clinical trials of this DNA Vaccine candidate, in India, in more than 1,000 participants and interim data indicated that the vaccine is safe and immunogenic when three doses were administered intradermally. Based on the recommendations of the Subject Expert Committee, which reviewed the interim data, the DCGI has accorded permission for conducting Phase-III clinical trial in 26,000 Indian participants.

INPUTS FROM PIB FIELD OFFICES
• **Kerala:** Kerala has requested the Centre to consider the state as priority during vaccine distribution. The state has cited four reasons to the Centre for its claim of priority access. By adopting “delay the peak” approach, the state had managed to keep the spread under check for the past eight months. However, a huge spike in cases has been witnessed since the past two months. According to the state government therefore the state should be given priority in vaccine distribution. High population of people with co-morbidities, high density of population which could result in the spread of Covid-19 at a faster rate, average population of elderly in the state, which is a priority group for vaccination, being higher than the national average are some of the other reasons cited by the government. Meanwhile, the state health department is to conduct a COVID-19 density study to understand the possibility of a fresh virus wave from a new coronavirus strain and also to put in place an appropriate preventive strategy. The current test positivity rate is 9.16%. Six UK returnees from Kerala, including a two-year-old child, have so far tested positive for the new strain of the virus. A total of 41 samples have been sent for NIV, Pune for further testing and results are awaited.

• **Tamil Nadu:** As on date, Tamil Nadu recorded 8,22,370 total cases, 12,177 deaths, 7808 Active cases and 8,02,385 discharges.

• **Karnataka:** Health minister Dr. K Sudhakar informed that in the first phase, 3,57,313 health workers will have vaccination and 28,427 vaccine centres will be opened. He also informed that State is ready for COVID vaccine and dry run has also been successfully conducted on last Saturday. Meanwhile High Court asked information from state government regarding not conducting test for 700 UK returned travellers.

• **Andhra Pradesh:** State Ministry of Health has issued orders reducing the prices of rapid antigen test kits administered in connection with Covid tests. The government has directed to charge only Rs 230 per kit including all charges. Meanwhile, State Health Commissioner Katamaneni Bhaskar said that there is no information from the Centre on when the vaccination for Covid-19 should start and how many doses would be made available to the state in the first phase. However, efforts were being made for cold-chain management, which was the most crucial part of storage and distribution. From a registration of 7,300 passengers in May 2020, Visakhapatnam airport steadily witnessed an apparent growth in the passengers' movement in subsequent months. In December, the airport saw 1.61 lakh passengers arriving and departing to various destinations. Compliance to safety precautions, contactless screening for ticketing, luggage-scanning and a hassle-free maintenance are some of the reasons for many travellers to prefer air travel from Visakhapatnam.

• **Telangana:** Telangana has seen the lowest daily positivity rate since Covid-19 outbreak. The positivity rate in the state dropped to 0.6 per cent on 5th Jan, a first since the onset of the coronavirus pandemic. In March 2020, when the first cases of the novel coronavirus were recorded in the state, the average positivity rate was 8.92 per cent, which peaked in June; a dry run of the vaccination programme was held at 1,000 vaccine session sites in the state on Dec 31 and Jan 1. Researchers at Hyderabad-based Centre for Cellular and Molecular Biology (CCMB) and Chandigarh-based Institute of Microbial Technology (IMT) have now isolated the novel coronavirus (SARS-CoV-2) from air samples collected from designated Covid-19 wards. Hyderabad and Dubai airports signed a MoU to ensure safe and efficient movement of the vaccine across the world. Total cases reported in Telangana: 2,88,410 Active cases: 4982, Deaths 1556 Discharges: 2,81,872 with a recovery rate of 97.73 per cent.

• **Maharashtra:** With the recovery of 18,50,189 COVID-19 patients after full recovery till Tuesday; the recovery rate in Maharashtra has gone up to 94.87%. 3,160 new cases and 64 deaths have been reported in the state on the same day. Case fatality rate is the state is 2.55%. Mumbai Circle reported 1085 new
cases and 22 deaths on Tuesday, while Pune Circle reported 635 new cases and 10 deaths on the same day. In this week, 8 persons had tested positive for the UK strain in the state, out of whom 5 are from Mumbai, while one each are from Pune, Thane and Mira Bhayander. The Chief Minister said on Monday that he will request the Centre for segregation of passengers coming from abroad via other states. Meanwhile, successful dry run of corona vaccination conducted in all four districts of the state - Pune, Jalna, Nandurbar and Nagpur on Saturday (January 2, 2020). Another dry run to be undertaken in all 36 districts on coming Friday (January 8, 2020).

