### **Prime Minister's comments at the Global COVID-19 Summit: Ending the Pandemic and Building Back Better Health Security to Prepare for the Next**

Prime Minister's comments at the Global COVID-19 Summit:

Excellencies,

The COVID-19 pandemic has been an unprecedented disruption. And, it is not yet over. Much of the world is still to be vaccinated. That is why this initiative by President Biden is timely and welcome.

Excellencies,

India has always seen humanity as one family. India's pharmaceutical industry has produced cost-effective diagnostic kits, drugs, medical devices, and PPE kits. These are providing affordable options to many developing countries. And, we have shared medicines and medical supplies with over 150 countries. Two indigenously developed vaccines have received "Emergency Use Authorization" in India, including the world's first DNA-based vaccine.

Several Indian companies are also involved in licensed production of various vaccines.

Earlier this year, we shared our vaccine production with 95 other countries, and with UN peace-keepers. And, like a family, the world also stood with India when we were going through a second wave.

For the solidarity and support extended to India, I thank you all.

**“If the Frontline workers are equipped with proper knowledge and training, they can become a valuable resource in this fight against post-COVID challenges”: Dr Bharati Pravin Pawar**

Union Minister for Health and Family Welfare Shri Mansukh Mandaviya released Post COVID Sequelae Modules in the presence of Dr. Bharati Pravin Pawar, Minister of State for Health and Family Welfare. These modules will help in building the capacity of the doctors, nurses, paramedics and community health workers across India to deal with long term effects of COVID.

Expressing his happiness on the release of guidelines, the Union Health Minister said that these have been prepared to provide guidance to doctors and health care workers to deal with the issue of long term effects of COVID. He said that proactive and comprehensive treatment of COVID is required to ensure minimum side effects and no negative effect of the treatment.

The Prime Minister, Shri Narendra Modi interacted with healthcare workers and beneficiaries of the COVID vaccination programme in Goa through a video conference on the completion of 100% first dose coverage for the adult population in Goa.

#### Interaction with healthcare workers and beneficiaries

During the interaction, the Prime Minister enquired from Dr Nitin Dhupdale, Lecturer in Goa Medical College, how he convinced people to take COVID vaccines. He also discussed the difference between the COVID vaccination campaign and the earlier campaign. Dr Dhupdale praised the mission campaign mode of this particular campaign. Criticizing the opposition party, PM wondered how after vaccinating 2.5 crore people there were reactions from the opposition party instead of the vaccinated people. The Prime Minister lauded doctors and other Corona warriors for the completion of 100% first dose coverage for the adult population in Goa. He said that this is an inspiration for the entire world.

Cabinet Secretary Shri Rajiv Gauba chaired a high-level meeting to review and discuss the COVID management and response strategy through video conference today, in the presence of Shri Rajesh Bhushan, Union Health Secretary and Dr. V. K. Paul, Member (Health), NITI Aayog. It was attended by the Chief Secretaries, Additional Chief Secretaries (Health), Principal Secretaries (Health), Municipal Commissioners, District Collectors and other senior officials of States and UTs.

Congratulating the States/UTs for the landmark achievement of more than 2.5 Cr vaccine doses administered yesterday, Cabinet Secretary complimented healthcare workers, Chief Medical Officers, District Magistrates and State Health Secretaries for their efforts. He hoped that with increased availability of vaccine doses, the pace of vaccination will be maintained.

He however took the occasion to remind the States that there is no room for complacency. He stressed on the need to strictly enforce COVID Appropriate Behaviour (CAB).

**PM chairs a high level meeting to review the Covid-19 related situation and vaccination**

**PM briefed about the augmentation of healthcare infrastructure**

**States asked to maintain buffer stock of medicines in every district**

**PM reviewed production, supply and pipeline of vaccines for next few months**

**PM spoke about the need for constant genome sequencing to monitor emergence of mutants**

PM Narendra Modi chaired a high level meeting to review the Covid-19 related situation yesterday. The topics covered included a review of the prevailing Covid-19 scenario, preparedness of the health systems to respond, availability of medical oxygen and matters relating to production, supply and distribution of Covid-19 vaccine.

It was discussed that across the world, there are countries where the number of active Covid cases continues to remain high. In India too, the figures from states like Maharashtra & Kerala, indicate that there ~~f~~ can be no room for ~~co~~placency. However, ~~the~~ weekly positivity was ~~at~~ less than 3% for ~~in~~ the 10th

consecutive week.

PM was briefed about the concentration of cases in a few geographies, districts with high test positivity as well as the week on week test positivity rate in the country.

PM spoke about the need for constant genome sequencing to monitor emergence of mutants. The officers informed him that INSACOG now consists of 28 labs distributed across the country. The lab network is also linked with a hospital network for clinical correlation. Sewage sampling is also being done for genomic surveillance. PM was apprised that states have been requested to share SARS COV2 positive samples with INSACOG regularly.

