

# Export of Vaccine to other Nations

Posted On: 23 MAR 2021 4:30PM by PIB Delhi

A sub-Group of the National Expert Group on Vaccine Administration for COVID-19 was constituted to consider all matters related to vaccine export of COVID-19 vaccines and take necessary decisions with due regard to domestic production and ensuring adequate availability for the national vaccine programme for COVID-19. This Sub-Group closely monitors the supplies.

External supplies of Made-in-India COVID19 vaccines started w.e.f. 20.01.2021. Supplies have been undertaken in the form of “Grants-in-aid”, commercial sales by the manufacturers and through GAVI’s COVAX facility. GAVI’s COVAX facility has more than 190 members including India. Country-wise details for supply of vaccines till 17 March 2021 are enclosed. More than 7.47 crore vaccine doses have been supplied to States/UTs within the country so far.

Once an epidemic takes form of a pandemic, its management has to be done keeping the entire globe as unit and in most circumstances, it is not possible to take either States-specific or country-specific approach. Hence, export of COVID-19 vaccine which facilitates global action to vaccination is important to simultaneously protect the high-risk population in all the countries of the world, thereby breaking the chain of transmission and minimizing chances of import of COVID-19 cases from foreign countries as well as neighbouring countries to India.

Low/middle income Countries as well as nations with limited access to pharmaceutical technologies are at debilitating disadvantages in dealing with the pandemic. To this end, Govt. of India has allowed only limited export of vaccines while according highest priority to domestic needs.

Supplies till 17 March 2021 (In lakhs)					
Sl. No.	Country	Grant	Commercial	COVAX	Total Supplies
		Quantity	Quantity	Quantity	
1	Bangladesh	20	70		90
2	Myanmar	17	20		37