- **Gujarat**: Gujarat has recorded 655 new cases and 4 deaths from COVID-19 during the last 24 hours. The recovery rate has further improved to 94.71 per cent. The total number of COVID-19 cases detected so far in Gujarat has reached up to 2,48,581. Out of these, 2,35,426 patients have recovered. 868 patients recovered during the last 24 hours. More than 99 lakh tests have been carried out in the state till date. Maximum 141 new cases reported from Ahmedabad, while Surat recorded 124 new cases. At present, total active cases in the state are 8,830. This apart, entire Health Department is gearing up for the massive COVID-vaccination drive across the state. Ahmedabad Civil Hospital will be the major vaccination administrative centre. Hundreds of doctors, nurses and frontline health workers are being deployed for the vaccination drive. Yesterday a dry run was experimented. CO-WIN software has to be utilised by the citizens for registration. In the mean-time, 6 Municipal corporations have started registrations. Meanwhile, the State Government has announced resumption of 10-12 std schools from 11th January, 2021.

- **Madhya Pradesh**: Madhya Pradesh continues to report more recoveries than positive cases, with a low positivity rate of 2.5%. Total number of Corona positive cases in the state have now reached 2,45,368 on Tuesday. With 14 patients succumbing to the infection, the death toll rose to 3662. There are 8,427 active cases while 2,33,229 is the number of total cured cases. There are only 14 districts out of 52 districts in state which recorded higher than 10 Corona positive cases in the state, which includes the four major cities of Indore, Bhopal, Gwalior and Jabalpur. Meanwhile, preparations for the first phase of COVID vaccination is underway. Health Department officials informed that free vaccine will be provided across the state to the most priority group which includes health care and frontline workers. 4 lakh Healthcare workers will be vaccinated in the first round of the first phase of Corona vaccination in Madhya Pradesh. They will be given shots at all the District Hospitals and Community Health Centres. There are 52 district hospitals, 84 Civil Hospitals and 334 CHC's. Primary Health Centres and numbering 1,100 have not been included as vaccination centres in the first round.

- **Chhattisgarh**: Altogether 1021 new Covid-19 positive cases were found in Chhattisgarh on Tuesday. Maximum 231 have been found in Raipur district alone. Tuesday's recoveries are 1492 and active cases are 9111. Total recoveries in the state is now 2 lakh 71 thousand 988. In Chhattisgarh, vaccine would be first given to 2.5 lakh Corona Worriers under first phase. Eleven hundred booths have been set up for giving vaccines. All preparations for vaccination are nearly complete. Mock drill would be carried out in 21 districts of Chhattisgarh for two days starting from January 7th 2021, to test preparations for corona Vaccination in these districts. Earlier dry run had been carried out in seven districts of the state. NHM Director Dr. Priyanka Shukla has directed CMHOs of all the districts to make necessary preparations. During mock drill Covid Appropriate Behaviour would be followed. Mock drill would be carried out on 7th January at Balrampur, Bijapur, Dantewada, Jaipur, Kanker, Kondagaon, Korea, NarayanpurSukma and Surajpur, while on 8th January, Balod, Balauda Bazar, Bemetera, Dhamtari, Gariaband, Janjgir-Champa, Kawardha, Korba, Mahasamund, Mungeli and Raigarh will be up for it.
• **Rajasthan:** On the 5th of January, recovered covid cases breached the 3 lakh mark in the state. In the first five days of the year, 4,139 persons recovered, while 2,432 were infected with the virus. In December, 40,180 persons tested positive and 58,889 recovered. The state government has decided to open all educational institutions, including schools, colleges and coaching centres, from January 18. As the pandemic situation in the state is under control, classes 9 to 12 in schools, final year classes in universities and colleges, coaching centres and government training institutes have been directed to open. They will have 50% attendance on the first day and the remaining 50% will attend classes on the second day. Also, the teachers will be given necessary training by the health department on precautionary measures to be taken.

