India has scaled another peak in its effort to contain the COVID-19 virus with the administration of more than **16 Cr** vaccine doses to its citizens. The cumulative number of COVID19 vaccine doses administered in the country stands at **16,04,18,105** as per the provisional report 08:00 pm today.

India also administered more than **13 Cr (13,00,03,225)** doses as the first dose and more than **3 Cr (3,04,14,880)** vaccine doses have been administered as the second dose.

2,29,999 beneficiaries of the age group 18-44 years received their first dose of COVID vaccine today. The cumulative vaccination coverage for this age group is **6,62,619** across 12 States/UT. Table below shows the cumulative vaccine doses administered to 18-44 years age group till now.

9,856	16,798	39,154	40,318	2,29,99 9	2,43,13 7	1,95,54 5	93,074	2,81,12 8	6,15,22 0	5,33,78 9
-------	--------	--------	--------	--------------	--------------	--------------	--------	--------------	--------------	--------------

The vaccination exercise as a tool to protect the most vulnerable population groups in the country from COVID-19 continues to be regularly reviewed and monitored at the highest level.