### **Update on CoWIN**

**CoWIN launches new API: KYC-VS: Know Your Customer's/Client's Vaccination Status**

**KYC-VS will enable entities to check an individual's status of vaccination through CoWIN**

**KYC-VS is consent-based, privacy preserving and can be seamlessly integrated with any system**

As the socio-economic activities are being gradually revived while maintaining everyone's safety, there is a need for a way to digitally convey the status of individuals' vaccination to entities with whom they may be engaging with for any or all reasons, as employees, passengers, residents etc.

Therefore, there is a need to enable an Aadhaar like authentication service for the status of vaccination through Co-WIN. To take care of these cases and others that may come up, Co-WIN has developed a new API called 'Know Your Customer's/Client's Vaccination Status' or KYC-VS. To use this API, an individual needs to enter his/her mobile number and name. Thereafter, they will get an OTP which they have to enter. In return, Co-WIN will send a response to the verifying entity on the individual's status of vaccination, which will be as follows –

0 - Person is not vaccinated

1 - Person is partially vaccinated

2 - Person is fully vaccinated

This response will be digitally signed and can be shared instantly with the verifying entity. A real-life example could be when at the time of booking a railway ticket, an individual will input the necessary details for buying the ticket and if required, the concerned entity will also get the vaccination status in the same transaction, with the due consent of the individual.

### **COVID Appropriate Behaviours very important, considering festive season, cautions COVID Working Group Chairman**

Almost 30,000 - 45000 daily cases on an average are being reported in our country for last several weeks. This is reported mostly from specific geographic regions, especially Kerala, many North Eastern States and a few districts of Maharashtra and some other southern states. If we follow the genomic analysis of SARS-COV-2 viruses circulating during June, July and August, no new variants have emerged and on the basis of sero-survey conducted during July, the on-going COVID cases represent the susceptible individuals who are not yet immunized; they are affected as part of the last phase of second wave.

In the sero-survey of July, 66% to 70% people were found to be infected; this also means 30% people are still prone to infection; and that they can be infected any time particularly if they are still unvaccinated. Hence any complacency on the part of any of us throughout the country will cost hugely since the 30% people can be infected and many of them can develop severe disease and rarely fatal, like we witnessed during April and May 2021.

Hence, following COVID Appropriate Behaviours is absolutely essential and critical, especially with the coming festive season. Emergence of new mutation around this time can also be a reason for the arrival of a third wave.

## **Make Himachal soil free of chemicals, calls upon farmers and gardeners of Himachal to take Himachal back to organic farming during the ‘Amrit Kaal’**

Addressing the gathering, the Prime Minister said Himachal Pradesh has emerged as a champion in the fight against the largest epidemic in 100 years. He added that Himachal has become the first state in India to have administered at least one dose of corona vaccine to its entire eligible population. This success has underlined the importance of Aatmvishwas and Aatmnirbharta, said the Prime Minister.

He said that the success of vaccination in India is the result of the spirit and hard work of its citizens. India is vaccinating at the record speed of 1.25 crore vaccines per day. This means that the number of vaccinations in India in one day is more than the population of many countries. The Prime Minister praised doctors, ASHA workers, Aanganwadi workers, medical personnel, teachers, and women for their contribution to the vaccination campaign. The Prime Minister recalled that he talked of ‘SabkaPrayas’ on the occasion of Independence Day, he said that this success is a manifestation of that. He also touched upon the fact of Himachal Being the land of deities and praised the dialogue and collaboration model in this regard.

### **COVID19 - Myths Vs. Facts**

**Sample sequencing by INSACOG has progressively increased**

**Initial part sequencing aimed at detecting Variants of Concern (VOC) among incoming international travellers**

**States have been repeatedly advised to send adequate number of samples for sequencing**

It is clarified that the number of sequences, as quoted in the report, seems to be taken from Indian COVID19 Genome Surveillance portal (<http://clingen.igib.res.in/covid19genomes/> ). The sequences analysed in the IGIB SFTP are as per the collection date of samples and does not depict the number of samples sequenced in a particular month. The samples sequenced by labs of INSACOG consortium also depends on the samples sent by the respective States.

The number of samples sequenced month wise is as follows:

Month	Samples received with Pango lineage assigned
Jan-21	2207
Feb-21	1321
Mar-21	7806
Apr-21	5713
May-21	10488
Jun-21	12257
Jul-21	6990
Aug-21	6458

Further, the Initial part sequencing of samples by INSACOG labs was aimed at detecting the Variants of Concern (VOC) among incoming international travellers and also to see whether any person with VOC has entered the country in past one month (double the incubation period of 28 days) from the date of establishment of INSACOG (26th Of December, 2020). For the detection of presence of VOC inside country, 5% of the positives (by RT-PCR) were targeted for sequencing. Both the objectives were achieved by end of January, 2021.