• **Goa:** With 80 new cases and 1 death on Tuesday, the total number of COVID-19 cases in Goa has gone up to 51,415, while there have been 744 deaths in the state so far. Presently, there are 860 active cases and the recovery rate stands at 96.88%. In a major decision, the State government has capped uniform rates for various diagnostic tests for COVID-19 in State-run as well as private hospitals in Goa. In an order issued on Tuesday, the rate for fully automated RT-PCR has been capped at Rs 2,430 per test while for a semi-automated RT-PCR the rate applicable is Rs 1,400. For conventional RT-PCR, the person will have to shell out Rs 1,188 per test. The rapid antigen test will now be charged Rs 580. The State Health Services Directorate on Saturday successfully conducted the dry run for COVID vaccination at four locations in Goa including one private site. A total of 100 healthcare workers – 25 at each site – received dummy vaccine jabs on Saturday morning by trained vaccinator officers. As tourists and party revellers violated SOPs laid down to prevent the possible spread of COVID-19 infections, during the New Year, Health Minister Vishwajit Rane on Saturday warned of a possible spike in coronavirus cases in Goa this month.

• **Assam:** In Assam, total COVID-19 cases rise to 2,16,381, total discharged patients are 2,12,246, active cases 1728 and 1,057 total death.

• **Sikkim:** In Sikkim, in this week, total COVID-19 cases rise to 5938, total discharged patients 5221, active cases 493 and total death 129.

**FACT CHECK**
A notice allegedly issued by the SSC claims that due to the increasing load on SSC servers a new tier named ‘Tier-0’ has been introduced and candidates can only apply for jobs after qualifying it.

#PIBFactCheck: This notice is #Fake. No such notice has been issued by the SSC.

---

Fraudsters are calling and asking for COVID-19 vaccine registration. They ask for Aadhar, email id etc. Subsequently to authenticate Aadhar, they ask for OTP. The moment OTP is given, money is siphoned off from Aadhar linked account.

For those spreading rumours let it be known that EUA for COVAXIN is differently conditional – in clinical trial mode

EUA for COVAXIN is different from COVISHIELD because its use will be in clinical trial mode.
All COVAXIN recipients to be tracked, monitored as if they’re in trial.

The emergency use
authorization for COVAXIN
is different from that for
COVISHIELD because the
use of the former will be in
clinical trial mode.

All recipients would be tracked and monitored as if they are in trial.

A date sheet for Class 12th & 10th Exams 2020-21 allegedly issued by the #CBSE is in circulation on social media.

#PIBFactCheck: This date sheet is #Fake. Although, @DrRPNishank has announced that Class 10th & 12th Board Examinations will be held from 4th May to 10th June 2021.

This date sheet has NOT been released by CBSE
कुछ खबरों में दाबा किया जा रहा है कि टीटीई ने कंपनी टिकट होने के बावजूद बी मजदूरों की राजधानी एक्सप्रेस से अभंडन शादी कहकर की नीचे उतरा दिया।

#PIBFactCheck: ये दाबा लघुसंस्तुति रूप से गलत है। सीसीटीई फुटेज के अनुसार, पारिधियों के देरी से आने के कारण उनकी ट्रेन छूट गई थी।

Avoid the Three Cs
Be aware of different levels of risk in different settings.

There are certain places where COVID-19 spreads more easily:

1. **Crowded places**
   with many people nearby

2. **Close-contact settings**
   Especially where people have close-range conversations

3. **Confined and enclosed spaces**
   with poor ventilation

The risk is higher in places where these factors overlap.

Even as restrictions are lifted, consider where you are going and #StaySafe by avoiding the Three Cs.

**WHAT SHOULD YOU DO?**

- Avoid crowded places and limit time in enclosed spaces
- Maintain at least 1m distance from others
- When possible, open windows and doors for ventilation
- Keep hands clean and cover coughs and sneezes
- Wear a mask if requested or if physical distancing is not possible

If you are unwell, stay home unless to seek urgent medical care.
PIB’S DAILY BULLETIN ON COVID-19 has not yet been uploaded at the Press Information Bureau's website from January 1 to 5, 2021.
