The Union Health Secretary and Union Secretary (Pharmaceuticals) held a Video Conference meeting with States and UTs today on various issues connected with medicines used for treatment of COVID19 patients in hospital setting.

The Secretary Pharmaceuticals made a presentation giving present status of Remdesivir. She informed that the drug has been approved as investigational therapy in patients who are on oxygen with moderate/ severe Covid 19 disease. Due to recent surge in Covid 19 cases, the demand for the drug also grown rapidly with reported shortages. Considering the same, DoP, NPPA along with CDSCO have undertaken an exercise to work out Remdesivir injection allocation to States based on an objective criteria.

Since the clinical guidance provides that remdesivir should be used in cases where oxygen is also required, the allocation is based on the oxygen allocation carried out by the Empowered Group-2 to various states. This schedule for allocation for the period of 10 days starting from 21st April 2021 has been worked out. The position will be reviewed after a few days. For the states, for which oxygen allocation was not made, Remdesivir allocation will also be made shortly. All states were requested to ensure judicious use of Remdesivir as per Clinical Management Protocol for COVID 19, conduct campaign to address any possible black marketing or hoarding of drugs used in Covid treatment and also facilitate the smooth and unimpeded movement of drugs including inter-state supplies.
